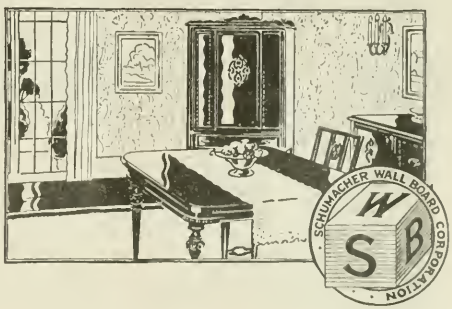
Twenty-sixth Year No. 27

A smooth one-piece wall

THERE are a multitude of plaster boards designed to build walls quickly. But those that build a really fine interior are mighty scarce.

Look at this interior built with Schumacher Plaster Wall Board. No battens here to hide the joints. The joints disappeared when the wall was finished. They don't need hiding. There are no warped surfaces. Plaster Wall Board makes a straight rigid wall and it stays that way.

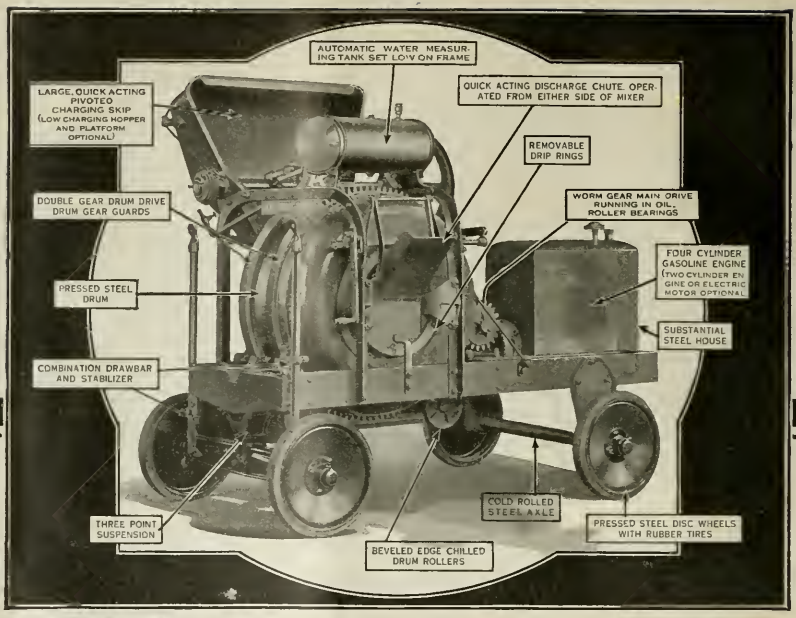
When you use Schumacher Plaster Wall Board, count on more than speed in construction. Plan for a fine, permanent interior.



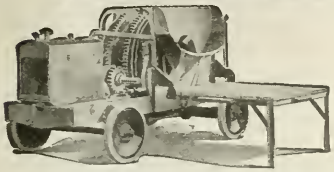
SCHUMACHER WALL BOARD CORP.
Los Angeles Seattle San Francisco

Warehouses—Tacoma - Portland - Stockton
San Rafael - Oakland - San Francisco
San Jose - San Diego

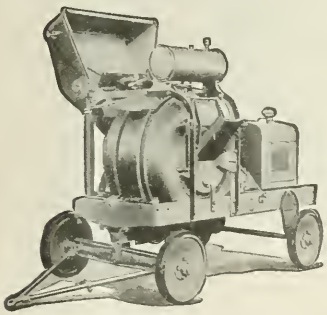
Schumacher Plaster Wall Board



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
QUICK ACTING DISCHARGE CHUTE, OPERATED FROM EITHER SIDE OF MIXER
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

TO RAISE MINIMUM REQUIREMENTS FOR STRENGTH OF CEMENT

The Cement Committee of the American Society for Testing Materials voted at its last meeting, which was held in New York on May 7, to raise the minimum requirements for the tensile strength of cement at 7 days from 200 to 225 pounds per square inch and at 28 days from 300 to 325 pounds per square inch. This action was taken on recommendation of the Sub-committee on Strength, of which P. H. Bates, of the Bureau of Standards, is chairman. The subcommittee's action was influenced largely by the results of a very comprehensive survey of tests of cement made during the 1925 season. In this survey the results of over 1,000,000 briquette tests, made by 155 laboratories and representing practically every American brand, were studied and classified for the purpose of determining what percentage of the cement passing the present requirements would have been rejected if the requirements were raised to 225 and 325 pounds at 7 and 28 days, respectively. It was found as a result of the survey that approximately 5 per cent of the total number of test results fell below the 225 and 325 pound limits.

The action of the committeee was taken pending formal letter ballot on the recommendation. In the event that the letter ballot is affirmative, the society will probably be asked to approve the recommendation of the Committee on Cement for inclusion in the standards next year.

Strike! Strike! Strike!—Who Is Out?

(Special Correspondence from National Association of Building Trades Employers)

On June 5, 1926, there were 56 strikes before the Department for settlement and in addition 15 controversies which had not reached the strike stage. Total number of cases pending 71, 16 of which are new. The 16 new cases may be compared with 12 and 20 of the first and second weeks preceding.

San Francisco Strike

The carpenters are still on strike in San Francisco. The Industrial Association reports that many of the jobs are being manned by non-union carpenters. The controversy is not over wage rates and the strike was called by the journeymen against the open shop.

Employers make the claim that it is impossible to secure the cooperation of the city officials consequently no police protection is being given to jobs on which non-union carpenters are working. Frequent clashes between pickets and the open shop workers have been reported.

Cleveland Painters Strike

Painters in Cleveland still continue to remain out on strike, having been called off on March 1st following refusal of contractors to grant an increase of 12½ cents an hour over the old rate of $1.25 and the five day week. At a recent meeting of the painters joint arbitration committee the journeymen members intimated that they would take back to their organization a compromise offer of $1.31¼ per hour and a recommendation that the demand for the five day week be waived if the employers would make such an offer. This was turned down by the contractors who reiterated their offer of a renewal of the old agreement with no wage increase and no shortening of the working week.

Strike In Boston

Cement finishers still continue on strike in Boston to force an increase in wages of 12½ cents an hour over the increase of 15 cents an hour already granted them by the Building Trades Employers Association. In April this craft, being without an agreement, asked for an increase to $1.25 per hour which is practically the basic wage for most of the skilled trades in Boston. The increase was granted and immediately the cement finishers presented the Building Trades Employers Association with a demand for an additional increase of 12½ cents an hour effective September 1st, 1926. The employers refused to accede to this demand consequently the men went out on strike. They are, however, working for contractors not affiliated with the employers organization at the rate of $1.25 an hour.

Strike in Florida

Union sheet metal workers in Tampa, Plant City, Clearwater, St. Petersburg and Bradentown have been on strike since April 1st demanding $1.50 per hour. Several sections in the agreement which the unions desired to have signed, but which were not favorably regarded by the employers, have deadlocked the strike.

Threaten Strike

Demands presented by the St. Louis electricians to the effect that all installations of telephone machinery, centrals, etc., in the new Southwest Bell Telephone building be done by members of their own local union, threaten to tie up all work on that building and may eventually tie up building operations for the Bell Company throughout the country. Trouble arose when the union learned that the work of installing machinery had been let to the Western Electric Company which operates on a non-union basis.

STATE ENGINEER EXAMINATIONS ARE ANNOUNCED

California state civil service commission announces examination for following positions in highway construction, inspection and location, applications to be filed not later than August 14, 1926: Junior engineering aide, grade 1, salary $105 to $130 a month; civil engineering aide, grade 2, $135 to $165; junior civil engineer (general), grade 3, $170 to $230; junior civil engineer (asphalt macadam and asphalt concrete), grade 3, same salary; assistant civil engineer (general), grade 4, $235 to $280; assistant civil engineer (asphalt concrete), grade 4; assistant civil engineer (locating), grade 4, same salary. Applications will close July 31 for position of superintendent of maintenance and repair, mechanical and highway equipment, salary $255 to $285 a month. Examinations will also be held for following positions in drafting, highway design and cartography, applications to close July 17: Junior draftsman, grade 1, $115 to $130; assistant civil engineering draftsman, grade 2, $135 to $165; civil engineering draftsman, grade 3, $170 to $230; delineator, grade 3, $170 to $230; senior delineator, grade 4, $235 to $280.

CHICAGO PLASTERERS GRANTED WAGE INCREASE

An agreement has been reached between the employing plasterers of Chicago and the plasterers' union after a strike lasting one month, wherein the plasterers are to receive an increase of $1 a day making the scale $13 a day. Other trades now receiving $1.37½ per hour have presented demands for an increase of 12½ cents per hour, among them are the carpenters, steamfitters, iron workers and marble setters. The iron workers are now out on strike to enforce their demands. The sympathetic strike clause still appears to be the stumbling block in the negotiations, although the bricklayers recently renewed their old agreement at $1.50 per hour which does not contain this clause. An attempt is still being made to have the trades affiliated with the Building Trades Council which have not as yet signed new agreements to include the sympathetic strike clause in their contracts.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Richmond, Contra Costa County plans adoption of ordinance requiring master plumbers operating in that city to pay a yearly tax of $100.

Canadian production of asbestos during 1925 set a new record. Total shipments for the year were 290,389 tons, valued at nearly $9,000,000. The shipment of 1924 reached a value of about $7,000,000.

The will of the late John R. Booth, Canada's foremost lumber man, filed at Ottowa, June 28, disposed of an estate estimated at $8,000,000. The entire estate is left to his three surviving children, all of whom reside in Ottawa.

The Chamber of Commerce of Newark, N. J., is conducting an educational campaign for the adoption by this city of the Council-Manager plan of municipal government. The city has been under the commission form of government for some years.

When an earthquake comes the safest place to be is in a huge, well constructed skyscraper, Professor Bailey Willis of Leland Stanford University, recognized throughout the nation as one of America's leading seismologists, told the annual convention of the National Association of Building Owners and Managers, meeting at Del Monte.

The Missouri State Highway Department, with the aid of college of agriculture experts, is adding to the roadside beauty by planting the dirt shoulders along the concrete roads, and the long fills on other types of improved state highways, with blue grass. More than 250 miles along the state highways have been seeded.

A new kind of traffic test is to be made in Paris. A street will be set aside as a traffic laboratory, in which will be conducted all sorts of tests for motor traffic to determine the cause of accidents. Various surface materials and safety devices will also be observed, as well as mistakes in driving and the most efficient control of traffic.

An entirely new set of regulations for the paving of streets by private contract are provided in an ordinance passed to print by the San Francisco Board of Supervisors. The chief change from existing regulations is a requirement that, before the board of works contracts with any paving concern, it must present a petition signed by 60 per cent of the property owners on the street to be paved asking that it do the work.

Stiff Eastern objection to the California application for an increase in the tariff duty on magnesite was brought out at the hearings before the tariff commission in Washington. Several New York and Philadelphia manufacturers of stucco, into which magnesite largely enters, contended that a 50 per cent increase would result in the domination of the domestic magnesite industry in the hands of a few producers in California. The hearings have been closed. Both sides have filed voluminous briefs.

The International Association of Master House Painters and Decorators of the United States and Canada reports that comparatively few boys and young men are showing any interest in learning the painters' trade, despite the fact that schools have been established in most of the principal cities of the United States for both part and full time study.

San Francisco Board of Supervisors has granted a franchise to the Golden Gate Ferry Company to operate an auto ferry between San Francisco and Alameda. The company contemplates an investment of $1,200,000 in the construction of three new boats and the erection of a wharf at Alameda costing $400,000. Operation of the ferry, however, depends upon the granting of an application by the State Railroad Commission on August 16.

Productive capacity in the Portland cement industry is increasing faster than the demand for that product, says the New York Trust Company. By the end of 1926 the plants of the country will have a producing capacity estimated at 200,000,000 barrels annually. Known plans for new buildings, railroad construction, public service work and highways indicate a probable annual demand of 160,000,000 barrels. With a potential excess of 40,000,000 barrels above an adequate supply, the industry faces the necessity of guarding against overproduction of the staple building material.

In a survey of business conditions in the Twelfth Federal Reserve District, the Federal Reserve report issued today says: "Building statistics for May confirm the evidence offered by April figures of a slight diminution in building activity. Value of building permts issued in twenty principal cities declned 17.8 per cent during May, 1926, as compared with April, 1926, a greater than seasonal decrease and was 25.8 per cent less than in May 1925. The present volume of business in the lumber industry is well above that of last year but prices and profits are reported to be unsatisfactory to lumber producers.

During the year from May 15, 1924, to May 15, 1925, the average hourly rate for building mechanics increased 3.9 per cent according to the Bureau of Labor Statistics. The average hourly rate of both the skilled and common laborers one year ago was $1.199. The average rates per hour on May 15, 1925 for the major trades were as follows: plasterers, $1.485; bricklayers, $1.475; slate and tile roofers, $1.419; stone masons, $1.401; lathers, $1.398; tile layers, $1.325; elevator constructors, $1.312; plumbers, $1.281; inside wiremen, $1.272; steam fitters, $1.271; structural iron workers, $1.271; marble setters $1.268; hoisting enpineers $1.265 cement finishers, $1.238; painters $1.232 ornamental iron workers $1.23; glaziers $1.222; mosaic and terrazzo workers $1.215; sheet metal workers $1.209; carpenters, $1.184; asbestos workers, $1.165; composition roofers, $1.165; plasterers laborers, $1.00; plumbers laborers $.954; building laborers, $.773.

TRADE NOTES

L. B. Menefee Lumber Company's mill at Rainier, Ore., on June 24, suffered a $250,000 fire loss.

Niels Simonsen and Floyd Ingram will operate in San Francisco under the firm name of Simonsen Iron Works.

Richmond Pressed Brick Works, the Port Coast Brick Works and United Materials Company are establishing yards and warehouse quarters at Twenty-fourth and Wood streets, Oakland, to serve as a main distributing plant.

As a preliminary to the quarterly meeting of the directors of the National Lumber Manufacturers Association at the Winthrop Hotel, Tacoma, Washington, August 5, there will be a meeting of the directors with the directors of the Western Pine Association at Spokane, August 3, to consider national lumber trade extension. Some of the National's directors will go from Tacoma to California and attend a trade extension conference with the lumbermen of California, to be held in San Francisco, August 10.

A bulletin of the Common Brick Manufacturers' Association illustrates the size and importance to the country of the common brick industry by theoretically assembling all the brick manufacturing plants into one community. The yards proper would cover an area of 50,963 acres, or 79.6 square miles, more than the entire District of Columbia. Assuming an average land value of $1000 per acre, this huge plant would represent a capital investment of $120,000,000, employing almost 37,000 workers.

With several large deals in the offing and with construction to begin within thirty days on a hotel at Redding which will cost $250,000, the Charles S. Mabrey Company of Sacramento, general contractors, increased the capital stock of the concern from $100,000 to $1,000,000. No stock has been placed on the market, but is held within the company. The reason for the increase, as given by company officials hinged upon the fact that the company has, for some time, been transacting $1,000,000 worth of business a year and found it necessary to increase its size to keep pace with the rapid progress of the firm. The company is contemplating building at Sacramento, possibly soon, but plans have not been completed and until they are no announcement will be made.

A jump of 1.4 per cent in the number of wage earners employed in California in May, 1926, and an increase of 2.2 per cent in weekly payrolls is shown in a report by Walter G. Mathewson, State labor commissioner. The report is based on reports from 738 representative industries in the State. The largest increase in employment was in sawmills and logging camps, manufacture of women's clothing, glass, stone and mineral products, agricultural implements, tin cans, and in the packing and canning of fish. The average weekly earnings of wage earners in all industries was $28.80 in May and $28.57 in April.

ALONG THE LINE

Adolph Teichert, Sacramento paving contractor, has been elected president of the Exchange Club of that city.

Wm. Charles Curl, retired contractor of San Francisco, died in that city, June 25, at the age of 71 years.

C. C. Emslie, a member of the Berkeley City Planning Commission, has resigned due to the pressure of private business.

R. M. Morton, state highway engineer, announces the promotion of R. P. Duffy from Maintenance Superintendent in Division 4 to post of Maintenance Engineer for the same division with headquarters in San Francisco. Engineer Duffy has had charge of maintenance work on Marin and Sonoma counties.

W. J. Jamieson has been appointed city engineer of Phoenix, Ariz. Henry Rieger, city manager, who has for several months combined the duties of city manager and city engineer, will devote his time to the office of city manager.

Wm. Hammond Hall, former Stocktonian, has presented the Stockton Free Public Library with a valuable contribution in the form of a set of the transactions and proceedings of the American Society of Civil Engineers, dating from 1884 to the present year. There are 81 volumnes, six by nine inches, covering 10 feet of shelf.

According to a press report no Sunday work is to be permitted in the construction of new highways in Salem County, New Jersey, even under the pretext of "emergency work" by contractors. A unique provision has been made in the first road contract for the current year, which will be in force on the Salem-Hancock's Bridge road.

For the first time in the history of Stanford University, a civil engineer was awarded the degree of doctor of philosophy, the highest degree that can be earned, when commencement exercises were held at Stanford University on June 31. This honor went to Nathan A. Bowers of San Francisco as the highest award which the university makes for original research and is available only to these who fulfill exacting requirements as post-graduate students. Bower's degree covers three years of post-graduate work culminating in a thesis of novel character describing engineering failures and offering constructive suggestions for greater security in engineering structures. In visiting engineering works in his capacity of associate editor of Engineering News-Record of New York, Bowers has had unusual opportunity, extending over a period of sixteen years, to collect information on engineering failures.

$1,800,000 School Program Tied Up At Fresno By Labor Troubles

Because of the unsettled conditions in the building crafts at Fresno, due to the lapse of the Fresno plan agreement between the Fresno Building Trades Council and the Fresno Builders' Exchange, caused by a difference over wage scales, the Fresno Board of Education has adopted a report of the buildings, grounds and insurance committee that the proposed $1,800,000 building program for schools be indefinitely postponed.

Through the acceptance of the report it has been decided that all proposed construction and construction now under way will be deferred until some later date, when labor conditions will have become more settled.

It is shown in the report that at present there is an unrest among labor circles in the city. One local, that of the bricklayers, has already left work, in an effort to enforce an increase of $1 per day in the wage scale, while the other building crafts are demanding increases.

At the time of the proposal of the building program conditions in the building crafts were apparently settled and had been for some time. A bond issue was voted, amounting to $1,800,000, calling for, among other construction, the building of the proposed Roosevelt high school. As is expressed in the report the comunity now faces a situation which would make such a program very difficult.

It is estimated by the members of the committee the increases demanded by the building trades would cause the cost of construction to be increased at least $100,000. For that reason, either a part of the program would have to be curtailed, or cheaper construction would have to be resorted to, since a program has been arranged calling for the expenditure of the total bond issue.

Another phase, which the committee declares influenced them in deciding to postpone the building program, was the expressed inability of the contractors of the city to bid, with any degree of accuracy, on the proposed construction. This inability is based upon the unstable condition of the labor market.

The refusal of the Building Trades council to release for publication any expression of their policy also influenced the committee in making the report and the board in accepting it. From the start, shortly before June 16, when the Fresno plan agreement lapsed, the council has refused to give out any statement on their stand, with the exception of that they are "sitting pretty."

Working rules have gone by the board, the committee felt, and no new rules, if any are in existence, have been announced to take the place of the old.

The bond proposition was based upon the condition of the Fresno plan agreement. Since it has gone out of existence and nothing has taken its place the board felt that it would be unwise to start the expenditure of money until some time in the future, when conditions are more settled.

A claim that the executive committee of the Building Trades council is apparently attempting to keep the general public in the dark on their policy and because the flexibility of conditions, liable to weekly change, also influenced the body in making the decision.

William John Cooper, superintendent of schools, reported on June 18 that he would recommend the action taken, should the Fresno plan agreement be allowed to lapse. The action of the board was, it is believed, taken upon his recommendation.

EDITOR'S NOTE—Authorizing a complete investigation of the wage demands presented to the Fresno Builders' Exchange by the Fresno Building Trades Council, the executive committee of the San Joaquin Valley Industrial Association, announces that "it also feels it may become necessary to take steps toward the establishment of the American Plan in Fresno in order that construction work may progress without the uncertainty of wage scales and working rules." The executive committee received and adopted a report of J. G. Martin, president of the Builders' Exchange, concerning the building industry from the viewpoint of the failure of the joint conference board to renew the yearly agreement.

Court Enjoins Jurisdictional Strikes

On June 7th, Judge Powell, Chief Justice of the Common Pleas Court in Cleveland, granted the Building Trades Employers' Association a temporary injunction restraining the various unions connected with the building industry from striking. The restraining order is sweeping in its scope and covers the Building Trades Council, the Cleveland Council, Building Trades Department of the American Federation of Labor, Sheet Metal Workers Local Union No 65, the Carpenters' District Council and the other building trades unions from any stoppage of work due to a jurisdictional dispute over the installation of metal floor domes in concrete floor construction. The installation of these floor domes has in the past been done by members of the Sheet Metal Workers Union and the Carpenters Union. At this time each of the above named organizations is claiming the right to perform this work to the exclusion of the rights of the other.

Following the issuance of the court order, W. P. Carroll, Executive Manager of the Building Trades Employers Association issued the following statement: "Both the sheet metal workers and the carpenters are claiming the right to install metal floor domes to the exclusion of the right of the other. The contractors' chief interest is in seeing that the work is allowed to proceed without interference or delay, the question of jurisdictional claim over the work being of secondary importance.

"The contractors have no interest in the controversy as to which should perform the work. The failure of the two disputants to determine which shall have jurisdiction over the work has made it necessary for the contractors to ask relief through the courts pending such steps as the carpenters and sheet metal workers may take in settling their claims."

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

S. F. HOME BUILDERS ELECT

Officers of the San Francisco Home Builders' Association elected at the annual meeting are: Ward Cox, president; J. V. Campbell, first vice president; R. H. Stevenson, second vice president; James Arnott, third vice president; Grace Perego, secretary. Directors, A. J. Falvey, Henry Mangels, J. Prout, C. S. Allred, L. V. Riddle and Theodore Meyers. A resolution of thanks was adopted for the work of the retiring president, A. J. Falvey. The new president reaffirmed the Home Builders' stand in support of the American plan.

CLEVELAND BOARD OF EDUCATION OPERATES TRADE SCHOOL

A trade school, said to be the first of its kind operated by a board of education, will be opened in Cleveland, Ohio, next fall to function in conjunction with labor unions and employers, and with the co-operation of the Cleveland Board of Education.

The new trade school, the result of a conference between school authorities, the local chamber of commerce, employers and union leaders, was announced by Howard L. Brigge, director of vocational training of the board of education.

Courses in the buildig trades, auto mechanics and machinists' trades have already been outlined in the curriculum. Pupils will spend four hours a week in school, for which time they will be paid by their employers at the regular rate of pay, the remainder of the time to be put in "on the job."

Labor unions have agreed to accept diplomas of the school, and will receive graduates into full standing in the respective unions.

CARPENTERS TO HAVE FIVE-DAY WEEK IN SAN MATEO

A five-day working week for carpenters will go into effect immediately as the result of a conference held by J. F. Cambiano, business agent of the Building Trades Council, and members of the General Contractors Association.

The five-day week is designed to provide work for more men and in no way adds to construction costs, according to Cambiano, who also points out that the employment of more men will result in more stable conditions in the community.

"With the carpenters now operating under a five-day working week, practically every building craft is now on this schedule," said Cambiano, "and we expect that very shortly a similar arrangement will be brought about for plumbers and electricians. There is naturally a percentage of our total working membership on the idle list and the new arrangement is designed to do away with this situation.

"We have had no trouble at all in arriving at an agreement with the employing contractors, for they realize that it does not effect building costs in any way and adds to the contentment of their workers."

COMMITTEES NAMED

President E. H. Higgins of the Richmond (Contra Costa County) Builders' Exchange has named the following committees to serve during the coming year: J. E. Eakle, F. A. Mero, B. J. Ballantyne, auditing; J. L. Eakle, E. A. Marshall, P. M. Sanford, finance; B. J. Ballantyne, R. H. Spiersch, Frank Smith, membership; Charles Brown, R. P. Dunn, investigating; J. I. Collins, Carl Overaa, W. D. Rihn, building; W. Snelgrove, Price Roberts, A. H. Winchcole, industries; F. A. Mero, George Edwards, R. H. Spiersch, Robert Dornan, Charles H. Brown, Fred Spiersch, house; R. P. Dunn, Frank Ausea, Herbert D. Baker, street, and A. H. Winchcole, R. W. Timmons, Frank Irving, exhibits.

STOCKTON BUILDERS BANQUET

Approximately seventy members of the Builders' Exchange of Stockton and guests met June 24 for a get-together and good fellowship banquet. Orchestral numbers by the Four Horsemen and solos by a number of artists, comprised the entertainment. An excellent dinner, family style, was served.

Brief remarks were made by the banqueteers, including Dave Valo, Ed. Cooney, Glenn Allen, Frank Mayo and James Burke and Alex Emerson. Burke and John C. Callahan staged a triangular Scotch and Irish story-telling contest.

The committee in charge of arrangements was composed of Earl Lewis, W. F. O'Keeffe, Joe Silver and Joe Severn.

BUILDING COURSE PROPOSED FOR TEXAS UNIVERSITY

A state-wide campaign will soon be launched in Texas for the purpose of placing a chair of construction in the curriculum of the State University. Agitation for the establishment of a prescribed course of instruction for those who wish to specialize in construction was started by members of the Associated General Contractors, especially those of the San Antonio Chapter. With the appointment of a committee, of which Will A. Orth was chairman, a tentative course was mapped out and submitted at the recent meeting of the Texas State Branch of the Associated General Contractors. The state branch placed its stamp of approval on the plans of the San Antonio Chapter and the president of each chapter in the state was named as member of a state committee to work with the San Antonio committee composed of Orth, R. L. Burney and A. J. McKenzie, to push the campaign.

NEW HARBOR IMPROVEMENT FINANCE PLAN

Adoption of a new harbor improvement finance plan, proposed by the Board of State Harbor Commissioners and today approved by Governor Richardson and the State Board of Control, will save the port of San Francisco $152,000 during the next year and insure additional savings in the future, it was announced today by William A. Sherman, president of the Port Commission.

The plan as outlined by Sherman provides for the withdrawal from the State Treasurer's office of the surplus in the San Francisco Harbor Improvement Fund, now totaling in excess of $1,700,000, to provide for the construction of Pier 45 at the foot of Hyde St.—the largest port terminal ever designed for this port. The pier will rest upon a solid fill and will be 1200 feet in length and 600 feet in width.

"The estimated cost of Pier 45 is $1,900,000," said Sherman. "Instead of meeting the cost with a bond sale, we have decided to utilize the port's surplus fund.

"The interest saved for one year will total $76,000 and a similar sum will be saved through the non-payment of a commission for bond selling. The total saved in one year will amount to $152,000.

"Three years ago the surplus in the San Francisco Harbor Improvement fund was about $500,000. Despite costly and important improvements and repairs paid for from the current revenues, and without resorting to any increase in the charges against the shipping, the surplus has piled up until it now totals in excess of $1,700,000.

"As it will require some time to build the new pier, it is reasonable to believe that the surplus will increase sufficiently to make available a sum that will pay for the entire improvement.

"We are today in receipt of a communication from the United States army engineers at Washington advising us that the plans calling for the solid fill type of construction for Pier 45 have been approved and the matter referred to the Secretary of War for his recommendation for the issuance of a permit.

"The solid fill or mole type pier will cost slightly more than the usual type but will effect a tremendous saving in the cost of maintenance.

"To provide funds for the construction of Pier 48, south of the channel, it will be necessary to sell bonds for approximately $1,000,000. The sale will be delayed about three months because it will require time to complete the fill at the end of the pier where the channel is too deep for the piling. The contract for the rock fill was let some time ago and this work is progressing rapidly.

"Under this plan our fixed interest charge on bonds will be $40,000 per year as against $120,000, which would have been the case if we had continued the usual procedure and sold $3,000,000 worth. However, in the event of an emergency arising that may require the expenditure of any large sum, we could then sell sufficient bonds to meet such emergency.

"We have also been informed that there will be considerable offering of State bonds this fall. Our plan will keep at least $2,000,000 worth of these securities off the market.

Joseph Losekann, Stockton architect, has been appointed city building inspector of Stockton, succeeding Ivan C. Satterlee, who has resigned to become associated with the Davis-Heller Co., architects and engineers of Stockton. The change is effective July 15.

Fact Finding Commission Is Urged To Settle Wage Disputes

(Special Correspondence from A. W. Dickson, Executive Secretary National Association of Building Trades Employers)

Almost invariably when the building trades demand a wage increase the request is accompanied by a formidable array of figures showing that the increase is necessary to maintain a certain standard of living. On the other hand the employers present data showing that present rates are high enough and that no raises are justifiable from an economic standpoint. Too often there is a wide variation between the figures presented by the two groups with the result that a dead-lock follows which ties up the industry to the detriment of every one.

Every city should support a fact finding commission which, when a wage dispute arose, could render an impartial verdict on the question as to whether or not the increases demanded were in line with economic conditions. Such a commission could investigate not only the cost of living, but also the matter of unemployment, wages paid in other industries, yearly income and in fact all the elements which are considered when any group desires an increase in wages.

Most men are fair and amenable to reason once they have all the facts before them. In the past numerous strikes have been called simply because of the utter lack of accurate information pertaining to primary principles o sound economics. An impartial fact finding commission whose personnel consisted of the outstanding men of the community whose sole interest in the matter would be a desire to better conditions in their city should be in a position to gather pertinent information along the lines suggested above, the accuracy of which could not be questioned.

Such a commission should consist of representatives of the employers, employe and general public. In the event an agreement can be reached between employers and employes binding them to accept the results of such an investigation in determining wage scales, so much the better. If not, the public would be in full possession of the facts and public opinion would be directed wherever justice lies.

Every worker is entitled to the best wages and best living conditions it is possible for his particular occupation to offer him. On the other hand no worker is entitled to a wage which in any way places a hardship on any other group. In other words the interest of the community as a whole is superior to the interest of a single individual or group of individuals.

The National Association of Building Trades Employers believes that any local organization of contractors in the country might do well to give some serious thought and attention to the above suggestion. Any movement which tends to lessen labor troubles through the removal of misunderstandings brought about by lack of accurate information is a worthy one and should have the unqualified support of every one in the industry.

Overbuilding Bug-A-Boo Seems To Have Died—Says Noted Financier

"Building has progressed on a stable course and it is reasonable to expect that construction activities this year will almost reach, if not exceed, the record-breaking volume of 1925," according to G. L. Miller, president of G. L. Miller & Co., Inc., nationally known bond house specializing in building construction financing.

Miller said that "overbuildnig bug-a-boo seems to have died a natural death," as insurance companies and certain other interests, which some months ago declared themselves somewhat skeptical as to the building outlook and urged a curb on construction loans, are now "demonstrating their faith and confidence in the present situation by appropriating large amounts for new buildings in New York City and elsewhere throughout the country." His statement follows:

"The major reaction in construction, long predicated in certain quarters, had failed to materialize. On the other hand, building has progressed on a stable course and it is now reasonable to expect that construction activities this year will almost reach, if not exceed, the record-breaking volume of 1925.

"Insurance companies and certain other interests, who some months ago declared themselves as somewhat skeptical as to the building outlook and urged a curb on construction loans, seem to have reversed their attitude. They are now demonstrating their faith and confidence in the present situation by appropriating large amounts for new building in New York City and elsewhere throughout the country.

"The Metropolitan Life Insurance Company, in the last 60 days, according to published figures, appropriated for bond and mortgage loans, $37,889,556. Of that amount $31,152,300 was city loans for both business and housing projects.

"The New York Title and Mortgage Corporation during the last four months announced mortgage loans aggregating $52,657,937, the majority of the loans being made on apartment houses situated in New York City.

"During April the Prudential Insurance Company of America announced loans amounting to $16,188,131, of which $10,257,644 was on dwelling and apartment houses, $1,594,100 was on city property other than dwellings and apartment houses.

"Building figures to date show a considerable lead over last year and the volume of work continues very heavy, although some gradual falling off seems likely to occur this summer in the volume of new construction. Little reduction in current activities, however, can be expected, owing to the enormous amounts of building commitments to date.

"Whether construction activities will continue at a high rate throughout the last half of the year will undoubtedly depend upon many conditions. It is reasonable, however, to anticipate that the fall months will show another spurt in building permits, which would mean that the recession during the summer would be of minor importance and have little effect upon the total volume of 1926.

"In New York, where building has been particularly active this year, there was a gain of $220,000,000 in contracts during the first four months of the year, over the same period in 1925. Despite this acceleration, however, building is progressing at a high rate and hundreds of new projects are still being planned and pushed into work.

"At its last meeting the Lawyers' Mortgage Company accepted mortgages aggregating $16,677,450 distributed through the New York district.

"If the financing being done by the insurance companies and banking interests is to be taken as a criterion of present conditions, there would seem to be little doubt that conditions are considered fundamentally satisfactory in the building industry, and that the overbuilding bug-a-boo has died a natural death.

"With this mental attitude existing, and with building proceeding at its present pace, now is the time, however, when the situation calls for the utmost caution on the part of the various lending institutions. The danger of overbuilding in certain communities is possible, and the policy of the lending institutions must not be other than one of critical conservatism, with the investors' safety paramount in their minds.

"Careful survey of the building situation to date, and the policy being carried out in making mortgage loans by the leading investment houses, seem to justify the belief there is nothing in the present situation that would cause over-anxiety or jeopardize the interest of investors in real estate mortgage bonds issued by these reputable institutions."

BUILDER FILES SUIT TO GET PARTNERSHIP ACCOUNTING

An accounting of all funds received by the Charles S. Mabrey Company of Sacramento on contracts entered into jointly by himself and the Mabrey concern for construction of more than a score of buildings in Sacramento and vicinity is sought by Louis G. Barton, a contractor and "promotion expert," in a suit filed in the superior court. Barton also asks for a determination of the profits under the agreement and payments of his share.

Under the joint contract for construction eighteen projects were completed in 1924, Barton states. He alleges the profits exceeded $25,000. Barton charges Mabrey violated their agreement when he entered into contracts to construct eight additional buildings.

LUMBER INDUSTRY STEADY

Telegraphic reports received June 24 by the National Lumber Manufacturers Association, from 391 of the larger softwood, and 149 of the chief hardwood, mills of the country, show apparently no noteworthy change in the lumber industry's activities. The 377 comparably reporting softwood mills show small decreases in production, shipments and new business, when compared with reports received last week, when, however, thirteen more mills reported. In comparison with reports from 361 mills a year ago, increases in all three items were noted, particularly heavy in production and new business. The hardwood operations, when compared with reports from 151 mills a week earlier, show production and shipments about the same, and a marked decrease in new business.

Craftsmanship *is the priceless ingredient* sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

MEADOW VALLEY Inn, Meadow Valley.

PLUMAS COUNTY, July 1, 1926.

SANDY PRATT, President.

OF THE Pratt Building Material Co.

IS HERE with Mrs. Sandy.

WHERE FISH are whales.

AND ALL fishermen.

ARE LIARS.

WHILE SANDY, producer.

OF CLEAN, sharp sand.

AND CLEAN, hard rock.

GENERALLY FISHES for SAND dabs.

AND ROCK cod.

SANDY HAS a $100 pole.

AND A $1.00 Fishing license.

AND IS trying.

TO HAUL in the mammoth trout.

ONE OF which.

IS SO large.

THAT A big horse.

BROKE HIS back.

CARRYING THE trout.

TO THE hotel.

THE SMALLEST trout caught.

WEIGHED 19 pounds, 6 ounces.

HOW DOES Sandy know?

SANDY TOOK the fish's "scales."

TO GET the weight.

ANOTHER THING Sandy likes.

ABOUT THIS neighborhood.

IT IS so "light."

BOTH DAY and night.

THE INDIANS say.

IT IS because the Feather River.

RUNS THROUGH this section.

SUNDAY IS the 4th of July.

AND Sky-ROCK-its will fly.

THROUGH THE air.

THIS HOTEL is very comfortable.

EVERYBODY SITS.

IN A ROCK-in-chair.

AND IN the meantime.

SANDY PRATT'S wonderful organization.

IS PRODUCING sand and rock.

AT SACRAMENTO and Marysvill.

PRATTROCK (NEAR Folsom).

PRATTCO (MONTEREY County).

CENTRAL OFFICE—San Francisco.

WHILE SANDY sleeps.

IN THE "bed."

OF THE Feather (comfortable) River.

"I THANK you."

Sandy Pratt at Meadow Valley Inn, Plumas County, and the smallest fish Sandy caught (see above K.C.B-like story). Sandy Pratt is president of the Pratt Building Material Co. and produces clean sand, crushed rock and gravel—watch San Francisco and Sacramento papers for additional photographs for Sandy believes in advertising—It pays because you can land the big fish.

HOISTING ENGINEERS IN D. C. GET WAGE INCREASE

A strike lasting six weeks of the hoisting engineers in Washington, D. C., was ended recently when the contractors agreed to grant an increase from $1.25 per hour to $1.37½ per hour. A three-year agreement was signed which contained provisions for reopening negotiations by either party nine months prior to its expiration. Several concessions in working rules were obtained by the contractors. Among them were that no engineer be required on one bay mixer or small pumps; and straight time instead of time and one-half when running two hoists or a mixer and hoist and several minor concessions.

ARMY ENGINEER RETIRES

Major-General Harry Taylor, who has supervised the expenditure of more than half a billion dollars during his service as assistant chief and chief of army engineers, passed to the retired list June 26 after forty-two years of active army service which included combat command during the Philippine insurrection and chief of engineers of the American army in France. He was succeeded by Major-General Edgar Jadwin.

A. B. Campbell will operate in San Francisco under the firm name of Industrial Ornamental Iron and Wire Works.

NOTICE TO BIDDERS

(Live Oak Union High School District)

NOTICE IS HEREBY GIVEN that the Board of Trustees of Live Oak Union High School District, of the County of Sutter, State of California, will **up to the hour of 11 o'clock A. M. of the 23rd day of July, 1926,** receive sealed bids for the construction of an addition to the Manual Training Building of the Live Oak Union High School, according to the plans and specifications now on file with the Clerk of said Board. Copies of said plans and specifications may be obtained at said High School from M. H. Ellestad, Manual Training Instructor, upon depositing the sum of $10 as security for the return of said plans.

All bids must be submitted as provided in specifications and must be filed with H. R. Ramsdell, Clerk of Board of Trustees, whose address is Live Oak, California. All bids must be accompanied by a certified check of one-tenth of the amount of the bid.

The Board reserves the right to reject any or all bids.

Dated this 22nd day of June, 1926.

H. L. STAFFORD,
E. H. COBEEN,
H. H. RAMSDELL,
Trustees of Live Oak Union High School District.

NOTICE TO CONTRACTORS

(School — Middletown Union School District)

NOTICE IS HEREBY GIVEN that sealed bids will be received and opened by the Trustees of the Middletown Union School District, Lake County, California, at the school house of said school district in Middletown, in said County and State **at the hour of 2:00 o'clock P. M., of Thursday, July 8th, 1926,** for the erection and completion of a four-room school building in said district according to plans and specifications prepared for same by W. Herbert, Architect, 520 Rosenberg Bldg., Santa Rosa, California.

Plans and specifications may be secured from the Board of Trustees upon a deposit of Five Dollars ($5.00) for each set.

Each bid must be accompanied by a certified check on some responsible California bank, or by a proper bidder's bond in the sum of not less than 5 per cent of the amount of bid, for the purpose stated in the specifications, made payable to Mrs. Julia Field, Clerk of said school district.

The Trustees reserve the right to reject any and all bids.

JULIA FIELD,
Clerk of Middletown Union School District, Lake County, California.

NOTICE TO ROOFING CONTRACTORS

(School Roofing—Fresno)

Pursuant to an order of the Board of Education of the Fresno City High School District of Fresno County, California, duly made and entered in its minutes this 24th day of June, 1926, public notice is hereby given that the said Board will receive **up to 3 P. M., on the 8th day of July, 1926,** at the office of the said Board in the Hawthorne School Building, 2425 Fresno Street, Fresno, California, proposals for the furnishing and installing the following patent roofing:

a—Approximately 160 squares, Johns-Manville or Carey Asbestos built up roofing, or equal, on the roof of the main part of the Longfellow Junior High School, located on Hazelwood Blvd. in the Fresno City High School District.

b—Approximately 47 squares, Johns-Manville or Carey Asbestos built up roofing, or equal, on the roof of the old Technical Gymnasium.

Specifications for the roofing drawn by Fishe-Lake & Traver, said specifications on file with the Secretary of the Board at the above address, together with forms for submitting bids.

All bids must be sealed and marked on the outside of the envelope "Bids for Composition Roofing, Longfellow School" or "Bids for Composition Roofing, Fresno Technical Gymnasium Roof."

Bids will be opened July 8th, 1926, at 8 P. M., at the said office of the Board of Education.

A bidder's surety bond or certified check made payable to Fresno City High School District in the amount of 10 per cent of the bid must accompany each proposal.

The Board reserves the right to reject any and all bids.

By order of the Board of Education of said High School District.

L. L. SMITH,
Secretary.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(Tulare School District)

NOTICE IS HEREBY GIVEN That the Board of Education of the City of Tulare School District, County of Tulare, State of California, will receive sealed proposals at any time from and after date hereof until **eight o'clock P. M., Monday, July 12, 1926,** for the furnishing of all labor and materials for the building of additions to the Wilson and Roosevelt School Buildings in Tulare, California, in accordance with the plans and specifications for said buildings prepared by Swartz & Ryland, of Fresno, California, duly certified architects under the laws of the State of California, employed by said Board of Education.

Said prop sals shall be delivered to the Secretary of the said Board of Education, at the office in the High School Building in the City of Tulare, State of California, and each proposal shall be accompanied by a certified check on same responsible Bank, for 10 per cent of the amount of such proposal, payable to the Board of Education of the City of Tulare School District, conditioned that the party or parties to whom the contract shall be awarded, shall execute a contract for the work to be performed, within five days after the making of such award, and to give surety bonds required for the faithful performance of the contract in the amount as required by law.

Contractors will be required to complete their work according to their contract on or before the 15th day of September, 1926.

Plans and specifications may be obtained from the office of the architects, Swartz & Ryland, Rowell Building, Fresno, California.

Bids will be opened by said Board of Education on the day and at the time above specified, at the office in said Tulare Union High School Building.

The said Board reserves the right to reject any and all bids, or any or all items of such bids.

Dated June 22, 1926.

E. R. ZUMWALT, President.
R. N. FULLER, Secretary.

NOTICE TO BIDDERS

(Hanford Union High School District)

At an adjourned meeting of the Board of Trustees of the Hanford Joint Union High School District, held at the regular meeting place of the said board of trustees, Wednesday, June 9th, 1926, it was determined by regular motion made and carried, to build 660 feet, more or less, of wire fence along the east side of the High School property between the school grounds and Pentecost Park as specified in following Item 1; also, to purchase 90 school desks as specified in following Item 2.

Item 1. 660 feet, more or less, Cyclone Invincible Fence, or of other make of equal quality, 7 feet above grade when erected, standard full weight material.

Item 2. 90, more or less, good durable school desks and 15 or more backs only.

Further specifications may be had upon application to the clerk of the Board of Trustees, Hanford, Calif.

The Trustees of said High School Board will entertain sealed proposals to furnish and install materials called for in Items 1 and 2, separately, all bids to be in the hands of G. W. Armstead **on or before Monday, July 12th, 1926, at 8:00 P. M.**, or delivered in person to the trustees at the regular meeting Monday, July 12th, 1926, at which time bids will be opened.

A certified check or bidder's band for ten per cent of the amount of each bid must accompany same.

The trustees of said board reserve the right to reject any and all bids.

G. W. ARMSTEAD,
Clerk of the Board of Trustees Hanford Joint Union High School District.

NOTICE TO CONTRACTORS

Fairfax School District—Kern County

Notice is hereby given that sealed bids for the erection of a two-room brick school house will be received by the Fairfax School Trustees at the office of their Architect—Clarence Cullimore, 10 Oleander Avenue, Bakersfield, **up to the hour of 5 P. M. on the 19th day of July, 1926.**. Bids will be opened at 8 P. M. July 19th, 1926, at the Fairfax School, Kern County, California.

Upon receiving plans and specifications each prospective bidder shall make a $10 deposit to the Architect.

Upon furnishing bids each contractor will be required to deposit a certified check with the Architect for the sum of 10 per cent of the amount of bid, as a measure of liquidated damages which the owner will sustain if the contractor defaults the execution of the agreement.

The successful bidder, to whom the contract is awarded must give a surety bond of 50 per cent of his bid to protect the owner against all claims. The Trustees reserve the right to reject any or all bids.

Dated June 29th, 1926.
Fairfax School District, Kern County.
A. W. RENCH, President.
L. S. ABEL, Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the California Highway Commission, City Hall, San Bernardino, Cal., **until 2 o'clock P. M., on July 26, 1926**, at which time they will be publicly opened and read, for construction in accordance with the plans and specifications therefor, to which special reference is made, as follows:

The erection and completion of all items as called for in the plans and specifications, including materials and all incidental work, for a Division Office Building, in the City of San Bernardino, California.

The Office Building will be a one-story structure 85'-0"x80'-0", including patio wall, with concrete walls; wood, cement and tile floors, concrete foundation, with a basement under part and with a tile roof. The interior will be plastered and finished. Concrete sidewalk and driveway will be laid.

Bidders shall submit separate proposals for the Office Building and the Electrical Work.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the offices of the California Highway Commission, 515 Forum Building, Sacramento, Cal., and City Hall, San Bernardino, Cal., and they may be seen at the office of the Architect Howard E. Jones, 455-459 Fourth Street, San Bernardino, and at the offices of the Division Engineers at Los Angeles and San Francisco.

A deposit of twenty-five ($25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of plans and specifications to the said Commission in good condition.

NOTICE TO CONTRACTORS

(Hospital Buildings—Canacao, P. I.)

Sealed Proposals, indorsed "Proposals for Quarters, Canacao, P. I., Specification No. 5157," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., **until 11 o'clock A. M., September 15, 1926,** and then and there publicly opened, for quarters at the Naval Hospital, Canacao, P. I. The work includes plain and reinforced concrete; asbestos shingle roofing and sheet metal work; steel and iron work; mastic flooring; metal furring and lathing; plastering; wood framing, doors, sash and trim; and plumbing and electrical systems. Specification No. 5157 and accompanying drawings may be obtained on application to the Bureau, to the Commandant , Navy Yard, Mare Island, Calif., or to the Commandant, Naval Station, Cavite, Phillipine Islands. Deposit of a check or postal money order for $20, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification.

L. E. GREGORY, Chief of Bureau.

May 5, 1926.

NOTICE TO CONTRACTORS

(Officers' Quarters and Nurses' Home—Canacao, P. I.)

The Bureau of Yards and Docks invites attention to the fact that it will open bids, in the near future, on Specification No. 5157, "Junior Officers' Quarters and Nurses' Quarters, Naval Hospital, Canacao, Philippine Islands." The two quarters for Junior Officers will be similar and will be one-story buildings. The nurses' quarters will consist of a two-story main building and a one-story wing. The work includes plain and reinforced concrete; asbestos shingle and tin roofs; sheet copper work; steel and iron stairs and other steel and iron work; mastic flooring; metal studding, furring and lath; plastering; wood framing, doors, sash, trim and floors; shell lights in doors, windows and transoms; hardware, painting, and plumbing and electrical systems.

In the event that this work is of interest to your firm, you should forward to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to the Commandant, Navy Yard, Mare Island, Calif., or to the Commandant, Naval Station, Cavite, P. I., a check or postal money order for $20 payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawings and specification.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 23, 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

QUANTITY SURVEYS GROWING

Few construction practices have grown more rapidly than quantity surveying. Not ten years ago reference to quantity surveys before the average owner or contractor required explanation of their object and processes. Most articles in construction journals, and there were then not many, were descriptions of British practices and experiences. A change has come about in the last half decade. Now there are some dozens of associations, firms and individuals making quantity surveys for contractors particularly of building construction. An association of commercial quantity surveyors is on the eve of organization. One after another chapters of the Associated General Contractors are organizing mutual bureaus for making quantity surveys, and in the last year local (city) survey bureaus have expanded successfully to provide state-wide service. This growth has created problems for contractors associations and particularly for the national association and its four-score chapters. Outstanding are the questions: Should the effort be toward mutual survey bureaus sponsored an dcontrolled by contractors associations or should the task be left to commercial surveyors to develop as their business interests dictate? In case of association control is it feasible and wise to develop state wide service or is it better to keep to small bureaus giving only city or district service? There is pronounced opinion favoring both association control and state surveys, but contracting opinion in general has yet to be formulated and expressed. The problems are imminent and concerted action if taken should be decided upon soon and contractors need to determine their minds quickly. The management of the Associated General Contractors has invited an expression of policy by the members. This expression should be prompt and definite.—Engineering News-Record.

SACRAMENTO CONTRACTORS WIN LONG PENDING SUIT

Judgment for $14,500 in favor of Henry Finnegan and George L. Herndon, Sacramento contractors, against Arthur H. Lamb and Mrs. Phyllis K. Lamb was rendered by Superior Judge Peter J. Shields at Sacramento, June 25. The judgment was rendered on a cross complaint filed by Herndon and Finnegan to a suit originally filed by the Lambs.

The matter has been the subject of litigation for many months. The Lambs first filed a petition for restraining order preventing Herndon and Finnegan from proceeding with the sale of a deed of trust executed by the Lambs as security for a loan of $12,000 and a bonus of $12,000. The allegation was made that the bonus was on the loan exclusively and that this added to the 12 per cent interest exacted constituted usury.

The restraining order was dissolved several months ago by Judge Shields and the order and judgment today constitutes a decision that the bonus was on a building contract as well as the loan and was not usurious. The amount of money involved in the judgment constitutes a deficiency judgment for a sum alleged due but not secured through sale of the deed of trust.

CARPENTERS' CHIEF HERE

Arrival in San Francisco of Wm. L. Hutchenson, national president of the United Brotherhood of Carpenters, is said to forecast an early settlement of the carpenters' walkout in the San Francisco Bay district.

"I cannot say now whether I will have a consultation with officials of the Industrial Association," Hutchenson said, after declaring that it would take him a day or two to study the situation thoroughly, although he had been in constant touch with developments. He continued:

"Of course, we are for peace. We want and work for co-operation rather than opposition, and always are open to suggestions looking to collective bargaining. That is why we would rather deal directly with the so-called associations of the contractors and employers, rather than with individuals."

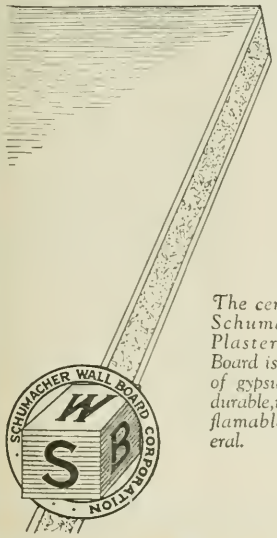
More than a strong smooth wall

a barrier against fire



The center of Schumacher Plaster Wall Board is made of gypsum—a durable, non-inflamable mineral.

IT'S just human nature not to worry about fire—until after it's happened.

But each wall built of Schumacher Plaster Wall Board is a protection against fire. It has center of gypsum—a non-burnable mineral. While you are building a smooth, sturdy wall you are also building a worthy fire wall. Yet this added protection is without extra cost.

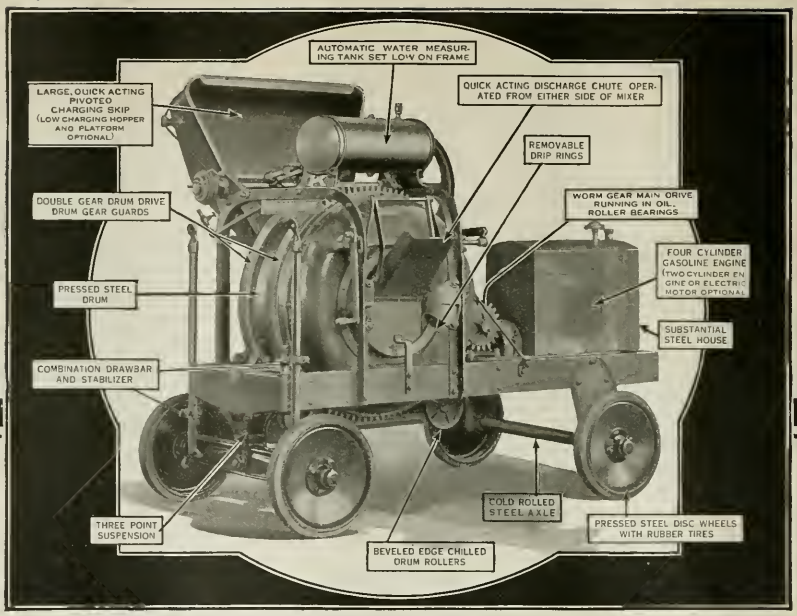
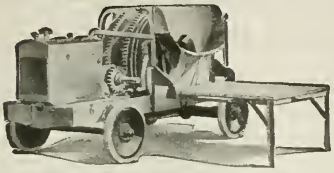
Schumacher Plaster Wall Board

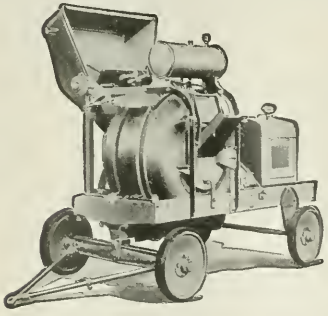
4T



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
QUICK ACTING DISCHARGE CHUTE OPERATED FROM EITHER SIDE OF MIXER
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL. ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
THREE POINT SUSPENSION
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

S. F. BUILDING IN JUNE TOTALS $8,479,058.

Private building operations undertaken in San Francisco during the month of June represent an expenditure of $8,479,058. During the month 832 permits were issued, as compared with 827 permits in May of this year when the valuation approximated $2,634,875.

The June total is swelled due to the issuance of a $5,000,000 permit for the proposed thirty-story Russ Building now in course of construction in Montgomery Street. Lacking this project, the operations would total $3,479,058.

Operations for the first six months of this year exceed those of the corresponding period in 1925. From January to June, inclusive, of this year, the total registers $32,223,117 as compared with $27,217,641 in 1925.

The following is a segregated report covering the June, 1926, operations as compiled by the Bureau of Building Inspection of the Department of Public Works:

Class	No. of Permits	Est. Cost
A	1	$5,000,000
B	3	690,000
C	12	156,500
Frames	341	1,725,683
Alterations	472	873,299
Public bldgs.	3	33,576
Total	832	$8,479,058

CITY MANAGER APPOINTED

Thomas H. Messer of San Francisco has been appointed city manager of Coronado, Cal. He has been a consulting engineer for 22 years.

U. S. Building Situation Indicates General Prosperity

Construction carried forward into 1926 from last year, together with the large amount of work undertaken this year, continues to be a powerful stimulus to general business," says the National Bank of Commerce, New York. Writing in the July issue of "Commerce Monthly," the bank says:

Contracts awarded in 1926 should compare favorably with last year although it is probable that declining awards in the second half will bring the total under that of 1925. New construction is still needed in many localities, but overwhelming demand as a driving force appears to be losing its power.

From the standpoint of employment, work in hand and contemplated is probably sufficient to keep building labor well occupied for the remaining months of the year, which with the high level of wages guarantees sustained purchasing power.

There is in the situation, however, an element of real danger contributed by the elasticity of building demand and the abundance of credit. The demand for building space expands measurably with prosperity and contracts when business activity declines. In the last four years construction requirements have been enlarged by the war shortage, a readjustment in living conditions and a high degree of prosperity which may have tended to produce an exaggerated idea of the building needed. It is now generally agreed that the war shortage has been met, leaving the demand from business prosperity and a high standard of living to support the boom. The real measure of overexpansion, therefore, will not become apparent until business slows down and demand contracts.

In periods of heavy construction in the past, as building approached its maximum volume a rising level of business activity has tightened money rates. This brake, however, easy money is leaving the boom to be stopped entirely from the other end, namely, through lower returns on capital invested when the supply of buildings becomes too large even for the demand of this era of prosperity.

Less urgency in the demand for building space is bringing construction costs back into prominence as a factory in the building situation. Building costs have achieved relative stablity for the last three years by striking a balance between slightly rising wages and weakening material prices. The level, however, is high. As rentals gradually decline, reducing the returns on capital invested, the necessity for lower costs will become more apparent.

In time of flagging demand falling prices instead of stimulating tend to curtail construction until stability is again attained. In this way building materials may become the decisive factor in the building situation. This element, however, is not expected to affect the industry very much this year as the work in sight and contemplated will probably be enough to maintain output at a high rate.

Labor Situation In Chicago

Bricklayers in Chicago will receive an increase of 12½ cents an hour over their old rate of $1.50 an hour beginning July 1, 1926, according to an announcement of the Associated Builders of Chicago. This craft recently signed a contract which was a continuation of last years agreement with the understanding that no increases were to be granted to the other trades. Following the increases secured by the plasterers and lathers of 12½ cents an hours the bricklayers demanded the same rate. The agreement extends until July 1, 1929, and insures harmonious relationships for three years. The sympathetic strike which threatened to disrupt conditions in the building industry has been definitely settled so far as the bricklayers are concerned, no change being made in the old agreement which will not allow the members of the craft to strike because of non-union men in the other crafts working on the same job with them. Structural and ornamental iron workers on strike for an increase of 12½ cents an hour over their old scale of $1.37½ recently returned to work pending negotiations.

The Building Trade Council, in an advertisement appearing in the Chicago papers announced the following course of construction shall not be in policy: Building projects now in the terrupted because the contractor or contractors may be employing non-union men on the job. However, if these contractors make any future contracts with the intention of continuing to employ non-union men, in any building trades, then the affiliated unions will proceed in accordance with the agreements which they have heretofore submitted to the employers on all buildings where such contractors are now employed. The following paragraph is contained in the contract submitted by the Council: Stoppage of Work and Penalties: In the exent of non-union men in any building trades being employed on any building job, there shall be no cessation or stoppage of work by members of the parties of the second part, until after the Joint Conference Board has been notified, and have had time to investigate and adjust same. It being distinctly understood that the time for adjudication shall not exceed forty-eight hours from the time notice has been given to the Board.

According to the Citizens Committee of Chicago the Council has decided to enter upon an aggressive fight to unionize all trades in the building industry and that an announcement has been made that where contracts are made after June 15th the building will be struck if Landis Award workmen are employed.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The fee on building permits for all structures under $500 in valuation, has been raised by the Oakland city council to $1 per permit. Heretofore the fee was $.50.

Building permits issued at Richmond, Contra Costa County, in June totaled $163,175. During the month $105,250 was expended in the erection of new homes.

Fresno building in June totaled $254,159 making the expenditure for the first six months of the year $936,-941. During the past month $135,108 was expended for repairs and alterations.

City attorney of Redwood City is preparing an ordinance for submission to the city trustees requiring contractors to pay a yearly license fee of $50. Heretofore only plumbers and electricians have had to pay a license, this being $25 a year.

Sacramento building operations in June closed with a total expenditure of $1,034,925, this amount being within $100,000 of the corresponding month in 1925. The largest project included in last month's total is $800,000 for the new plant of the American Can Company.

Seasonal decline in demand for plate glass due to the summer lull in the automobile trade is reported by manufacturers. Business coming from the building industry is good, while mirror and furniture trades are not up to normal, according to the "National Glass Budget."

Proponents of municipal hydro-electric development of the city of Aberdeen, Wash., on the Wynooche river won a decisive victory in a $2,000,000 bond issue for the construction of a dam and power plant on the river. Incomplete returns show the issue carried by a vote of 2435 for and 1600 against the proposal.

May sales of steel castings were 79,-003 tons, against 86,826 tons in April and 63,827 tons in May, 1925, according to the department of commerce. In the first five months bookings totaled 420,329 tons, against 388,122 tons in 1925 period. May production of steel castings was 95,734 tons, or 73% of capacity, compared with 105,735 tons, or 81% of capacity in April.

According to The Engineer, London, the British Association of Floor Contractors has had under consideration regulations which govern the construction of steel and concrete floors, and in particular the use of coal residues in concrete which is in any way in contact with steel. Having regard to the many cases in which this material has been clearly proved to have corroded the steel, often to the extent of entire destruction, the Association has decided to approach the Government, and all County Borough and District Councils to take steps to prohibit the use of coal residues in structural concrete in contact with steel. In this connection, it is worthy of note that the revised building regulations of other countries prohibit the use of this material for the class of work mentioned.

Berkeley building in June totaled $474,434 of which $417,516 covered new construction and $56,918 for alterations, repairs and additions. During the month 248 permits were issued of which 160 were for new buildings, mostly homes.

American industries, according to Washington statistics, will have a potential maximum production of $90,-000,000,000 this year—another factor explaining the refusal of the stock market to run into a panic and the continued good demand for all good stock and bond offerings.

The strike of the painters, paper hangers and glaziers in Cleveland is now in its seventeenth week. One of the local daily papers has suggested that a committee of five—two from each side with a fifth dis-interested person be selected to effect an arbitration of the difference. It is understood that this proposal is being considered by both sides.

Secretary of State Frank C. Jordan announces that the water and power act authorizing the issuance of $500,-000,000 worth of bonds for the development of water for irrigation and hydro-electric power, has qualified for a place on the November election ballot. A petition containing 11,332 names from Alameda County gave the measure the 77,263 names necessary to submit the act to the voters. In all, 82,318 names have been filed with Jordan. Los Angeles County filed 50,288 and San Francisco, 20,698.

As a result of a reduction in the duty on foreign woods, Japan has superseded the United States for the first time in importations of Philippine's lumber, having bought 2,346,568 board feet, as against 2,164,944 purchased by American dealers, during March. China with 1,189,744 board feet and Australia, buying 577,912, were the next best customers. The total March export was 6,556,312, as compared with 3,-892,744 in February. April and May promise to show even higher figures as new lumber tracts and mills are being opened and the business is assuming the nature of a boom.

Los Angeles' building total for June was more than a million dollars ahead of that for the preceding month, fell $3,400,000 short of that for June, 1925, and was $1,500,000 ahead of June, 1924. According to the report of the city building department, 3068 permits with an estimated valuation of $11,-856,082 were issued during June, 1926. For May the number of permits was 2960 and the estimated valuation was $10,702,844, while for June of last year the number of permits was 3652 and the estimated valuation was $15,305,-516. Operations for the first six months of the current year total $63,-161,395 as compared with $83,175,457 for the corresponding period in 1925. During the first six months of 1925 22,852 permits were issued as compared with 19,228 in 1926.

"Throughout all the basic industries, peace prevails," says Secretary James J. Davis of the Department of Labor. "Except for differences in a few localities in two lines of industry, there exist no trade disputes of importance. The building trades report a few centers where certain trades have not yet reported agreements with contractors, but otherwise there is a marked advance in satisfactoy relationship over some recent years. Although there are many difficult problems in the production of bituminous coal arising out of the magnitude of the industry, we have hopes that the operators and miners themselves will be able to adjust them. Continued business prosperity in the country should aid materially in stabilization of our coal industry. The workers of America enjoy the highest wages ever paid, and they will not jeopardize prosperity, for dangerous experiments in political agitation."

Bricklayers remain at work on the Central Grammar School building at Tulare, Calif., despite an order from the Tulare County Building Trades' Council to quit work due to the fact that non-union men are employed on the job. The order also covered the plumbers who obeyed the demand of the council.

The department of commerce announces that according to data collected at the biennial census of manufacturers of 1925, establishments engaged in the manufacture of sand-lime brick reported the operation of 308,703,000 of bricks valued at $3,716,654, as compared with 283,417,000, valued at $3,-334,503 in 1924, and 213,425,000, valued at $2,471,536 in 1923, representing an increase of 8.9 per cent in quantity and 11.5 per cent in value over 1924 and 44.6 per cent in quantity and 50.4 per cent in value over 1923.

TRADE NOTES

B. D. Burchard & Hagerman, Venice, Calif., desire to communicate with San Francisco firms which can deliver gypsum tile, brick and clay tile, f. o. b. docks, San Francisco.

Architects and Builders Specialties Co., P. O. Box 6465, Miami, Florida, desire to represent San Francisco Bay concerns in Miami and vicinity as well as through the state of Florida.

E. S. Dyer, manager of the Verdi Lumber Company branch at Winnemucca, Nevada, has purchased that business and will operate under the name of E. S. Dyer Lumber Company.

M. Kelley, manager of the Western Granite & Marble Co. of Hollister, announces purchase of a site at San Benito and First streets, that city, on which he will establish a new plant, 36 by 75 feet.

C. W. Pearce, of the Sunset Lumber Company, was the principal speaker at the June 29 meeting of the Berkeley Builders' Exchange. Financing, building and selling of homes for speculative purposes, were the topics of discussion.

Massillon Steel Joist Company of the Pacific Coast, capitalized at $2,000, with the principal place of business in San Francisco, has been incorporated. Directors are: J. L. Clymer, L. H. Brownstone, L. E. Goodman, M. C. Hickey and D. E. Halck.

ALONG THE LINE

Figures gathered by the American Institute of Architects indicate a wide spread distribution of the standard contract form for building construction during 1925. Approximately 400,000 copies of the form were distributed last year.

Five strikes were settled by Federal mediators in the week ending June 19, the Department of Labor reports. Five new disputes were reported in the same period. On June 19 there were 51 strikes before the department for settlement and in addition 10 controversies which had not reached the strike stage.

City of Sacramento, at a recent election, voted bonds of $976,400 to finance sewer extensions, $550,000 for installation of water mains and $350,000 for the construction of additional filter beds at the Municipal Filtration plant. A proposal to issue bonds of $257,000 to install a fire alarm system and $371,500 to finance street improvements failed to carry as did several other proposals.

Dr. Robert A. Millikan, executive president of the California Institute of Technology and scientist of national repute, was presented the honorary medal of the American Society of Mechanical Engineers at the annual convention banquet in San Francisco. The award was made to Dr. Millikan by W. L. Abbott, president of the society, in recognition of his work in the measurement and isolation of the electron and the extension of the ultra-violet spectrum which have been material aids in the transmission of photographs by wire and radio.

Paul Bailey, assistant state engineer, has been designated acting director of the State Department of Public Works by Governor Richardson to fill the vacancy caused by the death of W. F. McClure. The designation, which automatically makes Bailey acting chief of the division of engineering and irrigation and acting state engineer, was made, it is understood, to prevent the work of the office being hampered. It has been indicated that no appointment will be made until after the election.

Vernon W. Long, lumber broker in San Francisco and the Southern States, died in San Francisco, June 29th. He had been ill seven months. He was a native of Chapel Hill, N. C., and was 59 years of age. Long was graduated from the University of North Carolina in 1887 and immediately became editor of the Western Sentinel of Winston-Salem, a position he held until 1891. From 1889 to 1891 he also served as City Treasurer of Winston-Salem. Since 1891 he was in the sawmill, planing mill, wholesale lumber and commission business in Washington, D. C., Baltimore, Md., North Carolina, Florida, Mississippi, Alabama and California.

National Board For Awards Renders Important Decisions

At the last regular meeting of the National Board for Jurisdictional Awards held in the American Federation of Labor Building in Washington, D. C., the following important decisions were rendered:

Installation of Metal Windows; The installation of metal windows having cast-iron sills and cast-iron head blocks or in which three or more of the structural parts—that is, the sills, heads, jambs and mullions—are heavier than ten gauge, shall be the work of the Iron Workers; otherwise, it shall be the work of the Sheet Metal Workers.

Setting, Installing or Sticking of Artificial Stone: It is decided that the setting, installing or sticking of artificial stone whose material base is gypsum, plaster of paris or Keene cement; resembling plaster in character and density, wherever used on the interior of buildings, whether or not reinforced with burlap or other fibrous material, regardless of color, or whether or not faced with any special cement, whether precast or run in place, is the work of the Plasterers. Wherever artificial stone whose material base is of other cements which comes precast and resembles the natural stone in character and density, regardless of color, whether or not faced with any special cement, the work is that of the Bricklayers.

Placing of Trap Rock Floors by Terrazzo Methods: The finishing of cement floors where additional aggregate of stone is added by spreading or sprinkling on top of the finished base and troweled or rolled into the finish and then the surface ground by grinding machines, shall be under the jurisdiction of the Terrazzo Workers. When no additional stone or aggregate is added to the finished mixture, even though the surface may be ground, the work shall be under the jurisdiction of the Cement Finishers.

Cutting of Chases and Channels in Brick, Tile and Other Masonry: Inasmuch as no other trades except the Bricklayers, Plumbers and Steam Fitters, and Electricians have claimed this work, it is decided that the Cutting of Chases and Channels in Brick, Tile and Other Masonry is the work of the Bricklayers, except that the Plumbers and Steam Fitters and Electricians shall have jurisdiction to do cutting where required for the installation of their respective work.

The next meeting of the Board will be held at Atlantic City the week beginning August 2nd.

Wages Of Mechanics On Upward Trend—Labor Troubles Popular

Wages of skilled building mechanics throughout the country have been showing a strong upward trend, and the indications are that still higher labor costs are in prospect, according to the national monthly building labor survey compiled by the Building Construction Research Bureau of G. L. Miller & Co.

"There is little liklihood of any reduction in labor costs in the near future," said the survey. "On the other hand, with a continuation of construction activities at their present rate, the indications are that a shortage in labor supply may develop, especially in New York and the larger cities, which would undoubtedly give further impetus to the upward wage movement. Only a severe slowing up in building activities would have any material effect on the labor situation, and that does not appear likely for many months.

"Wage increases ranging from five to twenty-five cents an hour affecting more than 150 crafts in nearly two score cities, have become effective since April 1st. These increases have more than offset the decline in building material prices, which have been showing a downward trend since the first of the year. Building trades workers in practically all of the larger industrial cities of the country have been making demands for wage increases and changes in working conditions. Employers have been faced with the alternative of granting the demands or facing a strike.

"The number of strikes in the building trades this Spring has been greater than for many years. Shortly after May 1st it was estimated that more than 25,000 building craftsmen were on strike for wage increases and new working conditions in a dozen cities including Chicago, San Francisco, Los Angeles, Cleveland, Indianapolis and many other of the larger cities. Important strides, however, have been made during the last thirty days in settling many of these strikes and preventing new walkouts, and the labor situation has taken on a more satisfactory aspect.

"Cities in which wage increases have been granted skilled mechanics, especially in the trowel and mason trades, include Baltimore, Buffalo, Cincinnati, Dallas, Houston, Oklahoma City, Memphis, Pittsburgh, Salt Lake City, St. Petersburg, Fla., San Antonio, Tex., Columbus, O., St. Paul, Dayton, O., Chicago, New York, Indianapolis, Detroit, Philadelphia, Louisville, and St. Joseph, Mo. In Boston, twelve trades have signed two-year agreements, receiving increases of 15 cents an hour; and in Detroit, nine crafts have been granted advances ranging from 10 to 25 cents an hour.

"Unskilled or common labor continues in demand, although some cities such as Boston, Birmingham and Montreal report a surplus of this class of workers. The average rate for common laborers in May was 55 cents per hour for the entire country as compared with 54¼ cents in the previous month and 54 cents at this time last year."

JUNE BUILDING IN ALAMEDA

Mounting from $136,981 to $217,373 building in Alameda during June showed an increase of $80,392 over the corresponding month in 1925. There were 74 permits issued during the month. Of this number 20 were for new buildings to cost $185,790 and 51 were for alterations costing $31,583.

Educational Chief Tells Of Efforts To Supply Mechanics

By J. M. Hall, Agent for Trade and Industrial Education, Federal Board for Vocational Education, in an address before the Convention of the National Association of Builders' Exchanges

The necessity for replacing the gradually decreasing number of skilled and properly trained mechanics in the building trades is now recognized by all interests related to the industry. Although our population is increasing steadily, the number of skilled mechanics in the building trades is decreasing. Not only is there a decrease in proportion to the population, but there are actually fewer mechanics than there were a decade ago. For example, the number of journeymen plumbers has shrunk from 128,000 in 1910 to 103,000 in 1923. The numbers in most, if not all of the other trades has decreased proportionately and it is evident that there is a definite shortage of young men being trained to fill the vacancies created in the ranks of the journeymen by change of occupation, promotion, death, restriction of immigration, and other reasons.

Fewer Boys Entering Trades

From general information received from both employers and mechanics it is evident that there is in some cases a lack of organized cooperation between them in dealing with the problem of apprenticeship. As a result of this lack of co-operation there has been a decreasing number of boys entering the building trades and those who have entered have not been given the training and experience necessary for them to become skilled mechanics. This condition has also resulted in failure to get the best type of boys to enter the building trades as apprentices. The uncertainty of employment due to the fact that building construction is, in many cases, a seasonal industry and to the failure of contractors to cooperate in keeping apprentices employed, the lack of organized training, making it difficult for the apprentice to become a skilled craftsman, and the tendency to use apprentices as helpers or common laborers, have all contributed in discouraging the ambitious boy from entering the industry.

Irregularity of employment can be remedied only by a complete reorganization of the construction industry, or by co-operation between contractors in giving steady employment to apprentices. At present building construction is, to a large extent, a seasonal industry from which is demanded, at certain times of the year, a volume of production far exceeding its capacity. At other times the entire industry is practically at a standstill and when these periods come the apprentices naturally find employment in other lines where the pay and opportunities may be less, but where continuous employment is assured.

Building Over Entire Year

Our remedy for this situation is to adjust the demand for construction work by spreading this demand over the whole year. Important progress has already been made along this line through the activities of the American Construction Council, the Division of Building and Housing of the United States Department of Commerce and other agencies. It is readily apparent that a policy of continuous building activities will benefit not only those actually engaged in the construction industry, but will have a far-reaching effect upon business as a whole.

With a regularity of construction activities the manufacturer can better regulate his production. The dealer can better gauge the demand for material, thereby being able to regulate his stock and anticipate prices. The contractor can better plan his work, buy materials and assure steady employment to both journeymen and apprentices. Transportation companies can better adapt themselves to the needs and demands of the construction industry. In fact, the benefits of continuous and regular building activities will be distributed to the entire public, thereby reacting favorably upon the cost of construction. We are at this time, however, particularly interested in its effect upon apprenticeship and the reduction of human waste in industry.

Year Round Work

If the contractor has work the year round he can build up a permanent organization, and, since he can then retain his employees permanently he will naturally be more interested in their efficiency and more willing to invest money in their training. As long as building construction is a seasonal occupation the contractor must reorganize his working crew for every job and if he gets a poor crew on one job he will make what changes he can, but will trust to luck to get a more efficient crew on the next job. Since the apprentices do not remain permanently in his employ the contractor does not feel justified in financing a training program for apprentices who may be working for his competitor six months hence.

As long as there is a shifting of the building mechanics from one contractor to another any training scheme which is inaugurated must have the support of all contractors in order to equally distribute the burden of training expense. It is also necessary that arrangements be made whereby apprentices are given reasonably steady employment by the transfer of apprentices from one contractor to another and this can only be accomplished by co-operative action on the part of contractors and labor organizations.

Organized Training and Experience

In addition to having regular employment the apprentice should receive organized training and experience so that he may eventually become a skilled mechanic. The use of apprentices as helpers or handymen is one of the most serious abuses of apprenticeship and has contributed as much as irregular and uncertain employment to discouraging apprentices and in keeping boys from entering the building trades. If the apprentice is used as a flunky or as a common laborer for half of his apprenticeship period he will graduate from his four-year apprenticeship and demand journeymen's wages without having acquired the skill and experience which a competent journeyman should have. You cannot blame the four-year apprentice for demanding journeyman's wages because he has served as long a time as is necessary for a man to learn a trade providing he has had an opportunity to receive adequate training and experience. If you want journeymen who are skilled craftsmen you must make it possible for the apprentice to receive adequate training and experience during his apprenticeship period. By doing this you will not only develop more efficient journeymen, but you will also get more and better boys to enter the building trades. The building trades should attract the best boys because the wages are high, construction is one of our largest industries and offers unlimited opportunities for the ambitious boy.

Apprentice Training at Cleveland

Organized apprentice training in the building trades has not been entirely neglected, however. Apprentice training programs have been inaugurated in all parts of the country and a great deal of excellent work is being done. Cleveland, O., has operated an apprentice training program for several years which is proving entirely successful.

The Cleveland apprenticeship classes operate under the direct supervision of a joint committee composed of representatives of the contractors, the local unions, and the local board of education. Each candidate must pass an examination to satisfy the committee of the trade he wishes to enter that he is qualified as to physical and mental fitness. If the apprentice is passed by the committee he is indentured to a contractor and admitted to the part-time school. During his four-year apprenticeship period the technical part of the trade is correlated with the practical work. The joint apprenticeship committees meet weekly to adjust differences and enforce justice. The apprentice is given reasonably steady employment the year round from the time he is indentured until he receives his diploma the apprentice knows that someone is definitely interested in his success and that he is being given every available opportunity to make the most of his abilities.

Vocational Schools

During the past year 1500 indentured apprentices were enrolled in part-time vocational schools in the state of New Jersey. Last year 800 regular indentured apprentices were enrolled on a part-time basis in the vocational school at Milwaukee, Wis. Although the metal trades apprentices predominate in the Milwaukee school, there were a considerable number of building trades apprentices.

Among the other cities which are carrying on successful apprentice training programs in the building trades are Boston, New York, Philadelphia, Pittsburgh, Knoxville, Tennessee; St. Paul, Detroit, Los Angeles, Chicago, St. Louis, Joliet, Ill.; Cincinnati, El Paso and other cities. Since the plans for apprenticeship in these cities are similar to the Cleveland plan I shall not take your time to go into a detailed description of their programs.

Efficient Apprenticeship Program

The experience of these cities in apprentice training, however, has demonstrated that to be efficient an apprenticeship program should have the following characteristics:

1. A central apprenticeship committee or commission should be organized to plan and direct the work.

2. Sub-committees should be organized for each craft represented to carry out the plans of the central committee for the training of apprentices in their respective trades.

3. Apprentices should attend school during their working day.

4. Contractors should pay appren-

tices full wages for the time they are in school.

5. The school training should emphasize technical instruction.

6. Instructors should be masters of their trades.

7. Instructors should receive special training in methods of teaching their trade.

8. Attendance should be compulsory.

9. Classes should be restricted to employed apprentices.

10. Classes should be limited to 15 to 20 apprentices to one instructor.

11. Attendance certificates should be issued to every apprentice.

Co-operation Essential

Experience has demonstrated that apprentice training cannot be carried on successfully without the co-operation of the three principal parties concerned; namely, the employer, the employee, and the public. Before attempting to set up any form of training scheme a central apprenticeship committee or commission should be organized. This committee should be composed of from three to five building contractors or employers, from three to five employees representing the building trades organizations, and three other persons, two of whom should preferably be architects, engineers, and one public school official, preferably the local director of industrial education. This joint committee should be responsible for the formulation of a plan of apprentice training. It should secure the co-operation of the local board of education to the end that the classes may be conducted under public supervision and control, thereby making possible the use of Federal and State industrial education funds to aid in paying the salaries of instructors and insure partial administration of the program. It should appoint for each of the important building trades a subcommittee composed of employers, employees, and a representative of the vocational training department of the public schools. The responsibilities of these subcommittees should be as follows:

(a) The securing of such agreements on the part of employers and labor organizations as will insure the compulsory attendance of apprentices to training classes.

(b) The preparation of a proper course of study to meet the training needs of the apprentice.

(c) The securing of agreements from contractors as to rotating apprentices on different types of work to secure well-rounded experience.

(d) Aiding the local school director in selecting and training the instructor.

(e) Aiding the local school director and instructor in securing classrooms, books, supplies and equipment.

(f) Regularly inspecting the work of the class or classes and making suggestions to the central committee as to changes needed to improve the work.

Although apprentice training is still in its infancy the program is developing rapidly and will continue to devolop because it is meeting a fundamental need of society. It is both economically and socially sound to carry on any program of education or training which will increase the efficiency of the worker whether he be a carpenter or a surgeon and any trade or occupation which does not provide for the organized training of its personnel will suffer accordingly.

OPENS OFFICE

Chas. Muhs, Monterey architect, has opened branch offices in the Farmers' Mercantile Building, Salinas. The office will be in charge of C. C. Chamberlain.

Metal Trim Dispute Settled By Carpenters And Sheet Metal Men

An agreement, which is believed will settle the metal trim dispute of long standing between the Carpenters and Sheet Metal Workers International Unions, was reached at a joint meeting in Indianapolis on May 27th. For over twenty years both unions have been claiming jurisdiction over the installation of metal trim and repeated attempts to reach an amicable settlement which would be acceptable to both sides failed. The Building Trades Department of the American Federation of Labor at its annual conventions each year attempted to bring about a solution of the dispute as did the National Board for Jurisdictional Awards in the Building Industry. In December, 1920, the Board for Award rendered a decision which gave the Sheet Metal workers jurisdiction over the installation of most of the so called metal trim. This decision was not acceptable to the Carpenters and at the convention of the Building Trades Department held the following year in Denver, Colo. the organization withdrew from the department. Since that time jurisdictional disputes, many of which resulted in strikes, have kept the industry in a constant turmoil. The agreement reached at Indianapolis gives the Carpenters jurisdiction over the installation of most of the metal trim. The hanging of metal sash, the installation of metal column forms and the installation of ordinary plain metal shelving goes to the Sheet Metal Workers as does the sheet metal work in connection with store fronts.

The Executive Board of the United Brotherhood of Carpenters and Joiners of America at a meeting held in Indianapolis on June 3, 1926, voted to ratify the agreement. While the Executive Board of the Sheet Metal Workers International Association has not yet met to discuss the matter it is believed the approval of this body will be forthcoming shortly. The agreement is as follows:

"For the purpose of bringing about conditions of harmony and co-operation the following agreement is this day entered into and agreed to by and between the Sheet Metal Workers International Association and the United Brotherhood of Carpenters and Joiners of America.

"It is agreed that members of the United Brotherhood of Carpenters and Joiners of America shall erect and install all interior metal trim such as bucks, jambs, doors, casings, base, chair-rail, picture mouldings, partitions and all other material generally referred to as trim, except toilet partitions, which shall be done by Sheet Metal Workers.

"It is further agreed that in the setting of metal window frames that when frames are set, stayed, plumbed or braced such work shall be done by Carpenters, but if set or placed in an opening in walls left when a building is erected the work shall be done by Sheet Metal Workers. The hanging and adjusting of metal sash shall be done by Sheet Metal Workers. It is further agreed that any metal work in connection with store fronts shall be done by Sheet Metal Workers.

"It is further understood and agreed that in the erection of metal column forms the erection shall be done by Sheet Metal Workers. Any framing in connection therewith shall be done by Carpenters.

"It is further agreed that the installation of metal lockers also the erection of ordinary plain metal shelving shall be done by Sheet Metal Workers.

"It is further understood and agreed that the members of neither organization shall work on any building where non-union men of the other craft are employed.

"If any misunderstanding arises as to the meaning or carrying out of any of the provisions contained herein the matter shall be taken up with the General Presidents of the two organizations."

The agreement provides that it shall be effective when it has been approved by the executive boards of the two organizations and contains a proviso that it may be abrogated upon ninety days written notice should either party fail to carry out its terms. Wm. L. Hutchinson, John T. Cosgrove and Frank Duffy are signatories for the carpenters and John J. Hynes, Thos. Fay, W. J. Rooney, R. Pattison and James T. Moriarity for the sheet metal workers.

Closed Shop Conditions Threaten Motor Industry

Addressing the Detroit Rotary Club, Noel Sargent, manager of the Industrial Relations Department of the National Association of Manufacturers, declared that the American Federation of Labor is now endeavoring to establish closed shop conditions in Detroit building trades. "This effort," he declared, "will, if successful, be used to create a closed shop nucleus to establish complete unionization in the home of the American automobile industry. This industry faces a period of keen competition, and to increase production costs, which the closed shop always does, would drive business from Detroit and increase the cost of automobiles throughout the country."

He said that from 1899 to 1914, before war conditions influenced industry, the number of wage-earners in Detroit increased 160 per cent and in Los Angeles 357 per cent, both of these cities having open shop conditions industrially. "But in San Francisco," he said, "with closed shop conditions, the number of wage-earners actually declined 2½ per cent, despite great natural resources which should have attracted industry"

Mr. Sargent declared that if the efforts in Detroit to establish closed shop building conditions are successful they will unquestionably result in higher building costs.

"Definite figures," said Sargent, "prove conclusively the great economic advantage of open shop building conditions throughout the United States. They reveal the increased costs paid by taxpayers under the closed shop system, these same taxpayers also paying increased home building costs or higher rentals where closed shop methods control residential construction."

The total volume of construction in Detroit in 1925 was $180,000,000, Mr. Sargent stated. "Of this not over 25 per cent, or $45,000,000, was erected under completely closed shop conditions. On the remaining $135,000,000 the saving in cost as a result of freedom from closed shop regulations was approximately $27,000,000.

New Method For Pouring Concrete Tried At Longview

A departure from accepted methods of pouring concrete pavement, through the use of a new and patented distribution bucket, by the Longview Dredging and Construction company, in building part of the pavement on the new Pacific highway cut-off, Washington State, has demonstrated substantial savings of time and labor and increased efficiency through a more perfect mix, officials of that company announce. It is claimed to be the first time the mix has been distributed by this method on a paving job. The patented bucket distribution idea was developed for the pouring of the foundations of the east fir unit of the Long-Bell Lumber company mills, and proved so successful that it has been adopted for all classes of work by the Longview concern.

Two Departures

The new method embodies two departures from ordinary procedure, both made possible by the patented bucket. The mix is brought to the bucket from a central mixing plant, by truck. The bucket is attached to the boom of a Northwest crawler crane. The trucks dump their 20-foot load into the bucket. This dumping provides the first of three additional mixings from the time the mix leaves the central plant until it is poured into place on the grade. The second comes when the bucket, which is a rectangular shaped heavy steel box, is lifted from the ground and changed from a horizontal to a vertical position. The third mixing comes as the "soup" pours from the spout at the bottom of the bucket, and is distributed in place.

Claimed Efficient

The method of this distribution is the second novel feature of the system, and it is here that the saving in labor is effected. Chief Engineer Jack Neville, of the Portland Cement Association, who has seen the bucket in operation, has christened it the "Spreader's Delight." The batch from the bucket is controlled by a lever-operated trap at the end of the spout. The bottom is slowly moved above the grade, the flow of the mix is controlled by the man operating the lever, and the concrete streams out in almost exactly the position and quantity the man operating the lever desires. As this man is one of the spreaders, he sees to it that the mix is as evenly spread as possible. Two spreaders are all that are necessary to keep the stuff shaped up ahead of the "rod men," where using an ordinary paver requires three or four.

Patented Bucket

The patented bucket is the essence of the new system. Through its use on a crane, it has been proven adaptable to all sorts of work. In the mill foundation job, there were thousands of small piers to be poured. The crane eliminated the use of wheelbarrows. The patented trap on the spout of the bucket enabled any desired amount of concrete to be poured within the radius of the reach of the boom.

The speed of the system is shown by the fact that in the concrete pavement work this week, an average of 1500 square yards were laid daily, from one four-sack mixer at the central mixing plant. In pouring the base for the big refuse burner for the east fir unit, which is the largest burner in the world, 578 cubic yards of concrete were poured in 16 hours' time. Another great advantage is that the height at which the mix is poured is controlled by the reach at the boom. On the mill job, the highest pour made was 34 feet.

Effects Labor Saving

Patents for the bucket are held by W. A. Hanscom, president of the Longview Dredging and Construction Co.

The bucket used on the present job, the only one of its kind in existence, according to Mr. Hanscom, has a capacity of 20 cubic feet. It has already poured more than 35,000 cubic yards of concrete. The size could, of course, be adjusted to any desired capacity.

Welded Pipe Line Progress For East Bay Municipal Project

Work on the new ninety mile, Stable-Arc welded water supply line for the City of Oakland has progressed to the point where the most skeptical now admit that the new process for fabrication of the steel pipe is certain to revolutionize the entire scheme of production for this field in the very near future, according to J. F. Lincoln, vice president of the Lincoln Electric Company of Cleveland, Ohio.

More than five miles of the Stable-Arc welded steel pipe has already been laid in the trenches for this tremendous undertaking which is to bring the entire water supply for Oakland from the Mokelumne River. In addition each day sees vast quantities of the 65 inch in diameter pipe of 30 foot lengths, fabricated by the eight specially designed Lincoln Electric Company automatic welders at the West Berkeley plant of the Steel Tank & Pipe Company.

Accurate costs being kept on the fabrication of the Stable-Arc welded pipe already manufactured, provided ample evidence of the economies possible through the use of the new process. Known costs, it is said, on work already done, provide complete justification for the three million dollar saving which has been guaranteed by the Steel Tank & Pipe Company on the fabrication of the ninety miles of pipe, as against the estimate for supplying either lockbar or riveted pipe.

The tremendous savings being made possible by the use of the Stable-Arc process, result from reduced labor costs and a substantial decrease in the amount of steel required for the pipes. Due to the fact that it has been found possible with the Stable-Arc to provide practically one hundred per cent connections and joints, and thus to have a strength equal to the steel itself, the quantity of steel involved in the pipe has been materially reduced as against that which would have been required for other methods of construction where extra heavy steel plate is necessary to compensate for the weakness of the connections.

Important as it is, the fact that Stable-Arc welding has enabled the manufacturers to insure a thirty-five per cent reduction of the fabricating costs for the Oakland pipe job as against that which would have prevailed had the older methods been pursued, this is by no means the entire explanation of the inevitable revolution which will take place in the pipe-making field as a result of the application of this Lincoln process.

Of vital importance is the fact that the welded pipe is all being put through tests far beyond those which could be stood by pipe employing any other known joining method. Subjected to these tests, each thirty foot length has come through without failure or damage.

Using steel plate furnished by the Newport News Ship Building & Dry Dock Company and varying in thickness for ⅜ to ⅝ inch, the Steel Tank & Pipe Company in the West Berkeley plant runs the pieces through the straightening rolls, breaking rolls and bending rolls to form it into shape.

After the two half circular pieces have been tacked together by hand welding, they are then put through the specially built Lincoln automatic welders where the joining of the steel members is completed. This step finished the pipe lengths are sent to the testing machines.

In the case of the half inch pipe, the thirty foot sections are carried up to a pressure of 312 pounds per square inch, which gives about 21,500 pounds fibre stress in the steel. While under this pressure, each pipe section is sledged on every foot of the weld with a nineteen pound hammer.

Following this procedure, the pressure is increased to 400 pounds per square inch, which represents the elastic limit of the steel itself and in fact it has been found the steel in the pipe stretches sufficiently so that the circumference increases from one to two inches.

Only after having successfully passed this test without developing any leaks, is the Stable-Arc welded pipe passed through for final treatment. The sections after having been thus tested, are dipped in bitumastic, then wrapped with a protective covering and put in the trenches.

As the fabrication of the pipe for this ninety-mile undertaking progresses, sections are taken at random from those passing through the shop and subjected to a variety of other tests, anyone of which it is said could not be withstood by pipe made through the lock bar or riveted method.

After having subjected a number of sections to tension of 45,000 pounds to the square inch, these same lengths were then bent to a ninety degree angle. Here again, the tests showed the ability of the welded connections to withstand extreme abuse, for they came through in an entirely satisfactory manner.

Among other severe tests to which sections of the Stable-Arc welded steel pipe for the Oakland job, have been put was one which consisted of collapsing the pipe under extreme pressure. Examination of the sections which had been put through this test showed that the Stable-Arc welds had come through without failure.

All along the line, from the time the fabrication of the pipe was started, the welded connections have purposely been put through tests which it was definitely known could not have been stood by sections in which the older joining methods were employed. Entirely establishing its superior strength, the welded product has come through in every case to the complete satisfaction of engineers not only of

the Lincoln Electric Company and the Steel Tank & Pipe Company, but also to these of the East Bay Municipal District, under whose direction the project is being carried forward.

Early in March the first sections of the Stable-Arc welded steel pipe were laid in the trenches and hand welded together. Since that date additional sections have been laid with increasing rapidity and at a speed of progress which is establishing a new record for this sort of project.

It is upon the known facts as to the economy of the Stable-Arc welded steel pipe the proven superior strength of the product and the ease and speed of fabrication, that those close to the industry are predicting the early and entire replacement of lock bar or riveted pipe by the welded product such as is being used on the Oakland undertaking.

SAN JOAQUIN LOCK SYSTEM TO IRRIGATE VALLEY PROPOSED

A plan to render the San Joaquin river navigable for practically its entire length and a scheme to irrigate the San Joaquin valley by a series of dams and locks has been prepared by Paul Bailey, acting chief of the State department of public works, and will be contained in his report to the legislature of 1927.

Bailey offers two plans, one to build a long canal along the slope of the Sierra Nevadas, and second, a system on the floor of the valley which would necessitate raising the water from sea level to about 400 feet. Of the two plans Bailey believes the latter is best.

The favored scheme, Bailey says, would call for an artificial canal on the western side of the San Joaquin valley or use of the natural stream bed of the San Joaquin river and a multiple dam system.

These dams would form a series of ponds in the river channel, each nine to eighteen miles long. Pumps would be employed at each dam to boost the water 154 miles south, against the grade of the valley, to Fresno slough. The water then would be backed for sixty miles up the slough and thence southward by canals through Tulare lake basin to the southerly limit of the valley floor.

PALO ALTO BUILDING

June building operations in Palo Alto aggregate an expenditure of $162,685 as compared with $200,784 for the corresponding month in 1925. The total for the first six months of 1926 represents a construction expenditure of $1,147,850 as compared with $1,105,609 in 1925. Home building is the most active construction.

CERTIFICATES GRANTED

California State Board of Architecture, Northern Division, has granted certificates for the practice of architecture to the following: Robert A. Hutchisen, 1214 Webster St., Oakland; Reginald L. Mills, 1214 Webster St., Oakland; Mildred S. Meyers, 1201 Kohl Bldg., San Francisco; W. P. Stephenson, 2520 Haste St., Berkeley; William K. Bartges, 1022 Shattuck Ave., Berkeley; John I. Easterly, 2137 Tiffin Road, Oakland; Wm. B. Farlow, 58 Sutter St., San Francisco.

BUSINESS OPPORTUNITY

Architects and Builders Specialties Co., P. O. Box 6465, Miami, Florida, desires to represent San Francisco Bay concerns in Miami and vicinity as well as the state of Florida.

Economists Working On Plan To Forestall Long Periods Of Extensive Unemployment

A plan to forestall periods of extensive unemployment, such as often follow waves of unusual prosperity, is announced of economists who have been studying the problem of the worker and his job since the industrial crisis of 1921. The plan is presented in the report of a study made under the direction of a committee of the American Statistical Association, of which Mary Van Kleeck, director of the Russell Sage Foundation's Department of Industrial Studies, is chairman.

"The purpose of the plan," the report states, "is to lessen unemployment by providing facts needed to understand and control fluctations in the production of goods and obstructions to their sale. These interruptions in economic processes throw men and women out of work."

Declaring the unemployment spectre to be "no vague abstraction of economic theory," the report says: "To be out of work and out of wages in an economic world in which the dollar earned is the only means of securing food, clothing and lodging, overwhelms the worker with a sense of personal failure and discouragement, frustrates his hope of maintaining and raising the standard of living of his family and forces his children to begin wage-earning too early."

The report declares that the distress suffered by large groups of workers periodically thrown out of employment in times of business depression can largely be avoided by accurate advance information on the trend of employment. Such information, if gathered monthly under a comprehensive plan covering the entire nation and classified as to industries as well as geographically would, the report says, enable local governments and welfare agencies to forsee widespread unemployment many months earlier than is at present possible and to initiate municipal improvements and other relief measures before a crisis develops.

The report made public is an outgrowth of President Harding's conference on unemployment in 1921 and of Secretary Hoover's committee on the business cycle. As an illustration of the inadequancy of existing statistics, Miss Van Kleeck, who was a member of both the president's conference and Secretary Hoover's committee, points out that the nation's most eminent economists after careful study during the unemployment emergency of 1921 were unable to determine the number of jobless workers more closely than "from 3,500,000 to 5,500,000."

The plan now presented calls for the collection of employment statistics by state labor bureaus, with the United States Department of Labor the coordinating center. In addition, the plan commends and urges the extension of the regular collection of employment statistics by Federal bureaus having a direct relation to certain industries, such as the Geological Survey for miner and quarries, the Interstate Commerce Commission for railroads, and the Department of Agriculture for farms, and the reporting of all these data to the Federal Bureau of Labor Statistics for prompt publication of national indices of employment.

Answers to two main questions are sought in the proposed monthly surveys: the total number of employes on each payroll, and the total amount of wages paid in the monthly payroll period. The industries from which it is proposed to collect data are manufacturing, mining and quarrying, communication, building construction, wholesale trade, retail trade, logging and lumber work, and agriculture.

If the plan advocated is carried out, the committeee says, information will be available for business men, bankers and social agencies which will show each month for every important industry, for every state, and for every important community and industrial area, whether the number on the payrolls and the total wages paid are less or greater than in the preceding month, in the preceding year, and at other periods significant for comparison.

The business failures and suffering among wage-earners in 1921 resulted in directing attention to the possibility of preventing unemployment by lessening the fluctuations in business known as the business cycle, the committee points out. The chief factor in the control of business has been found in the control of credit by the Federal reserve system.

"Control of credit by the banks and the response of business men, which alone makes control effective, depend upon a fact basis for decisions," the report indicates. "Bankers, manufacturers and merchants are increasingly using the available facts. Changes in numbers employed reflect changes in activity in business. Changes in total wages, provided the rates of wages have not been altered generally confirm the evidence of change in activity in business." The report adds that changes in total wages may also be used as a guide to the buying power of the population.

The report points out that employment data, makes sales statistics or values of products, afford a standard of measurement common to the cotton mill or the automobile factory alike. Likewise, employment statistics afford a basis for comparison between industries

"This comparison frequently affords a clue to danger," says the report. "If, for instance, they reveal the raw materials are being produced in increasing volume without a corresponding increase in manufactures the danger that manufacturers may be overstocked with basic materials is indicated." —S. W. Builder and Contractor.

DISCONTINUE WEEKLY MEETINGS

Regular Friday night meetings of the Richmond Builders' Exchange have been discontinued, it is announced by L. C. Dexter, secretary. The action is taken to create more interest in the luncheon each Thursday noon. One business meeting will be held on Friday night each month.

The informal luncheons are becoming more popular each week and the attendance is steadily increasing. Following the meal business discussions are held and problems effecting the building trades are worked out.

Building News Section

APARTMENTS

Owner Taking Segregated Figures.
APT BLDG. Cost, $200,000
SAN FRANCISCO. Geary St. between Hyde and Larkin.
14-story and basement Class A reinf. concrete Community Apt. Bldg. (14 4 room and 28 3-room and 2 stores)
Owner — Joseph Greenback, Hearst Bldg.
Architect—C. O. Clausen, Hearst Bldg. Conservatory on roof, incinerator in each kitchen, coal fireplaces in living rooms, 2 passenger elevators.

Plans Being Prepared
APT. HOUSE. Cost, $200,000
SAN FRANCISCO. N Clay St. E. Powell.
14-story and basement class A apt. house (28 high class residential apts.)
Owner—M. Henderson.
Architect—J. C. Hladik, Monadnock Bldg.

To Award Segregated Contracts Within A Week.

Craftsmanship *is the priceless ingredient* sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

SANDY PRATT is still.
AT MEADOW Valley Inn.
IN PLUMAS County.
IN THE Feather River District.
WHERE FISH.
ARE SO plentiful.
THAT SANDY'S brother-in-law.
WHO IS a printer.
IN OAKLAND.
OWNS THE Goodhue Printing Co.
BIG CHAMBER of Commerce man.
AND EVERYTHING.
WANTS TO buy a boat.
TO CARRY the fish.
DOWN STREAM.
SANDY AND George Printer Goodhue.
HAVE WORN out.
ALL THE pack horses.
AND FISH transportation.
HAS BECOME a problem.
AND SANDY Pratt, president.
OF THE Pratt Building Material Co.
HAS BEEN offered.
BY ONE of the natives.
OF THESE tall mountains
THE "FASTEST row boat."
ON THE Feather River.
BUT SANDY'S relative by marriage.
SAYS ROW boats.
ARE ONLY as fast.
AS YOU work the oars.
AND MAYBE Sandy is green.
WHEN IT comes.
TO FAST row boats.
BUT SANDY is sure.
ABOUT HIS sand and rock.
BEING CLEAN and sharp.
"I THANK you."

This photo shows Sandy Pratt, producer of clean, sand and clean rock and clean gravel, trying to speed up the "fastest row boat" on the Feather River. Miss Ima Rock of Prattrock (near Folsom) home of Sandy's $250,000 rock, sand and gravel plant, is at the stern of "Sandab," the famous speed boat.

D-2147—Baltimore, Md. Gentleman wishes to get in touch with firms in San Francisco and vicinity desiring to market their products in the East.

PROSPERITY GREATEST EVER LUMBER SURVEY SHOWS

Calling the first half of 1926 the most prosperous January-June period on record, the July issue of the National Lumber Survey says:

"May prices of lumber and of all building materials were one per cent lower than in April, while prices for common brick, cement, and structural steel were unchanged."

Lumber was slightly higher and other building materials lower than a year ago. Construction costs, June 1, were 1.2% lower than on May 1, and wages were about one per cent higher.

Regarding general business considerations the Survey finds that industry and trade, from a lumber point of view were more favorable than in May, 1925, as also were labor and employment and industrial consumption of wood. On the other hand, transportation service was not quite so favorable as a year ago.

As compared with 1925, the Survey finds that building permits for May were 8.5% greater in value, building contracts 8.1% greater; but that farm purchasing power declined 3.3%, the export trade fell off 4.6%, and retail sales declined 6.5%. Cargo lumber shipments, however, are running 5% heavier than last year and car loadings 2.5% heavier. Lumber stocks were 5.4% heavier in May than in May a year ago, and the cost of lumber production was 4.5% higher.

Overruling all protests, the Richmond (Contra Costa County) city council has passed an ordinance requiring that all master plumbers pay a license fee of $100 per annum.

Official Proposals

NOTICE TO CONTRACTORS

(Gilroy High School District)

Notice is hereby given, by the Board of Trustees of the Gilroy High School District, Gilroy, County of Santa Clara, State of California, that separate sealed proposals are invited for the alteration of the present High School building. Separate sealed proposals are also invited for the construction of a cafateria building. All of the above are to be constructed on the present High School site of the said City of Gilroy, all in accordance with plans and specifications made by Ralph Wyckoff, Architect, 511 Growers Bank Building, San Jose, California, and filed with the said Board of Trustees.

Plans and specifications will be loaned out by the Architect to responsible contractors upon the deposit of $20, as a guarantee that said plans and specifications are to be returned on a specified date. Every proposal must be accompanied by a check made payable to the Gilroy High School District, equal to 5 per cent of the amount of the proposal and certified to by some responsible Banking Corporation, conditioned that the contractors whose bids are accepted will within 10 days after the award is made enter into a contract and will give good and sufficient bonds as required by law. Said bonds to be subject to the approval of the Board of Trustees of the said Gilroy High School District.

In case of a failure on the part of any contractor to enter into a contract within the period herinbefore specified, the amount of the deposit of such bidder will be forfeited to the said Gilroy High School District Upon the execution of the contracts and the approval of the bonds the deposits will be returned to the bidders. The deposit of the contractors other than the ones to whom the awards are made will be returned to the contractors making the proposal immediately after the contracts and bonds have been executed.

Bids will be received **up to and including 10 A. M., Saturday, July 17, 1926,** and must be addressed to Clerk of the Board of Trustees of the Gilroy High School District, and endorsed either:

"Proposal for alterati n of the present High School building," or "Proposal for the construction of a cafateria building."

Said sealed bids and proposals will be opened by the said Board at the office of the Gilroy High School at 10 o'clock A. M., on Saturday, July 17, 1926.

Successful bidder's contract will provide for completion of work not later than September 11, 1926. For each and every day after said date the building is not completed the contractor shall forfeit $10. The same amount to be paid to the contractor for each day the work is completed prior to September 11, 1926.

The Board reserves the right to reject any and all bids or proposals.

By order of the Board of Trustees.

Dated, Thursday, July 1, 1926.

E. E. BROWNELL,
Clerk of the Board of Trustees.

NOTICE TO BIDDERS

(Painting—Santa Barbara)

The Board of Education of the Santa Barbara School District, County of Santa Barbara, will receive sealed proposals at the office of said Board, 1235 Chapala Street, for painting shcool buildings, interior and exterior, in the Santa Barbara school district, in accordance with specifications on file in the office of said Board of Education.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

Bids must be sealed and filed with the Clerk of said Board at 1235 Chapala Street **before 2 P. M., July 13, 1926,** at which time and place bids will be opened and read in public.

A certified or cashier's check or bidder's bond in the amount of not less than five per cent (5 per cent) of the bid must accompany each proposal, drawn to the order of the Santa Barbara Board of Education , as a guarantee that the bidder will, if required by the Board of Education, within five days after being informed of the acceptance of his bid, enter into a contract with said Board in accordance with said bid and shall furnish the surety bonds as required. Said check or bond to be forfeited to the said Board should the bidder fail to execute contract and furnish bonds as above mentioned.

The Board of Education reserves the right to reject any or all bids and to waive any informalities in any bid received, and to determine the best bid submitted.

E. CARLOTTA DENGATE,
Clerk.

July 3, 1926.

NOTICE TO CONTRACTORS

(Sunnyvale School District)

NOTICE IS HEREBY GIVEN that the Board of Trustees of Sunnyvale School District of Santa Clara County, hereby calls for sealed proposals to be delivered to Fred T. Butler, Clerk of said Board of Trustees, **until Saturday, the 17th day of July, at eight o'clock P. M.,** at the Sunnyvale School Building, Sunnyvale School District, Santa Clara County , California, at which time said bids will be opened for the erection and completion of a four-room addition to present school building. These bids shall be presented in accordance with plans and specifications for said building on file with Wolfe & Higgins, architects, 2-3-4 Realty Bldg., San Jose, California, and with Fred T. Butler, Sunnyvale School District, Santa Clara County, California.

General work, including excavating and grading, concrete, carpenter work, interior equipment, miscellaneous ornamental and structural iron, sheet metal, built-up roofing and painting work, electrical work, brickwork, lathing, and plastering, plumbing and heating.

Complete sets of plans and specifications may be had by any bidder on application to said Wolfe & Higgins, architects, or to said Fred T. Butler, at the places hereinabove mentioned, and in each case shall be returned within one (1) week after securing the same.

Bids must be made on proposals obtained from said Wolfe & Higgins, architects, or from said Fred T. Butler at their addresses above mentioned, and must be signed by the bidder and accompanied by a certified check, certified by some responsible bank or banker and be made payable to Fred T. Butler, Clerk of the Board of Trustees of the Sunnyvale School District, to be retained by said school district as agreed and liquidated damages should the party or parties to whom the contract be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall be for at least 10 per cent of the amount of the bid.

Bids will be opened by the Board of said district on Saturday, the 17th day of July, A. D. 1926, at 8 o'clock P. M. at the Sunnyvale School Building in the Sunnyvale School District, Santa Clara County, California.

The Board reserves the right to reject any and all bids or any or all items of such bids.

FRED T. BUTLER,
Clerk of the Board of Trustees of Sunnyvale School District of Santa Clara County. State of California.

NOTICE TO BIDDERS

(Water Tank, Boiler and Power House Equipment)

The Board of Education of the City of Berkeley and of Berkeley High School District of Alameda County, State of California, hereby calls for sealed proposals to be delivered to the Secretary of the Board of Education of the City of Berkeley, at his office, 2133 Allston Way, Berkeley, California, **until Monday, July 19th, 1926, at the hour of 8 o'clock P. M.,** for the furnishing or the furnishing and installation of a water tank, a boiler and additional power house equipment in the Berkeley High School Building, located at Kittredge and Milvia Street, Berkeley, California, in accordance with plans and specifications therefor on file at the office of said Secretary to which reference is hereby made.

On deposit of Five ($5.00) Dollars said plans and specifications may be had by any prospective bidder for the work above listed. These plans and specifications may be retained for a period of five days.

If the plans and specifications are not returned to the Board within the time above specified, or are returned in a mutilated or damaged condition, the deposit will be forfeited and immediately used for the purchase of a new set of blue prints and specifications

All bids must be made on forms furnished on application to said secretary at the address above given.

Envelopes containing bids must be endorsed, "Bids on Power House Equipment and Water Tank." Bids must be signed by the bidder and accompanied by a certified check payable to the order of the Berkeley High School District of Alameda County, in the amount of at least ten (10%) per cent of the total amount of all items bid upon by each bidder, to be retained by said High School District as agreed and liquidated damages should the party or parties to whom the contract

is awarded fall to enter into the contract after the award, or to give the bond for the faithful performance of the contract, or any bond required by law. Bids will be opened by the Board of Education on Monday, July 19th, 1926, at the hour of 8 o'clock P. M., in the office of said Board, 2133 Allston Way, Berkeley, California.

The Board reserves the right to reject any or all bids, or any or all items of such bids.

Price, fitness and quality being equal, preference will be given to the products of the State of California.

By order of the Board of Education, June 21st, 1926.

GEORGE S. MOUSER,
Secretary of the Board of Education of the Berkeley High School District of the City of Berkeley and of Alameda County, State of Calif.

NOTICE INVITING BIDS

(Santa Barbara—Street Sweeper)

Sealed proposals or bids will be received in the office of the Manager of the City of Santa Barbara in the City Hall of said city **up to 11 o'clock A. M. on July 14, 1926,** for furnishing the said city with a motor street sweeper.

Information and specifications can be obtained in the City Manager's office.

Each bid must be accompanied by a certified check for 10 per cent of the amount of the bid and made payable to the Mayor of the City of Santa Barbara.

The right is reserved to reject any or all bids or to waive any informalities in any bid.

C. W. MOORE,
Acting City Manager.

NOTICE TO CONTRACTORS

(Porterville Union High School District.)

Pursuant to an order of the Board of Trustees of the Porterville Union High School District duly passed and entered on their minutes, notice is hereby given that the said Board will receive sealed bids for the erection and construction of a new wing to be added to the present gymnasium building at the high school site.

Plans and specifications are on file with the Secretary of the Board and copies may be obtained from him at 206 Putnam Ave., Porterville, Cal.

All bids must be in the hands of the Clerk at the High School on or before **July 14, 1926, at 7:30 P. M.,** at which time and place they will be opened by the Trustees. Each bid must be in a sealed envelope and be accompanied by a certified check or bidder's bond in an amount equal to at least 10% of the total sum of the bid submitted.

The Board reserves the right to reject any or all bids received.

Dated at Porterville, June 29, 1926.

AUSTIN MILLER,
Clerk.

NOTICE TO BIDDERS

(Turbine Pump — Fresno County)

Pursuant to an order of the Board of Supervisors of Fresno County, California, duly made and entered in its minutes on the 23rd day of June, 1926, notice is hereby given that said board will receive up to **2:00 o'clock p. m., of the 2nd day of August, 1926,** sealed proposals for furnishing and installing a Turbine Pump at the General County Hospital.

The said pump is to be installed in accordance with the specifications heretofore adopted therefor, and on file in the office of the clerk of this board. Said specifications offer three alternate propositions.

Copies of the specifications may be obtained from the clerk of the Board of Supervisors in the office of said board in the Court House, Fresno, California.

A certified check in the sum of 10 per cent of the amount of the bid, made payable to the Chairman of the Board of Supervisors, must accompany each proposal as a guaranty that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract with Fresno county to do such work as above mentioned, and furnish good and sufficient bonds according to law and rules of this board, conditioned upon the faithful performance of such contract, and all the provisions thereof.

Bids not accompanied by certified checks will not be considered.

The Board of Supervisors reserves the right to reject any or all bids.

Dated this 23rd day of June, 1926.

D. M. BARNWELL, Clerk.
By Fred E. Main, Deputy.

STATE OF CALIFORNIA
CALIFORNIA HIGHWAY COMMISSION
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, California, until two o'clock P. M. on July 19, 1926,** at which time they will be publicly opened and read, for construction in accordance with plans and specifications therefor, to which special reference is made, as follows:

The erection and completion of a maintenance shop building, truck shed, septic tank, wash house, and pump and oil house; the filling and grading of site with decomposed granite; the moving of shelters and the dismantling of tower and tank, at Bishop, California.

The buildings will be one-story wood frame and galvanized iron with concrete foundation. The shop building and pump and oil house will have concrete floors, the wash house will have wood floor. Plumbing and electrical work will be included in the general contract.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the offices of the California Highway Commission, 515 Forum Building, Sacramento, Cal., and Bishop, California, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco.

A deposit of twenty-five ($25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of plans and specifications to the said Commission in good condition.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Instruction to Bidders" annexed to the blank form of proposal, for full directions as to bidding, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated: June 21, 1926.

NOTICE TO BIDDERS

(Modesto—Pipe and Fittings)

Notice is hereby given that sealed bids or proposals will be received by the City Council of the City of Modesto at the office of the City Clerk, at 717 Tenth Street, **not later than seven-thirty (7:30) o'clock P. M., on Wednesday, the 14th day of July, 1926,** for the following material:

1500 feet of Class B Sand Cast, Class 150 Mono Cast or Class 150 de Lavaud, 8" Bell and Spigot end Cast Iron Pipe;

900 feet of Class B Sand Cast, Class 150 Mono Cast or Class 150 de Lavaud, 6" Bell and Spigot end Cast Iron Pipe;

Five (5) 6" Bell End, Class B, Cast Iron Tees;

Three (3) 8" x 6" Bell End, Class B, Cast Iron Tees;

Five (5) 6" x 4" Bell End, Class B, Cast Iron Crosses;

Two (2) 8" x 6" Bell End, Class B, Cast Iron Crosses.

F. O. B. Modesto, California.

All proposals or bids shall be accompanied by a certified check or Bidding Bond payable to the Mayor of said City, which check or bond shall be an amount not less than ten (10) per cent of the total bid. Bidders must state time of delivery.

The City Council reserves the right to reject any or all proposals or bids.

By order of the City Council of the City of Modesto, County of Stanislaus, State of California.

H. E. GRAGG,
City Clerk.

NOTICE TO CONTRACTORS

(Domestic Science Bldg.—Prescott School)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

NOTICE TO CONTRACTORS

(Library Stacks—University of California)

SEALED BIDS will be received at the office of the Comptroller, University of California, Berkeley, California, at or before 10 a. m., July 21, 1926, for general construction of South East Block of Stacks, Library, University of California, Berkeley.

Drawings and specifications may be obtained at the office of John Galen Howard & Associates, Architects, Crocker First National Bank Building, San Francisco, on deposit of $50.00 for each set of drawings and specifications taken out. Checks given as deposits are to be in favor of the undersigned. Deposits will be refunded on submission of a regular bid for the work and on return of said drawings and specifications in good condition. No bids will be considered unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the **California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on Aug. 2, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Santa Barbara County, across Gaviota Creek about 2½ miles north of Gaviota (V-S.B-2-E) a reinforced concrete girder bridge 24 feet wide composed of three 54-foot spans and one 30-foot span, and about twenty-six-hundredth (0.26) miles of roadway to be graded and surfaced with standard road surfacing, crushed gravel or stone.

San Diego and Imperial Counties, between top of Mountain springs Grade and Myers Creek Bridge (VII-S. D-Imp-12-H & A), about six and eight-tenths (6.8) miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: July 6, 1926.

E. H. COBEEN,
H. H. RAMSDELL,
Trustees of Live Oak Union High School District.

NOTICE TO CONTRACTORS

(Hospital Buildings—Canacao, P. I.)

Sealed Proposals, indorsed "Proposals for Quarters, Canacao, P. I., Specification No. 5157," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., **until 11 o'clock A. M., September 15, 1926,** and then and there publicly opened, for quarters at the Naval Hospital, Canacao, P. I. The work includes plain and reinforced concrete; asbestos shingle roofing and sheet metal work; steel and iron work; mastic flooring; metal furring and lathing; plastering; wood framing, doors, sash and trim; and plumbing and electrical systems. Specification No. 5157 and accompanying drawings may be obtained on application to the Bureau, to the Commandant, Navy Yard, Mare Island, Calif., or to the Commandant, Naval Station, Cavite, Philippine Islands. Deposit of a check or postal money order for $20, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification.

L. E. GREGORY, Chief of Bureau.
May 5, 1926.

NOTICE TO CONTRACTORS

(Officers' Quarters and Nurses' Home—Canacao, P. I.)

The Bureau of Yards and Docks invites attention to the fact that it will open bids, in the near future, on Specification No. 5157, "Junior Officers' Quarters and Nurses' Quarters, Naval Hospital, Canacao, Philippine Islands." The two quarters for Junior Officers will be similar and will be one-story buildings. The nurses' quarters will consist of a two-story main building and a one-story wing. The work includes plain and reinforced concrete; asbestos shingle and tin roofs; sheet copper work; steel and iron stairs and other steel and iron work; mastic flooring; metal studding, furring and lath; plastering; wood framing, doors, sash, trim and floors; shell lights in doors, windows and transoms; hardware, painting, and plumbing and electrical systems.

In the event that this work is of interest to your firm, you should forward to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to the Commandant, Navy Yard, Mare Island, Calif., or to the Commandant, Naval Station, Cavite, P. I., a check or postal money order for $20 payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawings and specification.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

Architects—Engineers—City and County Officials

How about bidswanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it? If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

American Standard Lumber Preferred By Home Builders

"Tell your lumber dealer you want American Standard lumber for your home" is the advice Chairman John H. Kirby, of the Central Committee on Lumber Standards is giving thousands of home builders this season.

American Standard lumber, according to the Central Committee, recognizes no board below 25/32 inch in thickness, which is preferred by the vast majority of lumber users for customary building purposes, rather than the sub-standard ¾ inch, 11/16 inch, or ⅝ inch material. Boards of 25/32 inch thickness have the greatest demand, due to their superior nail holding power, strength, stiffness and durability in place, all of which have been proven by scientific investigation and are recognized by well informed buyers and users.

The American Lumber Standards, the Committee points out, endorsed by the Government and specified in Government orders, and worked out by the industry with the aid of Secretary Hoover, definitely fix the finished thickness of 1 inch dry shiplapped common lumber at 25/32 inch, which has been established as the maximum size obtainable under conditions of good manufacture, from 1 inch rough green lumber, and at the same time efficiently serves such requirements as wall and roof sheathing and concrete form material, to which the majority of such lumber is put.

Uniform Lien Law Proposed By Hoover Is Up For Consideration

A national conference will be held at Denver this month to consider the final draft of a proposed uniform lien law as advocated by Secretary Herbert Hoover of the Department of Commerce. A tentative draft to be presented at the coming conference embodies the following principles:

"1. Liens shall be prior to any mortgage, where the mortgage is filed subsequent to the visible commencement of the building project.

"2. The tentative act makes certain that the building contract is a trust fund to be administered for the benefit of those furnishing labor and materials for the building improvement.

"3. Liens are to attach and be effective from the visible commencement of the building project.

"4. The owner is obligated to demand a sworn statement from the contractor each time before paying moneys to the contractor.

"5. The owner is obligated to prorate among laborers and material men moneys due original contractor according to the contractor's sworn statement.

"6. The general contractor is called up to furnish the owner a sworn statement at time of each payment under the contract, giving names of all laborers and material men engaged by the contractor, who have not been paid, showing amounts due each or to become due.

"7. Liens are to attach to form lumber used in construction and to lumber or other materials used in supporting excavations.

"8. Liens are to attach to fabricated material (such as mill work or terra cotta) whether or not used in the project for which it was fabricated.

"9. Notice to the owner. The material dealer is not obligated to give notice to the owner that he is furnishing materials on the job but may do so in order to protect himself fully for payment of materials furnished. During the first ten days after furnishing of the first of materials, the material dealer is protected in any event. In the event of a stipulated contract payment after the first ten days and in the event of no notice by the dealer to the owner, the material dealer is protected (since all payments are prorated on basis of his sworn statement) unless the sworn statement given the owner by the contractor is false, in which event the dealer is unprotected up to that juncture. If the dealer elects to give a notice in all cases he is fully protected if such notice is given in advance of the first stipulated payment under the contract. If notice is given subsequent to one or several payments already made, the dealer is in that case protected with regard to further payments to be made under the contract. The notice by the dealer to the owner need merely state that he is furnishing materials to a certain contractor for a certain job, giving location of property.

"11. There shall be no priority among lien claimants and all liens shall be on a parity.

"12. The lienor has one year in which to foreclose lien after filing.

"13. In the event the dealer finds it necessary to file a lien against the property, he must serve a copy of the lien on the owner within five days of filing the same with the county clerk. In case the owner cannot be found, such copy of the lien may be sent the owner by registered mail or may be posted or tacked on the building.

".14. Copy of lien must be served on the owner and in the event the dealer has no personal knowledge as to who the owner is, he may serve copy of the lien on the title holder of record in the office of the county clerk and such procedure will be held as constituting notice on the owner.

"15. When property is owned jointly by husband and wife, the tentative draft does not intend to affect the homestead rights existing in the different states as to husband and wife, but provides as to property owned jointly by husband and wife that the wife is agent for the husband and the husband is agent for the wife.

"16. The lien claims of the material dealer is valid even though the property is not owned by the contracting party, since in such an event the material men may have a lien upon the building and remove the same from the real estate and sell to satisfy his claim.

"17. The lien claim of the material dealer shall cover extras as well as material under original contract.

"18. A material man may remove unused materials from the property by giving the contractor credit for the same, unless the owner desires to retain the material and in such an event the owner must may for the same whether or not incorporated in the building.

"19. The material dealer may sue the contractor for what the latter owes him without prejudice to lien he may have filed against the property.

"20. Regardless of whether the contract for the improvement be verbal, written, express or implied, the material dealer's lien is valid and attaches

"21. Any agreement between owner and contractor that lien action shall not obtain against the building project in question does not vitiate the right of the material dealer to file lien in case he finds it necessary to do so for protection of his interest."

MORTAR ANALYSIS DEMAND AT SANTA BARBARA

H. A. Adrian, mayor of Santa Barbara, has just sent to Los Angeles to have an analysis made of the mortar in the chimney which fell June 29 during an earth vibration and killed Colin Orr, a three year old boy. The mayor exhibited samples of the mortar today and crushed them easily with his fingers.

"This mortar is not up to standard as provided by the city building code, judging from appearances," he said, "and I mean to see that proper action is taken if chemical analysis bears out appearances."

City Building Inspector L. L. Pope, after examining all theaters and public buildings, declared that no structural damage was done by the shock and that no building erected under the present city building code was damaged.

OAKLAND BUILDING IN JUNE TOTALS $2,674,656

A. S. Holmes, Oakland building inspector, reports the issuance of 853 permits during the month of June for improvements representing an expenditure of $2,674,656. During the past month 227 permits were issued for one-story dwellings costing $671,270. An itemized list of the Oakland operations are published on page three of this issue.

Permanent Walls

with Quick Construction

THERE'S more to Schumacher Plaster Wall Board than speed in construction. It's designed to build permanent walls.

That's the big advantage to this plaster wall board. You can use it for the finest interiors, yet you can build them in record time.

You'll save on labor. You'll save time. And you'll win the appreciation of the owner, for he can move in as soon as the last nail is driven in place.

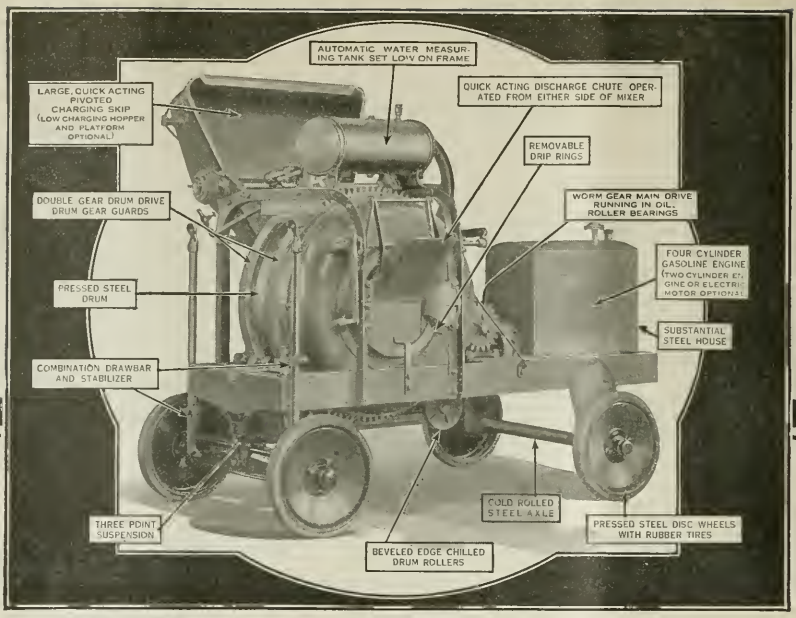
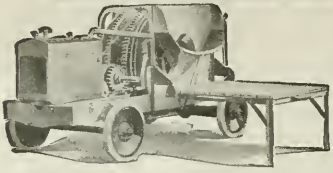
Schumacher Plaster Wall Board

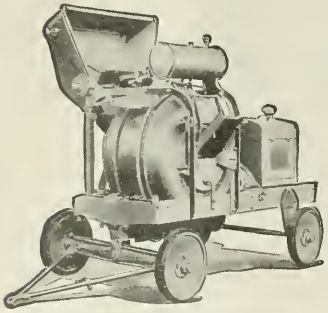
T5



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
QUICK ACTING DISCHARGE CHUTE OPERATED FROM EITHER SIDE OF MIXER
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

SURFACED ROADS IN STATE SYSTEMS TOTAL 145,508 MILES

Nearly 18,000 miles of road in the several State highway systems was surfaced in 1925, according to reports received by the Bureau of Public Roads of the United States Department of Agriculture from the State highway departments. In addition, 5316 miles of earth road was graded and drained according to engineering standards, making a total of 23,152 miles improved during the year, of which a little more than 10,000 miles was constructed with Federal aid.

At the end of the year the total surfaced mileage in the State systems had reached 145,508 miles, and there were 32,218 miles of earth road, graded and drained according to engineering standards. The total of 270,654 miles included in the State systems embraces the important roads of the country which have been laid out to serve the needs of the States. It is upon these systems that the important through routes of the Federal-aid system and the United States highways have been almost entirely laid down.

The surfaced roads in the State systems at the close of 1925 were of the following types: Sand-clay 12,677 miles, gravel, 64,408 miles, waterbound macadam 4804 miles, surface-treated macadam and gravel 15,858 miles, bituminous macadam 10,985 miles, sheet asphalt 839 miles, bituminous concrete 4821 miles, cement concrete 27,875 miles, brick 3111 miles and miscellaneous 131 miles.

BUILDING OUTPUT SHOULD NOT BE MEASURED BY PREWAR STANDARDS

The prophets of business reaction get busy every spring and tell us that the "building boom" is about to end. But summer rolls around and finds the "boom" unabated.

May it not be possible that American prosperity is leading to a normal building program so much greater than the prewar normal as to seem like a "boom" although no "boom" exists? The "own your home" movement is certainly gaining impetus every year. As long as general prosperity is maintained it seems likely that house building will increase. Why not? The statistics of many of our large cities indicate that fewer than 30 per cent of their inhabitants own their homes. Yet most of them would like to become home owners, and need but the offer of an attractive installment payment plan to make them willing listeners to the real estate salesman.

Moreover, now that nearly every family owns a motor car, living in a suburban home is more feasible as well as more attractive. The automobile has been properly given most of the credit for the extreme willingness of taxpayers to vote bonds for road and street improvement. May it not be that the automobile should be given most of the credit for the rapid spread of the "own your home" desire?

We have ceased being amazed at the great annual increase in moter car sales. No one would think of calling the present rate of those sales abnormal because they greatly exceed the prewar normal. Why then do we apply the prewar standard to real estate sales? Doubtless because we have not yet fully grasped two facts: First, that our national productivity is increasing rapidly. Second, that installment buying is not only greatly expanding certain markets but is itself leading to more steady employment.—Engineering and Contracting.

SANTA BARBARA WINS BETTER HOMES PRIZE

Announcement has just been made that Santa Barbara, Cal., has been given first place in competition with three thousand other communities in the National Better Homes campaign which has just closed. This announcement was made by James Ford, executive director of Better Homes in America, in a letter to Mrs. J. C. Knighten, chairman of the Santa Barbara better homes committee.

This campaign is sponsored each year by Better Homes in America, the national educational organization of which Secretary of Commerce Herbert Hoover is president. The headquarters of the organization are in Washington, D. C. Each year the rivalry is keen among communities, ranging in size from the smallest rural village or group of families to the largest metropolis, in carrying out the purpose of the organization to encourage the improvement of housing conditions.

PALO ALTO BUILDING RANKS HIGH ON PENINSULA

Palo Alto led the four peninsula cities of San Mateo, Burlingame, Redwood City and Palo Alto in the amount of building for the first six months of 1926 with a total of $1,147,840. This was a slight increase over the first six months of 1925, when the total building permits for Palo Alto was $1,105,609. For the month of June, 1926, Palo Alto issued building permits amounting to a total of $162,685, being exceeded for the month by Burlingame, whose total was $224,765. For the first six months of the current year the total building permits for Burlingame amounted to $1,029,675, as against a total of $1,196,901 for the first six months of 1925. Redwood City showed a total of $581,228 for building the first six months of 1926 and San Mateo $542,258. The total amount of building construction for the four peninsula communities for the first half of 1926 was $3,301,011.

ORDERLY BUYING POLICY IN U. S. NAVY

Evidence of the practical application of the accepted theory that government expenditures should be made as far as practicable in such a manner as to secure the advantages of slack season prices to itself and benefit industry and the public by keeping up production were made public in relation to the Navy Department.

The Navy, notwithstanding that this is decidedly the age of steel in navy armaments, uses an enormous amount of lumber—so great in fact that it constantly has $5,000,000 worth of lumber stock on hand.

In a letter to the National Lumber Manufacturers Association here, divulging the Navy's intention of depending in all its purchases upon the American Lumber Standards and the inspection services of the regional associations of lumber manufacturers associated with the National, the Bureau of Construction and Repairs says in part:

"With regard to the quantities and times of purchase, this Bureau, in cooperation with the Bureau of Supplies and Accounts, desires to have lumber purchased in quantities that will be most attractive to the industry, in so far as Naval requirements, legal and financial restrictions on the Navy permit. Quantities neither so large as to upset the market and prove burdensome to any single concern, nor so small as to be unattractive or involve a disproportionate cost for inspection and freight will be called for if we can help it.

"We desire to time our purchases so as to fit in best with the seasonal characteristics of the lumber market. The Navy buys large quantities of both hard and soft woods and has upwards of five millions of dollars constantly invested in lumber stocks. Our purchases of ash, oak, pine, fir, spruce, and the like are considerable. It is believed that by properly timing our requirement orders we can not only get the lowest prices, and the best attention, but we can also exert a steadying influence on the market, reducing the slow time in depressions and tending to cut peaks."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Petitions will be presented to the Roseville city trustees requesting steps to be taken to acquire a municipal water system.

Unfilled orders of the United States Steel Corporation on June 30 aggregated 3,478,642 tons, a decrease of 170,608 tons compared with the end of the preceding month.

Pennsylvania State College is planning to conduct an experiment next fall and winter on the effect of frost on concrete, the coarse aggregate used to be a good quality local sand stone.

Sheet Metal Workers Local No. 104, San Francisco, has advised the State Board of Harbor Commissioners that on and after September 1, 1926, the minimum wage scale for journeymen sheet metal workers will be $9 a day.

California State expenditures warrants totalled $111,117,493.30 for the fiscal year which ended June 30, 1926, an increase of $7,392,489.50 over the previous year, it is announced by State Controller R. L. Riley.

The state harbor board has been authorized by the state board of control to increase insurance on its holdings by $400,000. The board at present has insurance of approximately $3,400,000. The increase was authorized at a conference of William Sherman, president of the harbor board and Joseph Byrne, assistant secretary, with the board of control.

Glidden Company of California with the principal place of business in San Francisco, capitalized at $310,000, has filed articles of incorporation in Oakland. Directors are: Adrian D. Joyce, Cleveland, Ohio; Alexander Sclater, Los Angeles; Chas. C. Huston, San Francisco.

A suit to test the validity of the validity of the $278,000 bond issue of El Solyo Irrigation District, northwest of Westley in Stanislaus County, has been filed in the superior court at Modesto. The bonds were voted to finance construction of an irrigation system and a steam power plant to cost $64,000.

Mildred S. Meyers, daughter of Henry H. Meyers, San Francisco architect, has been granted a certificate to practice architecture in the State of California. Miss Meyers is a graduate of the Alameda High School and has been connected with the office of her father for some time.

The report of the investigation on the flow of water through pipe and box culverts, conducted during the past four years by the State University of Iowa in co-operation with the U. S. Bureau of Public Roads, has been completed and is now being printed by the State University of Iowa. Included in the tests were concrete, vitrified clay and corrugated metal pipe culverts ranging from 12 to 30 inches in diameter, and concrete box culverts in the following sizes: 2 ft. by 2 ft., 3 ft. by 3 ft., 4 ft. by 4 ft., and 4 ft. by 3 ft.

Berkeley Builders' Exchange is taking an active part in the promotion of safety in the East Bay section. Members of the Exchange recently paraded the streets accompanied by automobiles carrying banners warning what happens when "Boulevard Stop" signs are not obeyed.

June, 1926, building operations in San Jose represent an expenditure of $439,385, exceeding those of May, 1926, and June, 1925. The gain over the preceding month was 32 per cent and over June, 1925, was 31 per cent. Permits for 45 residences were issued last month.

Charged with having used another person's license in violation to the Piedmont city ordinance which provides that plumbing contractors must pay a fee of $25, John White, plumbing and sewer contractor, will be tried July 19. White is at liberty on $50 bail following his arrest for the alleged violation of the city ordinance.

The San Francisco Labor Council has filed a protest with the Board of Supervisors against any proposed change of time in San Francisco to bring about daylight saving. A letter signed by Secretary John A. O'Connell states that a study of the daylight saving plan in other cities has convinced the local labor body that no benefits are to be derived from the same by either labor or industry.

Chas. J. Heinemenn, Oakland city plastering inspector, announces that in future the inspection of all exterior plastering will be made by building inspectors. This course is taken to speed plastering inspections. Each building inspector will inspect the rough carpentry work, the exterior wire lathing and the second coat of cement plaster before any dash or jazz texture is applied.

Construction of a $1,800,000 power development project in Tehama county is contemplated through a water application filed at Sacramento by P. B. Cross of San Francisco. He asked authority to divert 12,000 acre feet of water from Deer creek annually. It is proposed to construct a multiple arch reinforced concrete dam 75 feet high.

Speaking before the annual convention of the United States Chamber of Commerce, Paul W. Litchfield, president of the Goodyear Tire & Rubber Company, expressed the attitude of the vast majority of the employers of labor in this country toward the labor question when he said: "It the aim of our people and our government to afford equal opportunity to each man to make his time on earth productive for his own advancement. It is naturally the desire of management to give wages as high as consistently possible; first, because steady work and high wages mean increased purchasing power for the products of industry, and second, because it means satisfied employes and production cannot be efficient in the presence of a general feeling of dissatisfaction."

Building in southern Alameda county this year will total $2,500,000, in the opinion of Frank Hann, Hayward building contractor and president of the Eden Township Federation of Improvement Clubs. The estimate, Hann said, is based on a careful study of conditions and past results, and on conferences with builders and civic heads. In the Hayward district alone the building program will probably total $1,500,000, according to Hann.

Architect and engineer, Parker O. Wright, Central Bldg., Los Angeles, and Francis H. Gentry, 316 Marine Bank Bldg., Long Beach, have been commissioned by the Federal Government to prepare plans for the architectural features for the Coolidge Dam near Florence, Arizona. The plans will include approaches, driveway, ornamental balustrades, power house and gate houses. The design has been approved by the Fine Arts Commission in Washington.

A $5,500,000 power project is planned by the Turlock Irrigation District, which has filed an application with the state division of water rights to divert water from the Tuolumne River and Moccasin Creek. The district asks authority to use 1200 cubic feet and 20,000 acre-feet of water each year in developing 27,000 theoretical horsepower. The diversion point will be near Jacksonville, Cal. Electric energy will be wholesaled to the San Joaquin Light & Power Company for distribution in Stanislaus County, according to the application.

The Fresno Building Trades Council, participating in a state-wide poll of building crafts, has adopted a motion opposing the proposal to place California in the ranks of states using the daylight saving plan during the Summer season. The action was taken on the recommendation of F. C. McDonald, president of the state organization, who declared a movement had been launched and financed by stock brokers to have the next legislature enact a law establishing the daylight saving scheme each year from the first Sunday in April to the last Sunday in September.

A cross-complaint seeking judgment of $30,273.93 alleged due by C. F. Virgillo and N. L. Bican, contractors on the construction of the Melones railroad and wagon road grades in Tuolumne County, has been filed by the Mathews Construction Company. The cross complaint was filed in reply to the suit recently filed by Virgilio and Bican in which the two alleged that the construction company owed them in excess of $62,000 for labor, in addition to $30,000 damages. The sum sued for by the Mathews company is alleged due on open book account for materials and supplies.

Carl Pleasant Company with offices in the Heard Bldg., Pheonix, Arizona, on a bid of $2,926,000 has been awarded a contract by the Maricopa County Municipal Water Conservation District No. 1, to construct the Frog Tanks for the Agua Fria-Beardsley project. Construction will involve a multiple arch dam 170 feet high above the river bed, 235 feet long in the channel, 1800 feet long on top with a diversion dam on the main canal 35 feet high and 700 feet long with main canal 35 miles in length of which 4 miles have been completed. The storage dam will have a capacity sufficient to irrigate 40,000 acres.

ALONG THE LINE

T. M. Edwards, architect, has moved from 833 to 525 Market street, San Francisco.

H. C. Weisenburger has been appointed building inspector of Watsonville, Santa Cruz county, a position paying $200 a month.

John Harpe will be a candidate for the office of county surveyor of Mendocino county. E. H. Smith, incumbent, will also be a candidate.

Eugene McGrane, formerly connected with the office of L. M. Canady, project engineer for the Vallejo municipal water project, has been transferred to the office of City Engineer C. D. Kilkenny.

Public Spirit Club of San Francisco urges that Mayor Rolph appoint a commission to investigate all transbay bridge plans and submit recommendations to the Board of Supervisors.

Paul Valle, who has served as city engineer of Coronado pending the appointment of a city manager, has tendered his resignation. Duties of the city engineer will be assumed by the new city manager.

S. G. Whittelsey, former acting city engineer of Chico; has taken over the engineering office in San Francisco, of C. C. Cottrell, who is now Manager of the Highways Bureau of the California State Automobile Association. Cottrell relinquished private practice last April to return to the automobile association.

Col. D. H. Sawyer of Washington, D. C., secretary of the Associated General Contractors of America, will be in San Francisco, July 21-24 on a national survey designed to rid the construction industry of "fly-by-night" contractors. While here he will consult with local builders regarding remedial steps to stablize the industry.

Building Inspector L. L. Pope and three other members of his department have been granted increases in salary by the Santa Barbara city council, acting upon the recommendation of Acting City Manager C. W. Moore. Pope's salary was boosted from $250 a month to $3600 a year; that of the structural plans checker from $225 to $250 a month; the assistant building inspector from $150 to $175, and the counter clerk from $125 to $150.

State Engineer Wilbur F. McClure, who died June 22 of a heart attack while on a tour of inspection at Sly Park, El Dorado county, left an estate valued at approximately $21,500 and bequeathed it to his widow and one daughter under the terms of his will, which has been filed for probate in the Superior Court at Sacramento.

The annual meeting of the American Association of State Highway Officials will be held, this year, at Pinehurst, N. C., November 8 to 12.

Following an all-night storm meeting, the Chicago city council voted an appropriation of $75,000 to grant a 30 per cent increase in salaries to engineers and technical employes of several municipal departments. The strike, which affected public works of an aggregate cost of $10,000,000, was the first walkout of the kind among the professional engineering employes of the city and included the technical staffs of Health, Building and Public Works departments.

Architect John M. Cooper, 321 Rives-Strong Bldg., Los Angeles, announces the opening of two new branch offices, one at 720 Alameda Title Insurance Bldg., Oakland, with Charles Webber in charge, and one at Southwest Union Securities Corp., Commonwealth Bldg., San Diego.

TRADE NOTES

Johns-Manville, Inc., has opened offices and display rooms at 312 Builders' Exchange Bldg., Oakland.

W. B. Jefferson will operate in San Francisco under the trade name of The Greater City Lumber Company.

Walter L. Ball, retired Sacramento contractor, died in that city, July 6, at the age of 61 years.

Warehouse quarters of the Kingsburg Planing Mill at Kingsburg, Fresno County, were destroyed by fire July 10.

Oakland Steel Foundry Co., capitalized at $50,000, has been incorporated in that city. Directors are: E. W. Olin and A. S. Landgren of Oakland; R. W. Bruce of Alameda and R. Gregg of San Francisco.

R. W. Pratt and J. E. McCarty of Lodi will operate in that section under the trade name of Bright Spot Electric Co., with headquarters at 235 East Market Street, Lodi.

Wm. J. Moninan Co., successor to Monihan and Slavin, plumbing and heating contractors, announce the removal of shop and offices from 249 Natoma Street to larger quarters at 1552 Fulton Street, between Baker and Lyon Streets, San Francisco.

Chas. S. Mabrey Construction Company has filed articles of incorporation at Sacramento. The company is capitalized at $1,000,000 and has the following directors: Chas. S. Mabrey, F. E. Irish and Robt. H. Schwab, all of Sacramento.

Home Service Co., 9th and Larimer Sts., Denver, Colo., desires to represent Central California firms in that section for any equipment that goes into the building of a home

Triumph Steel Company has called a stockholders' meeting in Reno, Nevada, July 14, for the purpose of reincorporating under the name of Triumph Steel Corporation and increasing the capital stock to $1,000,000. The announcement is made by E. E. Drees of Petaluma, a director of the concern.

C. J. Kubach Company, Merchants National Bank Building, Los Angeles, bidding $2,852,700 has been awarded the contract to erect the Los Angeles City Hall, exclusive of foundation work, steel and erection, elevators, etc.

Reading Iron Co. announces that H. E. Vickerman, formerly with the Oil Well Supply Co., has joined its sales force and will sell the company's wrought iron pipe in California. His headquarters are at 826 Van Nuys Bldg., Los Angeles.

L. C. N. Company, Inc., distributors of a door check and closing device manufactured by Norton Lasier Company of Chicago, Ill., has opened offices at 51 Jessie Street, San Francisco. Officers of the company are L. C. Norton, president, W. D. Putnam and B. R. Blackburn, vice-presidents and G. McGill, secretary-treasurer. For the present the company will confine its efforts to the sale of Norton products alone.

William Redmon, Alaméda contractor, has petitioned the United States District Court to be adjudged a voluntary bankrupt. He listed liabilities of $114,576 and assets of $500. Redmon is a member of the firm of Redmon, Page & Pond, a San Francisco firm. Default of a $67,569 bond for state highway work is listed as a liability.

Consolidation of V. S. Persons and Dwan and Company of San Francisco is announced. They will continue to market the same lines as heretofore through the firm of Dwan and Company with offices and warehouse quarters at 532-534 Sixth Street, San Francisco. Mr. Dwan, president of Dwan & Company, has long been identified with the sale of Toch Bros. products and more recently secured wide distribution of Weisteel compartments. Mr. Persons, vice-president, has been actively engaged as manufacturers' agent in Northern California territory for steel building materials and in that capacity has developed the sale of steel floor joists and freight elevator trucking doors. In addition the lines previously marketed by the separate concerns, Dwan and Company will act as distributors for Kerlow Steel Floor Gratings which have enjoyed wide circulation in the eastern territory.

MANY EARTH-LIME STUDIES UNDER WAY

A number of experiments on the use of lime on earth roads and for subgrade treatment will be under way this summer.

Test roads are being built in Wisconsin, using a thin gravel surface over the lime-treated subgrade. This work will be done by the Maintenance Section of the Wisconsin State Highway Department.

The University of Illinois is building several test sections near Champaign to determine the value of lime treatment preparatory to oiling earth roads. It is expected that the lime will stabilize the soil, and at the same time prevent the emulsifying of the oil by the clay.

In Missouri and Virginia sections are being treated with lime to obtain further information concerning its use on earth road without the addition of any surfacing material. In Ohio another short section of subgrade for concrete pavement has just been completed and the tests in the laboratories at Ohio State University are progressing.

ORGANIZATION NEWS

SANTA CRUZ SELECTED FOR ANNUAL BUILDERS' DAY.

Casa Del Rey Hotel, Santa Cruz, will be the scene of the 1926 Builders' Day Outing of the San Francisco Builders' Exchange, September 4, 5 and 6, it is announced by Sam F. Cohn, chairman of the permanent entertainment committee of the exchange.

During the past few weeks the exchange has been in communication with the Santa Cruz interests and following a series of meetings it was decided to accept that city as the location for the 1926 outing.

"Adequate housing accommodations, paved highways and the facilities which abound Santa Cruz for sports, prompted the committee to select that location for the 1926 outing," says Cohn. "This year we expect to provide for several thousand more people than has heretofore attended our festivities. After a careful survey of various locations the committee decided that Santa Cruz was the most appropriate site."

Preliminaries for a program are now being arranged, according to Cohn, who has been selected as chairman of the Committee of Arrangements for the Outing. As chairman, Cohn will be assisted by eleven committee leaders who will select others to serve on their respective committee.

"Preparations will be made at once to secure the best talent available to journey with us to Santa Cruz," Cohn says. "The quantity and quality of talent, however, will depend upon the assistance given by members of the exchange in prize donations and advertisements for the official program, especially the latter, inasmuch as financing the outing depends mostly upon the revenue received from this source."

CLEVELAND CARPENTERS RETURN TO WORK

Cleveland carpenters striking a number of jobs returned to work June 16th following dismissal of the contempt of court proceedings brought against them by the Building Trades Employers Association. On June 7th the court of common pleas issued a temporary injunction against all the unions in Cleveland restraining them from striking on account of a jurisdictional dispute between the carpenters and sheet metal workers over the placing of metal floor domes. The following day the carpenters struck a number of jobs in defiance of the order of the court and were immediately cited for contempt. Under the terms of the agreement which put the men back to work the dispute was referred to the presidents of the two international unions involved, in compliance with one of the provisions contained in the peace agreement negotiated between the two organizations in Indianapolis on May 27th. The employers association allowed the carpenters to be withdrawn from the injunction proceedings but all the other trades in the city are now enjoined from striking over this particular despute.

Upon request of the San Joaquin county, board of supervisors, the war department has amended authority given for the construction of a bridge across King Island cut, about twelve miles from Stockton, by extending the date of commencement to work to July 12, 1927, and completion to July 12, 1930.

Increase Production Only Means To Better Position Of Wage Earner

By A. W. Dickson, Executive Secretary, National Association of Building Trades Employers

Back in 1899 the average earnings of the American worker amounted to $426 per year. Twenty-four years later or in 1923 the figure had increased to $1254 a year or nearly three times as much. During the same period of time the cost of living rose to about twice its former level. The worker today, however, is about fifty per cent better off in "real wages" than the worker of twenty-five years ago.

Organized labor has repeatedly tried to claim all the credit for bringing this condition about. While it is true that the labor movement has been partly responsible for the change the greater share of credit must go to the fact that increased production made possible by more mechanical power per worker makes high wages possible.

It is perfectly obvious that increasing production is the only possible means for bettering the position of the wage earners. It is to be regretted, however, that this principle is utterly disregarded by such a vast number of workers in industry. In England there is a big demand for moderate priced homes for working men yet the average building worker there fully believes that if he only produces a minimum amount of work his act will produce jobs for other workers out of employment. The result is that comparatively little of this class of work is being done there on account of excessive costs, consequently every one suffers.

It does not take any great amount of reasoning ability to arrive at the conclusion that a horizontal reduction of production must necessarily carry with it an equivalent increase in production cost. If wage rates remained the same the increased cost of living brought about by low production would bring the "real" wage figure down in exact proportion to the decrease in work done.

We are rapidly approaching the time in this country when mass production made possible by the use of labor saving machinery will make it possible for all the needs of the human race to be produced in less working time than is now required. The only possible way to hasten that time is to combine improvements with hard work. That will bring down the cost of commodities thus further increasing the "real" wage of the workers—the only kind of a wage increase that is of lasting benefit to every one.

Besides providing for $20,000 worth of improvements on the system, the electric light distributing system owned by the city of Roseville, Placer County, netted $14,632.04 during the fiscal year just closed, according to a report filed with the city trustees by City Clerk Frank Chilton.

Pacific Coast Building Totals For June And First Six Months Of Year 1926

Building permits totaling 83,694 and involving $261,043,391 in building costs were issued during the first half of 1926 in 95 major cities comprised in the Pacific Coast section of the National Monthly Building Survey of S. W. Straus & Co.

The Vancouver area of British Columbia, gaining 42% over last year, and the four Idaho cities included in the Straus survey, increasing by 32%, were the only groups showing gains over the first half of 1925, although all but California and Arizona report gains over 1924.

A grand total of 13,394 permits to cost $19,109,134 issued during june in these 95 cities reflects a 20% increase over the May figures and but a 2% reduction from the heavy building program of last June. All of the groups except Idaho and Oregon show gains over May and all but California and Oregon report substantial increases over June of 1925.

The greatest individual increase reported comes from Lewiston, Idaho, where the first half-year's total is 394% above that of 1925 and 509% above that of 1924. The June figure is 426% above that of last June.

Los Angeles, issuing 19,228 building permits during the first half of this year, totaling $64,161,395 in building costs, shows a 22% reduction from the 1925 comparative figure. It represents 34% of the total for 57 California cities and 24% of the total for 95 cities of the Pacific Coast reported. The June figure, $11,856,082, shows a 10% gain over that of May.

San Francisco, although somewhat embarrassed by a walkout of carpenters, issued 5,189 permits to cost $32,223,117 during the half-year, higher than any previous comparable figure, 18% above that of 1925 and 23% above that of 1924. The June total, $8,479,058, is the highest monthly total in the city's history, 221% above the May figure and 81% above that of last June.

Seattle issued 5,653 permits calling for $18,330,170 in building costs during the first six months of this year, 8% more than in 1924, but 1% below the comparable figure for 1925. The total for June, $2,670,380, is 23% above the record for last June, but 7% below the May figure.

Portland's half-year total, 6,710 building permits to cost $17,257,075, shows a 14% gain over 1924, but a 24% reduction from last year's comparable figure. The June total, $2,879,180, shows a 4% reduction from May's figure and a 35% reduction from last June.

Oakland, issuing 5,597 permits for buildings to cost $15,489,615, during the past six months, shows a 15% loss from the 1925 record, but a 4% gain over 1924. In June, $2,674,656 in permits issued, reflect an 11% gain over May, but a 3% reduction from last June.

San Diego, reporting 4,202 permits for $9,534,446 in buildings, during the half year, shows gains of 15% and 30%, respectively, over comparable figures for 1925 and 1924. The $1,493,431 issued in June is 19% below the May total, but 15% above that of last June.

The following table gives the number and construction cost volume of building permits issued in various cities of the Pacific Coast area during the first six months of 1926, the cost volume for the first six months of 1925, and the cost volume for June, 1926, and June, 1925, as these figures are reported by building department executives.

City	No.	1st 6 months 1926 Cost	1st 6 months 1925	June, 1926	June, 1925
CALIFORNIA

CONCRETE PIPE INTERESTS MEET AT SAN JOSE

Concrete pipe tests, destribution of technical information on the value of this kind of pipe for sewer and irrigation, and following this an informal banquet, were events on July 10 that marked the meeting in San Jose of 150 members of the California Concrete Pipe Manufacturers' Association.

Under the direction of Milo B. Williams of San Francisco, consulting engineer for the association, tests were conducted with concrete pipe of various sizes manufactured by plants at Selma, Yuba City, Merced and Sunnyvale.

The tests were uniformly high, and the visiting consulting engineers expressed favaroble comment on the quality of the pipe.

At the banquet which followed in the evening at Hotel Vendome, Judge Percy O'Connor and Milo B. Williams were speakers. Citizenship and organization were linked by Judge O'Connor in his talk. Williams gave a brief history of the concrete pipe industry and explained the purpose of the manufacture's association. This he said is to aid in the production of a uniform high standard of concrete pipe and to educate builders to its uses and excellence.

TWO RESIGN FROM STAFF OF STANDARD SANITARY

Says the Richmond Record-Herald, under date of July 9:

"Newton W. Stern, general manager of the Pacific Coast division of the Standard Sanitary Manufacturing Company which includes the Richmond potteries and enamelware plant of the company and M. E. Wangenheim sales manager of the company resigned their positions yesterday noon at a meeting of the company held in the San Francisco offices.

"Stern refused to comment on the resignation when questioned other than to state that the resignation had been tendered and that he did not know who would be appointed as his successor.

"This is the second change in the heads of the company in the past few months. W. A. Potter for many years manager of the Richmond potteries tendered his resignation to the company on May 6.

"Stern was formerly general manager of the Pacific Sanitary Manufacturing Company here (Richmond) until that company was acquired by the Standard Company when he became Pacific Coast Manager of the Standard.

"Stern did not announce his plans for the future when he confirmed the report of his resignation."

LOS ANGELES BUILDERS' EXCHANGE REVISES CONSTITUTION

A revision of the constitution and by-laws of the Builders' Exchange of Los Angeles was ratified at a general meeting of members. Numerous minor changes have been made. One of the most important provides for the transaction of routine business of the Exchange by an executive committee subject to ratification by the board of directors. Heretofore the business of the Exchange has been handled directly by the board of directors, but because of the large number of members it was difficult to secure a satisfactory attendance and prompt dispatch of business. Members of the new executive committee have been selected as follows: David Woodhead, chairman; Lou B. Webster, R. Wolfsberg, Matt R. Bright, P. J. Bolin and Walter Moore, Jr., President Ralph Homann is ex-officio member of the committee.

State Highway Engineer Discusses Grade Crossings

(By R. M. Morton, State Highway Engineer

The State Highway Engineer is well aware of the grade crossing menace and the highway department is ready to push vigorously a program of elimination whenever the people provide the necessary funds.

Several movements in California have been inaugurated in the past few years to help awaken the public mind to the situation. In Southern California a grade crossing committee, of which the engineers of the California Highway Commission are members, has been active for at least two years and has created much sentiment in favor of elimination.

In Northern California a similar committee was organized in 1924, but did not function for any great time. On the committee in Southern California are representatives of the Highway Commission, railroads, city planning commission, automobile club and the general public.

Investigating Committee Made Suggestion

A year ago the Highway Investigating Committee, appointed by Governor Friend Wm. Richardson, took note in its report of the grade crossing situation on the state highway system. The committee recommended to the Legislature a bond issue of a total of $25,000,000 for the construction of railroad grade separations and necessary major bridges. The estimated cost of grade crossing eliminations on only the main state highways amounted to about $14,000,000 of the $25,000,000 recommended. No action was taken by the Legislature to place the proposed bond issue before the people.

A considerable portion of the State Highway Commission's bridge department is working constantly on plans for grade separations. Many separations have been made during the past few years and many more are projected. The policy of the Highway Commission is to eliminate bad crossings in the same program under which a section of highway is reconstructed. Grade separation projects are now either under construction, or will be at an early date, at numerous locations, but the number which can be eliminated in any one year is only a small portion of those which should be eliminated.

Relocation Eliminates Many Crossings

By far the greater number of grade crossings have been eliminated in the relocation and construction of highways rather than by construction of grade separations. Before the highway was built from Red Bluff to the Oregon line, there were about forty grade crossings on the existing county road. At the present time the road as located by the Highway Commission, has no grade crossings and but three grade separations. The road from Auburn to the Nevada line will have no grade crossings, although when completed there will be nine grade separations. The present road has about double that number of crossings.

There seems to be only two effective methods of saving life at grade crossings. First is by education of the public to proceed slowly, to look, and listen. Second is by costly elimination. Where elimination is not possible by means of relocation it must be accomplished by the building of grade separation structures, and large sums will be required to make much progress. The State can well afford to pledge its credit by means of a bond issue for the building of grade separation structures. The railroads are usually willing to contribute in proportion to the benefits received.

R. M. MORTON
State Highway Engineer

New York Points Way

Californians interested in the movement for elimination of grade crossings may well study the program of the State of New York where the people recently voted a bond issue of $300,000,000 for wholesale correction of this dangerous situation. The constitutional amendment providing for the bond issue authorizes the state to loan $225,000,000 to railroads and political subdivisions of the state which are to repay it with interest over a period of years. The state will contribute outright $75,000,000 as its share of the cost of the undertaking to make the highways of New York safe.

Tube-Bridge Urged For S. F. Bay—Engineers Are Named

Undismayed by the opposition of the Navy Department to a bridge across San Francisco bay north of Hunter's Point, various agencies have set to work in a renewed effort to make such headway as is possible before the final ruling of the government is announced.

The belief was expressed that in case the ruling does forbid a bridge across the main fairway a permit might be granted for the proposed combination tube and bridge plan, linking the heart of San Francisco with the center of eastbay population.

The Board of Supervisors announced that it would take up the bridge problem at once and hoped to make headway toward clarifying the situation. Supervisor Richard J. Welch, chairman of the joint committee delegated to hold hearings on the fourteen applications for franchises, declared that in his judgment delay at this time would be wrong—that the public had everything to gain by expediting the hearings and that waiting for unofficial reports and departmental action would be merely a waste of time.

The San Francisco-Alameda County Bridge Commission, an unofficial body, under the chairmanship of Former Governor James N. Gillett, anticipating favorable action upon its request for a delay in federal action for thirty days, announced the personnel of the committee of experts which it has asked to make a survey of the situation and the various plans proposed.

The experts named are:

Professor Charles D. Marx, of the engineering department of Stanford University and consulting engineer of Oakland harbor.

Thomas H. Means, noted geologist and foundation expert and consulting engineer for the governments of India and Egypt.

Francis Betts Smith, builder of the United States dry docks at Pearl Harbor, Hawaii, Mare Island and League Island, Philadelphia and consulting engineer of the Oakland-Alameda tube.

Erle Cope, construction engineer for many California bridges.

Sydney W. Taylor Jr., specialist in engineering economics.

Jerome Neuman, former chief engineer of the State Board of Harbor Commissioners.

Baily Willis, president of the Seismological Society of America and consulting advisor of the Japanese government.

Captain Frank H. Ainsworth, U. S. N., retired, representative in Washington of the Alameda naval base project.

Fred Dohrmann Jr., member of the San Francisco Regional Plan Association.

"We are hopeful," said Gillett, "that the War Department will grant either the thirty days extension of time asked by this commission or the sixty days extension asked by the Chamber of Commerce and in the meantime have selected a board of experts to be in readiness to begin operations the moment the extension is granted."

In commenting on the situation, Supervisor Welch said:

The board of supervisors should proceed at once with hearings on the applications for a franchise. Four of these do not come under the rule as "north of Hunter's Point." If this rule should be upheld, we would then be in a position to proceed with a plan located south of the point.

Scant courtesy has been shown the supervisors, particularly the committees handling the bridge subject and those of us who have studied this matter for years, by those who have been asking a delay in Washington.

Welch named as the projects which do not come under the Wilbur ban the Straus plan, backed by the Bermingham interests; the Leonard design, backed by the Bergstrom group; the Lindenthal plan, backed by A. J. Rich and the Goethals plan, sponsored by Rothschild and Golden.

City trustees of Lodi contemplate the appointment of a building and plumbing inspector. A building ordinance is now being prepared by the trustees for submission to contractors before final adoption.

APARTMENTS

Permit Applied For
APART. Cost $21,000
SAN FRANCISCO. W Fillmore 583 9 N Chestnut.
Three-story and basement frame (18) apartments.
Owner—J. F. Kirschling, 200 Sloat Blvd.
Architect — J. C. Hladik, Monadnock Bldg.

Plans Being Prepared
APT. HOUSE Cost, $1,500,000
OAKLAND, Alameda Co., Cal. Grand Ave., Euclid Ave. and Hillpoint.
Sixteen-story class A steel frame community apt. house with stucco exterior (90 apts., 450 rooms. Garage in basement for 100 cars).
Owner—Bert Bercovich, et al.
Architect—H. C. Baumann, 251 Kearny St.

Owner Taking General Figures
APT. HOUSE Cost, $80,000
SAN FRANCISCO. S E Alhambra and Mallorca Way.
Three-story of frame and brick veneer apt. house.
Owner—G. L. Nelson, 2086 Chestnut St.
Architect—H. C. Baumann, 251 Kearny St.

To Be Done By Day's Work and Sub Contracts.
APARTMENTS. Cost, $22,000 each
SAN FRANCISCO. N E Webster and Magnolia and S E Chestnut and Webster.
Two three-story and basement frame (15 each) apartments.
Owner—Axel A. Johnson, 632 Belvedere St.
Architect—None.

Preliminary Sketches Prepared.
APARTMENTS Cost, $——
MARYSVILLE, Yuba Co., Calif. Fifth Street.
Five-story fireproof apartments (2, 3 and 4-room apts.)
Owner—Corporation of local businessmen.
Architect — Dean & Dean, Cal. State Life Bldg., Sacramento, Calif.
Type of construction not decided.

Contract Awarded.
ADDITION Cost, $14,000
OAKLAND, Alameda Co., Cal. N Foothill Blvd. 40 N 60th Ave.
Two-story 11-room frame addition to apartments.
Owner—A. Korber and F. W. Neuman, 5932 Foothill Blvd., Oakland.
Architect—None.
Contractor — T. O. Reese, 2557 63rd Ave., Oakland.

Permit Applied For.
APARTMENTS Cost, $22,500
OAKLAND, Alameda Co., Cal. SE Fortieth and Webster Sts.
Three-story frame 36-room apartment house.
Owner—Paul Troplong, 3469 Piedmont Ave., Oakland.
Architect—None.

Plans Being Figured.
APARTMENTS Cost, $30,000
SAN JOSE, Santa Clara Co., Cal. W Santa Clara St.
Two-story brick and concrete store and apartment building (3 stores and 6 apartments).
Owner—Henry Guilbert, San Fernando and Locust Sts., San Jose.
Architect—Cros. S. McKenzie, Bank of San Jose Bldg., San Jose.
Bids will be taken for a general contract.

Sub-Contracts Awarded.
APTS. & STORES Cost, $40,000
SAN FRANCISCO, Guttenberg & Mission Streets.
Three-story and basement frame and stucco apartments and stores (3-room apartments).
Owner—A. Williams.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.
Contractor — A. Larson, 516 San Jose San Francisco.
Avenue, San Francisco.
Lumber—Pope & Talbot, 859 3rd St., San Francisco.
Mill Work—Portman Planing Mill, 1618 Mission St., San Francisco.
Electric Work—Collonan Electric and Mfg. Co., 3211 Mission St., S. F.
Other sub-contracts will be awarded later.

Plans Being Prepared.
APARTMENTS Cost, $150,000
SAN FRANCISCO. S O'Farrell St. 50 E Larkin St.
Eight-story and basement reinforced concrete apartment building.
Owner — M. E. Vukicevich and E. V. Lacy, Hearst Bldg., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Contract Awarded.
APARTMENTS Cost, $33,000
SAN FRANCISCO. E Twenty-sixth Ave. 85 N Anza St. N 40xE 75.
Three-story and basement frame apartment building.
Owner—Mary Moore.
Architect—None
Contractor—H. O. Lindeman. 617 27th Ave., San Francisco.

Sub-Contracts Awarded.
APARTMENTS Cost, $500,000
SAN FRANCISCO, NE Jackson & Steiner Streets.
Ten-story and basement and sub-basement steel frame and concrete class A apartment building (10 apts.), and a 1-story reinforced concrete class B basement extension garage building.
Owner—Thomas Hamill and R. G. Hall Inc., 6242 Geary St., San Francisco.
Architect — C. A. Meussdorffer, 802 Humboldt Bank Bldg., S. F.
General Contractor — Clinton Constr. Co., 923 Folsom St., S. F.
Marble — Vermont Marble Co., 244 Brannan St., S. F.
Reinforcing steel—Gunn Carle Co., 444 Market St., S. F.
Steel sash and frames—Michel & Pfeffer, 1415 Harrison St., S. F.
Steel forms—Steelform Contracting Co. Monadnock Bldg., S. F.
As previously reported, steel to Pacific Rolling Mill Co., 17th and Mississippi Sts., San Francisco.
Approximately 425 tons of steel will be used.
General contract includes all work except structural steel (awarded), elevators, ornamental iron doors, finish hardware, lighting fixtures, shades and mantels for which bids will be taken later. Clinton Construction Co. contract is for $315,287.

Sub-Contracts Awarded—Taking Bids for Plastering and Galvanized Iron Work.
APARTMENTS, ETC. Cost, $100,000
SAN FRANCISCO. S W Fern & Franklin Streets.
Six-story and basement reinforced concrete (36) apartments and stores.
Owner—M. A. Hunt, 916 Van Ness Av., San Francisco.
Architect—D. C. Coleman, 110 Sutter St., San Francisco.
Contractor—Helbing Co., 916 Van Ness Ave., San Francisco.
Electric Work — Commercial Electric Co., 1925 Howard St., S. F.
Lumber—Loop Lumber Co., 16th and Illinois Sts., S. F.
Plumbing—Higgins & Kraus, 730 Tehama St., S. F.
Steam Heating—D. O'Mara, 147 Welsh St., S. F.
Glass—W. P. Fuller & Co., 301 Mission St., S. F.
Structural Steel awarded to Golden Gate Iron Works, 1541 Howard St.

Plans Being Prepartd.
APARTMENTS Cost, $120,000
OAKLAND, Alameda Co., Cal.
Six-story steel frame Class C apartment house.
Owner—Withheld.
Contractor — W. E. Schirmer-Bugbee Co., Thayer Bldg., Oakland.

Contract Awarded.
APARTMENTS Cost, $13,000
OAKLAND, Alameda Co., Cal. N Forty-ninth St. 100 E Shattuck Ave.
Two-story 12-room apartments and one-story garage.
Owner—Therese Puriselle, 5221 Miles Ave., Oakland.
Architect—None.
Contractor—F. Tanner, 2130 Broadway Berkeley.

MARYSVILLE, Yuba Co., Cal.—I. C. Evans, 201½ D St., Marysville, a general contractor, contemplates erecting for himself a three story 120 by 160 ft., apartment and public garage in E St. bet. Fifth and 6th Sts.

Sub-Contracts Awarded—Taking Bids For Plastering and Galvanized Iron Work.
APARTMENTS Cost, $100,000
SAN FRANCISCO. NW Sutter and Franklin Sts.
Six-story and basement concrete (37) apartments.
Owner—M. A. Hunt, 916 Van Ness Ave., San Francisco.
Architect—D. C. Coleman, 110 Sutter St., San Francisco.
Contractor—The Helbing Co., 916 Van Ness Ave., San Francisco.
Electric work — Commercial Electric Co., 1925 Howard St., S. F.
Lumber—Loop Lumber Co., 16th and Illinois Sts., S. F.
Plumbing—Higgins & Kraus, 730 Tehama St., S. F.
Steam Heating—D. O'Mara, 147 Welsh St., S. F.
Glass—W. P. Fuller & Co., 301 Mission St., S. F.
Structural steel awarded to Golden Gate Iron Works, 1541 Howard St

OCEAN PARK, Santa Monica Co., Cal.—Archt. C. H. Russell, 1106 Story Bldg., is preparing plans for a 3-story and basement class C market and apartment bldg., on west side of Main St. between Pier Ave. and Ashland St., Ocean Park, for J. W. Stiles; market in 1st sto., 22 apts. above; 100x80 ft., basement and 1st flr. of rein. concrete construction, brick const. above, stucco exter., cast stone, wrought iron, comp. rfg., pine trim, oak and pine flrs., tiled baths, water htrs., wall beds, refrigerating system.

STOCKTON, San Joaquin Co., Cal.—Geo. Schroeder, 715 E. Fremont St., Stockton, at $23,000 submitted low bid to Architect Ralph P. Morrell, Union Bldg., Stockton, to erect two-story brick apartments at s.e. Washington and American Sts., for S. Gardella, Stockton. Following is a complete list of bids:

Geo. Schroeder	$23,000
John Hachman	23,215
H. H. Henning	23,460
Carl Nelson	23,500
T. E. Williamson	23,538
Powell and Medbury	23,749
J. H. Carpenter	24,777
V. Gray	25,000
Robt. Powell	25,148
F. P. Guyon	26,850

LOS ANGELES, Cal.—Archt. Arlos R. Sedgley, 1103 Kerckhoff Bldg., is preparing plans for 4-st ry class C brick apartment bldg. at cor. Council and Edgemont Sts., owners name withheld; 50 single and double apts; 80x108 ft., press. br. facing, brick walls, tile and comp. rfg., part basement, steam htg. sys., storage water htr., pine and hdwd firs., pine trim, tiled baths and drainboards, wall beds, wr. iron wk., metal lath.

PASADENA, Los Angeles Co., Cal.—Foss Des. & Bldg. Co., 45 N. Euclid Ave., Pasadena, have prepared plans and will build a four-story brick apartment building at the southeast corner of Oakland Ave. and Eldorado St., Pasadena, for Dr. Francis E. Callister and Mrs. L. D. Smith; tile, hardwood and pine floors, tile baths and sinks, tile and composition roof, fire escapes, steam heating system, storage water heater, automatic elevator, stucco exterior, lobby, roof garden, lockers.

BONDS

MARYSVILLE, Yuba Co., Cal.—$375,000 bond issue of Marysville Union High School District, proceeds of sale to finance erection of new high school, has been sold for premium of $17,915. (71100) 1st report Feb. 25; 4th June

DAVIS, Yolo Co., Cal.—$115,000 bond issue of Davis Joint Union High School District, proceeds of sale to finance erection of new high school, have been sold for premium of $6100.

SUNNYVALE, Santa Clara Co., Cal.—$13,500 bond issue of Sunnyvale School District, proceeds of sale to finance school improvements, has been sold for premium of $369.

BURLINGAME, San Mateo Co., Cal.—$90,000 bond issue of Burlingame School District, proceeds to finance school improvements, has been sold for premium of $2415.

VENTURA, Ventura Co., Cal.—San Antonio School District has called bond election for July 10, at which time it is proposed to vote $21,000 for school improvement. H. W. Gorham, H. Waite Gerry and Frederick Udall are trustees of district.

SALINAS, Monterey Co., Cal.—Until Aug. 2, bids will be rec. by county for purchase of $75,000 bond issue of Castroville Union School District; proceeds of sale to finance erection of new school.

VISALIA, Tulare Co., Cal.—$5500 bond issue of Nickerson School District, proceeds of sale to finance school improvements, has been sold for premium of $10.

HOLLISTER, San Benito Co., Cal.—Election will be held August 2 in Fairhaven School District, to vote bonds of $3,500 to finance school improvements. Trustees of district are: Joseph Herbert, John J. Hogon and O. W. Hart.

MERCED, Merced Co., Cal. — Until July 19 bids will be received by county supervisors for purchase of $4000 bond issue of Farmdale School District; proceeds of sale to finance school improvements.

PINEDALE, Fresno Co., Cal.—Election will be held Aug. 3 in Pinedale School District to vote direct tax of $6800 to finance completion of school. J. E. Bidwell and J. C. Winslow are trustees of district.

STOCKTON, San Joaquin Co., Cal.—Until Aug. 2, bids will be received by county supervisors for purchase of $25,000 bond issue of Harmony Grove School District; proceeds of sale to finance erection of new school.

DELHI, Merced Co., Cal.—Delhi School District votes bonds of $8000 to finance 2-classroom addition to present school.

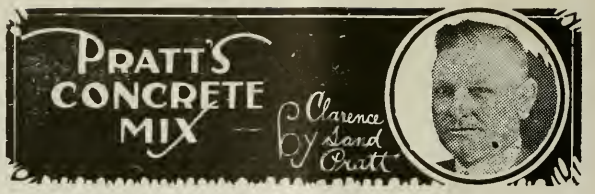
Architect—Chas. F. Strothoff, 2274 15th St., S. F.
Contractor—F. W. Varney, 860 Bush St., S. F.



Sacramento, Calif., July 7th, 1926.

Mr. Clarence F. Pratt,
Hearst Bldg.,
San Francisco.

My dear Sandy:—I know that you are aware that we are to lay the Corner Stone for the new concrete grand-stand at the California State Fair grounds on July 15. Inasmuch as the new grand-stand belongs to all the people of the State, we are in hopes that as many from San Francisco as possible will try to be up here for this occasion.

As President of the Chamber of Commerce, I am appointing you as a committee of one to go before your Rotary Club of San Francisco to see that they are well represented in Sacramento on July 15th, and I will also ask that you get in touch with as many of your business men as possible and let's see if we can't have a good-sized delegation from San Francisco up here to witness the laying of the Corner Stone of the new grand-stand. For years, the Chamber of Commerce has been trying to impress upon the rest of the State that this California State Fair is a State Fair, and not a county Fair. We, of Sacramento, of course, are proud that it is located in our city, but we realize that as a State institution, it must have the support of every community in the State, and I know very well that San Francisco will do her part when it comes to being represented here on this date.

I am not going to worry about the San Francisco arrangements at all, Sandy, for if there is one man in San Francisco, who Sacramento counts on as a friend, it is you. We have never called upon you to do anything in behalf of the Sacramento Valley, but what you have responded in that big-hearted way which seems to be a natural trait with you.

I am notifying the Board of Directors of the Chamber of Commerce tomorrow that I have placed you in full charge of the delegation from San Francisco, and I know that the Board will say, that the matter is settled when it is in Sandy Pratt's hands.

Yours for a bigger and greater State Fair.

Sincerely yours,
HAROLD McCURRY,
President of the Sacramento Chamber of Commerce.

HAROLD McCURRY is a booster.
* * *
THAT IS the reason.
* * *
HAROLD IS a success.
* * *
NO ONE ever saw.
* * *
A SUCCESSFUL knocker.
* * *
EVEN WHEN you knock.
* * *
YOU ARE boosting the town.
* * *
OR THE fellow.
* * *
THAT YOU are talking about.
* * *
ANYWAY THE above letter.
* * *
IS SO full.
* * *
OF NICE things.
* * *
THAT SANDY Pratt, president.
* * *
OF THE Pratt Building Material Co.
* * *
HAD TO tell the world.
* * *
THROUGH THE columns.
* * *
OF THIS wonderful newspaper.
* * *
AND SAN Francisco.
* * *
AND ALL California.
* * *
SHOULD BOOST the State Fair.
* * *
IT IS always worth while.
* * *
BUT THE big Chamber.
* * *
OF COMMERCE man.
* * *
FAILED TO tell.
* * *
OF THE added attractions.
* * *
TO THE fair in September.
* * *
ONLY ONE mile away.
* * *
IS SANDY'S American River sand plant.
* * *
WHERE CLEAN, sharp sand.
* * *
IS PRODUCED.
* * *
FOR CARLOAD delivery.
* * *
THROUGH NORTHERN California.
* * *
OF TRUCK delivery in Sacramento.
* * *
AND TWENTY miles from Sacramento.
* * *
IS PRATTROCK (near Folsom).
* * *
WHERE SANDY Pratt.
* * *
PRODUCES CRUSHED rock and gravel.
* * *
MARYSVILLE IS forty miles north.
* * *
AND SANDY'S Marysville sand.
* * *
IS PRODUCED at Marysville.
* * *
"I THANK you."

There will be a big fruit exhibit at the State Fair and Mrs. Adam (Eve) will be in charge of the grapes—she is out of the apple exhibit for she and Charley Payne, grand secretary of the fair could not agree on the dress she was to wear. Sandy Pratt, producer of sand, rock and gravel, will be in charge of the rock (candy) department also the sand (wiches).

All proposals must be accompanied by United States Currency or certified check made payable to Hospital Central Committee of the Counties of San Joaquin and Calaveras, State of California, in the sum of ten per cent (10%) of the amount of the bid, or by a bond for such amount, and two (2) bonds, each equal in amount to fifty per cent (50%) of the contract price will be required of the successful bidder or bidders.

The Boards of Supervisors of the Counties of San Joaquin and Calaveras by and through their Hospital Central Committee, reserves the right to reject any or all bids.

By order of the Boards of Supervisors of the Counties of San Joaquin and Calaveras, State of California, passed and adopted the 6th day of July, 1926, and by order of the Hospital Committee of Said Counties of even date.

EUGENE D. GRAHAM,
County Clerk of the County of San Joaquin, State of California.
(Seal)
By S. A. Carter, Deputy Clerk.

NOTICE TO CONTRACTORS

(San Jose—School)

Notice is hereby given that sealed bids will be received and opened by the Board of Education of the City of San Jose, Santa Clara County, State of California, in the office of the Board of Education, High School Building, San Jose, California, up to **8 p. m., on the 30th Day of July, 1926,** for the following work in connection with the erecti n of the first unit of a new grammar school on the Naglee street lot, San Jose, California, according to plans and specifications prepared by W. H. Weeks, architect, 369 Pine Street, San Francisco, California. Plans may be secured from the office of W. H. Weeks, or the office of the Board of Education, High School Building, San Jose, California.

The plan calls for one general contractor's figure including all of the work to be done and the material to be furnished.

All bids should be presented on bid forms furnished by the architects.

Each bid must be accompanied by a certified check on responsible California bank in a sum not less than five per cent (5%) of the amount bid, made payable to the President of the Board of Education of the City of San Jose, for the purpose stated in the specifications.

Each bid must be delivered in a sealed envelope and addressed to W. L. Bachrodt, Secretary of the Board of Education, and endorsed: "Proposal for the New Grammar School Building."

The board reserves the right to reject any and all bids.

W. L. BACHRODT,
Secretary of the Board of Education, City of San Jose, California.

LOCOMOTIVES

1 Baldwin 2-8-2, standard gauge; 21x24 cyls.; built 1910; weight of engine 83½ tons; weight of tender 60 tons; oil burning; 32,000 lbs. T. F., HHRR No. 3; minimum bid considered, $9,000.00.

1 American 2-8-2, standard gauge; 20x28 cyls.; built 1919; weight of engine 95 tons; weight of tender 45½ tons; oil burning; superheater; 35,000 lbs. T. F.; HHRR No. 4; minimum bid considered, $14,000.00.

1 Shay 80 ton special, 101 tons; standard gauge; built 1921; oil burning; superheater; 35,000 lbs. T. F.; HHRR No. 6; minimum bid considered, $14,000.00.

For specifications and further information apply to City Engineer, City Hall, San Francisco.

Public Sale to be held by Board of Public Works, City Hall, San Francisco.

On Friday, July 9, 1926, at 11:00 A. M.

NOTICE TO BIDDERS

(Monterey High School District)

Notice is hereby given that the Board of Trustees of Pacific Grove High School District hereby invites sealed bids for furnishing materials and doing the following work to wit:

The installation of two number 150 type Ray oil burners or equal.

One number 1 pump set.

One 1500 gallon supply tank and the necessary pipe work to equip the tank, also to run the necessary suction and return lines from the tank to the pump and supply lines from the tank to the burners.

Also the construction of 1¼" line underneath the floor and running from the furnace room to the sids of the high school building, near the gymnasium building, galvanized pipe to be used throughout.

All of said work to be done and installed at the Pacific Grove High School building in the City of Pacific Grove, California.

All the work to be done is described in the specifications for said work, filed in the office of the Clerk of said Board, which is hereby referred to for further particulars. Specifications can be had upon application. Sealed proposals shall be delivered to Clerk of said Board of Trustees on or before **the 20th day of July, 1926.** The Board of Trustees may reject any or all bids.

J. J. WILLIAMS,
Clerk of Board of Trustees.
July 9th, 1926.

NOTICE TO CONTRACTORS

(Hospital Buildings—Canacao, P. I.)

Sealed Proposals, indorsed "Proposals for Quarters, Canacao, P. I., Specification No. 5157," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., **until 11 o'clock A. M., September 15, 1926,** and then and there publicly opened, for quarters at the Naval Hospital, Canacao, P. I. The work includes plain and reinforced concrete; asbestos shingle roofing and sheet metal work; steel and iron work; mastic flooring; metal furring and lathing; plastering; wood framing, doors, sash and trim; and plumbing and electrical systems. Specification No. 5157 and accompanying drawings may be obtained on application to the Bureau, to the Commandant, Navy Yard, Mare Island, Calif., or to the Commandant, Naval Station, Cavite, Phillipine Islands. Deposit of a check or postal money order for $20, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification.

L. E. GREGORY, Chief of Bureau.
May 5, 1926.

BRIDGES

SANTA BARBARA COUNTY, Cal. — As previously reported, bids will be rec. by State Highway Comm. Aug. 2, to construct a reinforced concrete girder bridge, over Gaviota Creek, 24-ft. wide composed of three 54-ft. spans and one 30-ft. span and approx. .26-mi. of rdwy. to be graded and surfaced with stand. rd. surfacing, crushed gravel or stone. Project involves: 590 cu. yds. class "A" cem. conc; 21 cu. yds. class "E" cem. conc; 91,000 lbs rein steel; 140 cu. yds. excav. for bridge structure; 50 cu. yds. backfill for bridge structure; 10,700 cu. yds. rdwy. excavation without classification; 20,-200 sta. yds. overhaul; 775 tons stand. rd. surfacing, crushed gravel or stone; 58 c.y. riprap; 10 lin. ft 24-in. corr metal pipe; 13 monuments. Comm will fur. corru. metal pipe.

VALLEJO, Solano Co., Cal.—Bids will be asked shortly by A. O. Stewart, foot of Hyde St. (Golden Gate Ferry Co.), San Francisco, to const. Vallej.-Sears Point highway. Project will involve road 9.93-mi. in length and the following bridges: Napa River bridge, (trestle), 2300-ft. long exclusive of embankment approaches, with 75-ft. clear opening Strauss bascule, involv. approx. 231,000 lbs. structural steel; Sonoma Creek bridge, 1000-ft. long, 60-ft. clear opening Strauss bascule, involv. approx. 197,000 structural steel involved. Both bridges will have fender piling. Highway embankment from Napa river bridgehead to Sears Point will involve approx. 700,000 cu. yds. earthwork, 600,000 cu. yds. of which will be thrown up by dredges, the remaining being dry land work. Total est. cost $500,000.

SAN DIEGO COUNTY, Cal.—As previously reported, bids will be rec. by State Highway Comm., July 26, to const. rein. conc. girder bridge over A. T. & S. F. ry. at Del Mar consisting of one 47-ft., one 45-ft. and six 28-ft. spans on c nc. bents. Project involves: 110 cu. yds. struc. excavation; 890 cu. yds. "F" cem. conc; 23 cu. yds. "E" cem. conc; 165,000 lbs. reinforcing steel in place; 60 cu. yds. struc. backfill.

WASHOE COUNTY, Nevada — Fred Coolidge, Austin, Nevada, at $31,615.22 submitted low bid to State Highway Comm. to const. conc. girder bridge and approaches at Wadsworth. Eng. est. $33,456.25. Other bids: J. N. Tedford, $33,749.40; O'Neil and Warren, $35,614.70; C. C. Gildersleeve, $37,538.60.

LOS ANGELES, Cal.—Until 2 P. M., Aug. 2, bids will be rec. by county to const.:

Wooden truss bridge on Marshall Ave. over the Alhambra Wash.

Wooden truss bridge on Easy St. over the San Gabriel River.

Bridge on Topanga Creek Rd. over Topanga Creek.

Reinf. concr. arch bridge on Blanch St. over Eaton Wash, in Rd. Foreman Div. No. 102.

Plans may be obtained at office of Rd. Dept., 11th floor, Hall of Records.

SAN JOSE, Santa Clara Co., Cal.—Herschbach & Scarrino, San Jose, at $4946 sub. low bid to county to const. three culverts in Fisher Ave., Sup. Dist. No. 1. Surveyor's estimate, $5100; Other bids: Thermotite Constr. Co., $4986; Wm. Radtke, $1987; Collins & Martin, $5170; Lozier & Carr, $6350; Smillie & Baker, $7595.

SANTA BARBARA, Cal.—Until Aug. 2, bids will be rec. by county to const. Foxen Canyon rd. bridge; est. cost $9800. Owen H. O'Neill, county surveyor.

LOS NGELES, Cal. — L. J. Bristow, 1915 Wilshire Blvd., Santa Monica, sub. low bid to county at $78,275 f r reinf. conc. bridge across Malibu Crk. on route of State Highway.

Oberg Bros., 3470 Hollenbeck Ave., low at $13,900 for reinf. conc. girder bridge across Las Flores Crk. on r ute of State Highway.

SAN JOSE, Santa Clara Co., Cal.—Thermotite Constr. Co., San Jose, at $1344 sub. low bid to county to const. culvert in Jacob Ave. Sup. Dist No. 4. Surveyor's estimate, $1375. Other bids: Herschbach & Scarrino, $1349; Collins & Martin, $1375; Smilie & Baker, $2575

SAN JOSE, Santa Clara Co., Cal.—Until Aug. 2, 11 A. M., bids will be rec. by Henry A. Pfister, county clerk, to const. rein. conc. culvert on Alamitos Rd. near Keating's place and for a rein. conc. fish ladder on Alamitos creek near Almaden, Sup. Dist. No. 4; also for the const. of two rein. conc. culverts in Church and Foothill Aves., in Sup. Dist. No. 1. Plans on file in office of clerk. Robt Chandler, county surveyor.

SAN JOSE, Santa Clara Co., Cal.—County Surveyor Robt. Chandler preparing spec. for conc. culvert in McClellan and Saratoga and Mt. View Rd.

SAN GABRIEL, Cal.—City Engineer Wright estimates cost of repairs to Longdon Ave. bridge at $13,000.

SAN FRANCISCO — Healy-Tibbitts Co., 64 Pine St., at $.83 awarded cont. by American Toll Bridge Co., 525 Market St., to fur. and place 35,000 tons riprap around centre piers of Carquinez bridge.

CHICO, Butte Co., Cal.—Until Aug. 3, 8 P. M., bids will be rec. by Ira R. Morrison, city clerk, to const. retaining wall in Little Chico Creek at 9th and Orange Sts. Cert. check 10% req. with bid. Plans obtainable from city engineer.

EUREKA, Humboldt Co., Cal. — Gardner Bros., Eureka, at $2,889, $1,611 and $2,367 awarded conts. by county const. bridges over Zanone Creek, Davis Creek and Salmon Creek respectively. F. J. Maurer and Son, Eureka, at $3,145 awarded cont. for bridge over Larabee creek.

SACRAMENTO, Cal.—Until Aug. 2, 10 a. m., bids will be rec. by Harry W. Hall, county clerk, to const. timber bridge over Buckeye Creek on lone road. Spec. obtainable froc County Engineer Drury Butler. Cert. check 10% payable to Chairman of Bd. of Sups. required.

SAN DIEGO, Cal.—Southern Elec. Co. San Diego, sub. low bid to city at $12,497 for ornam. lights in State St., 6 blks., involv. Union met. posts.

O. U. Miracle, 227 Ave. D, Redondo Beach, low bid at $22,698 for ornam. lights in 16th St., 17 blks., involving pressed steel posts.

MACHINERY & EQUIPMENT

CHICO, Butte Co., Cal.—Until July 22, 5 P. M., bids will be rec. by Chas. H. Camper, clerk, Board of Education, to fur. and del. chassis to suit bus body owned by Board of Education. Spec. obtainable from clerk.

EUREKA, Humboldt Co., Cal.—Fred H. Lundblade, Eureka, at $7175, bidding for Austin-Western Road Machinery Co., San Francisco, awarded cont. by city to fur. motor driven street sweeper. Elgin Sales Corp., Elgin, Ill., at $7500 only other bidder.

SAN JOSE, Santa Clara Co., Cal.—County Clerk Henry A. Pfister will sell at public auction, Aug. 2, 10 A. M., one Fageol 6-speed compound truck, 4-ton capacity, 1919 model, chassis only with cab. Further information obtainable from clerk.

MODESTO, Stanislaus Co., Cal.—Until July 14, 7:30 P. M. bids will be rec. by H. E. Gragg, city clerk, to fur. one Fordson rubber wheel tractor complete with tools; one air compressor complete with cutting and digging tools, equipped to connect with Fordson tractor; one double drum hoist complete with cables and equipment to connect to Fordson tractor. Cert. check 10% payable to Mayor of city req. with bid. F. W. McCarton, city eng.

PITTSBURGH, Contra Costa Co., Cal.—Until July 26, 1:15 P. M., bids will be received by Armand Stow, clerk Pittsburg School District, to fur. and install certain shop equipment and machinery. Complete lists of materials and equipment desired obtainable from clerk or F. S. Ramsell, city supt. of schools.

WHITTIER, Cal.—Until 7:30 p. m., July 19, bids will be rec. for two 1½-ton trucks with power dump bodies, not to exceed $3000 ea. Information from M. R. Bowen, st. supt., 205 N Greenleaf Ave., Whittier. Cert. check or bond 10%. Paul Gilmore, city clerk.

KERMAN, Fresno Co., Cal.—Election will be held July 31 in Kerman Grammar School District to vote bonds of $3950 to finance purchase of two motor busses for transporttion of pupils.

AUBURN, Placer Co., Cal. — Until July 19, 7:30 p. m., bids will be rec. by Mrs. G. W. Hamilton, clerk, Auburn Union Grammar School District, to fur. (1) two Yellow Coach, Chassis Model X, 210-in. wheel base Duan pneumatic rear tires; (2) two 44-passenger bodies, Type No. 2, as designed and built by S. S. Albright Co., of Sacramento. Cert. check 10% req. with bid.

MONTEREY, Monterey Co., Cal.—Until July 20, 7 P. M., bids will be rec. by A. J. Mason, city clerk, to fur. one motor truck scale. Platform 20' O" X 9' O", capacity 20 tons. The scale shall consist of two pairs of main or primary levers of the straight line type, each pair connected to a longitudinal extension lever which in turn shall be connected to a transverse extension lever, thence to the weigh beam. The initial load shall be suspended from the center of each main lever bearing and from that point transmitted through each lever to each succeeding lever. The scale lever system shall be designed to sustain a static load of 25,000 lbs., upon each main lever load knife edge and with which loading, the stresses established by the American Railway Engineering Association must not be exceeded in any part of the scale. The load per linear inch of knife edge must not exceed 5000 lbs. Bearing pressure on concrete must not exceed 300 lbs., per square inch. The main suspension shall consist of a double web saddle having self aligning steel bearing blocks resting upon the two elements of the main lever load knife edges, and a T head bolt supported at the center of the saddle. The lower end of the suspension bolt shall be threaded for a circular nut upon which shall rest the steel trunnion block supporting the girder chair. The suspension assembly shall be adjustable vertically by means of the nut and after adjustment must be automatically and securely locked. All knife edges and bearing steels for the scale levers must be supported throughout their entire length and must be machined and set in machined seats. Platform must be checked by four longitudinal and four transverse checks of the rod type.

FRESNO, Fresno Co., Cal.—County will provide $12,000 in budget to finance repairs to road equipment. A. M. Jensen, county surveyor.

RAILROADS

SAN FRANCISCO.—Until Aug. 4, 3 P. M., bids will be received by Board of Public Works to fur. and del. street car motor equipment. Bond of $20,000 req. of successful bidder. Specifications obtainable from Bureau of Engineering, 3rd floor, City Hall.

FIRE EQUIPMENT

EUREKA, Humboldt Co., Cal.—City rejects bids to fur. 200 ft. fire hose and new bids will be asked at once. A. Walter Kildale, city clerk.

COALINGA, Fresno Co., Cal.—City rejects bids to fur. 1500 ft. 2½-in. double jacket Multiple woven cotton rubber-lined fire hose, complete with couplings, and new bids will be considered July 19, 5 P. M. Cert. check 10% payable to city req. with bid. Spec. on file in office of L. A. Buchanan, city clerk.

MISCELLANEOUS SUPPLIES

EUREKA, Humboldt Co., Cal.—City rejects bids to fur. 200 ft. fire hose and new bids will be asked at once. A. Walter Kildale, city clerk.

COALINGA, Fresno Co., Cal. — City rejects bids to fur. 1500 ft. 2½-in. double jacket Multiple woven cotton rubber-lined fire hose, complete with couplings, and new bids will be considered July 19, 5 P. M. Cert. check 10% payable to city req. with bid. Spec. on file in office of L. A. Buchanan, city clerk.

EUREKA, Humboldt Co., Cal.—Until July 20, 8 P. M., bids will be rec. by A. Walter Kildale, city clerk, to fur. 1000 ft. 2½-in. double jacket fire hose with couplings. Spec. obtainable from city clerk.

RESERVOIRS AND DAMS

PHOENIX, Ariz.—Carl Pleasant Co., 408 Heard Bldg., Phoenix, awarded cont. by Maricopa County Municipal Water Conservation Dist. No. 1, at $2,926,000 for const. compl. of Frog Tanks (Agua Fria-Beardsley) project, involv. multiple arch dam 170 ft. high above river bed, 235 ft. long in the channel, 1800 ft. long on top, with diversion dam on main canal 35 ft. high and 700 ft. long, with main canal 35 mi. in length, of which 4 mi. have been completed. The storage dam will have capacity to irrig. 40,000 ac.

LOS ANGELES, Cal.—Until 2 P. M., August 2, bids will be rec. by county superv. of flood control dept. to place 1000 split Z-pipes, each consisting of two equal pieces, in accordance with spec. B-29; 600 for Pacoima dam, to be deliv. to Bent Bros. at San Fernando, and 400 ft. for Santa Anita dam, to Ross Constr. Co., Arcadia.

FLORENCE, Ariz.—Archt. and Engr. Parker O. Wright, Central Bldg., Los Angeles, and Francis H. Gentry, 316 Marin Bank Bldg., Long Beach, have been commissioned by the U. S. Govt. to prepare plans for the architectural features for the Coolidge Dam near Florence, Ariz., including approaches, driveway, ornam. balustrades, power house and gate houses. Design has been approved by the Fine Arts Comm., in Washington.

TRACY, San Joaquin Co., Cal.—City Eng. E. G. Finlay will make survey of proposed improvements to sewage disposal plant which will probably include a sludge bed.

CHULA VISTA, Cal.—Approx. quantities for sewage treatment plant and outfall sewer for which bids will be rec. by city July 27 (previously noted) are: 940 ft. 14-in. light C. I. pipe and 492 ft. 15-in. concr. or vit. pipe; main sewer involv. 1648 ft. 8-in. and 2580 ft. 18-in. sewer pipe, three special m. h., 4 std. m. h. Imhoff tank involv. 820 cu. yds. exc., 232 cu. yds. concr., 35,000 lbs. reinf. steel. Bids are desired as follows: lump sum on tank and unit prices on sewer. Burns-McDonnell-Smith Engr. Co., Rives-Strong Bldg., Los Angeles, engineers.

BANNING, Cal. — W. C. Seccombe, San Bernardino, awarded cont. by city at $63,345 to const. lateral and outfall sewer system and sewage treatment plant. Olmsted & Gillelen, civil engrs., 1112 Hollingsworth Bldg., Los Angeles.

SANTA ANA, Cal.—Approx. quantitles for const. of outfall sewer, for which bids will be rec. by city for tri-city committee July 26 (previously noted) are: remove and re-lay 30 12-ft. lengths of 42-in C. I. pipe on pile trestle, 39 lengths new std. class "B" 42-in. C. I. pipe on pile trestle, and 155 lengths 42-in. flexible joint pipe on bed of ocean; two sewage screen units with elevators and ejectors with a cap of 6 million gals. per diem. Burns-McDonnell-Smith Engr. Co., Rives-Strong Bldg., Los Angeles, engrs.

MISCELLANEOUS CONSTRUCTION

CALIFORNIA—Permits to appropriate water were granted by the State Department of Public Works, Division of Water Rights, during the month of June as follows:

No. 2549, San Joaquin county, to Ira E. Saunders, Stockton, June 23, for 0.96 sec. ft. from Middle Riv. for irrig. of 77 ac. nr. point of diversion; est. cost, $2000.

No. 2550, Marin county, to Bolinas Public Utility Dist., Bolinas, June 23, for one sec. ft. from Arroyo Hondo Crk. for municipal purposes for Bolinas Public Utillty Dist.; est. cost, $50,000.

No. 2551, San Luis Obispo county, to City of San Luis Obispo, June 23, for 2.32 sec. ft. from Lopez Crk. for municipal purposes; est. cost, $600,000.

No. 2552, San Luis Obispo county, to City of San Luis Obispo, June 23, for 1799 ac. ft. from Lopez Crk. for municipal purposes.

No. 2553, San Luis Obispo county, to Victor L. Bentson, San Francisco, June 23, for 4.74 sec. ft. from Arroyo Grande Crk. in Ranchos Corral De Piedra and

Santa Manuela, to irrig. 378.81 ac. nr. point of diversion; est. cost, $20,000.

No. 2558, Kern county, to H. E. Seaton, Los Angeles, June 26, for 0.25 sec ft. from Sand Canyon Chk. for domes. use and to irrig. 60 ac. nr. point of diversion; est. cost, $2000.

No. 2517, Lake county, to W. F. Detert, San Francisco, June 1, for 6.25 sec. ft. and 60 ac. ft. from Bucksnort Crk. for irrig. of 1002 ac. in Guenoc Rancho; est. cost, $100,000.

No. 2518, San Bernardino, to Ray Downing and O. P. Whitney, Long Beach, June 3, for 0.001 sec. ft. from underground source for domestic purposes; est. cost, $250.

No. 2521, Inyo county, to Thos. H. Standard, Brown, Calif., June 10, for 0.12 sec. ft. from unnamed spring, for irrig. of 10 ac. nr. point of diversion; est. cost, $510.

No. 2524, San Diego county, to the Golden Chariot Mining Corp., Berkeley, June 11, for 0.3 sec. ft. from unnamed stream, for use in mining, milling and domestic purposes; est. cost, $2000.

No. 2530, San Bernardino county, to N. B. Burkley, Fawnskin, June 16, for 0.07 sec. ft. from unnamed spring for domes. use; est. cost, $1200.

2531, San Bernardino county, to Martha Gilmore Krom, Los Angeles, June 16, 1926, for .001 sec. ft. from unnamed mountain stream from domes. purposes.

No. 2532, San Bernardino county, to Earnest C. Wright, Pasadena, June 16, for .001 sec. ft. from unnamed spring in Willow Glen for domes. use; est. cost, $50

No. 2534, Mono county, to Walker Riv. Irrig. Dist., Yerington, Nevada, June 18, for 35,000 ac. ft. from West Walker Riv. for irrig. of 160,000 ac., stock, and domestic use nr. point of diversion; est. cost, $167,500.

No. 2535, Mono county, to Walker Riv. Irrig. Dist., Yerington, Nevada, June 18, for 115,000 ac. ft. from West Walker Riv. to irrig. 160,000 ac. nr. point of diversion.

No. 2536, Mono county, to Walker Riv. Irrig. Dist., Yerington, Nev., June 18, for 57,000 ac. ft. from East Walker Riv. to irrig. 160,000 ac. nr. point of diversion; est. cost, $330,000.

No. 2537, Mono county, to Walker Riv. Irrig. Dist., June 18, for 85,000 ac. ft. from West Kalker Riv. for domes. use and for irrig. of 160,000 ac. nr. point of diversion; est. cost, $449,000.

No. 2538, Mono county, to Walker Riv. Irrig. Dist., June 18, for 200 ac. ft. per annum from unnamed stream, for domes. use and for irrig. of 160,000 ac. nr. point of diversion; est. cost, $918,-000.

CONDITIONS IN THE BRICK INDUSTRY.

"Use American Made Brick" is the slogan of a campaign to be waged by the Common Brick Manufacturers of America in behalf of producers of building brick in the United States and Canada. This effort to stay the destruction of a great industry by the importation of brick made by cheap European labor was made possible by the publication in June, by the U. S. Treasury Department, of a ruling that all foreign brick should be marked with the name of the country of origin. This order calls for the enforcement of a law that has been in existence since the tariff act of 1922 was passed by Congress, but which heretofore had not been effective in the case of brick.

With the foreign brick marked for identification the American manufacturers believing their product to be of better quality and more economical to use, will vigorously promote domestic brick.

The receipt of large quantities of foreign brick has not lowered the price of brick in the United States because the foreign brokers have made all the profit they could and sold just a shade under the American manufacturer. The building public this site of the Atlantic has gained nothing, but every foreign brick sold here has put an American workman out of a job. It evidently hasn't profited the European workers since their wage scale remains at about $1.15 a day as an average.

The latest report of the Bureau of Foreign and Domestic Commerce of the Department of Commerce shows receipts of foreign made brick in New York, Maryland, New Hampshire, Florida, Washington, Maine, Vermont, North Dakota.

In spite of these inroads of foreign brick current reports of domestic manufacturers show that there are gains in new business and in deliveries during the past month. The long heralded slump in building is apparent in only a few places, and there in the most moderate degree.

The increased use of brick in residential construction permits the industry to more than hold its own in spite of small loss in the total volume of construction.

The report of 103 manufacturers as of June 1st shows 192,000,000 brick moved from the yard during the preceding month as compared with 146,400,000 moved by 110 concerns in the preceding month. Prices remain stable, and have not varied to any extent for a period of two years.

Labor conditions are favorable except in the State of Connecticut where they have been disturbed for the past year, but are steadily showing improvement.

PENINSULA MASTER PAINTERS WILL PICNIC SATURDAY

Members of the Peninsula Master Painters' Association will hold a picnic for their families and friends at Mangini's picnic grounds on the Portola road, San Mateo county, next Saturday. The main event will be a baseball game between the Palo Alto and Redwood City Master Painters. There will be a number of competitive events for the children and parents, and prizes will be awarded. There will also be dancing. The picnic will start at 10 o'clock.

The committee on arrangements is Art Jensen, chairman, Redwood City; L. H. Brown, Palo Alto; Charles Leis, Burlingame.

(Continued From Page 22).

NOTICE TO CONTRACTORS

(Hanford Grammar School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Hanford Grammar School District, Kings County, State of California, in the Woodrow Wilson School Building, at Hanford, California, at **2:00 o'clock P. M., Monday, July 23, 1926,** for the erection and completion of a two-room addition and the completion of the present Woodrow Wilson School Building for the Hanford Grammar School District in accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine Street, San Francisco, and 1924 Broadway, Oakland, California, for the general contract and its several propositions.

Plans and specifications may be seen at the offices of the Architect before mentioned, or at the office of the Board of Trustees of the Hanford Grammar School District, Hanford, California.

Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to Frank B. Graves, Clerk of the Board of Trustees of the Hanford Grammar School District; said check to be forfeited to the School District if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract. A bidder's bond will be acceptable in place of a certified check.

Each bid must be made out on bid forms obtained from the Architect, enclosed in a sealed envelope which is endorsed "Proposal for General Contract," and must be delived to Frank B. Graves, Clerk of the Board of Trustees, Hanford, California, prior to the date and time set for the opening of bids.

Owner reserves the right to reject any or all bids.

(Signed) FRANK B. GRAVES,
Clerk of the Board of Trustees, Hanford Grammar School District,
Hanford, California.

NOTICE TO CONTRACTORS

(Glenn County High School District)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Glenn County High School District in Glenn County, California, until **2 o'clock P. M., July 22, 1926,** for the following equipment to-wit:

100 steel lockers size about 15 inches by 15 inches by 36 inches high with key locks; 50 steel bo k lockers, size 12 inches by 12 inches by 12 inches with key locks.

50 adjustable steel desks for High School purposes, 22 window shades for Elk Creek High School. Bidders on the foregoing equipment to submit samples. Bids will be received for one hot air crude oil burning furnace installed in High School building at Willows and three wood burning Heaters to heat two class rooms and the auditorium in the High School at Elk Creek, California.

Bids will be received by the Board for laying concrete walks four feet wide and 4 inches thick, including ½-inch of topping. These walks to run from High School to Gymnasium and on entire south side and on the entire north side of said building. Also from s uthwest corner of Gymnasium to the northwest corner of the Manual Training Building.

Bids will be received by the Board for building a Tennis Court and a 12,000-gallon concrete underground storage tank on the High School grounds at Willows.

Bidders to include with their bids on all of the above concrete work a statement giving the proportion of sand, gravel and cement they intend to use.

For more details see the Clerk of the Board. The Board reserves the right to reject any and all bids.

Board of Trustees, of the Glenn County High School District.
By A. E. PIEPER, Clerk.

NOTICE TO BIDDERS

(Turbine Pump — Fresno County)

Pursuant to an order of the Board of Supervisors of Fresno County, California, duly made and entered in its minutes on the 23rd day of June, 1926, notice is hereby given that said board will receive up to **2:00 o'clock p. m., of the 2nd day of August, 1926,** sealed proposals for furnishing and installing a Turbine Pump at the General County Hospital.

The said pump is to be installed in accordance with the specifications heretofore adopted therefor, and on file in the office of the clerk of this board. Said specifications offer three alternate propositions.

Copies of the specifications may be obtained from the clerk of the Board of Supervisors in the office of said board in the Court House, Fresno, California.

A certified check in the sum of 10 per cent of the amount of the bid, made payable to the Chairman of the Board of Supervisors, must accompany each proposal as a guaranty that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract with Fresno county to do such work as above mentioned, and furnish go d and sufficient bonds according to law and rules of this board, conditioned upon the faithful performance of such contract, and all the provisions thereof.

Bids not accompanied by certified checks will not be considered.

The Board of Supervisors reserves the right to reject any or all bids.

Dated this 23rd day of June, 1926.
D. M. BARNWELL, Clerk.
By Fred E. Main, Deputy.

STATE OF CALIFORNIA
CALIFORNIA HIGHWAY COMMISSION
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the **California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on Aug. 2, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Santa Barbara County, across Gaviota Creek about 2½ miles north of Gaviota (V-S. B-2-E) a reinforced concrete girder bridge 24 feet wide composed of three 54-foot spans and one 30-foot span, and about twenty-six-hundredth (0.26) miles of roadway to be graded, and surfaced with standard road surfacing, crushed gravel or stone.

San Diego and Imperial Counties, between top of Mountain springs Grade and Myers Creek Bridge (VII-S. D-Imp-12-H & A), about six and eight-tenths (6.8) miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. TEDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: July 6, 1926.

NOTICE TO BIDDERS

(Live Oak Union High School District)

NOTICE IS HEREBY GIVEN that the Board of Trustees of Live Oak Union High School District, of the County of Sutter, State of California, will **up to the hour of 11 o'clock A. M.** sealed bids for the construction of an addition to the Manual Training Building of the Live Oak Union High School, according to the plans and specifications now on file with the Clerk of said Board. Copies of said plans and specifications may be obtained at said High School from M. H. Ellestad, Manual Training Instructor, upon depositing the sum of $10 as security for the return of said plans.

All bids must be submitted as provided in specifications and must be filed with H. R. Ramsdell, Clerk of Board of Trustees, whose address is Live Oak, California. All bids must be accompanied by a certified check of one-tenth of the amount of the bid.

The Board reserves the right to reject any or all bids.

Dated this 22nd day of June, 1926.
H. L. STAFFORD,
E. H. COBEEN,
H. H. RAMSDELL,
Trustees of Live Oak Union High School District.

Officers of Peninsula Master Painter's Association were installed at a meeting held July 12 at the I. O. O. F. hall, San Mateo. Those who took their seats were Charles Leis of Burlingame, president; L. E. Doolittle of Redwood City, First vice-president; W. Weait of Burlingame, second vice-president; E. F. Pfaffin of Palo Alto, secretary-treasurer. Following the meeting a banquet was served the members.

Stability...

and speed in Construction

SPEEDY wall construction is valuable only when it builds rigid, lasting walls.

Schumacher Plaster Wall Board insures swift construction, yet it builds permanent walls. Stability has been engineered into it; and it's made only of durable materials.

Wherever permanent walls are needed you can use it with full confidence. Use it in homes—apartment houses, business structures.

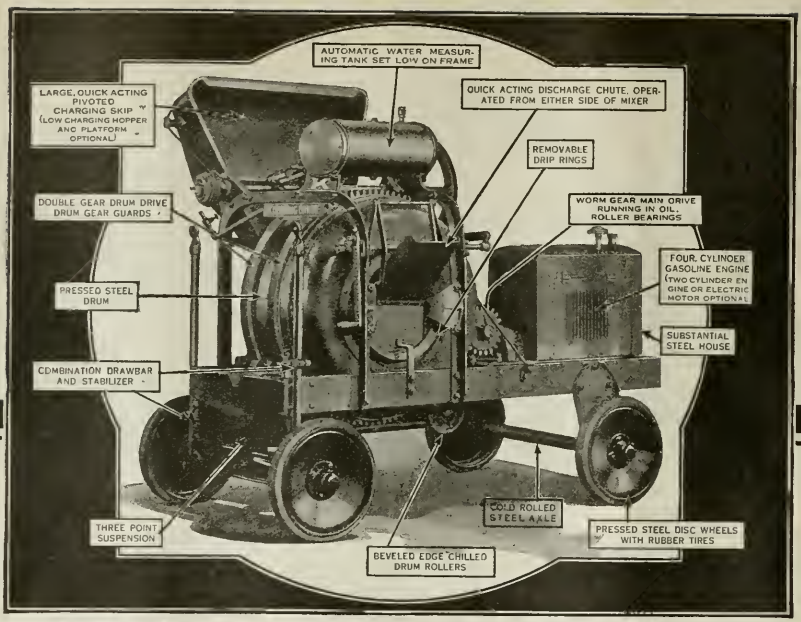
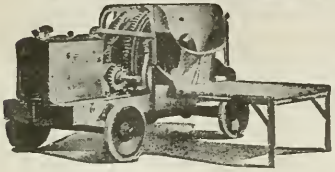
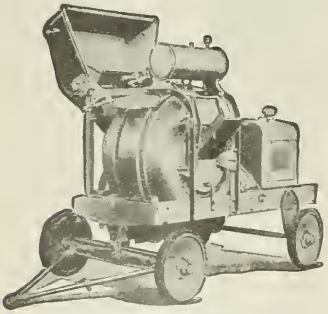
6T



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
QUICK ACTING DISCHARGE CHUTE, OPERATED FROM EITHER SIDE OF MIXER
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

INDUSTRY NEEDS APPRENTICES

The apprentice has a long history behind him but the Department of Manufacture of the Chamber of Commerce of the United States finds that he does not belong only to the past. It is of the opinion, on the contrary, that apprenticeship is more important to American industry than it has ever been before.

"But," it adds, "it must be adjusted to meet modern and changing conditions. Practical and logical plans are available for meeting these conditions. In order to be mutually successful, apprenticeship must produce results for both the employer and the apprentice."

The results of a survey of apprentice training are embodied in a report issued by the National Chamber, which analyzes the methods followed by many of the large corporations and plans applicable to small as well as large business institutions and industrial communities.

Most manufacturers, the Department concludes, believe in the general policy of apprentice training, though they may differ greatly on methods. They realize that apprenticeship in practically every form supplies a reservoir from which to fill vacancies in the supervisory force. It produces dependable, efficient and capable workmen, reduces labor turnover, supplies skilled artisans needed because of restricted immigration and produces men who are more valuable to themselves as well as to their employers.

THE MANUFACTURER AND THE COMMUNITY

The old theory that a manufacturer's business is entirely his own affair is fast being superseded by the theory that it is also a community project, according to E. W. McCullough, Manager of the Department of Manufacture of the Chamber of Commerce of the United States. The latter idea is crystallizing in the form of manufacturers' councils or industrial departments in local chambers of commerce.

"The manufacturer," says Mr. McCullough, "brings to the community not only himself and his investment, but usually a number of employees and their families who are also vitally concerned in whether he makes a go of it or not. He is a large factor in community building. His failure is often a local calamity, for his business is not only his own but that of the community as well.

"The manufacturers of a city are competing with those in similar lines in every city throughout the country and they are not likely to succeed nearly as well as when they are organized to work together. The fact that their products are widely diversified does not mean that there can be no cohesion or unity, for in the production of all commodities there are certain underlying fundamentals to all, such as material and labor supply, the training of workmen, industrial relations, labor-saving equipment, taxes, insurance, transportation, legislation, technical research.

"The time to make such a beginning is now, for we are not only in an age of scientific and mechanical progress, but the war on waste in industry and business is on and those engaged in manufacturing pursuits will be under extreme pressure for more and better product at a lowering of costs."

UNDERPASS BIDS OPENED

Bids for building the underpass at South San Francisco on the Bay Shore highway opened by the California Highway Commission, shows Jack Welch of San Francisco the lowest of ten bidders with an offer of $216,779.20 against an engineer's estimate of $235,088.25.

The structure will be of reinforced concrete construction and will carry the Bay Shore highway under the eight existing tracks of the Southern Pacific and Belt Line railroads and will provide space for expansion of the trackage to sixteen lines of railway. It will have a clear roadway width of forty feet and, in addition, a walk of ample width for pedestrians. The length of the subway will be over 800 feet.

Completion of the underpass will make traversable the first section of the Bay Shore highway, grading of which has been completed by the commission with funds advanced by the City and County of San Francisco.

PLUMBING DEALERS TAKE LESS PROFIT—REPORT SHOWS.

Wholesale dealers in plumbing and heating supplies made smaller profits in 1925 than in 1924, according to a report just issued by the New York University Bureau of Business Research.

The bureau, under the direction of Dr. Lewis H. Haney, has made an exhaustive study of expenses and profits in the supply business, the investigation being carried on at the request of the Eastern Supply Association. A similar study made last year enables a comparison of 1924 and 1925.

Dr. Haney says: "Our study shows that a representative group of supply dealers earned a net income in 1925 which was equal to 3.68 per cent of their net sales. This compares with 4.2 per cent in 1924."

The decline in net income was chiefly due to two factors. There was an increase in operating expenses which reached the rather high figure of 17.8 per cent of net sales last year. There was a little smaller rate of turnover. We find that in 1925 the supply wholesalers turned their stock over on the average of 4.7 times. The chief increase in operating expenses occurred in the labor item which amounted to 6.9 per cent of sales in 1925.

An interesting point in the report is the conclusion that on the whole, the smaller concerns makes a better showing than the larger ones. The larger the business, the greater the percentages of sales which is required for labor and for rent. Some items of expenses are larger with small concerns, such as credits and collections, and executive salaries, but on the whole the tendency is the other way.

An interesting fact brought out by the report is that collections were less satisfactory at the end of 1925, than in the preceding year. The percentage of outstanding bills and accounts receivable at the end of last year was 18.3 per cent of sales, against only 16.5 per cent at the end of 1924.

NATIONAL GAS AND CONSUMERS GAS FIRMS IN MERGER

Merger of the National Gas Govenor Company of New York and the Gas Consumers Association, a California firm, having offices in San Francisco and Oakland, in a $1,800,000 corporation was disclosed with the renewal by the association of articles of incorporation in Sacramento.

Owning patents on several devices to regulate the flow of gas in lighting and heating apparatus, the association, which is said to afford a material saving to members in gas bills, now plans to expand into a national organization.

First organized in 1878 to protect the interests of gas users, the association it is asserted, becomes possessed through the merger with the business and holdings of its only competitor.

Ferdinand Reis Jr. is president of the greater association and F. G. C. Lyons head of the National Gas Govenor company of New York, vice-president and general manager. The directors are Joel H. Hecht, Frank P. Deering and W. S. Pardy of San Francisco; P. H. Randolph, Alameda, and W. R. Baumgerfield, Berkeley.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Midway Gas Company contemplates the construction of a 37-mile 8-inch gas pipe line from the main line at Grapeville Station to the Monolith Portland Cement plant, east of Tehachapi, Kern county.

Prescott F. Cogswell, Los Angeles county supervisor, has mapped out a program involving an expenditure of $20,000,000 for the elimination of dangerous grade crossings throughout Los Angeles county.

The Eastern Millwork Bureau, Inc., has compiled data showing millwork cost "dollar." Lumber and other material with handling to mill, make up 44.8%, machine and bench labor 20.1% and general expense 35.1%.

Determined to make American consumers independent of foreign potash monopolies, the bureau of mines will shortly begin exploration of Texas potash deposits believed to rank with the leading deposits of the world, Secretary of Commerce Hoover as announced.

Indications that building activities throughout the country the rest of the year will go forward on substantially the same basis as in the boom period of 1925, are apparent in reports of building permits and plans filed in 462 cities for the first half of 1926, compiled by S. W. Straus & Co.

Clarence Howard, president of the Commonwealth Steel Company in St. Louis, will be a visitor to the Sacramento Southern Pacific Shops on July 26th. Howard will be accompanied hy G. P. Whitehead, sales representative of the same firm.

Wells & Bressler, Santa Ana contractors, bidding $584,000 were awarded the contract to pave with macadam various roads in Imperial county. The contract involves approvimately 1,728,909 square feet of 6-inch and 820,326 square feet of 5-inch pavement. M. Blumenkranz of Stockton was next low bidder on the project at approximately $588,700.

Plans for a $500,000,000 international highway to link North and South America came to light in Los Angeles at the state corporation's commission hearing on the application of the Andes Trail Association to sell memberships in its non-profit, co-operative undertaking. The association wishes to dispose of $200,000 worth of memberships at prices ranging from $1 to $1000. The organizers are Thomas H. Jennings, J. D. Barrett and Earl W. Porter, all of Inglewood, a suburb.

With a production of 24,260,000 tons of steel during the first half of 1926, the steel mills of the United States neared capacity output. This production sets a new half-year record and each month showed an increase over the corresponding month last year. The output to date this year was 90 to 92 percent of actual capacity and indicates that within a very few years the steel plants of the country will require expansion to take care of the country's needs.

The Board of Supervisors of Contra Costa County has joined with the State Engineer in a protest against the granting of franchises to motor truck and trailer lines operating over the State highway system with excessive loads. Economic waste through paralleling existing railroad systems and through destruction of highways is cited as the reason for the action.

Limitation of the height of apartment houses which shut off the view and sometimes the light and air of residents in old-established San Francisco residential sections is proposed by Chas. J. Powers, a member of the Board of Supervisors. The proposal has been referred to the City Planning Commission. It is proposed to employ an expert to carry on the work.

Alameda County Board of Supervisors has appropriated $36,000 to advertise that section during the current fiscal year. Ascording to the Oakland Chamber of Commerce, one result of last year's advertising appropriation, was that ninety-two new industries, with an investment of more than $5,000,000, established themselves in the East Bay section. These industries employed more than 1900 persons with a payroll of more than $2,900,000.

A new roofing ordinance, twice as stringent as the present one, and extension of the fireproof roof area to include most of the western part of the city, are recommended to the supervisors by the San Francisco Bureau of Fire Prevention. The bureau urged that, whenever a shingle roof had been damaged to the extent of 20 per cent of its area, reconstruction with fire proof material be required everywhere except in the outer parts of the city.

More than 400 representatives of the Western Regional Association of the National Paint, Oil and Varnish Association of America met in their fifth annual convention in Hotel Del Monte, July 10. The convention was opened by Marshall Dill, vice president of the National Association, and former president of the national body. Of particular interest in the convention program was the speech of E. D. Timms, in which he bitterly attacked the chain paint stores now starting to do business.

Los Angeles' building activities for July, 1926, are running slightly in excess of those for the same month a year ago, but behind those for June. Up to and including the 13th, the city building department issued during July 1136 permits with an estimated valuation of $5,189,040. For the corresponding period in June the number of permits was 1394 and the estimated valuation was $6,512,640, while for the first 13 days of July, a year ago, the number of permits was 1496 and the estimated valuation was $4,836,631. For the current year, up to and including July 13, Los Angeles' building total was $68,350,435 as compared with $88,012,088 for the corresponding period in 1925.

The total bonded debt of all forms of government in California was shown to be $609,549,227.82 in a report covering fiscal transactions for the year ending June 30, issued by State Controller Ray L. Riley. This is an increase of $76,349,975.66 over the fiscal year ending June 30, 1925, and represents an increase of 549 per cent over 1911. The bonded debt represents 10.5 per cent of the total assessed value of non-operative property, as compared with 4.2 per cent in 1911. Cities are shown to have had the smallest percentage of increase in the bonded debt since 1911. The debt of municipalities increased 331 per cent, while in the same per cent the bonded debt of counties increased 905 per cent, and of the State 1650 per cent.

In the July issue of the Monthly Labor Review, an article published on the volume of building projects in 130 cities of the country, 1914 to 1925, shows how much has been done in the country as a whole and in the cities individually in the past few years to overcome the shortage in buildings caused by war-time curtailment. The year 1922 was the first year after the war in which there was a surplus of building over the normal requirements as measured by 1914 standards and the next three years each showed an excess of building over normal requirements for the country as a whole although this situation was not true for a number of the individual cities.

U. S. Civil Service Commission announces examinations will be held shortly for the positions of Chief Architectural Draftsman, paying $2400 a year; Senior Architectural Draftsman, $1860 and Junior Architectural Draftsman, $1680. Applications for these positions must be filed at Washington, D. C. not later than Aug. 21. Complete information may be obtained from the Commission offices at Washington, D. C., or the secretary of the commission at the postoffice or customhouse of any city.

A special tax to raise $287,500 to finance the erection of American Legion Memorial Halls in various sections of Stanislaus county will be voted on at the November general election, the Stanislaus county supervisors have decided. The tax, if voted, will provide for the erection of structures at Oakdale, estimated cost, $40,000; Patterson, $35,000; Riverbank, $17,500; Newman, $45,000; Turlock, $50,000 and Modesto, $100,000.

Listing liabilities at $85,708.35 and assets of $71,085.90, the Stockton Rock and Gravel Company of Stockton has filed a petition in voluntary bankruptcy in the United States District Court at Sacramento. The petition was filed by R. Goold, president of the defunct company, and he sets forth that on July 14th, a meeting of the stockholders of the company was held at Stockton and it was determined then that the company was insolvent. Kathryne Goold, the company's secretary, made the report that led to the proceedings. Only two creditors are listed who hold complete or part security. These are the San Joaquin Valley Building and Loan Association and the United Bank and Trust Company of California. Their credits in the company total $40,250. More than twenty-five Stockton and San Francisco concerns are listed among the creditors without security, the Clark Roofing Company of Sacramento being the only Sacramento concern in this group. The roofing company has a credit of $206.10 secured by a personal note.

ALONG THE LINE

A campaign for the protection of the professional title of "engineer" is being inaugurated by the American Association of Engineers.

S. A. Jubb, who has been manager of the Los Angeles office of the Clinton Construction Company for the last five years, has severed his connection with that company. He has not yet made any definite plans for the future.

Bids will be asked shortly by the Los Angeles Department of Public Works to construct Section No. 3 of the Arroyo de la Sacatela storm drain system. The work will involve the construction of 11.85 miles of storm drain and 1354 feet of sanitary sewer.

Walter B. Hogan, city engineer of Stockton, has been elected a vice-president of the California Municipal Traffic League, recently organized in San Francisco. Chas. F. Todd, a member of the San Francisco Board of Supervisors, is president of the league.

S. H. Tillinghast, chief engineer for the Sutter Basin Company since 1919, died recently in Woodland. He was a member of the Sacramento Section, American Society of Civil Engineers. Prior to joining the Sutter Basin Company, Tillinghast was connected with the U. S. Reclamation Service. He was born in Rhode Island, was a graduate of Brown's University and attended Massachusetts Institute of Technology. A widow and two sons survive.

Members of the Stockton Chapter, American Association of Engineers, inspected the Richmond refinery of the Standard Oil Company, July 17. Following an inspection of the plant dinner was served in the company's cafeteria. The inspection was arranged by W. B. Hogan, city engineer of Stockton and president of the Stockton Chapter of engineers, co-operating with officials of the oil company.

Bids will be considered by the U. S. Bureau of Reclamation, Orland, Calif., on August 12, to construct the Stony Gorge Dam project, involving 19,000 cubic yards excavation; 37,200 cubic yards of concrete; 7000 lineal feet drilling and grouting grout holes; 1,500,000 pounds of bending and placing reinforcing steel; 892,000 pounds of valves, gates and other metal work. The dam is to be hollow type concrete, about 116 feet high above the present stream bed and approximately 900 feet in length. Plans for the work are obtainable from the Bureau offices at Orland, Calif., Washington, D. C., and Denver, Colo.

Frederick Archer Sandford Foale, Sacramento architect, who died July 7, left an estate not exceeding $4000, it was disclosed when a petition for letters of administration in the estate was filed in superior court by his widow, Susannah Sandford Foale. Heirs named in the petition include the widow, Arthur Bickley Sandford Foale and Archer John Foale, sons, and Ellen Jane Agnes Foale, a daughter. Probate of a purported will, executed in London, England, by Foale on August 3, 1906, is not sought by his widow. She claims its provisions do not vary from those of a decree of distribution anticipated in the estate.

A bond issue of $11,000,000 will be asked by the Los Angeles City Water & Power Commission at the August primaries for power purposes as follows: $1,500,000 for generation and transmission storage above plants; $1,250,000 for completion of generating plant No. 1; $190,000 for transmission lines and appurtenances; $750,000 for additional central receiving station capacity; $150,000 for additional equipment at existing receiving station No 1; $460,000 for receiving station at Wilmington; $3,700,000 for loop-line high voltage distribution rights of way; $600,000 for general structures and equipment; $100,000 for transportation equipment and $200,000 for acquisition of lines within annexed territories.

TRADE NOTES

Geo. H. Tay Company of San Francisco has filed articles of incorporation at Redwood City. The company is capitalized at $250,000.

Building material warehouse of E. A. Matthews & Son, at 520 F street, Eureka, was destroyed by fire July 14. Loss is estimated at $15,000.

Plant of Coos Bay Lumber Company at Bay Point, Contra Costa County, suffered a $250,000 fire loss recently. Approximately 16,000,000 feet of timber was destroyed.

F. W. Tramp, L. Landman and A. Starke will operate from 310 Eighth Ave., San Francisco, under the trade name of Modern Sheet Metal Works.

Independent Elevator Co. of San Francisco, capitalized at $25,000 has been incorporated with the following directors. A. W. Bleyle, J. J. Davis and W. F. Postel.

Construction has been started on three new structures at the plant of the Pierce Lumber Company, H street near Belmont avenue, Fresno. The new buildings will be used for storage of lumber, plaster, lime and cement.

With the opening of warehouses in San Francisco and Oakland, the United States Gypsum Company announces completion of locating a chain of Pacific Coast distributing quarters. Warehouses are also located at Los Angeles, San Diego, Portland and Seattle.

"Truscon Roofs of Security" is the title of a booklet just issued by the Truscon Steel Company of Youngstown, Ohio. The book offers a presentation of two types of steeldeck roofs "Ferrodeck" and "I-Plates"—manufactured by the company to meet the demand for permanent light weight, non-combustible roofs on all kinds of buildings. Copies will be sent on request to the Youngstown offices of the company.

Proof of the value of a complete advertising campaign to the manufacturer is contained in the announcement from the Pacific Coast Advertising Clubs Association awarding the trophy for the best advertising campaign used by a Pacific Coast manufacturer. The advertising of W. P. Fuller & Co., in competition with the most important manufacturing concerns on the Coast, was adjudged to be the most complete of any advertising used during the year. The campaign was conducted by Johnston-Ayres Company, advertising agency with offices in San Francisco, Oakland, Los Angeles and Salt Lake City. The campaign included practically every medium of advertising, but featured the use of trade magazines.

The Observer

Exports of iron and steel during May dropped off about 21,000 gross tons from the high figure of 194,449 tons reported for April, but May imports reached a total of 108,731 tons, a gain of about 1100 tons over those of April, according to the report of the Department of Commerce recently issued. The heavier export losses were sustained by tin plate, boiler tubes and welded pipe, rails, galvanized sheets, fabricated structural materials and steel bars. In spite of the drop from April, however, the May trade was considerably above that of March, and the combined figure for the first five months of the year, 869,077, is some 23 per cent greater than that for the corresponding period of 1925.

Profits of virtually all the steel companies in the United States were higher in the last six months than in the corresponding period of 1925. Reports for the period, although not yet complete, have made this fact certain. Since steel prices have averaged lower than in 1925, these profits have come from increased volume of business—and are more important still—from more economic methods of production and distribution. Steel ingot production has been nearly 8.5 per cent higher than in the first half of last year and economies resulting from a high rate of maintenance were pronounced. It is anticipated in some quarters that when the United States Steel Corporation compiles its figures for the second quarter, they will show as much as $8 a share earned on the common stock in the first half of the year as compared with $6 reported a year ago.

Because of the immediate danger of fire and the general unsightliness of a building on the University of California campus in Berkeley, known as the Mechanics Annex, President W. W. Campbell has given orders for its destruction. In spite of the loss of floor space which lack of this building will engender, faculty members look upon the move as one of the greatest improvements of the year. There are approximately forty similar wooden buildings on the campus and every one of them is a fire hazard. The Mechanics Annex was built by the United States government during the war and was known as the Radio building. It was later purchased by the University and devoted to air service instruction, mechanical engineering, geology, and naval architecture. An addition is now under construction at the Art building to take care of the architecture, and the other subjects were transferred to other buildings.

Liquid Oxygen—Declared More Powerful And Safer Than Dynamite

Intently at work in his laboratory some fifty years ago, a French scientist Louis-Paul Cailletet, inadvertently opened the wrong valve in a whirring apparatus before him—and made history in doing it.

Nothing exploded, there was not even a sputtering spark, but what happened gave Cailletet the thrill of his life and the scientific world, as it came to realize, a portentious discovery.

In an ordinary glass tube upon which the Frenchman had fixed an expectant gaze during years of experiment, he espied a drop of moisture. It lingered but a moment, little more than a vanishing mist. But this one vagrant drop, produced through a fortuitous mistake signalized the harnessing of a mystic atmospheric force.

It presaged the advent of a new element in physics—now known as liquid oxygen—with a destructive force even deadlier than that of dynamite and, as time has shown, much cheaper and less hazardous in its use.

And all of this out of thin air.

The enthralled Cailletet, when he touched the wrong valve and observed the fleeting drop of moisture, knew only that he had discovered a way to reduce gases from the air to a liquid form and bottle them up. It remained for scientists years later to find out how to utilize this concentrated power, so terrific in its pent-up energy.

Although the every-day world up to this time has heard little of liquid oxygen, it has, within the last decade, taken its place as one of the notable discoveries of the age. While its present-day utility lies in its potency and economy as an explosive, scientists are working upon experiments to apply it to other uses.

Liquid oxygen is literally air reduced to liquid form, from which, in process of powerful compression, nitrogen is distilled off. In the alternating process of compression and expansion through which it is produced, it reaches a temperature of 269.5 degrees Fahrenheit, below zero, a temperature in which human life could not exist for the briefest instant.

In its quiescent form, when not in use as an explosive, liquid oxygen instantly freezes all substances immersed in it. Poured on ice, it vigorously boils, so much colder is it than the ice itself. Flowers dipped in it will become frozen to the solidity of porcelain. An appetizing, tender steak will become so tough under its effect that it may be used as a hammer to drive nails.

Liquid oxygen explosive, or L. O. X. as it has become to be known, is made by mixing very finely divided carbon, which in the form of lamp black or carbon black with the liquid oxygen which is, of course, highly concentrated oxygen. The association of the carbon and the oxygen is so intimate that when combustion is started due to a fuse or detonator, the carbon instantaneously burns and creates a large volume of high temperature carbon dioxide gas.

At the moment of combustion, or explosion, the temperature of liquid oxygen jumps from 269.5 degrees below zero to 5603 degrees above, a variation of 5872 degrees. The shattering force of this combustion is sufficient to rend asunder huge strata of deeply imbedded rock.

The practicability of liquid oxygen as an explosive has been put to test by the United States Bureau of Mines, in collaboration with scientists engaged in its development. It has been found particularly advantageous in blasting rock in quarries or in other open rock formations. During the war, when the Germans ran short of glycerine and Chilean nitrates, they found it imperative to evolve a substitute for dynamite as an explosive. Their engineers who had been working for years on the process of liquifying oxygen put it into use as an explosive in underground mines.

In the last few years, liquid oxygen, or L O X, as it is technically known, has been used in quarrying in New York, Pennsylvania, Colorado and other states, with significant results as compared to the use of dynamite. It has been found that blasts can be made at considerably less expense than with dynamite.

One conspicuous experiment was recently made by experts of the Air Reduction Company and the Ingersoll-Rand Company, the latter of which is one of the producers of the new oil-electric locomotive. Under direction of F. W. O'Neil, chief engineer for the Ingersoll-Rand Company, who has been occupied for several years in the development of the efficiency of liquid oxygen, a plant was erected at a quarry of the Celcite Quarry Company, at Myerstown, Lebanon County, Pa. Sixty cartridges of liquid oxygen were placed in twelve holes 28 feet deep and 6 inches in diameter. A single trunk fuse was used to set off all the cartridges simultaneously. The drill holes were set 12 feet apart, in a 30-foot rock bench.

The cartridges, fitting snugly, were 18 inches long and 5½ inches in diameter, five being placed in each hole. They were encased in bags made of stout muslin and filled with finely divided carbonaceous material of a highly absorbent nature.

Out of 1,014 pounds of liquid oxygen into which the cartridges were dipped, each one absorbed 15 pounds, or 940 pounds for all. Since the cartridges were immersed in relays, one hour and a half elapsed from the time they were dipped until they were placed in the drill holes. This fact is pointed out by engineers as emphasizing that, even with a relatively rapid evaporation of liquid oxygen, sufficient time may be taken for deliberate placing of the cartridges, so as to obtain the most effective results.

The relative cost of blasting with L O X as compared with dynamite has been shown in tests running over a period of two years. These reflect an expense of around three times as much for dynamite as for liquid oxygen.

One pound of liquid oxygen, it has been shown, together with one-fifth of a pound of carbon, with which it is packed in the cartridge, will do the work of one pound of 40 per cent dynamite. With power at one cent per kilowatt hour, liquid oxygen can be produced at 2½ cents a pound, while the carbon used would cost three cents, a total of 5½ cents for the pound. As against this, dynamite costs from 13 to 15 cents a pound.

The safety of blasting with L O X is one of its characteristics, recognized officially by the Bureau of Mines. Danger from accidental explosion is much reduced. Its cartridges cannot be set off except by a very severe shock such as the impact of a bullet. A truck-full of liquid oxygen cartridges could be driven through the streets of a crowded city without fear of anything being blown up in event of a collision. The red flag of dynamite does not have to be dangled from the tail end of the truck carrying L O X.

The Bureau of Mines says of it:

"No danger exists in the trsnsportation of this explosive to the point of use. Practically no danger exists of premature explosion. Danger of misfire in event a cartridge is not properly exploded is eliminated by waiting a sufficient time to allow for the evaporation of the oxygen. (The time necessary depends on the diameter of the cartridge.)

"An unexploded stick of dynamite is always a menace if encountered while mucking or during the removal of coal or ore from a mine, but the liquid oxygen cartridge, under similar conditions, is 'dead'."

Over 100,000,000 tons of stone for crushing and other uses are being blasted in quarries in the United States each year. To shatter and dislodge this rock from the ledge requires millions of pounds of explosives. Economies that may be effected in this work by the substitution of liquid oxygen for nitrogenous explosives, are calculated by experts to run into many millions of dollars a year.

In Europe there are many plants, producing liquid oxygen. One mining company, in Lorraine, is mining its entire output of iron ore by liquid oxygen explosives and it is estimated that fully 80 per cent of the iron ore mined in France is being blasted with L O X.

New liquid oxygen plants are being built in this country with indications that the use of L O X within a few years, for open rock blasting, will become a large enterprise.

The use of L O X in surface, or strip mining, through which huge quantities of coal may be recovered from rocky ground, is one new field in which L O X is destined to play an important role. One mine in Southern Indiana has already been equipped with an L O X plant by the Air Reduction and Ingersoll-Rand Companies and blasting operations are being successfully carried on.

One impressive use of which liquid oxygen is susceptible is in the sick-room, in replacing the mask employed in the administration of oxygen to patients. With a bucket-ful of liquid oxygen placed at the patient's bed and a fan to carry the oxygen across it, a patient would be enabled to inhale the oxygen without knowing it was being administered.

And this powerful liquid oxygen, capable of blowing up a whole city, or in quieter mood alleviating the suffering of the sick room, is drawn, by the ingenuity of science, from the air we breathe.

$2,000,000 A Day Is Paint Expenditure In United States

The United States is spending $2,000,000 every working day for paints, according to a report made to the Engineering Foundation by its committee on wood finishing research, of which A. H. Sabin of New York City is chairman. The nation's paint bill last year is estimated at $600,000,000.

More than half the painting was done by non-professionals, the report states. The application of the paint required about two days' work per capita of the entire population, and the value of buildings and other objects painted was not less than 100 times the cost of the paint.

"Everybody is interested directly or indirectly in the painting of wooden structures," the report goes on. "Few know about paints or their relations to the surfaces painted.

"Even skilled painters lack much of the knowledge which would be found in scientifically correct answers. Consequently, disappintment, waste and dissatisfaction are frequent in painting.

"The American Institute of Architects, the Engineering Foundation, representing the national societies of engineers, and scientific and technical organizations connected with the National Research Council, have for several years been fostering investigations of paint and wood, with the endorsement of the National Farm Bureau Federation and several associations of woodworking industries. From the nature of the problem, it will take several years more to get sure answers to all the questions being studied."

U. S. Gypsum Company To Market Sabinite Acoustical Plaster

Announcement is made at the Chicago office of the United States Gypsum Company that Sabinite Acoustical Plaster, developed at Riverbank Laboratories, Geneva, Illinois, by Dr. Paul E. Sabine, is to be manufactured and marketed by the Gypsum Company under an exclusive license.

This material comes to the job already sanded and requires only the addition of water. It is porous in composition and instead of reflecting virtually all the sound that strikes it, as does ordinary plaster, its absorbs a great proportion of the sound, which it transforms by friction into heat-energy. Its covering capacity is greater than ordinary plaster and its application involves no greater problems than the application of ordinary plaster.

While this material was perfected over five years ago, it has been withheld from the market by Riverbank Laboratories until actual job experience should substantiate or disprove the results obtained in laboratory tests. To obtain this job experience two rooms at Riverbank Laboratories, one room of the Geneva, Illinois, high school and auditoriums and radio broadcast rooms at various points in the United States were plastered with it. According to Dr. Sabine these test jobs all are in perfect condition and the material has performed identically on the job as it did in the laboratory.

Tests and researches into the physics of sound according to Dr. Sabine, have demonstrated that through the use of this material a maximum of acoustical efficiency can be obtained in any theatre, church, auditorium, school or other room.

Riverbank Laboratories, where Sabinite was developed, is a scientific organization that was founded and is maintained by Colonel George Fabyan. The researches into the physics of sound conducted there by Dr. Sabine are a continuation of the work begun by his late cousin, Professor Wallace C. Sabine of Harvard University.

Wages Based On Production Means Piece Work Says Employer

Building trades employers are not ready to accept organized labor's new wage theory that "the worker's real wage must be increased in proportion to his increasing productive power" Some of them, at least, still hold that wages should be based on the law of supply and demand.

C. G. Norman, chairman of the board of governors, New York Building Trades Employers' Association, in an article in the July issue of the "Builder-Economist," published by G. L. Miller & Co., declares that "nothing has appeared under collective bargaining to substitute the cost of living and standard of living basis of wage adjustment." He also says that the workers may have an "increased power of production, but do not produce."

"Organized labor in advancing a new theory as a basis for the adjustment of wage conditions believes that the worker's real wage should be based upon his productive ability," writes Mr. Norman. "This to my mind means piece work, and if this is what organized labor is advocating I feel that as far as employers are concerned in the building industry, they would be only too pleased to accept the theory.

"I quite agree with President Green of the American Federation of Labor that the national state of mind is undergoing a decided change in its views and attitude toward wage theories and wage questions. The exceedingly high wage being paid in the building industry has not only absorbed all of the economies that have been possible through the use of machinery, appliances and methods, but has gone considerably beyond that and with increases have come a reduction in production.

"Some years ago a professor of economics at Columbia asked me the question as to what incentive there was for a mechanic to be a good workman and do a fair days' work? My answer at that time was that experience showed that the good and efficient workman at the end of the year had worked practically continuously and received full time, while the lesa efficient and careless workman spent numbers of days looking for employment, and held a job only while his employer was under pressure to complete a certain piece of work. During the last five years this has changed. With the vast amount of building throughout the country, and restriction of immigration, there has been brought about a condition where the inefficient and careless workman is employed almost on a parity with the efficient, good workman, with the result that the production of the good workman has been reduced, while under the existing conditions the workers may have an increased power of production, but do not produce.

"Were it not for the strong opposition to the theory of the law of supply and demand on the part of organized labor it would operate in all industries in the same manner in which it now applies to those industries which are not dominated by labor organizations," said A. W. Dickson, executive secretary, National Association of Building Trades Employers. He said that another theory advocated by labor which is "unsound economically is that 'our national prosperity depends upon the payment of high wages.'

"High wages of themselves never make for prosperity," he said. "They must be counterbalanced by correspondingly high production. Wage rates are not so important as are 'real wages' or the amount of commodities which wages will buy. Real wages in the long run and considered on a general average spread basis, are based upon production."

Prof. Irving Fisher, department of political economy, Yale University, nationally known economist, however, regards more favorably than the employers the new wage philosophy of labor. He said that he was in "hearty agreement" with the general thesis of labor's proposal, and considered it revolutionary in that it urged upon management "the elimination of wastes in production in order that selling prices may be lowered and the wages higher."

"This is really the opposite of the 'limitation of out-out' theory," said Mr. Fisher. "To have consigned that fallacy to the scrap heap is a tremendous achievement. It will be a epoch making period in history when labor carries out its proposal and demands of management that it be more scientific."

The economist said that one of the weak points in labor's new proposal was that no provision was made for "decreased wages with decreased production." He said that the penalty for keeping up wage rates when production is inadequate to support them, as in a depression is inevitably unemployment, which in itself is equivalent to wage reduction.

"The only effective way to be sure of continually increased wages without any decrease is to prevent any decrease in production. This should be our objective. It may be reached, or approached, by continuous improvements in productive arts and management, improved health and efficiency of all workers, stable credit and money, and adjustment of seasonal industries. Through these means we may flatten out the so-called 'business cycle.'"

San Jose Builders Organize League To Keep Work At Home

Aroused over the fact that they have not been afforded opportunities of figuring on plans or contracts for large local buildings, many of them erected by local people who expect local support, a large number of San Jose building contractors and architects have organized the San Jose Building Industries Protective League and are out to guard their interests against invasion by "foreign" architects and contractors.

Ralph Wyckoff, architect, has been elected president of the league, while W. L. Howe is secretary. The board of directors consists of such prominent men as Charles McKenzie, H. R. Sherman, H. W. Highie, William Higgins and W. J. Serpa.

Contention of the league is that local business interests, expecting the patronage of San Joseans, have gone outside of the city for estimates and plans on buildings while there is as good and better talent located within San Jose, from which city the owners of the new buildings expect support for their respective businesses.

A list of such buildings, planned by out-of-town architects and being built by out-of-town contractors will be made public shortly, members of the b ard of directors announced. "It is a fine state of affairs," one director of the newly formed league said. "San Jose contractors and architects are left completely out in the cold, while rank outsiders are allowed to come in and take the cream of the business. We are not yelling for all the work. If any outside contractor beats us on estimates, well and good, although such pr gressive cities as Fresno are excluding outsiders as far as possible. What we want is a chance to figure on these jobs. In the past we have been entirely excluded — never given a chance to figure—on many local jobs, large or small. Local business wants us to buy our shoes, our clothing, our food from them. But when it comes time to give the architects and contractors a chance to figure on a job which might make them a few dollars, these same business men call in outsiders, and never give the local boys a chance to even figure on them. It is this practice against which we are organizing and which we will in the future fight to a finish."

Fire Resistance Of Hollow Building Tile Is Determined

Tests to show the behavior of tile walls in burning buildings, which the Bureau of Standards, Department of Commerce, has been conducting on hollow tile in cooperation with the Hollow Building Tile Association, were reported in a paper read before the building officials of the principal cities of the United States at their recent annual meeting in Columbus, Ohio.

These tests were planned to yield more information on the properties of hollow tile, such as the strength of tile walls, and more especially the fire resistance of such walls. This report was concerned principally with the fire tests.

Two sizes of walls were tested—one 16 feet long and 11 feet high, the other 4 feet long and 4 feet high. The walls were built just as they would be built in a building and when they had aged a month or more they were placed to form one side of the furnace in which the tests were made. The fire in the furnace was regulated during the test so as to approximate that obtained in severe fires in burning buildings.

The tests show the ability of tile walls to carry load during the burning of a building and also to prevent the spread of fire when they are used as party or fire walls. They show that 8-inch tile walls would be adequate for residence and office buildings and institutions in which no considerable amount of combustible material is allowed to collect.

For stores or factories containing only a moderate amount of combustible material a 12-inch wall would be required. For factories having a considerable amount of combustible material or for warehouses, a wall heavier than 12 inches would be required, particularly if the wall is not plastered.

The results of these tests are considered of great value to the industry and the public, as well as to the building commissioners, in that they give reliable information on the extent to which hollow tile walls can be relied upon for protection in case of fire.

Definite Result Due In Fresno Labor Situation

A definite result, perhaps bringing complete industrial peace, will probably be taken out of Fresno's building industry situation this week.

Several weeks of intensive negotiations by leaders of the various employer and union interests affected by the abandonment of the so-called Fresno plan of conciliation in handling the problems of the industry are expected by leaders to come to a definite head within a few days.

A special meeting of the builders' exchange board of directors is to be called to consider the appointment of a special committee, authorized to confer with a like delegation appointed by the Building Trades Council to reach an amicable settlement of the controversy.

The union camp and the chief employers in the building business were thus apparently moving for an early adjustment by conciliation.

There is marked activity in the Fresno Industrial Association, to whom the organized employers referred the entire matter, after the failure of the worker representatives to sign a new agreement, effective June 16th.

J. W. Hunt, former secretary of the Valley Industrial Association and reputed American Plan advocate, has come from his Los Angeles home to work on field affairs of the employers.

Hunt, who admits an active interest in the building trades situation, emphatically denied his presence or his activity in Fresno portends an "open shop" struggle.

H. G. Wright, secretary of the builders' exchange, announced that "if a sufficient number of the exchange directors were in the city to insure a full representation" a special meeting would be called for the latter part of the week to consider appointment of a "settlement" committee.

He added the only notification he had received of the launching of such a move by the building trades council, which acted last Monday night, was a verbal statement from Fred C. Huss, secretary and business agent for the union organization.

Reduction of this invitation to seek an immediate adjustment to writing probably will be sought and a definite understanding reached as to the powers conferred on the union committee, Wright said.

PAUL BAILEY SUCCEEDS McCLURE AS CALIFORNIA STATE ENGINEER

The appointment by Governor Richardson of Paul Bailey as state engineer of public works succeeding W. F. McClure, deceased, was certified July 17 in the office of Secretary of State Frank C. Jordan .

No formal announcement of the appointment was made, but it was stated at the governor's office that a commission would be issued. By this appointment Bailey, who is now deupty state engineer, becomes ex-officio chief of the division of engineering and irrigation. His salary will be $5000 a year.

The appointment is not unexpected as Bailey has been acting in this capacity since the death of McClure several weeks ago.

Bailey has been connected with the state government since 1916. He was first connected with the state water commission as an investigating engineer and in that capacity made a number of important investigations. He became deputy state engineer in 1921. His chief work in the past five years has been the formulation of the statewide water resources plan, which contemplates the conservation of all available water in the state and irrigation of more than 18,000,000 acres of undeveloped land. He has also taken a prominent part in irrigation district work and in the flood control plan of the Sacramento and San Joaquin valleys.

WATERPROOFING CONCRETE BLOCKS

The discovery of a new process of waterproofing concrete blocks is announced by Paul C. Cunnick, Director of Laboratories at the Rock Island Arsenal, Rock Island, Illinois. Mr. Cunnick states that by treating the blocks with hydrated lime they might be made impervious to water. He said that by adding 20 or 25 per cent of lime to the concrete mixture, a house could be erected in a swamp and the dampness would never penetrate the structure, explaining that the lime is so fine that it fills in all of the voids and cells in the concrete, even fitting in between the cement particles, thus preventing water or dampness from penetrating it. Little is added to the cost of construction by this treatment, it was pointed out.

Building News Section

APARTMENTS

Contract Awarded.
APARTMENTS Cost, $60,000
OAKLAND, Alameda Co., Cal. NE 14th St. 50 W 21st Ave.
Three-story 48-room apartments and stores.
Owner—A. M. Poulsen, 1636 Franklin St., Oakland.
Architect—None.
Contractor — California Builders, 1636 Franklin St., Oakland.

Contract Awarded
APARTMENTS Cost, $24,500
SACRAMENTO, Cal. 908 "O" St.
25 apartments and garages.
Owner—J. F. McNeeley, 910 "O" St., Sacramento, Cal.
Architect—None.
Contractor — Turpin Construction Co., Sacramento, Cal.

To Be Done By Day's Work.
APT. BLDG. Cost, $24,000
SAN FRANCISCO, N Green 150 E Van Ness Avenue.
Four-story and basement steel frame and reinforced concrete apartment bldg. (5 4-room apts.).
Owner—P. L. Shea, 3327 Octavia Street San Francisco.
Architect—Shea & Shea, 454 Montgomery St., San Francisco.

Plans Being Prepared.
APT. BLDG. Cost, $20,000
SAN FRANCISCO, Cal., 44th and Grove
Two-story frame and brick veneer apt bldg. (4 apts), Oakland.
Owner—Mr. Monge, 8th and Broadway Oakland.
Architect — Paul Lavergne, 3119 San Pablo Ave., Oakland.
Ready for bids about Aug. 1.

Plans Being Prepared.
APARTMENTS Cost, $——
SAN FRANCISCO. N Fulton St. near Gough St.
Four-story and basement reinforced concrete apartment house.
Owner—M. Vukicevich and E. V. Lacey Hearst Bldg., San Francisco.
Architect—G. Clausen, Hearst Bldg. San Francisco.
Ready for segregated bids in one week.

Additional Sub-Contracts Awarded.
APARTMENTS Cost, $48,960
PALO ALTO, Santa Clara Co., Cal., Stanford University Campus.
Two-story frame and stucco apartment house.
Owner—Stanford University (a private project financed by Profs. Frank Golder, Ralph Lutz, Dr. Alonzo Taylor and John A. Sellards, all of Stanford University.
Architect — Bakewell & Brown, 251 Kearny St., San Francisco.
Contractor — Stephenson Constr. Co., Hearst Bldg., San Francisco.
Plumbing—Wm. P. Hogan, 338 Winslow, Redwood City.
Electric Work—M. E. Ryan, 231 Main St., Redwood City.
Sheet Metal—Wallace Sheet Metal Wks 300 Arguello, Redwood City.
Flooring Tile—Malott & Peterson, 20th and Harrison Sts., San Francisco.
Tile Roofing — Graff-Winlund-Graff Inc., Beach and Halleck, Oakland.
Ornamental Iron—H. R. Hill Co., 39 Tehama St., San Francisco.
Painting—J. A. Mohr & Son, 433 11th St., San Francisco.
As previously reported, mill work was awarded to Empire Planing Mills, Palo Alto, Cal.; sheet metal work to Cashel Bros., 201 Homer, Palo Alto; rock and sand to Cavanaugh Bros., Menlo Park, Cal.; plumbing and heating to Carl T. Doell, 556 29th St., Oakland; electric work to M. E. Ryan, Redwood City, and lumber and cement to Dudfield Lumber Co., 607 Alma, Palo Alto.

Segregated Figures Being Taken.
APARTMENTS Cost, $200,000
SAN FRANCISCO, W Larkin St. bet. Greenwich and Lombard Sts.
Ten-story, basement and sub-basement steel and concrete community apt. house with stucco exterior.
Owner—2909 Larkin Community Apt. Corp.
Architect — Quandt & Bos, Humboldt Bank Bldg., S. F.

Contractor Taking Sub-Figures.
APARTMENTS Cost, $32,000
SACRAMENTO, Sacramento Co., Cal. 12th Ave. opposite Junior College.
Two-story frame and stucco apartment house with tile roof, Spanish style (10 2- and 3-room apts.)
Owner—Mr. and Mrs. J. A. Riley, 502 10th St., Sacramento.
Designer & contractor—L. F. Gould, 1623 O St., Sacramento.
Individual gas furnaces are specified

Plans Being Prepared
APT. BLDG. Cost, $40,000
OAKLAND, Alameda Co., Cal. 4th Ave. and E 19th St.
Three-story frame and stucco store and apt. bldg.
Owner—Not stated.
Architect—Clay N. Burrell, American Bank Bldg., Oakland.

Completing Working Drawings
APTS. Cost, each, $350,000

Official Proposals

NOTICE TO CONTRACTORS

(Memorial Building—Paradise)

Notice is hereby given by the Board of Supervisors of Butte County, California, that sealed bids will be received by the Clerk of the said Board, at his office in the Butte County Court House, in the City of Oroville, California, up to **Tuesday, August 3, 1926, at 1:30 o'clock P. M.**, for the erection of a Memorial Building, to be built on real property of Butte County, at Paradise, according to Plans and Specifications prepared for the same by Wm. J. Bliesner, Paradise, California. All bidders will bid on the work as follows: General Construction as a whole, and not segregated. Plans and Specifications can be seen during office hours at the office of the said Clerk of the Board of Supervisors, and also may be obtained from the architect, Wm. J. Bliesner, at Paradise, California. Bids will be presented in accordance with the blank form attached to the specifications. Each bid must be accompanied with cash or a certified check on some responsible California Bank, for a sum not less than ten per cent of the amount of bid, made payable to the Clerk of the Board of Supervisors, as a guarantee of good faith, that the party to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary Surety Bonds, for the faithful performance of the work, and also as a guarantee to pay all claims for labor and materals used in the said work, and in case the bidder to whom the contract is awarded, fails or refuses to enter into the aforesaid Agreement, or to furnish the aforesaid necessary bonds, said check will be forfeited to the said County of Butte, in the manner provided by law. The Board of Supervisors will not accept a Bidder's Bond, in lieu of a certified check or cash. Each bid must be enclosed in a sealed envelope and addressed to the Clerk of the Board of Supervisors, and endorsed "Proposal for Building Memorial Building, Paradise." The Board of Supervisors expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Supervisors of Butte County, California.

C. F. BELDING, Clerk
By B. L. McCoy, Deputy Clerk.

NOTICE TO CONTRACTORS

(Road Work—Nevada Irrigation Dist.)

Sealed proposals will be received by the Directors of the Nevada Irrigation District, at their office in Grass Valley, Nevada County, California, up to **two o'clock P. M. (2:00 P. M.), August 6, 1926,** for the construction of Unit No. 2 of the Bowman Lake Road, at which time bids will be publicly opened.

The work consists of the construction of a mountain road about 13,750 feet long, and includes approximately 9,250 cu. yds. of excavation, 7,250 sq. yds. of road surfacing and 7 culverts.

The contract will be let to the lowest responsible bidder. The District reserves the right to reject any or all bids.

Plans, specifications and contracts are on file and can be inspected at the District's office in Grass Valley, or at the office of the District's Engineer, Fred H. Tibbetts, Alaska Commercial Building, San Francisco, California.

Full sets of plans, specifications and contracts may be obtained at the Engineer's office or at the District's office, on deposit of $5.00 for each set, which will be repaid if the set is returned in good condition on or before August 6, 1926.

All proposals shall be accompanied by a certified check or bid bond in the amount of at least 5% of the total amount of the bid submitted.

All certified checks or bid bonds accompanying rejected bids will be returned. Certified checks or bid bonds will be returned to the successful bidder, conditioned on his executing the contract and furnishing bonds required, within the time stipulated in the proposal.

In case of failure to execute the contract or furnish the required bonds within the stipulated time, the certified check or bid bond and the proceeds thereof, will become and remain the property of the Nevada Irrigation District.

Certified checks and bid bonds will be made out in favor of the Nevada Irrigation District.

By order of the Board of Directors of the Nevada Irrigation District.

A. L. WISKER,
Secretary of the Board of Directors.

CONTRACTS AWARDED

GILROY, Santa Clara Co., Cal.—The following bids were received by E. E. Brownell, clerk, Girloy High School District, to remodel high school and erect cafeteria building. Ralph Wyckoff, Growers' Bank Bldg., San Jose, is the architect.

John Ritksheim, 5th St., Gilroy.. $5840
H. R. Sherman, 41 W. San Antonio St., San Jose 5989
Wm. Radtke, Gilroy 5990

The contracts were awarded to H. R. Sherman and John Ritksheim respectively. The heating contract as reported before, was awarded to P. J. Enright, 2720 McAllister St., San Francisco at $2650.

NOTICE TO CONTRACTORS

(Fairfield Grammar School District)

Notice is hereby given that sealed bids will be received by the Fairfield Grammar School District, Solano County, California, at the Present Grammar School Building, Fairfield, Solano County, California, until **eight o'clock p. m., July 30th, 1926,** for the erection of a School Building to be built in Fairfield, California, according to plans and specifications prepared for the same by George C. Sellon & Company, the authorized Architects.

Bids will be received for the General Construction which includes Mason Work; Carpenter Work; Plastering Work; Painting Work; Roofing Work; Plumbing Work; Sheet Metal Work; and Electrical Work.

All bids will be received with alternate propositions.

Plans and specifications can be seen during office hours at the office of the Clerk of said Board at Fairfield, California, and may be seen at or obtained from the office of the Architects, 1415 California State Life Building, Sacramento, California.

A cash deposit of $25.00 will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of the return of same.

All bids must be presented on blank forms which may be procured from the office of the Architects.

Each bid must be accompanied by a certified check on some responsible California bank for a sum of not less than ten per centum (10%) of the amount of the bid, made payable to D. A. Weir, Clerk to the Board of Trustees as a guarantee of good faith that the party to whom the contract may be awarded will, within ten days after the award is made enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work, and in case the bidder to whom the contract is awarded fails or refuses to enter into said agreement, or to furnish said bonds, said check will be forfeited to the said School District, in the manner provided by law. The Board of Trustees will not accept a Bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to D. A. Weir, Clerk of the Board of Trustees, Fairfield Grammar School District, Solano County, and endorsed "Proposal for building School".

The Board of Trustees expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By Order of Board of Trustees, Fairfield Grammar School District.

By D. A. WEIR, Clerk.

NOTICE TO CONTRACTORS

(McSwain School District)

The Board of Trustees of the McSwain School District, Merced County, California, will receive sealed proposals up until **2:30 o'clock P. M. of July 30, 1926,** at the McSwain School Building, at which time and place said bids will be opened and read in public, for furnishing the required labor and material for the construction of a two-room frame addition to the McSwain School house, in accordance with plans and specifications prepared therefor by W. E. Bedesen, Engineer, Shaffer Building, Merced, California.

Cashier's or certified check for an amount not less than ten per cent (10%) of the amount of bid shall accompany each proposal, drawn to the order of J. C. Brooks, Clerk of the Board of Trustees of the McSwain School District, as a guarantee that the bidder will, within five (5) days after being notified of the acceptance of his bid, enter into contract with said school trustees in accordance therewith and shall furnish the surety bonds as required by the specifications, said check to be forfeited to the said school district should the bidder fail to execute contract and furnish bond as above mentioned.

All bids to be made out on forms furnished by the engineer.

Plans and specifications for all the above work may be seen and secured at the office of W. E. Bedesen, Shaffer Building, Merced, California.

A deposit of $10.00 will be required from all contractors receiving plans, said deposit to be refunded when plans and specifications are returned in good condition.

The said School Board reserves the right to reject any or all bids, and to waive any informality in any bid received.

By order of the Board of Trustees, McSwain School District, Merced County, California.

J. C. BROOKS, Clerk.
Dated July 14, 1926.

NOTICE TO CONTRACTORS

(Merced Union High School District)

The Board of Trustees of the Merced Union High School District, Merced County, California, will receive sealed proposals up until **8 o'clock P. M. of July 30, 1926,** at the High School, Merced, California, at which time and place bids and proposals will be considered for doing and furnishing the following work and equipment at the Livingston Branch High School at Liv-

lingston, and the Merced Union High School at Merced.

Bids on all of the work mentioned will be considered separately. Each bid must be accompanied by a certified check drawn to the Clerk of the Board of the High School District, as a guarantee of good faith. Said check to be in an amount not less than 10 per cent of the bid submitted.

Plans and specifications for each of the items mentioned may be procured at the office of W. E. Bedesen, Engineer, Shaffer Building, Merced, California.

Work to be done at the Livingston High School

The grading of the Livingston High School yard to grade stakes set by the engineer, said work to consist of the moving of between 2000 and 3000 cu. yds. of earth. Bids to be received on this work by the cu. yd.

The installation of approximately 4000 sq. ft. of 4" sidewalk. Bids to be considered by the sq. ft.

Installation of a sprinkler system, together with the necessary pumps and motors.

Work to be done at the Merced Union High School

Installation of six gas steam radiators for the heating of the dressing rooms in the gymnasium building.

Furnishing, setting up and delivering to various points in the school district, six portable garages.

The said Board reserves the right to reject any or all bids, to waive any informality in any bid received, or to accept any bid which in their judgment best subserves the district's interest.

By order of the Board of Trustees of the Merced Union High School District, Merced County, California.

O. A. TURNER, Clerk.

Dated July 9, 1926.

NOTICE TO BIDDERS

(Stiffleg Derrick)

PROPOSALS FOR ELECTRICALLY OPERATED STIFFLEG DERRICK

Sealed proposals will be received at the office of the General Purchasing Offier, The Panama Canal, Washington, D. C., until 10:30 o'clock a. m., August 5, 1926, at which time they will be opened in public, for furnishing the above-mentioned equipment. Blanks and information relative to this Circular (1746) may be obtained from this office of the offices of the assistant purchasing agents, 24 State street, New York; 611 Gravier street, New Orleans, La.; and Fort Mason, San Francisco, Calif.; also from the United States Engineer Offices in the principal cities throughout the United States. A. L. FLINT, General Purchasing Officer.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission at the place, date and hour indicated below, at which times they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Proposals received at 515 Forum Building, Sacramento, California, until **2 o'clock P. M. on August 16, 1926.**

Monterey County, across Salinas River one mile south of Soledad (V-Mon-2-D), a bridge consisting of eleven 119-foot steel spans, three 17-foot and one 19-foot timber approach spans to be refloored, cleaned and painted.

Los Angeles County, between Michigan Ave., Whittier, and the southerly boundary (VII-L A-2-D), about three and two tenths (3.2) miles in length, to be graded and paved with Portland cement concrete.

Proposals received at 603 Rowell Building, Fresno, California, until **10:30 o'clock A. M. on August 19, 1926.**

Fresno County, between Church Avenue and Cherry Avenue, Fresno, (VI-Fre-4-B) about six-tenths (0.6) miles in length, to be widened and surfaced with asphalt concrete.

All bids are to be compared on the basis of the State Highway Engineer's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated July 19, 1926.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the **California Highway Commission, 515 Forum Building, Sacramento, Cal. until 2 o'clock p. m. on Aug. 2, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Santa Barbara County, across Gaviota Creek about 2½ miles north of Gaviota (V-S. B-2-E) a reinforced concrete girder bridge 24 feet wide composed of three 54-foot spans and one 30-foot span, and about twenty-six-hundredth (0.26) miles of roadway to be graded and surfaced with standard road surfacing, crushed gravel or stone.

San Diego and Imperial Counties, between top of Mountain springs Grade and Myers Creek Bridge (VII-S. D-Imp-12-H & A), about six and eight-tenths (6.8) miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: July 6, 1926.

NOTICE TO BIDDERS

(Turbine Pump — Fresno County)

Pursuant to an order of the Board of Supervisors of Fresno County, California, duly made and entered in its minutes on the 23rd day of June, 1926, notice is hereby given that said board will receive up to **2:00 o'clock p. m., of the 2nd day of August, 1926,** sealed proposals for furnishing and installing a Turbine Pump at the General County Hospital.

The said pump is to be installed in accordance with the specifications heretofore adopted therefor, and on file in the office of the clerk of this board. Said specifications offer three alternate propositions.

Copies of the specifications may be obtained from the clerk of the Board of Supervisors in the office of said board in the Court House, Fresno, California.

A certified check in the sum of 10 per cent of the amount of the bid, made payable to the Chairman of the Board of Supervisors, must accompany each proposal as a guaranty that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract with Fresno county to do such work as above mentioned, and furnish good and sufficient bonds according to law and rules of this board, conditioned upon the faithful performance of such contract, and all the provisions thereof.

Bids not accompanied by certified checks will not be considered.

The Board of Supervisors reserves the right to reject any or all bids.

Dated this 23rd day of June, 1926.

D. M. BARNWELL, Clerk.
By Fred E. Main, Deputy.

Wm. J. Frazier, former Sacramento building contractor, died in San Francisco recently. A widow, two sons and a daughter survive.

Schumacher Plaster Wall Board

"AND they're good walls, too. Smooth and solid. Not a joint to be seen, yet we didn't use a batten in the whole house. You can certainly deliver good walls if you build them with Schumacher Plaster Wall Board."

That's the advantage of Schumacher Plaster Wall Board. It's a good wall already prepared. You can finish a whole wall with it while you're preparing the mortar for the old fashioned way.

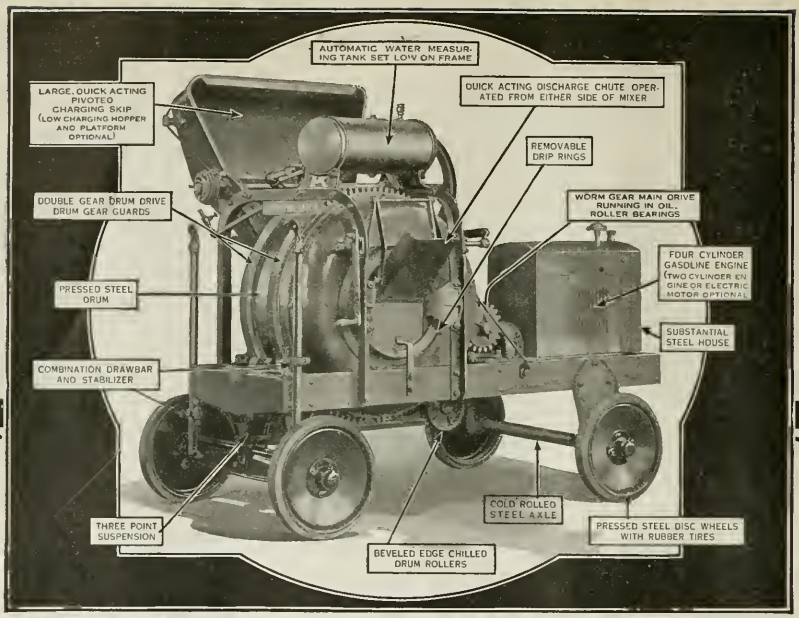
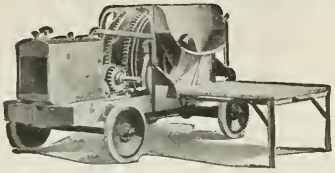
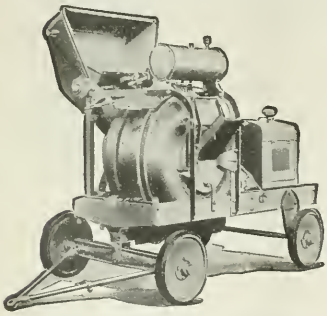
IT



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
QUICK ACTING DISCHARGE CHUTE OPERATED FROM EITHER SIDE OF MIXER
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

ENGLISHMEN DISCLOSE FACTORS FOR OUR PROSPERITY

The "Secret of High Wages" is a title of a book just published and which was written by two young Englishmen who toured the United States last year, studying industrial conditions in this country. The following points are touched upon in the book as being the factors contributing to our national prosperity:

(1) Promotion in America is by Merit.

(2) America sticks to the principle of small profits and quick returns, and wealth is made by fine margins of profit on immense and rapid turnover.

(3) Rapid turnover is secured by simplification and cheapening of processes which necessitates less capital for a given output.

(4) America shows endless keenness in time-saving and trouble-saving appliances.

(5) The American employer is not hostile to high wages:

(6) American manufacturers co-operate by exchanging ideas.

(7) Americans are vigilant and acute in eliminating waste and in conserving time, energy and space.

(8) American welfare methods double high wages in their stimulating effect by surrounding the workers with cleanliness and light and by seeking in every way to increase their convenience and satisfaction.

(9) Americans encourage research with magnificant intelligence, scouring the world to obtain the best research brains.

WAGES BECOMING STABILIZED NATIONAL SURVEY DISCLOSES

While the ten years ending with 1925 have been more violent wage fluctuations than had ever occurred in the history of the United States as far as available records show, present indications are that wages as a whole have become fairly well stabilized and have resumed their normal trend, according to the annual wage study of the National Industrial Conference Board.

The importance to industry and to business generally of more stabilized wage conditions and of less severe fluctuations, will be more fully appreciated if it is brought to mind that a one per cent increase in railroad wages, for instance, can add 28 million dollars a year to the cost of operating the country's railroads. As far as the immediate future is concerned, such wage changes as will occur are likely to be localized and sporadic, without greatly disturbing the general trend, which has been gradually upward since 1840, the earliest date for which detailed records are available.

Since 1923 there has been consistent evidence that wage fluctuations were being confined between narrower limits, in contrast to the period of 1915 to 1923, when the entire wage and price fabric was disrupted first by rapidly rising, then by sharply declining rates. One of the most significant events in the wage history of 1925 was that the outstanding wage controversy of the year, the anthracite coal strike, resulted in the continuation of the existing wage scale.

Since wages in the long run tend to follow commodity price movements, the price trend is scrutinized by the board in connection with its wage study, but with the result that as yet no definite long-time trend of the price level either upward or downward has been established. The average price level in 1925 is found to have been higher than for any other year since 1920, and 6 per cent higher than in 1924, but recently has been slowly declining.

STATE ENGINEERS TO REPORT ON DEFECTS IN $400,000 BRIDGE.

State highway officials decline to discuss further the condition of the $400,000 Douglas Memorial Bridge over the Klamath River in Del Norte which R. M. Morton, state highway engineer, announces will not be accepted or opened until what "appear to be serious" defects in construction are thoroughly investigated and eliminated.

The exact nature of the defects, which appear in the cement construction of some of the main supporting arches of the bridge, built by F. Rolandi, San Francisco contractor under the direct supervision of engineers of the highway department, will be determined in a report to be made by a committee of expert engineers appointed by the commission.

Whether the defects can and should be repaired also will be determined by the commission after it receives the report of the engineering board which has made investigations and soon is expected to present its findings.

Engineer Morton expresses the belief that the defects in the construction are due to the rush of the contractor last Fall in pouring the concrete arches before the high water came.

Officials of the commission maintain that the material used in mixing the cement was O. K. in that it all was examined by chemists of the highway department.

It was first intended to build the bridge of steel, but after due consideration the engineers decided upon concrete construction. The strength of the bridge lies in the thrust of the arches, in the cement of which the defects have been discovered.

Commission officials will not speculate as to how long the defects in construction will delay the opening of

SANTA BARBARA WAGE INCREASE NOT TO BE PRESSED

Wage increases of $1 a day, requested by five Santa Brabara building crafts, will not be effective August 1, as previously announced, it is stated by Jay Smedley, secretary and business agent of the Building Trades Council.

Craft representatives are now negotiating with a committee from the Builders' Exchange, and no changes will be made in the present scales until an agreement is reached.

"The negotiations seem to be dragging," the building trades secretary said, "and the unions do not intend to put the new scales into effect until they are completed. I don't know when that will be."

The trade unions requested the higher wage scale on May 1, effective 90 days from that time. About a month later the Builders' Exchange took up the matter by appointing a committee to meet with the unions.

The five crafts are sheet metal workers, iron workers, stone masons, building laborers and hod carriers.

FIRE RESISTANCE OF BUILDING WALLS TESTED

A new type of apparatus to test the fire resistance of building walls and the stability under pressure, at the same time, has been perfected by underwriters lab ratories.

In the shape of a movable frame of I beams, into which a test wall of any desired sort may be built, the apparatus has a row of hydraulic jacks across the bottom, which can apply up to 200 tons of pressure, to simulate the weight of a wall several stories high.

Containing a brick wall, the frame is rolled into place in the side of a furnace and the bricks heated almost to incandescence then deluged with a fire hose. This first test wall showed some crumbling on the fire side and the fire did not penetrate the wall.

After the wall treated by fire is cooled, the hydraulic jacks then apply double pressure for which the wall is to be built to withstand, to judge of its probable performance under unusual loads.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The City Council of Kalamazoo, Mich., is reported to have passed an ordinance fixing the cost of extinguishing fires upon persons disobeying fire precaution orders.

The Bureau of Labor statistics says that out of every dollar spent for building in 274 cities during 1925, 64.7 cents went into residential construction. One-family dwellings made up 41.7% of all buildings in number and the average cost was $4567.

Offering for sale of ripe timber on 1,196,353 acres of remaining land formerly a part of the grant to the Oregon and California railroad and of approximately 93,000 acres of land formerly a part of the Coos Bay Wagon Company grant in Oregon is announced by the interior department. Sale of the timber lands will be made at auction.

The hourly rate of wage for elevator constructors and helpers in Boston was increased to $1.33 and 93 cents respectively on June 21st. This was in accordance with the agreement consummated between the elevator constructors and their employers.

On July 3, there were 47 strikes before the Department for settlement and in addition 9 controversies which had not reached the strike stage. Total number of cases pending 56—6 of which are new. The 5 new cases may be compared with 15 and 5 of the first and second weeks preceding.

Discovery of a new steel alloy is announced by Sir Robert Hadfield, head of Hadfields, Ltd., steelmasters, according to word from Sheffield, England. So high a temperature will it withstand that a gas turbine has been constructed to run at the speed of 55,000 revolutions per minute, at a working temperature of 1650 degrees F. Machines made of this steel, it is stated, can be worked at a bright red heat.

Contractors and material men who joined in a lockout of Gary, Ind., trade unionists because the latter refused to handle non-union made window sash, have reached an agreement with the various unions through the Federal Department of Labor, it has been announced. The lockout affected every trade union in the Gary district and involved a building program of $9,000,000. The men had been locked out for several weeks, material men agreeing not to supply building material of any kind during the lockout. The men have returned to work.

Under a new rule adopted by the commissioners of the District of Columbia, the owner of a building under construction must employ an inspector approved by the District building inspector. The rule applies to the construction of large buildings and all places of assembly in the District of Columbia; buildings containing more than 20,000 sq. ft. of reinforced concrete or more than 100 tons of structural steel, and also theatres and other places of assembly regardless of size. The rule carries out a recommendation made by the Washington Society of Engineers.

Louis J. Cohn, San Francisco contractor, has filed suit for $100,000 against five directors of the United Income Properties, Inc., an Oakland concern. Cohn alleges he began work August 18, 1925, on a $2,000,000 building ordered by the company at Twenty-eighth street and San Pablo avenue and that he was forced to stop construction last April 15 because the firm became insolvent. Directors named are Louis Engleberg, Ray Nestid, K. Gluck, B. J. Klainman and Ludwig Steiner.

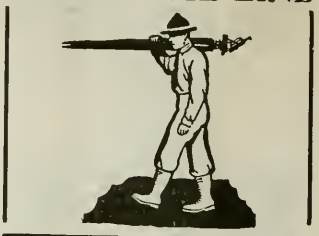
Los Angeles building total for July promises to make a new record for the current year. Up to and including the 20th the number of permits issued was 1892 and the estimated valuation was $11,329,252. For the corresponding period in June the number of permits issued was 2087 and the estimated valuation was $9,033,605, and for the first 20 days of July, 1925, the number of permits was 2248 and the estimated valuation was $7,969,025. A permit for the superstructure of the new city hall, estimated to cost $4,000,000, is included in the July total. Up to July the largest total for any previous month of the year was $13,879,558 in March. For the current year up to and including July 20 Los Angeles' building total was $74,490,647, as compared with $91,144,482 for the corresponding period last year.

The growth of the open shop movement throughout the United States following the World War has, in a measure, curbed the power of the closed shop in the United States; but every American citizen should recognize that every time he signs a closed shop contract with any labor union, wherein he agrees to employ only men who are members of the labor union, he is thereby bringing this Government just one step nearer to the point that England has reached today. Freedom of employment or, in other words, the right to work for a living, is absolutely essential to the life and happiness of every citizen, and it is a dangerous policy to place the power to grant or withold this right in the hands of labor unions who are responsible to no one but themselves. Conditions in closed shop England today should certainly serve as an object lesson to open shop America.—"Open Shop News."

June, 1926, production and shipments of Portland cement were the greatest for any month in the history of the industry, according to the Department of Commerce. Portland cement stocks continued the seasonal decline but at the end of June were nearly 16 per cent higher than on June 30, 1925. Total production for June was 16,827,000 barrels, against 15,387,000 barrels in June, 1921

Special meeting of the Pacific Electric Manufacturing Company has been called for September 8th when the question of increasing the capital stock of the company from $200,000 to $500,000 will be considered. The meeting will be held at 5815 Third Street, San Francisco, it is announced by James A. Thompson, secretary of the company.

ALONG THE LINE



Henry B. Fisher has been named city engineer of Gilroy succeeding Chas. E. Sloan. The city contemplates the construction of a sewage disposal plant.

Fred Banta, 82, a native of Indiana, and former building contractor of Fresno, died in Los Angeles July 16. Death was due to heart trouble.

W. N. Crandall, 72, contractor, identified with the building of the Santa Fe and Salt Lake railroads, died in Los Angeles, July 20.

M. Kunakoff will operate from 1017 DeHaro Street, San Francisco, under the trade name of Progress Floor Company.

Architects Kuhn and Edwards, formerly operating from 833 Market St., announce dissolution of partnership. Mr. Edwards will continue to practice at 525 Market street, San Francisco.

Harold S. Williams will be a candidate for the office of county surveyor of Santa Cruz County. Lloyd Bowman, incumbent, will also be a candidate for the office.

Theodore A. Randall, 60, secretary of the National Brick Manufacturers' Association and nationally known authority on ceramic arts, died in Indianapolis, Ind., July 23.

Four city employes of Berkeley have tendered resignations to City Manager John N. Edy. Dr. W. P. Shepard, city health commissioner for 18 months, will leave Aug. 9 to become director of the welfare organization of a large insurance company, with headquarters in San Francisco. Fred J. Henderson, assistant building inspector, and H. E. Marshall of the same department will leave Aug. 1. Each considers his pay insufficient. Frank L. Flittner, building appraiser, will leave the service in September.

Herrick Lumber Company of St. Maries, Idaho, has let a contract to the T. J. Long Company of Portland, Ore., to construct 52-miles of standard-gauge railroad out of Burns, Ore., to cost in excess of $1,500,000 in addition to an electrically operated sawmill with a capacity of 75,000,000 feet of lumber annually.

Lieut. Col. Herbert J. Simon, for the past six years director of sales for the Los Angeles Pressed Brick Company, died in Los Angeles July 15, after an illness of two weeks. He was born in San Francisco Feb. 2, 1886, but lived in Los Angeles since he was 8 years of age. He was connected at different times with M. A. Bryne Tile & Marble Co. and Wesselne Marble & Tile Co. in the southern city. He served overseas during the world war with the 160th U. S. Infantry and in the Intelligence Service. He is survived by a widow and two sons, Herbert J. Simon Jr., and Charles Simon.

TRADE NOTES

Allen Breed will operate from 311 California street, San Francisco, under the firm name of Pacific Redwood Floor Company.

Chas. W. Down and Ernest A. Jensen will operate general plumbing business in San Jose under the trade name of "Golden Crest Plumbing Company."

J. A. Daugherty has been named secretary of the San Francisco Master Plumbers' Association. Daugherty was formerly connected with the California Steam & Plumbing Supply Company.

Hutchinson and Company, Oakland paving contractors, have leased the University of Stanford quarries at Palo Alto and plan immediate construction of a spur track to connect with the Southern Pacific-Mayfield-Los Gatos branch line.

Fire starting from an explosion in the boiler room, destroyed the mill of the Security Lumber Company, Inc., and nearly 1,000,000 feet of finished lumber at Kapowsin, near Tacoma, Wash., July 25. The loss, none of which is covered by insurance, is estimated at $35,000.

Republic Motor Truck Co., Inc., Alma, Mich., announces the establishment of a system of factory branches on the Pacific Coast extending from Los Angeles to Portland, Oregon. Three of these factory branches have been opened in the past month in Los Angeles to Portland, Oregon. The names of the managers in the present branches are as follows: Los Angeles, G. A. Anderson; San Francisco, K. A. Woodin; Portland, Glenn Harmon. R. H. Spencer is Pacific Coast manager of the entire West Coast branch system

Chester N. Reitze has resigned as Pacific Coast District Manager of the Portland Cement Association to become vice-president and general manager of the Superior Portland Cement Company, Inc., with offices in Seattle. J. E. Jellick, district engineer of the Portland Cement Association at Los Angeles has been made Pacific Coast District Manager, succeeding Reitze, and will make his headquarters in San Francisco. Mr. Jellick is succeeded by A. H. Potts, one of his former assistants.

Approximately 200 of the Ward Heater Company dealers and representatives throughout the United States will be guests of the company at a convention to be held in Los Angeles, August 10. Dealers throughout Texas, Colorado, Montana, Oregon, Washington, California, and from the far Eastern states will be present. The purpose of the convention is to lay before the dealers and representatives the new sales plans under which Ward Furnaces will be sold this season. The representatives will be shown through the foundry and assembling plants and a number of agencies in the immediate district, and at the final wind-up a talk will be made by Samuel Sproat, president of the company, on manufacturing and sales methods, as well as the 1926 advertising campaign.

Closer Co-Operation Is Urged By A. G. C. Chief On Visit Here

Calling for closer co-operation, pleading for the elimination of the irresponsible contractor, closer attention to the lien law and urging the axiom that in numbers there is strength, Colonel D. H. Sawyer, secretary of the Associated General Contractors of America, with headquarters in Washington, D. C., is in San Francisco.

Speaking of the Pacific Coast, Col. Sawyer says:

"The great need here in the West is capital, and I admit that I don't know where it is coming from, but one thing I am sure of, and that is that it will be produced somehow, for every available acre of land here in the West must be put to use, and very soon now.

"You have climate, soil, water power and transportation, and it is imperative that these things be utilized in order to feed our growing country.

"I predict a steady growth here, and want to warn against a 'boom' such as was just experienced in Florida. Probably the only thing that keeps these operators from coming out here to work is the fact that they haven't the railway fare."

The Associated General Contractors are making headway with the Campbell bill, which, if passed, will allow public officials to accept competitive bids on municipal jobs, according to Sawyer, who states that the judiciary committee has reported favorably on it. Concerning this bill, Sawyer says:

"Very few public officials are fitted to do the work of a contractor, and we have figures to show that work done on contract is cheaper than that done by city officials.

"A bill allowing competitive bidding would be especially useful in the maintenance of our highways. With an investment of a billion dollars yearly, it can be seen that there are any number of repairs, extensions and improvements to be made, and the problem of handling these small jobs is becoming difficult."

A big work which the association is doing is the establishment of apprentice schools to interest American boys in the hand trades, Sawyer states.

This is important, he says, because the labor problem is becoming a difficult one with contractors, due to the diminishing number of foreign laborers let into the country, the activities of the unions which work to cut down the working hours, and the fact that most American boys are not interested in learning to be brick masons and carpenters.

'As a matter of fact, there is more opportunity for advancement in these lines of work than in almost any other field," he said.

Sawyer, who was a colonel in the construction division during the war, has been active during the past year in standardization of contracts for the Associated General Contractors. His tour is primarily to gather material upon which a comparative study of building conditions and costs will be based.

Du Pont De Nemours To Assist Master Painters In New Bureau

In recognition of the public service rendered by master painters in their respective communities and to assist them in their contribution to the preservation of property, E. I. du Pont de Nemours and Company announces the formation of a new division to make available the latest developments in the evolution of finishing products. It will be known as the Architectural Division with Frank T. Stocker as manager and will operate under the Paint and Varnish Division in Philadelphia.

Observations made by sales representatives and dealers throughout the country confirm the general impression that master painters worthy of the name have become progressive business men. They are alive to the opportunities in their business and they wish to prepare themselves with all possible thoroughness for the responsibilities placed upon them by architects, contractors and home owners.

The master painter is no longer thought of in terms of overalls and stepladder. Today he is recognized by forward-looking people in the community and in the paint and varnish industry as a business advisor, a merchandiser of color, economy and comfort and a trusted consultant in matters which affect seriously the best interests of the family, neighborhood and community.

He is pledged, according to the code of ethics adopted by this International Association, among other obligations to "Conduct ourselves so that our example and practice will have an uplifting influence on the business; to continually study modern design and color so that our opinions will be sought and respected; to have a thorough knowledge of our business that we may submit reasonable prices covering all costs and an adequate profit."

In the belief that he is entitled to have the active co-operation of the research chemist and the manufacturer who provide him with his materials, the du Pont Company has established the Architectural Division.

One of the important functions of this new unit will be to co-operate with the Master Painters and Architects in the development of their work, and to offer the results of research and experimental work whenever this information will be of practical value. The whole plan, of course, is one of co operation in keeping with the company's policy, to recognize these two important groups as factors in the paint and varnish industry.

The development of the newer type of finishes will render this type of service particularly valuable, so that both groups will be consistently informed of all the latest paint and varnish developments and their application to industry.

For information regarding the working details of this plan, as well as information on any finishing problem, may be directed to the Architectural Division, 3500 Grays Ferry Road, Philadelphia Pa.

PAVING WAR LOOMS IN OAKLAND AS RESULT OF NEW FIRM IN FIELD

Possibility of a new paving war in Oakland looms today following the refusal of the city council to reject bids for the improvement of three Oakland streets.

The California Construction Co., a San Francisco concern, entered Oakland unannounced and underbid the local contractors.

This invasion has aroused the ire of local men, a letter to the city council from the Hutchinson Company of Oakland indicates.

In the letter Dwight Hutchinson urged the council to reject all bids. If the council would call for new bids he promised to submit an offer at least $10,000 under the low bid submitted by the California Construction Co.

Mayor John L. Davie asked if the original bids had been regular. He was advised they were. On roll call W. J. Baccus, commissioner of streets, alone voted against it. Commissioner Leroy Goodrich was absent.

The improvements over which the controversy arose are to be made on Plymouth street between Eightieth and Ninetieth Avenues, on Jones Avenue between East Fourteenth street and Foothill boulvard and on Eighty-second Avenue between East Fourteenth and Olive streets.

The total cost of the work will be about $110,000.

WALWORTH-LALLY COMPANY SUED FOR $20,000 DAMAGES

Charging that his business and reputation were damaged, and that he suffered humiliation through an assignment of a claim by the Walworth-Lally Company, that resulted in attachment of his automobile and plumbing business at Martinez, I. B. LaFleur, plumbing contractor, has filed suit for $20,000 damages in the superior court in that city.

LaFleur says that on January 8 he gave Walworth-Lally Company an order on the American Bank for all money deposited in his name up to the amount of his indebtedness to the concern, which was in the neighborhood of $1100, and that the assignment was satisfactory to them. On April 15, he says, the defendants assigned his agreement to a collection agency for the purpose of bringing action to enforce payment of the money. Judgment was rendered in favor of the collection agency, he says, and attachment of his automobile and plumbing shop followed.

LaFleur says that prior to that time he enjoyed a good business and good reputation. He asks $10,000 exemplary and punitive damages, and $10,000 damages to his business, in addition to costs of action.

SANITATION LEAGUE ELECTS

Joseph Ahlbach of the firm of Ahlbach & Mayer has been elected president of the California Sanitation Development League. Ross M. Clark of the American Radiator Company and H. M. Friesley of M. Stulsaft Company, were elected 1st vice and 2nd vice presidents respectively. Neil O'Hair of P. E. O'Hair & Co., was elected treasurer and Edward Looker, secretary. The board of directors comprise: J. Ahlbach, R. M. Clark, H. M. Friesley, N. O'Hair, C. N. Gilley, Ans Dalziel, C. T. Doell, A. S. Lamond and B. F. Blair.

N. E Spicklemore of Berkeley has been appointed assistant to R. H. Witt, city engineer of Chico.

Prosperity Not Based On High Wages Alone

(Special Correspondence fro m National Association of Building Trad es Employers)

The new wage policy of the American Federation of Labor as outlined by President William Green, is the subject of considerable discussion on the part of economists and business men everywhere.

Most writers agree that the weak point in the theory is that while wages should be increased with increased production, they should not be decreased with decreased production. Regardless of the attitude of labor on this particular point there is a certain penalty for keeping up wage rates when production is inadequate to support them, as in a depression, and that is unemployment. The only effective way to be sure of continually increased wages without any decrease is to prevent any decreases in the general level of production.

Another weak point in the theory is that the law of supply and demand is no longer operative. It is true that in the long run wages will be based upon the law of supply and demand.

While it is a fact that the law does not operate fully in every instance it is equally true that the principle reason it does not is on account of the barriers put up by labor.

Were it not for strong opposition to the theory of the law of supply and demand on the part of organized labor it would operate in all industries in the same manner in which it now applies to those industries which are not dominated by labor organizations.

Another theory advocated by labor which is unsound economically is that "our national prosperity depends upon the payment of high wages. High wages of themselves never make for prosperity. They must be counter balanced by correspondingly high production. Wage rates are not so important as are "real wages" or the amount of commodities which wages will buy. Real wages in the long run and considered on a general average spread basis are based upon production.

There can be no permanent prosperity so long as the wages paid to any one particular group are out of all proportion to those paid to all other groups, because the commoditles made hy one must of necessity be purchased by and paid for out of the wages of the others.

The wage theory advanced following the last annual convention of the American Federation of Labor in which labor declared, "We hold that the best interests of wage earners as well as the whole social group are served, increasing production in quality as well as quantity and by high wage standards which assure sustained purchasing power to the workers, and, therefore, higher national standards for the environment in which they live, and the means to enjoy cultured opportunities," is without doubt the most important and forward looking statement which ever eminated from a labor convention in this or any other country.

It has long been an accepted fact that wages can only be paid out of production. Where there is low production there must of necessity be low wages, otherwise there would be no business stability.

High production, high wages and high consumption go hand in hand and are the cardinal principles of modern American industry.

These three factors are responsible for the fact that the United States today is the most prosperous nation in the world. The opposite theory of low production, low wages and low consumption is being tried in Europe with disastrous results to industry and workers.

Building Trades Membership In U. S. Exceeds One Million

1,027,584 Building Craftsmen Now Members of Labor Organizations—Union Wages Accepted Basis For All Compensation In Industry—Skilled Workers Highly Organized—Many Apprentices Being Trained

(Special Correspondence From Building Construction Research Bureau of G. L. Miller and Company)

For the first time in the history of the construction industry, the building trades in the United States have a membership of more than one million, according to statistics made public by the Building Construction Research Bureau of G. L. Miller & Co, nationally known real estate investment bond house specializing in building construction financing.

"A nation-wide survey of union membership in the building industry," said the Research Bureau's report, "revealed that at the present time 1,027,584 building trade mechanics were actually members of labor organizations. This represents a gain of 69,594 new members during the last year, an increase of about 7 per cent over their former membership—the largest gain ever recorded in any one year. The increase was made by unions affiliated with the American Federation of Labor, which have been making considerable progress toward organizing building mechanics.

"Tremendous gains made by organized labor have placed it in a more favorable position than ever before to oppose any attempt at wage reductions. Any substantial lowering of general labor costs seems unlikely for many months unless there is a serious falling off in building activity which would materially reduce the demand for labor.

70 Per Cent of Skilled Crafts Organized

"The building trades unions now actually control between 45 and 50 per cent of the 2,250,000 wage earners in the construction industry, and the wages and working conditions that they have obtained are generally accepted as the basis of compensation for all building mechanics.

"Union organizations of the skilled trades is mostly highly developed and it is estimated that approximately 70 per cent of all the skilled craftsmen in the building industry are members of labor unions. Efforts to organize common labor, however, have not been so successful and it is estimated that less than 20 per cent of the 625,000 unskilled workers in the industry are unionized.

"Official membership figures obtained from the various international unions showed that the seventeen building trade unions affiliated with the American

Federation of Labor now have a combined membership of 997,684. There is in addition to these organizations, an independent union known as the United Building and Common Laborers Union of America with a membership of 20,000, and several smaller independent unions with a combined membership estimated at not more than 10,000, making the actual total membership of organized labor in the building industry 1,027,584.

"The United Brotherhood of Carpenters and Joiners of America, the largest building trades union in the country, showed a most remarkable growth with a gain of 35,800 new members. The International Union of Bricklayers, Masons and Plasterers was second in gains with an increase of 10,577 new members. A number of other international unions showed gains ranging from 500 to 6000 new members during the last year.

"The Bricklayers Union and plasterers organization were shown by membership figures to be the most highly organized of the building trades. These figures indicated that the bricklayers had a membership equal to about 85 per cent of all the workers engaged in this trade, while the plasterers had succeeded in unionizing about 75 per cent of this type of mechanics.

"William J. Tracy, secretary-treasurer of Building Trades Department of the American Federation of Labor, which comprises sixteen international unions, and not including the United Brotherhood of Carpenters, reported that the Department now has a membership of 574,556, an increase of 30,651 over last year. He said that the affiliated international unions 'only pay on membership in good standing and it would be fair to estimate on an average of about 10 per cent being added to the total.' In 1921, the Building Trades Department had a membership of 513,025; 1922, 507,356; 1923, 502,132; 1924, 522,610 and in 1925, 543,905.

Unions Unite to Hold Gains

"Mr. Tracy said that the building trades unions had successfully 'weathered their fight against the open shop and low wages and the unions will not surrender what they have gained through years of struggle.'

"'All our jurisdictional troubles,' he added, 'are being satisfactorily adjusted, meaning greater solidarity of the building trade unions. Low wages and bad conditions of employment cannot long prevail where the workers of an industry unite their efforts in a forward and upward movement.'

"In making a survey of union membership the Building Construction Research Bureau received reports from various international unions which showed that labor is making a serious effort to train apprentices, and it is estimated that at least 25,000 apprentice mechanics are being trained.

"The Bricklayers Union reported that they had an apprentice membership at this time of 13,360 as compared with 11,509 at the same date last year. The International Lathers Union reported a large number of apprentices in training, and stated that there was registered at their headquarters at the present time 1038. The Granite Cutters International Union reported that an effort was being made to establish a 'real apprenticeship system in the industry, which would make an increase in the number of apprentices which at this time is very low.' The International Union of Steam and Operating Engineers reported approximately 3000 apprentice engineers in the building industry and declared that they never 'hesitate to accept into membership any apprentice because we know that tomorrow he will be a journeyman.'

"The Brotherhood of Painters, Decorators and Paper-hangers and the Brotherhood of Carpenters reported that they had a large number of apprentices in training but were unable to furnish definite figures."

Membership of Building Unions

These figures officially reported by the various building trades unions show their present membership strength as compared with a year ago as follows:

	1925	1926
Carpenters and Joiners, United Brotherhood of	364,993	400,793
Bricklayers', Masons and Plasterers' Int'l. Union of America	110,951	121,528
Painters, Decorators and Paper-hangers, Brotherhood of	115,640	119,332
Hod Carriers', Building and Common Laborers' Int'l Union	74,000	80,000
Plumbers and Steam Fitters, United Ass'n of	65,000	70,000
Electrical Workers of America, Int'l Brotherhood	55,000	60,000
Plasterers', Operative and Cement Finishers' Int'l Ass'n	30,000	30,000
Lathers, Int'l Union Wood, Wire and Metal	21,856	25,570
Metal Workers, Int'l Alliance Amalgamated Sheet	25,000	25,000
Bridge and Structural Iron Workers' Int'l Union	19,185	20,569
Engineers, International Union of Steam	16,100	14,000
Granite Cutters, Int'l Ass'n of	8,500	8,500
Elevator Constructors' Int'l Union	8,122	8,122
Stone Cutters' Ass'n, Journeymen	5,068	5,595
Marble, Slate and Stone Polishers, Rubbers and Sawyers, Tile and Marble Setters, Helpers, I. A.	3,075	3,075
United Slate, Tile and Composition Roofers', Damp and Waterproof Workers' Ass'n	3,000	3,000
Asbestos Workers, Int'l Ass'n of Heat and Frost Insulators	2,500	2,500
TOTAL UNION MEMBERSHIP AFFILIATED IN A.F.OF.L.	927,990	997,584
Common Laborers, United Building	20,000	20,000
Membership of other Independent Unions	10,000	10,000
TOTAL ORGANIZED BUILDING LABOR MEMBERSHIP	957,990	1,027,584

All-Western Road Show Will Be Featured At Exposition Site

The Marina of the 1915 Panama-Pacific International Exposition grounds, San Francisco, will be the scene of the second All-Western Road Show, October 7 to 15, inclusive; according to President Tracy W. Harron, of the Western Construction Equipment Distributors, under whose auspices the show will be staged. Close to one million square feet of space will be available for exhibitors, both under canvas and outdoors, on the Marina, which was the scene of last year's highly successful initial All-Western Road Show. The Marina is situated within ten minutes by street-car or auto, to the heart of San Francisco's downtown business district.

This year's Road Show will be staged in conjunction with conventions of contracting, state and county officials, engineering, rock producing and good roads organizations of the entire Pacific Coast and Rocky Mountain states, eleven states being included in the personnel of the sponsoring association. Advance orders for space already exceed the gross space used by exhibitors last year, and the Show management hopes to be able to accommodate all applications to exhibit at the exposition. Where last year's show afforded to many thousands of visitors a splendid opportunity to view the most modern design and engineering in road building machinery and practice, it is hoped that this year's attendance figures will greatly exceed those of 1925, and the Committee proposes maintaining an efficient Registration Department to properly catalogue all Show visitors.

The Show will be held nine days, opening Thursday morning, October 7, at ten A. M., and running through the following Saturday and Sunday, also Columbus Day, closing on Friday, October 15, at 5:30 P. M. It is believed that executives, officials and experts will welcome the opportunity given their job foreman and machine operators, engaged during week-days, to view the exhibits on Saturday and Sunday.

Arrangements are under way for special trains and motor caravans to bring visitors to San Francisco from principal trade centers of the West, and those in charge of the Show look forward to the presence of many Eastern and Southern visitors. A hotels-housing committee will be organized to assure adequate accommodations to those attending the Road Show, or participating in one or more of the numerous conventions, national and regional meetings, and conferences scheduled from October 7 to 15.

The United States Bureau of Public Roads, represented by Bureau Chief Thomas H. MacDonald, has announced that the largest exhibit used by the Bureau will be on display at the San Francisco Road Show.

The general committee for the 1926 All-Western Road Show comprises T. W. Harron, President, San Francisco; Edward R. Bacon, Vice-President, San Francisco; L. E. Murphy, Treasurer, San Francisco; P. H. Curtis, Los Angeles, Executive Secretary; C. C. Chamberlin, A. E. Mason, C. A. Garfield, O. R. Peterson, Carl Kratz, F. C. Edmonds, W. E. Hewitt, S. S. Smith, E. S. Jenison, W. H. Mason, J. P. Sherbesman, and Stanley Kulp, San Francisco; Frank Gaines and Claude Faw, Berkeley; J. T. Alm, and Charles A. Spears, Oakland; Dan R. Brown, Ed. Crowley, George Monfort, L. M. Railsback and L. H. Garlinghouse, Los Angeles; F. C. Stannard, Salt Lake City, R. L. Balzer, W. E. Feenaughty and F. A. Kingston, Portland; F. C. Schoen and L. A. Snow, Seattle; and L. L. Clinton, Denver.

General headquarters have been established by the Committee for the 1926 All-Western Road Show, at 625 Market St., San Francisco, under the direction of P. H. Curtis, Executive Secretary.

STATE MILLWORK INSTITUTE TO CONVENE AT SAN DIEGO

The next tri-annual convention of the Millwork Institute of California will be held at San Diego August 5, 6 and 7. Headquarters will be at the Hotel San Diego. The banquet will be held Thursday evening, August 5. Business sessions will close Friday evening and the whole of Saturday will be given to sightseeing. Billy Gleason is general chairman of the committee on arrangements. Among the subjects to be considered are: Adoption of uniform full mill bid; inter-territorial relations; standardized ledger accounts; composite statements and index ratios; manual of millwork; cost of cut-up lights; cost of detail finish; cost of moulding doors.

There are 460 incorporated cities in Texas of which some 400 have public water supplies, according to the 1925 report of the State Health Department. Two hundred and ten cities and towns had sewer systems.

Building News Section

APARTMENTS

Owner Taking Segregated Bids.
APARTMENTS Cost, $35,000
ALAMEDA, Alameda Co., Cal. No. 2231 Lincoln Ave.
Three one and two-story frame court apartment buildings (40 rooms).
Owner—W. C. Dunn, 1515 Central Bank Bldg., Oakland.
Architect—J. W. Bayliss, 1514 Central Bank Bldg., Oakland.

Completing Plans.
APT. BLDG. Cost, $200,000
SAN FRANCISCO, Franklin & Clay Sts.
Six-story and basement steel frame & concrete apartment bldg (2, 3 and 4-room apts).
Owner—Marian Realty Co.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.
Segregated bids to be taken by owner. Plans will be completed in about a week.

Plans Complete.
APARTMENTS Cost, $150,000
SAN FRANCISCO, E Larkin St. 80 N Turk.
Six-story and basement concrete (45) apartments.
Owner—J. G. Kincanon, 560 Larkin St., San Francisco.

Steel Contract Awarded—Taking Segregated Bids On Other Portions Of The Work.
APT. BLDG. Cost, $200,000
SAN FRANCISCO, Geary St. between Hyde and Larkin.
14-story and basement Class A reinf. concrete Community Apt. Bldg. (14 4-room and 28 3-room and 2 stores, Castle Court Apts.)
Owner — Joseph Greenback, Hearst Bldg.
Architect—C. O. Clausen, Hearst Bldg. Conservatory on roof, incinerator in each kitchen, coal fireplace in living rooms, 2 passenger elevators.
Structural Steel awarded to Herrick Iron Works, 18th and Campbell, Oakland.

Owner Taking Segregated Bids.
APARTMENTS Cost, $150,000
SAN FRANCISCO. California St., near Stockton Street.
Six-story steel frame Class C apartment house, 50x176 (54 2- and 3-room apts).
Owner — Chas. J. Keenan, 110 Sutter St.
Architect — N. W. Sexton, De Young Bldg., San Francisco.
Structure will have concrete walls, white cement exterior, terra cotta trim. Considerable wrough iron will be used. Apartments will be equipped with wall beds, garbage incinerator, rubber tile in bathrooms, Crane plumbing, Pacific wall board material is specified, also Lock lath dead soundproof deadening felt.

Contract Awarded
APTS. Cost, $17,500
OAKLAND, Alameda Co., Cal. N 45th St., 140 E Grove St.
One-story 30-room frame 14-room apartments.
Owner—Emil Jensen, Berkeley.
Architect—None.
Contractor — M. F. Hamilton, 6111 Colusa Ave., Berk.

Plans Ready For Figures Tuesday or Wednesday — Bids To Be Opened August 5.
APARTMENTS Cost, $25,000
MARTINEZ, Contra Costa Co., Cal.
Two-story and basement frame and stucco store and apartment building with brick base (4 3-room and 1 2-room apts.)
Owner—Sneed & Nixon, Martinez.
Architect—Jas. T. Narbett, 814 Chanslor Ave., Richmond.

Completing Plans
APT. BLDG. Cost, $250,000
SAN FRANCISCO. Hyde St., near Greenwich.
Ten-story and basement Class A steel frame community apt. bldg (1 apt. to a floor).
Owner — Joseph Greenback, Hearst Bldg.
Architect—C. O. Clausen, Hearst Bldg. Exterior will be finished in stucco with terra cotta trimmings.
Segregated bids to be taken by owner in about two weeks.

Completing Plans.
APARTMENTS $1,000,000 or more
SAN FRANCISCO, S W Jones and California Sts.
Fifteen-story class A apartment house 100 2 to 5-room apartments.
Owner—Jones-California Inc.
Architect — Weeks & Day, 315 Montgomery St., San Francisco.
Contractor—Cahill Bros., 55 New Montgomery St., San Francisco.

Steel Contract Awarded.
APARTMENTS Cost. $150,000
SAN FRANCISCA, N Vallejo 150 E Laguna.
Eleven-story and basement class A (10) residential apartments.
Owner—Nineteen Fifty-Eight Vallejo Inc., 2240 Green St., S. F.
Architect—E. H. Denke, 1317 Hyde St., San Francisco.
Contractor — Denke and Bowes, 1317 Hyde St., San Francisco.
Structural steel awarded to Central Iron Works.
As previously reported concrete work was awarded to Mission Concrete Co., 125 Kissling, S. F. Other contracts will be awarded shortly.

Concrete Work Awarded.
APARTMENTS Cost, $35,000
SAN FRANCISCO, SE Broadway and Taylor Sts.
Three-story and basement frame (10) apartments.
Owner—Mrs. E. T. Wilson.
Architect—E. H. Denke, 1317 Hyde St., San Francisco.
Concrete work—Mission Concrete Co., 125 Kissling St., S. F.

WATSONVILLE, Santa Cruz Co., Cal. —Stewart T. Thompson, 140 Blackburn, Watsonville, will shortly award contracts in connection with $25,000 apartments he will erect at Madison St. and East Lake Ave., to be known as Madison-Lake Apts.

To Take Sub-Bids Next Week
APARTMENTS Cost, $60,000 ea
SAN FRANCISCO. N Clay St. — W Van Ness Ave.
Two four-story Class C apartments to contain 8 3-room and 8 2-room apts each.
Owner—Stock, Maas & Sauer, care architect.
Architect — Albert H. Larsen, 447 Sutter St., San Francisco.

Contractors Attention!

I am selling lumber from mill to you in car lots at wholesale prices. Can furnish dimension all lengths, also mixed cars including uppers.

W. H. SMITH
MEDFORD, OREGON

Plans Being Completed — Owner To Take Segregated Bids In About A Week.
STORE Cost, $26,000
OAKLAND, Alameda Co., Cal. — San Pablo Ave., 21st and Castro Sts.
Two-story frame and brick veneer store and apt. house (6 stores, 8 2-room apts.)
Owner—Peter Anderson.
Architect — Schirmer-Bigbee & Co., Thayer Bldg., Oakland.

Contract Awarded.
APT. HOUSE Cost, $26,000
RICHMOND, Contra Costa Co., Cal., NW 16th and Bissel Ave.
Three-story frame and plaster apartment house (8 3-room apts, 8 garages and storage rooms in first floor).
Owner—V. M. Chancelet, 227 16th St., Richmond.
Architect—None.
Contractor — Wallace Snelgrove, 160 18th St., Richmond.

Contractor Taking Sub-Figures
APTS. Cost, $10,500
SAN FRANCISCO. S PACIFIC ST., 97 W Stockton.
Two-story and basement concrete apts.
Owner—R. H. Morrow, 128 Sutter St.
Architect—None.
Contractor—Mission Concrete Co., 125 Kissling St.

Concrete Work Awarded.
APARTMENTS Cost, $150,000
SAN FRANCISCO, N Vallejo 150 E Laguna.
Eleven-story and basement class A (10) residential apartments.
Owner—Nineteen Fifty-Eight Vallejo, Inc., 2240 Green St., S. F.
Architect—E. H. Denke, 1317 Hyde St., San Francisco.
Contractor — Denke & Bowes, 1317 Hyde St., S. F.
Concrete work—Mission Concrete Co., 125 Kissling, S. F.
Other sub-contracts will be awarded shortly.

Taking Bids For Plastering and Elevators.
APT. BLDG. Cost, $100,000
OAKLAND, Alameda Co., Cal. E Webster St., 200 N 17th.
Four-story reinforced concrete and hollow tile apt. bldg. (26 2 and 3-r om apartments and stores).
Owner—R. W. Farmer, 544 Hobart St., Oakland.
Architect — Chas. W. McCall, 1404 Franklin St., Oakland.
Ornamental Iron Work awarded to Frauneder Ornamental Iron Works.

SAN FRANCISCO, Cal.—Sibley Grading and Teaming Co., 135 Landers, has been awarded a sub-contract for grading by Ira W. Coburn, Hearst Bldg., who has the contract for general work in connection with the construction of a twelve-story class "A" steel and concrete community apartment building, to be erected on Vallejo near Laguna. Owner, 1980 Vallejo Street, Inc. Carl Werner, Santa Fe Bldg., is the architect. A list of segregated contracts awarded by Mr. Werner was given in our issue of July 16.

BONDS

SAN BERNARDINO, San Bernardino Co., Cal.—San Bernardino Valley Union junior college dist. will probably call bond election latter part of September to vote on question of issuing approx. $500,000 for purchase of 30-acre site and erection of 3 school bldgs. on Mt. Vernon Ave. nr. Mill St.

MENDOTA, Fresno Co., Cal.—Mendota School District votes bonds of $5,000 to erect temporary school quarters.

EUREKA, Humboldt Co., Cal.—Until Aug. 10 bids will be received by county supervisors for purchase of $90,000 bond issue of North Fork Union High School District; proceeds of sale to finance erection of new school.

GALT, Sacramento Co., Cal.—Galt High School District votes bonds of $100,000 to finance erection of new high school, replacing structure destroyed by fire. Trustees of district are: Elizabeth Noble, E. H. Barber, F. W. Harms and J. F. Kenefick.

SACRAMENTO, Cal.—Until Aug. 23 bids will be received by county supervisors for purchase of $20,000 bond issue of Washington School District; proceeds of sale to finance school improvements. Eugene J. Seadler, Mitau Bldg., Sacramento, is the architect. **(See Schools this issue).**

CHURCHES

Plans Being Figured—Date of Opening Bids Extended To Aug. 3, 1926.
ADDITION Cost, $125,000
BERKELEY, Alameda Co., Cal. Bancroft and Dana Sts.
Two additional units to present brick class C church.
Architect — Horace G. Simpson, Call Bldg., San Francisco.
Bids are being taken for a general contract.
This being the 2nd and 3rd units will consist of social and educational building and parsonage. Members of the building committee are Seldon Smith, D. W. Brock and Dr. Sherrill Hall.

REDONDO, L. A. Co., Cal.—Gene B. Foster, 1772 Sycamore Ave., was low bidder at $56,816 on genl. contr. for erecting new church at Redondo for First M. E. Church; Alfred W. Rea and Chas. E. Garstang, Pac. S. W. Bank Bldg., L. A., archts. Bids are in excess of appropriation and low bidders will be asked to figure on certain revisions to reduce the cost.

OAKLAND, Alameda Co., Cal. — The First Presbyterian Church, Oakland, are planning on the early erection of a Sunday School Building in the Montclair district, the first unit of which will cost in the neighborhood of $25,000. It is planned to make the school the home of all denominations.

Craftsmanship *is the priceless ingredient* sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

SAN FRANCISCO—Board of Education contemplates expenditure of $37,-000 to finance remodeling basement of "Commercial High School," Franklin and Hayes Sts., for a cafeteria and quarters for Reserve Officers' Training Corps in addition to domestic science quarters in the 2nd floor.

Marysville, Cal., June 29, 1926.

My dear "Sandy:"

The following true story was related to me the other eve, so I wrote it up for the Marysville "Democrat."

It was published last eve in the joke column (but I assure you it was no "joke" to the newly-weds!) I couldn't locate a paper this A. M. so copy it off for you.

"BIG DISAPPOINTMENT FOR NEWLY-WEDS!"

Yesterday evening, while returning from a bathing party, a pair of "newly-weds" discovered a hundred pound sack of "C. & H. Berry Sugar" (all sewed up as it comes from the sugar refinery, apparently never having been opened) lying on the highway, near the Feather River bridge. Hastily applying the emergency brakes, the young husband jumped from the car, laboriously tugged, hauled and pulled said hundred pound sack into his car, and drove with all speed to his home in Yuba City. The "bride," having visions meanwhile of using the sugar to can apricots, peaches, plums, watermelons, cucumbers, and everything else, cannable. Alas! upon their arrival home, they opened the sack and foundit contained one hundred pounds of **"Sandy Pratt's" clean, sharp sand from the Yuba River!!** The "newly-weds" believe that "anticipation is greater than Realization."

RUTH C. SANFORD.

IT PAYS to advertise.

AND THE above story.

GAVE SANDY and his sand.

AND THE "California & Hawaiian Sugar,"

A FREE ad.

AND SANDY would like.

TO SEND the bride.

A WHOLE sack.

OF C. & H. sugar.

IF THE bride.

WILL WRITE Sandy a letter.

MAYBE THE C. & H. Sugar Co.

WILL GIVE Sandy a sack.

OF THEIR well known sugar.

IT WOULD be "sweet."

IF THEY did.

(SAVE SANDY about $8.00).

ANYWAY THE newly-weds.

HAVE CLEAN sand.

FOR THEIR children.

TO PLAY in.

AND IF beds are scarce.

AT MR. and Mrs. B. Happy's.

THEN THE children.

COULD SLEEP.

IN THE "bed."

OF THE Yuba River.

WHERE SANDY dug the sand.

THAT WAS thought.

TO BE C. & H. sugar.

WHILE NEWLY-WEDS need sugar.

TO SWEETEN the lives.

OF EACH other.

THEY MUST have "sand."

(PRATT'S CLEAN, sharp sand).

TO HELP them.

OVER THE (Pratt's) "rocky" roads.

"I THANK you."

The above folks are no relation to the Marysville couple. They are B. A. SANDAB OF PRATTCO (Monterey County) — home of Sandy Pratt's "Prattco Amber" sand (uses—concrete, sandblasting, chicken grit, plastering, brick mortar) and Miss IMA WHALE of Prattrock, near Folsom, where Sandy's company, the Pratt Building Material Co., produce clean, hard rock, gravel and sand. They were married in June and built their "nest" on the American River at Sacramento where Sandy digs sand. She works in the cannery, while he fishes on the Feather River. He and work are not friends.

OAKLAND, Cal.—The following bids were rec. July 20, by Alameda Bd of Education for gymnasium equipment for the new high school building.

A. G. Spalding & Bros., 1751 Broadway, Oakland	$1096.20

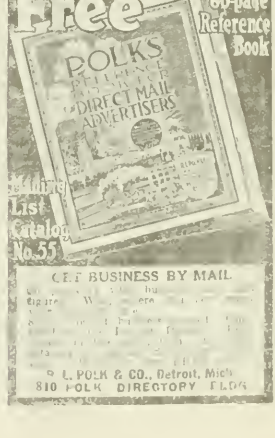
Firm desires to receive complete details, prices and terms on machinery for the manufacture of alcohol bottoles of a capacity of 18 litres approximately, as well as smaller receptacles; also machinery for the manufacture of small matal stamps used for sealing flour sacks, stamps to be made of soft metal upon which is stamped the name of the flour mill for whom the seals are manufactured.

10533—Oberursel, Germany. Firm of buying and selling agents desires to represent California manufacturers or exporters interested in appointing an agent in Germany. References.

D-2157—San Francisco, Cal. Merchandise brokers are in a position to act as sales representatives, selling exclusively on a commission basis and confining their operations to the jobbers, manufacturers and department stores, for manufacturers desiring representation in the California territory.

D-2158—Los Angeles, Cal. A sales organization having approximately 7000 sales people covering California and now beginning active selling direct to the consumer, with distribution through their own controlled "service stations" and so-called warehouses, desires to secure the representation of California manufacturers of products of merit.



Official Proposals

NOTICE TO CONTRACTORS

OFFICE OF THE CLERK OF THE BOARD OF SUPERVISORS OF ALAMEDA COUNTY, CALIFORNIA.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, California, at his office until **Monday, August 16th, 1926, at the hour of 10:30 o'clock A. M.** (the day when said bids will be opened and the contract awarded) for the erection and completion of Sun-Rooms and Covered Walks at the Alameda County Hospital near San Leandro, California.

Complete Plans and Specifications for the above work are on file in the office of the County Clerk where copies, may be obtained by depositing with the County Clerk the sum of $25.00.

Contractors will be restricted as to the length of time they may retain these plans and specifications to Ten (10) Days. Deposits of contractors failing to return said plans and specifications in good condition within said time limit will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a check for at least Ten (10%) per cent of the total amount of the bid or proposal certified to by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board of Supervisors to be forfeited to the county of Alameda as agreed and liquidated damages should the party or parties to whom the said contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the Contract.

The Board reserves the right to reject any and all bids.

Dated July 19th, 1926.

GEO. E. GROSS,
Clerk of the Board of Supervisors
of Alameda County, California.

NOTICE TO CONTRACTORS

(Pittsburg School District)

Notice is hereby given that the Board of Trustees of the Pittsburg School District will receive sealed bids for the construction of a gymnasium to be erected on the Grammar School grounds, Pittsburg, California. Plans and specifications of the building may be secured from Mr. Louis S. Stone, the architect, Oakland, California, or Armand Stow, Pittsburg, California.

Bids must be signed by the bidder on proposals obtained at the office of the Architect.

Bids must be addressed to Armand Stow, Clerk of the Pittsburg School District, and accompanied by a certified check of not less than 10 per cent of amount of highest bid, certified to by some responsible bank or banker and made payable to the Pittsburg School District, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract within ten days after the date of award, or give the bonds required for the faithful performance of the contract or any bond required by law.

The Board reserves the right to reject any or all bids. The bids will be opened **Thursday, August 5, 1926, at 1:15 p. m.,** in the office of the principal, at the Grammar School.

ARMAND STOW,
Clerk Pittsburg School District.

NOTICE TO CONTRACTORS

(Santa Barbara County—Grading)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the 19th day of July, 1926, Notice is hereby given that sealed bids will be received until **11 o'clock a. m. on the 16th day of August, 1926,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the City of Santa Barbara, County of Santa Barbara, State of California, and said bids then and there will be publicly opened and read for furnishing all plant, material and labor and doing the work required, for the construction and erection of the Court House, Hall of Records and Jail buildings on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with the plans and specifications therefor, made by William Mooser Company, Architects, copies of which may be obtained on application from the County Clerk, at Court House in the City of Santa Barbara.

Such bids will be received for the work as follows:

Bid (1) For excavating and grading works.

Bid (2) For additional excavating and grading work, per yard.

All proposals must be submitted on forms similar to the one attached to the specifications and prepared by William Mooser Company, Nevada Bank Building, San Francisco, California.

Each, a Bidder's Bond, or a Certified Check in the sum of at least Ten per centum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon, otherwise said Cash or Bidder's Bond, or Certified Check, will be forfeited to the County of Santa Barbara.

A deposit of Ten Dollars will be required for plans and specifications, the deposit to be returned immediately on the return of plans and specifications in good condition to the Clerk of the Board of Supervisors, County Court House in the City of Santa Barbara, or to the architects, Nevada Bank Building, San Francisco, State of California.

Rights Reserved

The County of Santa Barbara reserves the following rights: (a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternate or any independent part of any proposal submitted by the successful bidder at the price stated in such proposal for such alternate or separate parts of the work, under this provision; (e) to deduct any sepate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to, omissions from, changes in, or substitution for the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under that particular item and without notice to the sureties on the bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of the County of Santa Barbara in the City of Santa Barbara, State of California, and have endorsed thereon: "Proposal for Court House, Hall of Records and Jail Building for the County of Santa Barbara, California, and the particular part of the work bid upon".

Dated Santa Barbara, California, July 20th, 1926.

C. L. PREISKER,
Chairman of the Board of Supervisors
of the County of Santa Barbara.
C. A. HUNT,
County Clerk and Clerk of the Board
of Supervisors of the County of
Santa Barbara.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

NOTICE TO BIDDERS

(Painting, Veterans' Hospital, Livermore, Calif.)

Sealed proposals will be received by the U. S. Veterans' Bureau, Room 791, Arlington Building, Washington, D. C. **until 11:00 A. M., August 24, 1926** and there publicly opened for Painting of Plaster amounting to 59,000 square yards at U. S. Veterans' Hospital No. 102, Livermore, California.

Proposals will be considered only from bidders experienced in this line of work. Specifications may be obtained from the Construction Division, Room 791, Arlington Building, Washington, D. C. or from the Medical Officer in Charge at the above mentioned hospital and shall be returned within ten days after date of opening proposals.

A certified check (or proposal bond on attached form) drawn to the order of the TREASURER OF THE UNITED STATES, for 2 per cent of proposal, including all work bid upon in addition to main items, shall accompany each proposal to entitle it to consideration. The check of the successful bidder will be returned after the acceptance of his performance bond. All other checks will be returned as soon as it is determined that proposals represented by them will receive no further consideration.

The successful bidder will be required to execute a formal contract and to furnish a satisfactory performance bond of approximately 50 per cent of the contract price by sureties acceptable to the Director.

Time of performance and the records of bidders for expeditious and satisfactory performance of contracts will be considered in making awards. Bidders have the right to be present, either in person or by attorney (Sec. 3710, R. S.) and to examine and inspect all bids (33 Stat. L., 440).

J. ERNEST PRICE,
Acting Chief,
Construction Division.

July 21, 1926.

NOTICE TO CONTRACTORS

(Turlock Union High School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Turlock Union Hligh School District, Stanislaus County, State of California, in the High School Building, at Turlock, California **at 8:00 o'clock P. M., August 10, 1926,** for the erection and completion of a steam heating plant, furniture and fixtures, and a concrete oil tank, for the Hligh School Building for said School District In accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine Street, San Francisco, and 1924 Broadway, Oakland, California, with their several propositions.

Heating and Ventilating, Furniture and Fixtures, Concrete Oil Tank

Plans and specifications may be seen at the office of the Architect before mentioned, or at the Office of the Clerk of the Board of Trustees, in the High School Building, Turlock, California.

Each bid, except furniture and fixtures, must be accompanied by a certified check on some responsible California bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to A. G. Crowell, Clerk of the Board of Trustees of Turlock Union High School District; said check to be forfeited to the School District if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract. There will be no check required with the bid for the furniture and fixtures.

Each bid, except the furniture and fixtures, must be made out on bid forms obtained from the Architect, enclosed in a sealed envelope which is endorsed "Proposal for 'Heating,' or 'Furniture and Fixtures,' or 'Oil Tank,'" and must be delivered to A. G. Crowell, Clerk of the Board of Trustees, Turlock, California, prior to the date and time set for the opening of bids.

Owner reserves the right to reject any or all bids.

A. G. CROWELL,
Clerk of the Board of Trustees Turlock Union Hligh School District, Turlock, California.

NOTICE TO CONTRACTORS

(Palermo School District)

Notice is given that sealed bids will be received by the Board of Trustees of the Palermo School District for the complete erection of an auditorium building and repairs to existing building, in accordance with plans and specifications on file with the Clerk of the Board of Trustees of the Palermo School District, Butte County, California, and also in the offices of Dean & Dean, Architects, Room 1406, California State Life Building, Sacramento, California.

The said auditorium building is to be erected on the block owned by the District, as shown on the plan, and whereon the School Building now stands, in Palermo, Butte County, California.

On a deposit of $15 with the Architect, complete sets of plans and specifications may be had by any prospective bidder, and retained for a period of 15 days. The deposit will be returned to the bidder on the return of the plans and specifications in good condition.

Bids must be made on proposals obtained at the office of the Architects, and be signed by the bidder, accompanied by a certified check for at least 10 per cent of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to Rudolph Lavey, Clerk of the Board of Trustees of the Palermo School District, said check to be forfeited to and retained by the School District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for the erection of an Auditorium Building and repairs to Existing Building,"

All bids must be filed with Rudolph Lavey, Clerk of the Board of Trustees of the Palermo School District, Butte County, California, **not later than 11:00 o'clock A. M., Wednesday, August 11th, 1926.**

The Board of Trustees of the Palermo School District reserves the right to reject any and all bids.

BOARD OF TRUSTEES, PALERMO SCHOOL DISTRICT,
RUDOLPH LAVEY, Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until **2 o'clock p. m. on August 23, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Merced County, between Merced and the southerly boundary (VI-Mer-4-A) about fourteen and three tenths (14.3) miles in length, to be widened with Portland cement concrete and surfaced with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated: July 26, 1926.

NOTICE TO CONTRACTORS

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

NOTICE IS HEREBY GIVEN that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until **Tuesday, the 10th day of August, 1926, at 9:45 A. M.,** at which time said bids will be opened for the erection and completion of the McChesney School Annex, of the Oakland School District, to be erected on the Northwest corner of La Cresta Street and Hampel Street. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

Separate bids will be received for:
(1) General Work.
(2) Awning Type Window Fixtures and Hardware.
(3) Slate Blackboards.
(4) Plumbing, Heating and Ventilating Work.
(5) Electric Work.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and General Contract Plans shall be returned within ten (10) days and all other plans shall be returned within five (5) days after securing same, to the Superintendent of Building. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) percent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand ($5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 10th day of August, 1926, at 9:45 A. M., in the Board Room, 211 second floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO BIDDERS

(Stiffleg Derrick)

A. L. FLINT, General Purchasing Officer.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., August 9, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Monterey County, across Salinas River, one miles south of Soledad, (V-Mon. 2-D), a bridge of eleven 119-foot steel spans, three, 17-foot and one 19-foot timber approach span to be refloored, cleaned and painted.

Plans may be seen, and forms of proposals, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated: July 12, 1926.

NOTICE TO CONTRACTORS

(Road Work—Nevada Irrigation Dist.)

Sealed proposals will be received by the Directors of the Nevada Irrigation District, at their office in Grass Valley, Nevada County, California, up to **two o'clock P. M. (2:00 P. M.), August 6, 1926,** for the construction of Unit No. 2 of the Bowman Lake Road, at which time bids will be publicly opened.

The work consists of the construction of a mountain road about 13,750 feet long, and includes approximately 9,250 cu. yds. of excavation, 7,250 sq. yds. of road surfacing and 7 culverts.

The contract will be let to the lowest responsible bidder. The District reserves the right to reject any or all bids.

Plans, specifications and contracts are on file and can be inspected at the District's office in Grass Valley, or at the office of the District's Engineer, Fred H. Tibbetts, Alaska Commercial Building, San Francisco, California.

Full sets of plans, specifications and contracts may be obtained at the Engineer's office or at the District's office, on deposit of $5.00 for each set, which will be repaid if the set is returned in good condition on or before August 6, 1926.

All proposals shall be accompanied by a certified check or bid bond in the amount of at least 5% of the total amount of the bid submitted.

All certified checks or bid bonds accompanying rejected bids will be returned. Certified checks or bid bonds will be returned to the successful bidder, conditioned on his executing the contract and furnishing bonds required, within the time stipulated in the proposal.

In case of failure to execute the contract or furnish the required bonds within the stipulated time, the certified check or bid bond and the proceeds thereof, will become and remain the property of the Nevada Irrigation District.

Certified checks and bid bonds will be made out in favor of the Nevada Irrigation District.

By order of the Board of Directors of the Nevada Irrigation District.

A. L. WISKER,
Secretary of the Board of Directors.

NOTICE TO BIDDERS

(Santa Maria Union High School District—Mower and Chairs)

Notice is hereby given that the Board of Trustees of the Santa Maria Union High School district will receive separate bids for furnishing the following equipment:

(a) One hundred fifty (more or less) chairs for use in gymnasium.
(b) One (1) Ideal Model "30" power mower or equal with magneto, detachable riding trailer and catcher.

Bids must be in writing and shall specify price, f.o.b., Santa Maria California. All bids must be filed with the Clerk of said Board of Trustees and will be opened **August 11, 1926, at 8:00 p. m.,** at the high school building, Santa Maria, California.

The Board of Trustees aforesaid reserves the right to reject any or all bids or to waive any informality in any bids received.

Dated July 14, 1926.

F. J. McCOY,
Clerk of Board of Trustees of Santa Maria Union High School District.

Architects—Engineers—City and County Officials

How about bidswanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it? If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Building & Engineering News

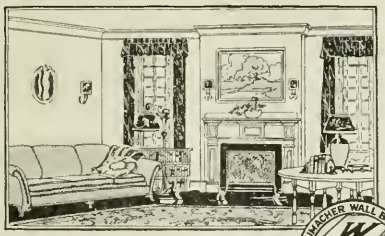
No battens here! Not necessary with



Schumacher Plaster Wall Board

THE joints of Schumacher Plaster Wall Board seal together like wood veneer. The joints simply disappear. You cannot detect them even if you try.

The interior shown here was built with Schumacher Plaster Wall Board. The walls are just as straight and rigid as the day they were finished. There are no joints that gap open—no bulges in the surface—and no battens to spoil its beauty.

Schumacher Plaster Wall Board is a scientific short-cut to good walls. It's good business to use it.

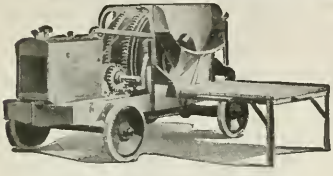
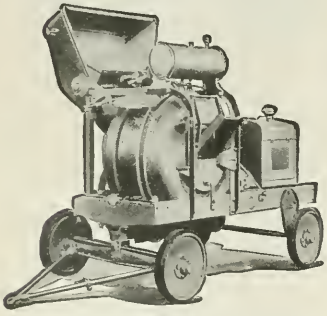
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

GROUP ACCIDENT PREVENTION IS PROFITABLE

Organized accident prevention is a practice of slow growth among constructors. Individual large firms of builders have had their safety engineers and accident prevention and relief measures for perhaps a decade but group organization for the same purpose dates back only six years to the undertaking of the Detroit General Builders' Association now a chapter of the Associated General Contractors. Incidentally this group of constructors has by organized safety work cut down its accident loss one-half in five years. The record has been an inspiration. Now the Texas branch of the Associated General Contractors has organized in connection with a group plan of insurance and accident prevention department with a trained safety engineer in charge. A code of safe practices has been compiled and educational and enforcement methods have been inaugurated. The action of the Texas contractors is a noteworthy one. They have begun well. There remains for each individually to learn and apply the lessons of all accident prevention experience which is that no accident prevention department or committee or bureau however expertly headed and skillfully managed can prevent accidents. This is the individual task of each contractor. The safety director can organize group safety work, advise the individual concerning methods and direct the fight against a persistent foe but the individual contractor must do the fighting. It is this individual effort that has made the safety work of the Detroit General Builders' Association a record of high accomplishment.—Eng. News-Record.

S. F. BUILDING OPERATIONS IN JULY TOTAL $3,556,069

Building operations in San Francisco for the month of July, 1926 represents an estimated expenditure of $3,556,069, according to John P. Horgan, chief inspector of buildings of the Department of Public Works. During the month, Horgan reports, 864 permits were issued, of this amount $896,755 covered municipal school construction.

Following is a segregated report of the July activities compiled according to class of construction:

Class	No. of Permits	Est. Cost
A	2	$350,000
C	15	297,500
Frames	319	1,680,980
Alterations	527	330,834
Public Bldgs.	1	896,755
Total	864	$3,556,069

July, 1925, activities registered 918 permits, the improvements being estimater to cost $5,102,987. June, 1926, operations numbered 832 permits for projects costing $8,479,058.

BARRETT & HILP AWARDED UNDERPASS PROJECT

Barrett & Hilp, San Francisco contractors, bidding $266,283.10 has been awarded a contract by the California State Highway Commission to construct the underpass at South San Francisco on the Bay Shore highway in San Mateo County. The engineer's estimate for the project is $283,438.25.

The structure will be reinforced concrete construction and will carry the Bay Shore highway under the eight existing tracks of the Southern Pacific and Belt Line railroads and will provide space for expansion of the trackage to sixteen lines of railway. It will have a clear roadway width of forty feet and, in addition, a walk of ample width for pedestrians. The length of the subway will be over 800 feet.

Completion of the underpass will make traversable the first section of the Bay Shore highway, grading of which has been completed by the commission with funds advanced by the City and County of San Francisco.

LOS ANGELES BUILDING FOR JULY IS $14,126,776

Building permits issued in Los Angeles during July reached a total valuation of $14,126,776, the highest total for any month this year, according to the monthly report of J. J. Backus, superintendent of building. The figure exceeds that of July, 1925, by nearly $3,000,000.

A total of 2906 permits was issued by the building department last month, the report shows. Class A reinforced concrete buildings led the list in valuation, amounting to $2,685,000. This figure includes the permit for the new city hall Frame buildings came next with a total valuation of $4,621,032, and led in number with a total of 1868.

Accommodations for 1669 new families will be made possible by construction for which permits were issued last month, Backus estimates. Apartment houses will quarter 671, single dwellings 766 and double dwellings 232, according to the report.

HIGHWAY COMMISSION ASKS BIDS FOR SHASTA BRIDGE

Bids will be considered by the State Highway Commission August 30 for the construction of a high arch bridge on the Pacific Highway over Dog Creek Canyon in Shasta county, eliminating numerous curves and grades. The arch span of the bridge will have a length of 234 feet and the distance from the bottom of the canyon to the floor of the bridge will be 125 feet. Including approach spans, the total length of the bridge will be 518 feet. It will have a clear roadway width of 24 feet. The arch will be the longest and the highest on the state highway system, exceeding in size two others in the same locality, built to facilitate realignment of the Pacific Highway through the Sacramento canyon.

DALLAS PLASTERERS RETURN TO WORK AT OLD SCALE

Plasterers in Dallas recently went back to work at their old wage scale of $13 a day after having been on strike for an increase of one dollar a day. In addition to the wage increase which carried with it a demand for double time for all over time the union presented the following working conditions:

"Only plasterers sons can become apprentices of the union till January 1, 1927. One apprentice per contractor is permitted every four years and he shall not be over 18 years of age and must serve four years.

"No union man is permitted to go on scaffolding before working hours. Members bringing their tools to a job without having a job shall be fined not less than $10.00.

"No out-of-town man may be employed while there is a local man idle.

"On jobs where there is no elevator, and where men are working above the fifth floor, they must wait until 8 o'clock before going upstairs.

"Any member disclosing any business of the union to the boss shall be fined $50.00.

"Where there are two or more members of the same firm of plastering contractors only one will be allowed to use tools.

"Monthly dues to the union shall be $6.50 payable in advance.

"The business agent or shop steward shall be allowed to examine time, or count pay, if he doubts anything. Any member refusing this privilege to the business agent or shop steward shall be fined one day's work."

WHAT IS A BRICK?

At last it has been definitely established that "A brick is a brick."

At the last meeting of the American Society for Testing Materials at Atlantic City, the brick committee, known technically as Committee C-3, voted the following definition:

"BRICK. A structural unit rectangular in shape and made of burned clays unless designated by a prefix indicating another material.

"NOTE. As through centuries of use a brick has been an object of clay, the term 'brick' if used without a qualifying adjective is understood, in the present state of the art, to mean a unit of burned clay. Bricks are usually solid, about 8x3¾x2¼."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

San Diego city council has voted to pass an ordinance charging building contractors $10 a day for use of streets in the business district of that city.

Exceeding the July, 1925, mark by $15,895, building in Alameda last month totaled $203,892. Thirty-six permits were issued for new buildings to cost, in the aggregate, $189,030. The remaining 46 permits were those issued for alterations, costing $14,862.

Sixty-two building permits were issued in Palo Alto during the month of July for improvements estimated to cost $119,402, of which twenty-two covered the construction of homes costing $87,025. July, 1925, total was $258,964.

Stockton building permits in July represent an expenditure of $234,345, according to City Building Inspector Jos. R. Losekann, a total exceeding the month of June by approximately $90,000. Permits for twenty homes were issued during July, these costing $194,150.

The policy of the city of Los Angeles of limiting the height of structures may be adopted by the city of New York. A proposal is now under consideration by the New York City Council. This proposal will limit future construction to ten stories on the boulevards and six stories on side streets.

Sacramento building permits issued during July, 1926, represent an expenditure of $476,951, according to City Building Inspector Ben H. Covell. The total of the past month bringing the city's construction expenditure for the year up to $5,331,391 as against $6,863,721 for the corresponding period in 1925.

Seventy relatively large lumber mills are now in operation in the Philippines, according to the Philippine Bureau of Forestry. Of these, eighteen are owned by Americans, fourteen by Filipinos, seven by Chinese, four by Spaniards and the remainder by operators of other nationalities.

Greenshields Co., Ltd., Montreal, is reported to be ready to finance a $3,500,000 bridge across Lion's Gate, according to word from Vancouver, B. C. The structure would be 218 feet above tide level of which the main span is to be 1200 feet and with approaches 3000 feet. The structure would complete the Great Pacific Highway to Vancouver.

Metalace Corp., 1 Liberty St., New York, manufacturing a number of patented products coming under the general heading of woven wire of three and four strand construction, desires to secure an established distributing agent for San Francisco and the manufacturing districts adjoining. The wire is suitable for furniture-making, heating and ventilating, grilles, radiator enclosures, radio cabinets, waste baskets, cage work for bank and office enclosures, window guards, etc. Interested parties should communicate with Mr. G. Denny Moore, secretary of the company at the above address.

Long Beach officials report the arrival there during the fiscal year ending June 30 of 18,728,000 ft. of lumber, 2,144,000 ft. of which was Philippine hardwood. Since the location there of the Patten & Davies Lumber Co. and other concerns, the port has boomed on lumber receipts.

A campaign against illicit electric signs in Oakland is announced by A. S. Holmes, chief city building inspector, who assertes that the battle will start as soon as he gets an extra man who will have nothing to do but check up electric signs. Holmes alleges that "Oakland is rife with electric signs erected without permits, notwithstanding the building laws."

The initiative petition of the Northern California Development Company to place its request for a bridge franchise across Carquinez Straits on the ballot has qualified. The company proposes, should the franchise be granted, to construct a $3,000,000 suspension bridge across the Straits from Eckley, Contra Costa county, to Point Dillon in Solano county. The company has been refused a franchise to bridge the Straits on two occasions.

A bridge law passed in 1881 and requesting county supervisors to notify the State Engineer before granting a permit to bridge a navigable stream so that the State engineer can designate the width of the draw and the length of the spans still is in force, U. S. Webb, attorney general, ruled on a request by Paul Bailey, State engineer.

County officers in about a dozen of the smaller California counties will be affected by the decision of the supreme court that the 1923 act fixing salaries of county surveyors was in effect an increase of salaries. The decision was handed down in the case of Ralph R. Arnold, surveyor of Contra Costa county, against A. N. Sullenger, as auditor of that county. The supreme court set aside a writ of mandate Arnold had obtained to compel Sullenger to pay him his salary for August, 1924, at the rates fixed in the 1923 act.

Because of the state's specifications provided by one of Governor Richardson's "economy" boards for the new grandstand at the state fair grounds called for a concrete mix that was too dry, it has become necessary to gunite" over many places at an expense of several hundred dollars to the State of California, over and above the contractor's bid for the work. This was admitted both by the contractor, J. F. Knapp and by representatives of the state division of architecture, which designed the structure awarded the contract, and is supervising its construction. This revelation comes closely upon the heels of the discovery of a similar condition in the concrete mix for the Douglas Memorial Bridge over the Klamath River. State Highway Engineer R. M. Morton, in a statement upon the condition of the bridge, admitted that the defects appear serious. Representatives of the contractor declare that the state's specifications were strictly followed, but that they provided for a concrete mix that was too dry for the best results

Whether Supervisor Charles J. Powers' resolution that building heights be limited in the San Francisco residential districts will be passed is to be discussed at a special hearing before the Board of Supervisors in the immediate future.

Twenty-five directors of the National Lumber Manufacturers' Association from Florida, Louisiana, Mississippi, Texas, Minnesota, Wisconsin, California, Michigan, Montana, Idaho and Washington, have given notice of their intention to attend the annual meeting of the board to be held at the Winthrop Hotel, Tacoma, August 5. It is expected that about 10 more will yet be heard from.

General Electric Company's net sales billed for the first six months of the current year, ending June 30, 1926, totaled $147,450,867.96 and the profit available for dividends on the common stock and surplus is $19,000,392.63. This indicates net earnings equivalent to about $2.63 per share on the 7,211,481 shares of new no par value stock. The statement of earnings for the six months follows: Sales, $147,450,868, costs and ded., $131,191,460; net income $16,259,407; sundry income, $3,811,516; total profit, $20,070,923; special stock divs., $1,070,531; for common stock, $19,000,392.

East Bay Municipal Utility District has filed application with the State Division of Water Rights seeking an appropriation of 375 cubic feet per second and 217,000 acre feet per annum from the Mokelumne river for generation of power with which to pump water to the district. The project calls for the construction of a dam to impound 221,000 acre feet. It will be 345 feet high, 1500 feet long at the top and 40 feet at the bottom, and will cost approximately $6,450.000. Construction is to start before 1927 and is expected to be completed by 1929. The district recently was granted two applications by the division, one for municipal use and the other for power. The new application is for the purpose of installing an additional power unit.

A pamphlet on "Pertinent Points On Building Investment" has been prepared by the Better Building Committee of the American Construction Council. The pamphlet gives suggestions on the more important things that the public should keep in mind in buying real estate securities on contemplated or new building construction. Being representative of the opinion of all component parts of the construction industry that go to make up the Council it is impartial in nature and therefore carries unusual weight.

Based upon a claim that he was to receive half the profits of the Claremont tunnel job of the Mokelumne river project, A. J. Sartoris, construction engineer, has filed suit in the Superior Court in Oakland against the contrscting firm of Grier & Mead for $150,187.37. Sartoris charges that in April of this year he reached an agreement with Grier & Mead to bid on the Claremont tunnel and, if the bid was accepted to supervise construction and furnish materials and cash in consideration of half the profits. The bid was accepted last May, the contract price being $1,374,374.73 and estimated profits being $300,374.75. From May until July 24, Sartoris declares, he acted as general superintendent of the tuunel job, furnished equipment valued at $15,000 and advanced $1076.50 for materials used. But on July 24 he claims he was ousted from the job without cause.

ALONG THE LINE

Engineers of sixteen irrigation units on the King's river, who have been studying the proposed Pine Flat water project on the King's river, are preparing their final report. Definite steps toward construction must be taken by October 1, the state irrigation board has ruled.

Capt. A. B. Fry, supervising chief engineer of U. S. Public Buildings in the New York district, who has been transferred to San Francisco, left New York Aug. 2 for the coast on the S. S. Ecuador, via Panama. For a number of years he was in active service in the U. S. Navy.

Under an order recently issued by the Inspector of Public Works, City of Los Angeles, inspectors are not permitted to work longer than eight hours, although a contractor may have work under way that requires inspection an hour or more beyond the eight hour period, and offers to deposit funds with the city auditor to cover the expense of such inspection.

The American Society for Municipal Improvements and the Asphalt Association will hold their conventions at The Mayflower, Washington, D. C., beginning Nov. 8 and lasting through Nov. 12. They will unite in a joint exhibit in the hall room of The Mayflower. Geo. O. Tenney, 645 Munsey Bldg., Washington, D. C., is chairman of the local committee.

Robert H. Scanlon, well known in the San Francisco lumber trade through his position as head of the M. J. Scanlon Lumber Company at Massack, Calif., has been appointed assistant mill manager of the Powell River Paper Company of Powell River, British Columbia. The company with which Scanlon has affiliated is one of the largest paper manufacturing companies in Canada. The former Californian will have several departments under his supervision.

Thos. H. Dennis, of Sacramento, succeeds George R. Winslow, maintenance engineer for the California Highway Commission. The change was made upon order of R. M. Morton, state highway engineer, who issued the following statement: "Inability to keep step with progress, under constantly changing conditions, has resulted in dissatisfaction with Mr. Winslow's administration of the maintenance department. This culminated about a month ago in a request for his resignation. He refused to resign and his lay-off is the result." Winslow entered the state service in August, 1913, and had been maintenance director of the commission since. Although Winslow is a civil service employe, it was stated that Chief Engineer Morton is empowered to lay him off and to replace him with an acting maintenance engineer. Winslow, it was stated, does not lose his civil service status.

J. W. Pearce, Stockton architect, recently addressed the Santa Cruz Exchange Club on "City Building".

E. A. Rolison, former city manager of Redding, was selected from a list of thirty-four applicants for the position of city manager of Santa Barbara. During his term as city manager of Redding, Rolison fostered the municipal electrical distribution system which proved profitable to the city. Rolison's term of office at Redding terminated this Spring when a faction led by the present mayor, who is opposed to municipal operation of utilities, succeeded in electing a majority to the city council at the city election. Rolison's salary at the close of his term was $3600 a year. At Santa Barbara, where he takes office Aug. 1, he will receive a salary of $6000 a year.

TRADE NOTES

John W. Rice will operate from 504 Hobart Bldg., San Francisco, under the trade name of San Francisco Rock Products Company.

Principal place of business of the Southern Lumber Company has been moved from Boulder Creek, Santa Cruz County, to San Jose.

Alta Electric Company of San Francisco has been incorporated with a capital stock of $20,000. Directors are: A. A. Schwarz, F. Gentles and P. M. Zwerin.

Bent Concrete Pipe Company of Los Angeles, concrete and irrigation pipe manufacturers, has opened a branch office at 204 Bank of Italy Bldg., Visalia, with A. A. Clark in charge.

River Sand and Gravel Company, through F. J. Lyon, has filed application with the San Francisco Department of Public Works, for permission to erect a small office building at the southeast corner of Sixteenth and Harrison Streets.

Technical Department of the Humboldt Evening High School, 18th and Dolores streets, San Francisco, announces free public instruction in industrial drawing, industrial applied mathematics and industrial applied science. Text books are furnished by the school, the students to furnish their own drafting instruments. School opens Aug. 16, sessions commencing at 7 and close at 9:15 P. M.

Tilden Lumber Company has completed arrangements for the purchase of the Stoodley Lumber Company plant at Santa Cruz. J. H. Roper of Oakland will be plant manager at Santa Cruz for the Tilden interests.

Holbrook, Merrill and Stetson of San Francisco, handling sheet metal, plumbing supplies and steam fittings in wholesale, will shortly open a distributing branch at 1800 Twentieth St., Sacramento, with J. D. Hubbard as branch manager. The concern started business in Sacramento in 1850.

S. S. Day, manager of the Sacramento branch of Crane Co., national wholesale plumbing supply house, has received word that all employes who now own Crane stock have been awarded a bonus in the form of common stock shares. Each stock-holding employe will receive 10 per cent of his present holdings. Crane company employes throughout the country own about $3,000,000 in stock at the present time.

Sacramento Builders' Supply Company has opened offices and sales quarters at 2617-19 R St., Sacramento, and will distribute its products throughout Northern California and Nevada. While the company will deal in the usual run of builders' supplies, such as cement, lime, sand, etc., a feature will be made of concrete products, including drain tile, building tile, blocks, roof tile, sewer pipes and brick. Jas. T. Coghill, formerly of the Henry Cowell Lime & Cement Company, is general sales manager for the new concern.

What are claimed to be the largest concrete bunkers on the Pacific Coast are being completed in Richmond by the Richmond Navigation & Improvement Company. The terminal of the company, just occupied, is at Canal street and Cutting boulevard and represents an investment of $100,000, including a shipping canal privately constructed by H. P. Lauritzen, president and manager.

Unusual conditions in the Portland cement industry have brought about a curtailment in output during the midsummer season, a time when ordinarily cement consumption is at its height for the year. This announcement is made by the Superior Portland Cement Company, owning and operating the largest cement plant in the Pacific Northwest, located at Concrete, Washington. Two or three causes enter into the present situation, notably a greater cement plant capacity in the state of Washington than present requirements warrant, the importation of foreign made cement from Belgium and other countries, brought in virtually as ballast, and the completion of large works which a year ago required immense quantities of cement.

The Observer

The suit enjoining the Allied Architects, a corporation, from proceeding with its contract with the Los Angeles County Board of Supervisors for plans for a new general hospital, was thrown out of superior court when Judge Shaw sustained a demurrer to the complaint and denied permision to amend it. The action brought by the district attorney's office charged that the Allied Architects had no right to contract for architectural services because of the state law providing for the licensing of architects. The court held that the state law did not prevent a corporation engaging in architectural work. The suit had asked that the corporation be enjoined from engaging in all architectural work and that it be fined $5000.

Yosemite Power Company of San Francisco has filed application with the State Department of Public Works, Division of Water Rights, for permission to divert an aggregate of 175 cubic feet per second and 65,000-acre feet annually from the south and middle forks of the Tuolumne River in Tuolumne County. Construction of two concrete dams and three power houses for the development of 66,304 horsepower is contemplated. The electric energy developed will be sold to existing power companies. Cost of the project is estimated at $5,500,000. Work will begin, the application states, on receipt of authorization from the federal power commission, before which an application is pending.

Reduces Cost Of Construction Quantity Survey—How Its Use

(By H. Neville Mason, Managing Director of Quantity Surveyors, Ltd., Toronto, Ont.)

The main object of quantity surveying, as offered at the present time, is the reduction of the cost of construction thereby tending to increase the amount of work undertaken each year, thus giving more work to the engineering and architectural professions and consequently to the members of the industry.

It is not to be assumed that an effort is being made to introduce the elaborate methods of Great Britain but the service which is now being offered is based on the requirements and practices of the contractors who are more and more inclining to the decision that properly drawn up bills of quantities should be issued by the architect with the drawings in such a manner as to provide a common basis of tendering for all parties.

As there is little likelihood of costs being reduced by lower material prices, and considering that the prices of the last few years have been barely large enough to keep most organizations together, it follows that, unless some other means of saving cost is found, prices will advance rather than recede or remain stationary.

Putting It To Contractor

The only two ways, are firstly, to help reduce the contractor's overhead; and secondly, to remove from his shoulders in a great measure the present burden of responsibility, which undoubtedly belongs to the architect, and is typified in most specifications in words somewhat like the following:

"The Contractor shall supply everything deemed necessary by the Architect to provide a completed building, whether specifically shown on the drawings or mentioned in the specifications." A clause of this nature puts it squarely up to the contractor to supply what in some cases represents the deficiencies of the architect.

The result of such a clause as this is to make the reputable contractor very wary, and entails the inclusion in his tender of a sum varying possibly from five thousand dollars ($5000) to ten thousand dollars ($10,000) to cover the idosyncrasies of the architect. The smaller sum being used if the architect is known to be amenable as to extras, and nearer the larger sum if he is deemed the reverse.

One Cause for Wide Variation in Bids

In the busy season, also, the fact that architects allow such short times between the calling and closing of tenders, making it impossible, if estimating two or three jobs, to check them all, is also the cause of adding possibly another $2000 or $3000 to cover possible errors or missions.

The inclusion of such items possibly explains the frequent wide variation of tenders, and it will often be noticed that the contractor who has a wide reputation, and knows more about such troubles turning up, is frequently the higher bidder, when his reputation often demands his presence on the job, irrespective of the lowest tender.

Cost of Figuring Job

Among the items contributing to the high overhead of today is the constant repetition of work by the staff of every contractor, taking off the quantities of the job, which, if done correctly, would all be the same but for which only one contractor, the successful one, receives any remuneration. Out of the 24 men figuring, the expenses of the 23 unsuccessful ones have to be paid by the clients other than the one for whom they are figuring.

Then again, the "Fishing Trip" or the job that does not go ahead, has to be paid for. Some owners seem to imagine that they can call for tenders and then, if the job is postponed, it costs them nothing; but here again they pay if they eventually build, and if they don't pay, the other clients of the profession do.

Some years ago a $600,000 building was tendered on, but did not go ahead. The architect was paid his fee somewhere in the neighborhood of $13,000. The industry got nothing; but a rough survey indicated the total cost to those figuring as nearly $20,000.

Surely this method represents a tremendous economic waste. The fee proposed under the present quantity survey system is one half of one percent for Quantities, which, when issued, would be in such a form that the contractor could immediately place his labor and material rates thereon and complete his bid in a very short time.

The contractor of old did not always bother to estimate accurately or to keep very careful costs. He was generally a man who had practiced his trade in his early days and after some success had blossomed out as a general contractor. Today, most of the reputable general contractors are engineers and university graduates. They have their costs recorded in such a way that given a properly prepared set of quantities, they can price them in a very short time. Thus will the issuing of quantities save as least two thirds of every man's time who is preparing a price for whatever trade is required.

All that is required in conjunction with these quantities, to relieve the owner from the inclusion of the large contingency items mentioned, is the insertion of a clause in the specifications like the following:

Quantities

"The Bills of Quantities issued with these Drawings and Specifications represent the requirements as to material and labor contemplated for the proper performance of the work.

"Anything deemed to be necessary in the opinion of the Architect, which is not included in this Bill of Quantities will be paid for as an extra.

"Anything included in this Bill of Quantities but found eventually not to be required will be deducted from the Contract Price."

Here you have a clean-cut proposition which will undoubtedly enable the contractors to give you close prices.

The architect should not depend too much on cubing buildings constructed during the past 3 years to obtain the cost of future construction that may be contemplated. The industry is certainly going to stiffen its prices as the losses of the past few years can not be allowed to continue. The use of preliminary quantities and cost estimate is urged. This service can be supplied to the architectural profession at a very reasonable cost, which is of course less than for completed quantities.

Cooperation

Cooperation between a quantity survey company and the members of the profession would be invaluable and would result in the elimination of many poor features existing at the present time.

Recently a designing engineer insisted on indicating certain steel sections in a building, irrespective of the fact that only one mill rolled them, and then only very occasionally. In this instance the rolling was extended from week to week until finally the job was delayed a whole month in completion. Rather than pay about $100 for substitute construction the sections were insisted on. The resulting delay of a month cost the client far more than $100 and a suggestion as to the advisability of substitution at the proper time would have been beneficial. Time and again engineers and architects specify steel sections because they are apparently shown in the section book, quite oblivious of the fact that they are only rolled to special order. While such information is always provided very willingly by the steel fabricators, yet, for those who do not wish to feel directly obligated the company can fill the need.

The architect employs extra men on his staff at frequent intervals, of whom he knows nothing at the start, concerning their capabilities in the line of abstracting for preliminary estimate and cost, often having to carry them over slack periods so as not to lose them. The service now offered in Canada provides this assistance at any time, can always be depended upon and is only paid for when utilized.

Considerable saving to the architect can be made in many ways, as for instance: the saving in sets of plans issued, time required to procure tenders, the concentration of questions from one source and so on.

There is no doubt that, if some of the old-established architects, who have repeatedly expressed their belief in the efficiency of the quantity survey, would take it upon themselves to issue quantities with their next job, the more timid ones will follow suit, especially when they see how the contractors welcome the innovation.

Telegraphic reports received by the National Lumber Manufacturers' Association from 354 of the largest softwood and 139 of the chief hardwood, mills of the country, for the week ending July 24, show slight decreases in production and shipments, and some increase in new softwood business, when compared with reports from 359 mills for the week earlier. As compared with the same week of last year, there was a gain in all three factors, especially current orders. The disparity in the number of hardwood mills reporting makes comparisons impossible.

The arc-welder with his grotesque hod and electric arc will supplant the noisy rivetting hammer in the erection of two steel buildings at Pittsburgh, Pa., for the Westinghouse Electric and Manufacturing Company. Awarding of contracts for two arc-welded steel buildings at the company's East Pittsburgh and Sharon plants was announced by W. S. Rugg, vice-president of the company, before representatives of various steel concerns and technical societies invited to witness tests of arc welded steel joints and columns at the Carnegie Institute of Technology.

Recent Forestry Legislation— Taxation Measures Made Progress

Recognition of the need for equitable state tax systems on timber lands was one of the encouraging and outstanding facts in the action of the state legislature during 1926, according to the National Lumber Manufacturers Association in a legislative summary issued recently, which shows that constructive work along forestry lines was accomplished in practically all of the thirteen state legislatures which met in regular or extraordinary session this year.

New York, which has long experimented with three red-taped acts looking to the encouragement of reforestation through exemptions, low valuations and deferred taxes, cleared these measures from the statutes and passed a 6 per cent yield tax law. The new act has the strong feature of preventing local tax assessors from increasing the land taxes due to tree growth, by providing that land classified under the new law cannot be assessed at a higher valuation than similar lands without substantial forest growth situated in the same tax district. Any tract of five acres or more adapted to tree growth, which has been planted with an average of 800 trees per acre or underplanted with an average of 300 trees per acre since 1921, may be classified and annually taxed on the value of the land alone. When a cutting is made, the trees pay a 6 per cent yield tax based on the stumpage value, which is divided two-thirds to the town and one-third to the school district in which the land is located. Land may remain classified so long as the property is taken care of and the stand of merchantable timber does not average 40 M board feet of softwoods and 20 M board feet of hardwoods to the acre. When the Conservation Commission decides the land has a stand averaging the above, it may notify the owner that within two years the 6 per cent stumpage tax will be due and the land will be withdrawn from classification if not paid. If, within the two year period, the owner cuts such timber as is directed by the Commission, the tax on the uncut growth will not become due and the land remains classified.

Commenting on the new law which is expected to substantially aid in reforesting the 4,000,000 acres of idle land in the state, its author, Assemblyman Clarence L. Fisher says: "The new law, without withdrawing from taxation any land is now taxed, exempts the growing of planted and underplanted forests which will hereafter pay one tax when the trees are cut. The effect of the new law is to place forest crops more upon the basis of agricultural crops. In case of agricultural land the farmer harvests his crop and does not pay a tax upon it, but instead pays a tax upon the value of the land, while a wood crop, which takes fifty years to mature, may now be taxed fifty times."

Kentucky lands owners, of 1000 acre tracts or more which are suitable for growing trees by planting or by natural reforestation, may have such lands classified as forest reservations and placed under the direction of the Commissioner of Agriculture and the State Forester with the bare land bearing an annual tax of $2.50 per acre and the trees paying a 10 per cent stumpage tax when cut, according to provisions of the new forestry law in that state. The taxes collected from such lands will be paid into the State Treasury, to the credit of the Forest Reserve Fund, and the counties in which forest reserves are located will have the amount of their taxes, which they annually pay into the State Treasury, reduced by the amount of taxes assessed upon the forest reserves.

The Washington legislature, in extraordinary session late in 1925 passed a bill proposing a state constitutional amendment which would provide for encouraging and promoting forestation and reforestation by placing a fixed value for tax assessment purposes on forest lands for a term of years and for a yield tax to be collected on the trees when cut. The measure will be voted on at the coming November elections. Similar amendments also came up in Mississippi and Louisiana but neither passed.

At the November elections, the voters of California and Minnesota will consider proposed forest tax constitutional amendments, passed by the 1925 legislatures.

Mississippi was the only state that created a forestry commission this year. General forestry measures and amendments to present laws were passed in the states of Kentucky, Massachusetts, New Jersey, New York, Rhode Island and Virginia.

No forestry matters were considered in the extraordinary sessions in Georgia, Pennsylvania and Wisconsin. The South Carloina Senate passed a bill to create a state forestry commission, but the House killed it.

While comparatively few forestry measures were proposed in the legislatures this year, the total number of all bills introduced exceeded 13,000 and of these more than 4000 became law. If this high speed production continues next year, when more than 40 legislatures meet, American business will run the gauntlet of about 40,000 bills and receive a "prize-package" of around 12,000 new laws.

Director Of New State Forest Experiment Station Is Appointed

Edward I. Kotok, for fifteen years an officer of the California District, United States Forest Service, has been appointed director of the new forest experiment station to be established in this state, according to announcement by Col. W. B. Greeley, chief forester.

Director Kotok brings to his new position a wealth of practical experience in the important phases of fire control and forestry research. Starting work in California as a forest assistant on the Shasta National Forest in 1911, he steadily advanced to the supervisorship of the Eldorado National Forest, and in 1919 was assigned to the important work of fire inspector for all national forests of the state. He has also had charge of planting work in northern California, inspector of state work under the Clark-McNary Act, and is the author of many Government publications dealing with the problems of fire and forestry practice.

The other members of the California forest experiment station staff already selected are: Duncan Dunning, silviculturist of the Forest Service district headquarters in San Francisco; A. E. Wieslander, technical assistant from the Lassen National Forest, and H. A. Siggens, junior forester. Two additional assistants will be appointed at an early date.

"California is a region full of varied forest problems," states Director Kotok "involving forest protection and timber growing as well as water conservation and reforestation. The forest experiment station will seek to find the fundamental factors which make for the successful solution of these important economic problems, and will cooperate and coordinate its work with the many organizations and agencies now engaged in forest research, water conservation and fire prevention."

NATIONAL FORESTS HAVE BANNER BUSINESS YEAR

Receipts from the 18 national forests of California for the fiscal year ending June 30, 1926, totaled $1,276,245, reports the San Francisco district headquarters of the United States Forest Service. This is the largest annual revenue ever received from Federal forest resources in this state, and exceeds the receipts of the preceding fiscal year by $289,600.

Twenty-five per cent of this total revenue, or $319,060 will be returned to the state by the Federal Government for distribution to counties in which the national forests are located for road and school development, and an additional ten per cent or $127,624 will be expended by the Forest Service on road and trail construction in those counties, making a grand total of $446,680 which will be returned to California in lieu of taxes on these Federal properties.

Timber is the best paying resource of the national forests of California, and yielded a revenue of $894,500 during the past fiscal year.

SLIGHT UPWARD TURN REPORTED IN ELECTRICAL SALES

Allowing for seasonal variation there has been a slight upturn in business in the electrical industry. Sales are better than they were six weeks ago, and there is every indication that business will continue good, "Electrical World" reports. Industrial plants are buying in steady volume. Inquiries for wire are now productive of orders and a satisfactory business is being conducted in that line.

The large construction programs of the power companies in the Southeast are creating a good demand for line-construction materials and substation equipment. Satisfactory turbine and switchboard orders are in immediate prospect. In the New England district there is a steady call for small motors. Industrial plant buying in New York territory is showing good strength and small motors and control equipment are in active demand.

Utility companies are active on new construction in the Middle West. In the Chicago district the installation of distribution transformers in the first six months of the year is approximately 25 per cent greater than for the same period last year. On the Pacific Coast industrial plant buying has quieted down. Inquiry from power companies has been fair.

APARTMENTS

Plans Being Figured.
APT. BLDG. Cost, $25,000
SAN FRANCISCO, N E Lombard and Stockton Streets.
Three-story and basement frame apartment building (6 2 and 3-room apts).
Owner—A. Soracco & E. Cuneo, 1700 Stockton St., San Francisco.
Architect—C. Fantoni, 550 Montgomery St., San Francisco.

Plans Being Prepared.
STORE, APTS. Cost, $115,000
SAN LEANDRO, Alameda Co., Cal. E-14th St.
Twelve 2-story frame and stucco store and apartment buildings, French Village style.
Owner—Cos Williams, Oakland, Cal.
Architect—Frederick H. Reimers, Tribune Tower, Oakland.

Sub-Figures Being Taken
APARTMENTS Cost, $40,000
SAN FRANCISCO, Cal. N Geary $2½ W Hyde.
Six-story and basement Class C concrete (25) apartments.
Owner and Builder—C. F. Parker, 251 Kearny St., S. F.
Architect—L. Ebbets, 251 Kearny St., S. F.

Contract Awarded.
APARTMENTS Cost, $25,000
SAN FRANCISCO. SW Fillmore and Beach Streets.
Three-story and basement frame (18) apartments.
Owner—Bessie Cooley.
Architect — J. C. Hladik, Monadnock Bldg., San Francisco.
Contractor—R. J. Stempel, 80 Sotelo Ave., San Francisco.

To Be Done By Day's Work And Segregated Contracts.
APARTMENTS Cost, $35,000
SAN FRANCISCO, SW Broderick and Oak Sts.
Three-story and basement frame (17) apartments.
Owner—Emil Nelson, 55 Allston Way, San Francisco.
Architect — J. C. Hladik, Monadnock Bldg., S. F.

To Be Done By Day's Work.
APARTMENTS Cost, $20,000
SAN FRANCISCO, NW Anza and 3rd Avenue.
Three-story and basement frame (12) apartments.
Owner—T. B. Strand, 521 Pierce St., San Francisco.
Architect—H. C. Baumann, 251 Kearny St., S. F.

Ready For Segregated Bids.
APARTMENTS Cost, $—
SAN FRANCISCO, N Fulton Street near Gough St.
Four-story and basement reinforced concrete apartment house.
Owner—M. Vukicevich and E. V. Lacey, Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg. San Francisco.

Low Bidder.
APARTMENTS Cost, $75,000
SAN FRANCISCO, N O'Farrell St. — W Hyde St.
Five-story and basement steel frame and brick apartments, 21 2-room apartments and garage.
Owner—A. W. Kern.
Architect—O. R. Thayer, 110 Sutter St., San Francisco.
Low Bidder—F. L. Hansen, 251 Kearny St., San Francisco.
Oregon pine and mahogany trim, oil burning system, tile lobby, floor and base, colored tile baths. Bids will be taken for general work, painting, electrical work, heating, plumbing, wall beds, finish hardware, etc.

Plans Being Prepared.
APARTMENTS $500,000 each

SAN FRANCISCO.—Grant and Hart, 180 Jessie St., at $9,985 submitted low bid to Board of Public Works for additional facilities at the Noe Valley School. Complete list of bids follows:
Grant and Hart $9,985
Geo. V. Gadin 10,264
Vogt and Davidson 11,672
Elliott and Grant 11,928
E. K. Nelson 13,760
Jas. F. McCarthy 13,885

THEY ARE trying.
* * *
TO INDUCE Sandy Pratt.
* * *
TO WEAR short trousers.
* * *
(SOME CALL them pants).
* * *
IT SEEMS.
* * *
THAT NOW the first families.
* * *
ARE DRESSING their men folks.
* * *
IN KNEE trousers.
* * *
BUT SANDY can remember.
* * *
WHEN A boy.
* * *
DOWN AT Tulare City.
* * *
THAT SANDY spent.
* * *
TWO SOLID years arguing.
* * *
PLEADING WITH Sandy's parents.
* * *
ASKING THEM for a pair.
* * *
OF LONG pants.
* * *
SANDY'S FOLKS were slower.
* * *
THAN THE Supreme Court.
* * *
IN DECIDING Sandy's pants case.
SANDY EVEN committed perjury.
* * *
TO WIN his case.
* * *
SANDY PRATT, now producer.
* * *
OF CLEAN, sharp sand.
* * *
AND CLEAN, hard rock.
* * *
PROMISED HIS fond relatives.
* * *
THAT HE would wear out.
* * *
ALL HIS old short pants.
* * *
AND USE the long ones.
* * *
ON SUNDAY only.

BUT AS soon.
* * *
AS SANDY was presented.
* * *
WITH THE long pants.
* * *
THEN THE short ones.
* * *
WERE ANCIENT history.
* * *
AS FAR as Sandy.
* * *
WAS CONCERNED.
* * *
AND NOW.
* * *
SANDY CAN'T reconcile himself.
* * *
TO GIVE up something.
* * *
THAT WAS such a struggle.
* * *
TO WIN.
* * *
"I THANK you."

When Sandy Pratt was a boy, you had to wear short pants until you were almost grown. Now they put long trousers on the boy before he leaves the hospital, where he was born. But this hasn't much to do with Sandy Pratt's company, the Pratt Building Material Company, producers of clean sand, rock and gravel at Marysville, Sacramento, Pratteo, (Monterey County) and Prattock (near Folsom). Central office, 518 Hearst Building, San Francisco.

MIDDLETON, Lake Co., Cal. — D. Downie, Sebastopol, at $9690 awarded contract by Middletown Union School District to erect 4-classroom frame school. W. Herbert, architect, Rosenberg Bldg., Santa Rosa. D-2163—Cincinnati, Ohio. Manufacturers of a flag-container attachment for flag poles desire to appoint a distributor in San Francisco to introduce their product.

D-2164—South Boston, Mass. Manufacturers of a number of patented products coming under the general heading of woven wire of three and four strand construction, desire to secure an established distributing agent for San Francisco and the manufacturing districts adjoining. The wire is suitable for furniture-making, heating and ventilating grilles, radiator enclosures, radio cabinets, waste baskets, cage work for bank and office enclosures, window guards, etc., etc.

MASTER PLUMBERS ENDORSE SANITATION LEAGUE

Following resolution was adopted at the annual convention of the State Master Plumbers' Association, held in Los Angeles:

WHEREAS, the Manufacturer, the Wholesaler and the Retailer in the Plumbing, Heating and Ventilating business have united in Sanitation Leagues in California for the education of the public and the craftsman, and

WHEREAS, these Leagues are expending thousands of dollars annually in the endeavor to improve conditions in every branch of the industry through bookkeeping, cost finding, sales classes and Speakers' Bureaus and kindred activities, and

WHEREAS, these organizations cooperate closely with the National Trade Extension Bureau and make intensive local presentation of Bureau work possible;

THEREFORE, Be it Resolved: This, the 25th Annual Convention of the California State Master Plumbers Association, assembled, does record itself as endorsing the work of California Sanitation Development League and the Sanitation League of Southern California.

ASBESTOS PRODUCTION INCREASED DURING 1925

The total quantity and value of asbestos mined in the United States and sold in 1925, as reported by producers to the Bureau of Mines, amounted to 1258 short tons, valued at $51,700. These figures comprise 93 tons of chrysotile asbestos, valued at $10,750, mined in Arizona and California, and 1165 tons of amphibole asbestos, valued at $10,950, mined in Georgia, Idaho and Maryland.

The sales of chrysotile asbestos showed a decrease of 46 per cent in quantity and an increase of 20 per cent in value, compared with 1924, and the sales of amphibole asbestos were more than nine times as great in quantity and were 28 per cent greater in value.

Imports of unmanufactured asbestos for consumption, amounted in 1925 to 230,520 short tons, valued at $7,134,502, and the exports were 1109 short tons valued at $70,846. Corresponding figures for 1924 were: Imports, 183,250 tons, valued at $5,602,945; exports, 1270 tons, valued at $93,163.

UNIFORM LIEN LAW MOVEMENT IS ADVANCED

Action is under way to effect a reform of lien law conditions and the Associated General Contractors of America, along with other interested trade associations, will next fall have an opportunity to express views concerning the product of present activities to draft a uniform lien law in tentative form, officials of the contractors' organization report.

The national conference of commissioners on uniform state laws, the body which places approval upon proposed uniform law forms, met at Denver July 7, during the course of the convention of the American Bar Association. At that time consideration was given to the draft prepared by the Hoover committee, which has been dealing with the subject for some time. The national conference will make its report this fall to the Hoover committee. It will be after this action has been taken that the proposed uniform law will be submitted to the trade associations directly interested in the uniform lien law movement.

Official Proposals

NOTICE TO CONTRACTORS

(San Mateo Union High School District—Grading)

Notice is hereby given that the undersigned trustees of the San Mateo Union High School District, San Mateo County, Calif., will receive sealed bids up to the hour of **seven-thirty (7:30) o'clock p. m., on Thursday, the 12th day of August, 1926,** at the office of the San Mateo Union High School, San Mateo, at which said time and place said bids will be publicly opened.

Bids will be received on the grading and excavating of High School grounds at Poplar and D Streets, San Mateo.

A time limit of 30 working days will be allowed for completion of work.

All bids to be addressed to the Clerk of the said Board of Trustees and must be accompanied by a certified check made payable to the order of aforesaid clerk in amount equal to at least ten (10) per cent of the largest bid so submitted, and no proposal will be considered by said Board unless accompanied by such check.

The said check to be forfeited to said School District, as ascertained and liquidated damages in case the successful bidder fails or refuses to enter into a contract to perform the work, and give satisfactory bonds required, within ten days after the date of the award.

The plans and specifications for said work may be obtained from E. L. and J. E. Norberg, architects, 407 Occidental Avenue, Burlingame.

The said Board of Trustees expressly reserves the right to reject any and all bids. A deposit of $10 required on plans.

Done by the order of the Board of Trustees of the San Mateo Union High School District, San Mateo County, California.

N. D. MORRISON, President.
J. R. MURPHY, Clerk.

NOTICE TO BIDDERS

(Pump—Waukena Union School Dist.)

M., of Tuesday, the 10th day of August, 1926,** sealed bids for the furnishing to said district of one five-horse power motor and deep well turbine pump, to be connected to pressure tank with automatic switch, on the premises of scho l house of said district, and to be furnished with outside discharge pipe from pump, said pump to be operated in an eight-inch well on said premises and bidder must make allowance in bid for exchange of one deep well plunger pump one-h rse power motor now in the school building of said district; said motor and pump must be installed on or before two weeks before the opening of the next term of scho l of said distrirt in the month of September, 1926; each bidder shall furnish specifications for pump and the Board of Trustees reserves the right to reject any and all bids or to adopt the article upon which a bid is offered, which article may be deemed m st suitable for the needs of the district.

Dated July 27, 1926.

JOHN B. DE FOE,
Clerk of the Board of Trustees of Waukena Union School District.

NOTICE TO BIDDERS

(Pipe & Fittings—Redood City)

Public notice is hereby given that sealed bids will be received by the Board of Trustees of the Town of Redwood City, California, up to and including **Monday, the 9th day of August, 1926, at the hour of 10 o'clock A. M.** of said day, for the following materials and supplies to be delivered f. o. b. cars at Redwood City, to-wit:

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rates: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

7000 lineal feet of 4 inch cast iron water pipe, class B, standard weight.

4000 lineal feet of 6 inch cast iron water pipe, class B, standard weight.

10, 4 inch tees; 8, 6 inch by 4 inch tees; 3, 6 inch tees.

All pipe to be of the bell and spigot form and of lengths of not less than 12 feet nor more than 16 feet. All tees to have bells all around. Pipe and fittings to conform to American Water Works Association standards.

All pipe and specials to be subject to inspection by the Superintendent of the Water System of the Town of Redwood City upon delivery, and rejected pieces to be stored at the expense and subject to the order of shipper.

All bidders shall specify the time within which delivery will be made. The Town of Redwood City will pay for said pipe as follows: one-third (⅓) of the amount thereof on the first day of the month following the delivery and acceptance of said pipe; one-third (⅓) thirty (30) days after the first day of the month next succeeding the delivery and acceptance of said pipe, and the balance of one-third (⅓) sixty (60) days from the first day of the month next succeeding the delivery and acceptance of said pipe.

Bids to be accompanied by a certified check in the amount of ten (10%) per cent of the aggregate of the bid payable to the Town of Redwood City. Checks of unsuccessful bidders to be returned at once. Check of successful bidder to be returned upon acceptance of goods ordered.

The Board of Trustees reserves the right to reject any and all bids.

By order of the Board of Trustees of the Town of Redwood City.

Dated July 19th, 1926.

W. A. PRICE.
Clerk of the Town of Redwood City.

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned on August 18, 1926 for constructing portions of the State Highway System as follows:

(1) Bids received until and opened at 1:30 P. M., for grading, construction of structures, and placing of gravel surface between 5 Miles South of Connor's Pass and foot of Conner's Pass, in White Pine County, a length of 4.93 miles.

(2) Bids received until and opened at 2:30 P. M., for grading and construction of structures between Clark and Derby in Washoe County, a length of 6.48 miles.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office at Reno and Ely; the division offices at Elko, Reno, Ely and Las Vegas; and the district office of the Bureau of Public Roads, 461 Market Street, San Francisco. For copy of each set of plans, undersigned requires a deposit of Fifteen Dollars ($15.00), Ten Dollars ($10.00) of which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

Bids will be received **up to the 18th day of August, 1926, at 7:30 o'clock P. M.**

All bids must be delivered to C. N. Clark, Clerk of said School Board, Monticello, California.

The Board reserves the right to reject any and all bids.

C. N. CLARK,
Clerk of the Board of Trustees of Monticello Union School District.

NOTICE TO GENERAL CONTRACTORS

(Alterations—State Office Building)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, **Forum Building, Sacramento, California, up to 2 o'clock P. M., Monday, August 30th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials, and labor required for Permanent Partitions and Alterations, State Office Building, Sacramento, California, in accordance with plans and specifications thereof copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

The work includes Gypsum Tile Partitions, a small amount of Brick, Architectural Terra Cotta & Marble Work, Glass & Glazing, Plastering, and Carpenter & Mill Work. The plans show a complete layout of offices, most of the partitions of which are "sectional." The sectional partitions are not included in this work and will not be installed for the present.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Permanent Partitions and Alterations, State Office Building, Sacramento, California."

STATE DEPARTMENT OF PUBLIC WORKS, Division of Architecture.
GEO. B. McDOUGALL, State Architect.
PAUL BAILEY,
Director of Public Works.

NOTICE TO CONTRACTORS

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, Calif., **until Tuesday, the 17th day of August, 1926, at 9:45 A. M.,** at which time, said bids will be opened for the erection and completion of the Sequoia School Building, of the Oakland School District, to be erected on the northeast corner of Lincoln Avenue and Scenic Avenue. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, Calif.

Separate bids will be received for:

(1) General Work.
(2) Awning Type Window Fixtures and Hardware.
(3) Slate Blackboards.
(4) Plumbing, Heating and Ventilating Work.
(5) Electrical Work.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and General Contract Plans shall be returned within ten (10) days, and all other plans shall be returned within five (5) days after securing same to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) percent of the amount bid, provided however, that in no case shall said check be required to be in excess of Five Thousand ($5000) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 17th day of August, 1926, at 9:45 A. M., in the Board Room, 211 second floor, of said City of Oakland, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, Calif.

On Friday, July 9, 1926, at 11:00 A. M.

NOTICE TO CONTRACTORS

(Nickerson School District)

Notice is hereby given that sealed proposals will be received by the Board of Trustees of the Nickerson School District, Tulare County, California, at the present school building **until eight o'clock P. M., Wednesday, August 18th, 1926,** for the erection of a brick addition to the present school building, in accordance with plans and specifications prepared by Swartz & Ryland, the authorized architects.

Certified check or bidder's bond for an amount of not less than ten (10%) per cent of the amount of the bid shall accompany each proposal, drawn to the order of H. W. Alford, Clerk of the School District, as a guarantee that the bidder will within five days after being notified of the award of the contract, enter into a contract with the said School District and furnish the necessary bonds as required by law for the faithful performance of said work, and in case the bidder to whom the contract has been awarded fails or refuses to enter into such an agreement, or to furnish said bonds, said check or bidders bond will be forfeited to the said School District in the manner provided by law.

Plans and specifications may be obtained from the office of the Architects, Room 624 Rowell Building, Fresno, Calif., or from the Clerk of the Board of Trustees.

The Board of Trustees expressly reserves the right to reject any and all bids and to waive any informality in any bid received.

By order of the Board of Trustees, Nickerson School District, Tulare County, California.

H. W. ALFORD, Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on August 30, 1926, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Shasta County, a reinforced concrete bridge across Dog Creek about 1 mile

south of Delta (11-Sha-3-C), consisting of one 234 foot open spandrel arch span and eight 24 foot girder approach spans.

Santa Barbara County, between Carpinteria and Summerland (V-S.B.-2-H-J), about four and five-tenths (4.5) miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: August 2, 1926.

NOTICE TO CONTRACTORS

(Firehouse—Hillsborough)

Sealed proposals will be received by the Board of Trustees of the Town of Hillsborough, San Mateo County, California, **until five o'clock P. M. of Tuesday, the 17th day of August, 1926,** for doing the following work, including the furnishing of the necessary labor and materials therefor, in the Town of Hildsborough, to wit: The construction of a municipal fire engine house, with living quarters, to be erected upon the parcel of land belonging to the Town of Hillsborough, situate on Dorchester Road near the point of intersection of lots 9 and 10 of Hillsboro Heights, as is more specifically described in the deed from California Pacific Title Insurance Company, a corporation, to the Town of Hillsborough, dated April 29th, 1926, and recorded May 22nd, 1926, in Vol. 227 of Official Records, page 421; all of which will more fully and particularly appear by reference to the specifications therefore adopted by the Board of Trustees of the Town of Hillsborough on July 20th, 1926, entitled, "Specifications for a Fire Engine House and Living Quarters to be Erected on Dorchester Road, for the Town of Hillsborough, California," and with the plans accompanying said specifications which said plans and specifications are on file with the undersigned Clerk, to which reference is hereby made for full details of the work to be done and materials to be furnished hereunder.

Said work must be done in strict accordance with the said plans and specifications filed in the office of the undersigned Clerk as aforesaid, and copies of which said plans and specifications are also on file with Howard & White, the architects for said work, at their office in the Lick Building, San Francisco, California.

All proposals must be made upon the forms which will be furnished gratuitously upon application to the Town Clerk, or to the architects, and must be filed with the said Town Clerk on or before Tuesday, August 17, 1926, at the hour of five o'clock P. M. of said day, and may be mailed to the undersigned Clerk, addressed Post Office Box 235, Burlingame, California, or to room 440, Hollbrook Bldg., San Francisco, or may be delivered personally to said Clerk during business hours of any business day at said room in said Holbrook Building, San Francisco, up to twelve o'clock M. of August 17, 1926, or to him personally at his office in the Hillsborough Town Hall up to five o'clock P. M., of August 17, 1926. All proposals must further be accompanied by a certified check on a solvent bank in the State of California, payable to the Town Clerk of Hillsborough, for an amount not less than ten (10) per cent of the aggregate of the proposal, as a guarantee that the bidder will, within ten (10) days after receiving the award, enter into a contract for said work according to said plans and specifications, and furnish the bonds required under said specifications, and that failing so to do the sum mentioned in said check shall be liquidated damages for such failure and neglect, and shall be forfeited to and paid into the treasury of the Town of Hillsborough.

All proposals will be opened by the said Board of Trustees in public session at five o'clock P. M. on Tuesday, August 17, 1926, at its council chamber in the Hillsborough Town Hall, Hillsborough, California, same being the usual place of meeting of said board.

The Board of Trustees reserve the right to reject any and all bids.

By order of the Board of Trustees of the Town of Hillsborough.
(Seal)

JOHN A. HOEY,
Clerk of the Town of Hillsborough and ex-officio Clerk of the Board of Trustees thereof.

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned **at 3:30 P. M., on August 18, 1926,** for constructing a portion of the state highway system in Nye County, between 8 Miles North of Tonopah and 30 Miles South of Manhattan, length 9.21 miles, work consisting of grading, construction of structures and placing of gravel surface.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office at Tonopah; the division offices at Elko, Reno, Ely and Las Vegas. For copy of each set of plans, undersigned requires a deposit of Fifteen Dollars ($15.00), Ten Dollars ($10.00) of which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.
(August 4-6-7-9-11-13)

NOTICE TO CONTRACTORS

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specificatione may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

Permanent Walls

with Quick Construction

THERE'S more to Schumacher Plaster Wall Board than speed in construction. It's designed to build permanent walls.

That's the big advantage to this plaster wall board. You can use it for the finest interiors, yet you can build them in record time.

You'll save on labor. You'll save time. And you'll win the appreciation of the owner, for he can move in as soon as the last nail is driven in place.

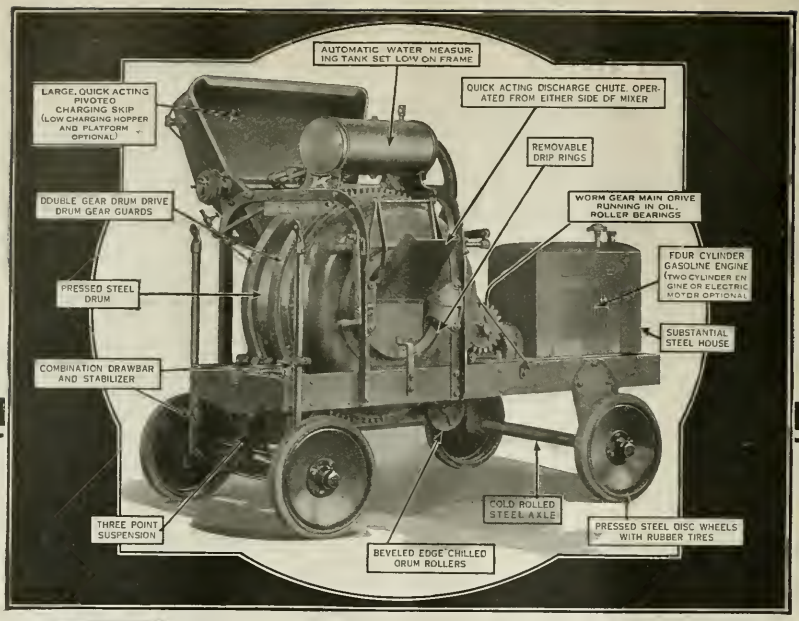
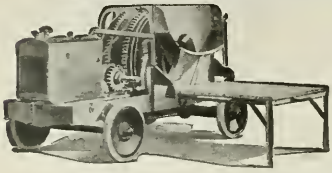
Schumacher Plaster Wall Board

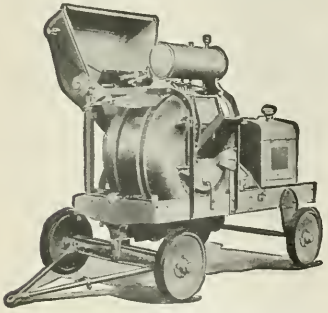
T5



AUTOMATIC WATER MEASURING TANK SET LOW ON FRAME
QUICK ACTING DISCHARGE CHUTE, OPERATED FROM EITHER SIDE OF MIXER
LARGE, QUICK ACTING PIVOTED CHARGING SKIP (LOW CHARGING HOPPER AND PLATFORM OPTIONAL)
REMOVABLE DRIP RINGS
DOUBLE GEAR DRUM DRIVE DRUM GEAR GUARDS
WORM GEAR MAIN DRIVE RUNNING IN OIL, ROLLER BEARINGS
FOUR CYLINDER GASOLINE ENGINE (TWO CYLINDER ENGINE OR ELECTRIC MOTOR OPTIONAL)
PRESSED STEEL DRUM
SUBSTANTIAL STEEL HOUSE
COMBINATION DRAWBAR AND STABILIZER
COLD ROLLED STEEL AXLE
THREE POINT SUSPENSION
PRESSED STEEL DISC WHEELS WITH RUBBER TIRES
BEVELED EDGE CHILLED DRUM ROLLERS



Low charging platform, steel frame of which is hinged to mixer, and can be folded up against mixer-frame for hauling from job to job! Wide, capacious charging hopper makes charging easy.



Charging Skip goes to high angle charging position — shoots materials into drum without pounding skip! Note low automatic water measuring tank and Disc Wheels! Liberal drum dimensions!

HIGH speed operation — balanced light weight for fast hauling, and strong sturdy construction for long hard service —that's the Koehring Dandie!

Fast charging and fast discharging, the Dandie is a big money earner!

KOEHRING 7-S DANDIE Mixer

is the outstanding value in the light mixer field. Its design includes: 4 cylinder radiator-cooled engine or hopper-cooled two cylinder engine; completely enclosed transmission in dust tight oil bath with shaft on roller bearings; double drum gear drive; drum rollers fixed to shaft turning in big bearings insuring even bearing wear, and perfect lubrication!

7-S Dandie Mixer

Two or four cylinder engine. Charging skip or low charging hopper and platform. Automatic water measuring tank. Rubber tired steel disc wheels, or steel wheels. Complies with A. G. C. Standards.

Send back this coupon

learn the construction of the Dandie, and you will recognize a remarkable value, and big profit earner on the job.

ASPHALT INTERESTS TO MEET IN WASHINGTON

What promises to be the largest and most important gathering of municipal officials and asphalt contractors, producers, engineers and chemists of the United States and Canada that has ever been held is scheduled for Washington, D. C., November 8 to 12 next, under the joint auspices of the American Society for Municipal Improvements, The Asphalt Association and the Association of Asphalt Technologists. Both separate and joint sessions will be held at various times during the week, the object being to discuss for mutual benefit a program of municipal improvements, particularly in the matter of street and highway construction, that eventually will make North American cities the most up-to-date in the world. All kinds of municipal problems will be considered but emphasis will be laid on street planning, design, specifications, types of paving and methods of construction, location, contract lettings, excavating, opening and replacing pavements, street lighting, street and paving plant inspection, paving plant operation, paving methods between car tracks, street cleaning, snow removal and traffic regulation. Representatives of The Asphalt Association attending the Fifth Annual Asphalt Paving Conference to be held at the same time and place, together with representatives of the American Society for Municipal Improvements , will have places on the program of the joint sessions, as well as the sesions that will be held separately. All of the sessions, joint and separate, will be held at the Mayflower Hotel.

OPTIMISTIC BUSINESS SENTIMENT PREVAILS

"The third quarter of 1926 begins with business sentiment so bouyant that it almost verges on rampant optimism," says Col. Leonard P. Ayres, vice President, The Cleveland Trust Company.

"Forward ordering is being substituted for hand-to-hand buying," according to Col. Ayres. "Stock prices are advancing on their way to make a double-topped bull market. It is probable that the volume of industrial output in 1926 will exceed that of any previous twelve months' period, and that the industrial profits will be the greatest of any peace-time year. Employment is general; wages are high; credit conditions are easy; the consuming power of the country is enormous; and the agricultural outlook is better than fair.

"Business now is good, and very good, and it will probably continue high in activity and output until it becomes involved in serious overproduction, over-construction, and over-expansion of industrial equipment. All this could happen within the space of a few months. The developments of this quarter should indicate whether or not such a prospect is shortly ahead of us."

CANADA BUILDING CONSTRUCTION SURPASSES EXPECTATIONS

Record-breaking building activities throughout Canada marked the beginning of the current half year period, according to reports made public recently by the Dominion bureau of statitistics of the department of trade and commerce. Building permits issued in the 63 principal cities were $78,620,362, an increase of 19 per cent over the same period a year ago. This is in contrast with a small loss in building permits issued in the principal cities of the United States for the same period as shown by the national monthly building survey of S. W. Straus & Co.

The same Canadian cities showed an increase of 25 per cent in building permits issued in June compared with the same month last year. The June gain in the United States as revealed by the Straus figures was 7½%, thus indicating a much greater relative degree of building in Canada than in this country.

Montreal, with $12,682,239 in permits issued, gained $1,300,000 and led all Canadian cities for the half year. Toronto, with $11,945,913 was second but lost $1,000,000. The most spectacular increase was in Winnipeg, which jumped from $2,412,940 to $8,069,600, an increase of 234 per cent. Vancouver, the fourth building city had $7,756,825 compared with $4,899,543 a year ago.

U. OF C. BLUEPRINT READING COURSE ANNOUNCED

An advanced course in blueprint reading and estimating will be conducted by Walter J. Huston of the University of California extension division. This course emphasizes the reading of blueprints as applied to building, cabinet making, shipyard work, pattern making, carpentry, and other branches of the building trades, and is open to all those who have completed the elementary course in blueprint reading or its equivalent to the satisfaction of the instructor.

The first meeting of the class will take place Thursday, August 26, 7 o'clock, at 10 McClymonds High School, Oakland.

Other courses in the engineering and industrial field which will be conducted by the extension division are as follows: "Elementary Blueprint Reading," beginning Wednesday, August 25, 7 o'clock, 12 McClymonds High School, Oakland, Grover C. Polson, instructor.

"Diesel Engines," beginning Friday, September 17, 7:30 o'clock, 303 Extension Center, 1512 Franklin St., Oakland, Carl G. A. Rosen, instructor.

"Fundamentals of Electricity," beginning Thursday, September 16, 7:30 o'clock, 315 City Hall, Oakland, R. Roy Cowles, instructor.

EXTERIOR PLASTER THICKNESS INCREASED IN OAKLAND

Chas. J. Heinemann, plastering inspector of Oakland, has issued the following statement regarding the thickness of exterior plastering and particularly the inspection:

"It will be necessary hereafter to have ¾ inch base coat before the city building inspectors will pass the jobs or sign cards as accepted. In the past the inspector generally accepted ¾ inch full thickness for texture finish and ⅞ inch for dash finish, but in many cases the texture job was never finished as intended and the result was that the stucco was dashed and the required thickness was shy and not up to the standard requirements prescribed by the City of Oakland law. Hereafter all exterior stucco jobs will require ⅞ inch stucco on before an O. K. can be given. This law applies to dash or texture."

FIRE SALVAGE

How much of the estimated national fire loss of $570,000,000 for 1925 is due to fire and how much is due to water is a question raised in the latest fire prevention bulletin of the National Fire Waste Council issued through the Insurance Department of the Chamber of Commerce of the United States.

No one knows what the water loss is but the Council concludes that it is considerable. For this reason it directs attention to possibility of reducing it by organized salvage.

Fire chiefs in a number of cities are now directing their efforts not only to extinguishing fires but to protecting property from water damages. The city of Los Angeles, for example, has organized two salvage companies as a part of the fire department. The fire chief reports that on two different occasions the salvage companies affected a saving in water damage of approximately more than $100,000. Other cities are equipping their fire departments with salvage covers which are used to protect merchandise, furniture and various other articles.

"An opportunity," the bulletin suggests, "exists for the extension of fire department activities in a direction not now being followed. The indications are that any fire department making a determined and well-organized effort to salvage property from water damage will reap a benefit in reduced fire loss."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

New York "Times" says: Lower building contract awards apparently are reflected in declines in prices of building materials, indicating the beginning of sharper price competition in that direction.

Owing to an increased demand for upper and select sugar pine and finished mill products, the California Door Company has built an additional planing mill and installed the latest type of planers and lumber finishing machines at Dimond Springs, El Dorado county.

A three-day conference by inspectors of the California White and Sugar Pine Manufacturers Association was held recently at Merced Falls, Merced county. Inspectors present were: V. E. Johnston, chief inspector; A. E. Johnson, J. M. Johnson, Tom Sandae, Charles Oliver, Irvin Dunn, Horace Sims, W. P. Wink.

Frank J. Gieseke, Sacramento building contractor, died in that city, Aug. 9. He had been ill for several months and heart disease is believed to have caused his death. Gieseke came to Sacramento in 1889 from Kansas. He had been contracting building work for more than a score of years.

The Master Builders' Association of Kansas reports that an average of over five surveys a week have been made in the quantity survey bureau, maintained by the organization, since the middle of May. The bureau was started last year and has proven to be a valuable service to the members of the aggressive Kansas organization.

In an address before the Rotary International Convention held recently in Denver, William Green, President of the American Federation of Labor, said in effect that his organization hereafter would not sponsor "general strikes" involving the violation of wage agreements, because the "real issues" of the original strike become wholly lost to sight in the larger disturbances.

Speaking from a wheel chair, Captain Otto C. Dowling, commandant of the Lake Denmark Naval Arsenal, testified before the Navy's Court of Inquiry, and among several recommendations as to capacity regarding future erections strongly recommended that these buildings should be built above the surface on concrete foundations with walls of hollow tile, buttressed to withstand shock.

A diminishing shortage of buildings, with an increasing number of cities reporting overbuilding, stabilized residential rents in all except the largest and smallest cities, and fluctuation in the rentals of business property, with widely scattered centers of real estate activity, characterize the present real estate market as it is analyzed in the semi-annual survey pust completed by the National Association of Real Estate Boards from data supplied by real-estate boards in 181 cities.

Organized labor has initiated a national home-ownership program for workers, which will be carried out by the American Home Builders, Inc., of Cleveland. The new organization, with a capitalization of $1,000,000, is headed by W. G. Lee, President of the Brotherhood of Railroad Trainmen, and the program will be directed by Dr. Walter F. McCaleb, founder of the labor banking movement.

Final draft of the proposed ordinance regulating plastering in the city of Los Angeles will be submitted to the Building and Safety Commission tomorrow. The ordinance was prepared by Charles Morris, research engineer of the commission. At a recent hearing many changes were suggested by representatives of the construction industry and the final draft will be in the nature of a revision in accordance with such changes as were favored by the commission. No licensing feature is embodied in the ordinance. It is understood, however, the plastering contractors contemplate submitting a separate ordinance later which will provide for licensing.

The valuation of building permits issued in the United States during the first half of this year exceeds that of the same period last year by ten per cent. Ordinarily the valuation of permits during the last half of the year falls from ten to fifteen per cent under the valuation of the first half. Last year was an exception to this rule and consequently 1925 piled up the biggest total on record. Whether the last six months of 1927 will follow the precedent established last year or show the customary falling off cannot be determined at this time. There is not as much work in prospect at this time as there was on this date last year. However, the industry could experience a sharp decline and still show a total volume of business on a par with 1925.

The National Lumber Manufacturers' Association plans an expenditure of $1,000,000 a year for a period of five years for advertising purposes and research work. At a recent meeting in Tacoma, Wash., attended by representatives of the National Lumber Manufacturers' Association and the West Coast Lumbermen's Association $225,000 a year was pledged for such purposes. The West Coast Lumbermen's Association now has in operation a trade extension campaign calling for the expenditure of $300,000 annually for three years. George S. Long of Tacoma, general manager of the Weyerhaeuser Timber Company, and R. A. Long, founder of the Long-Bell Lumber Company of Longview, Wash., led in subscriptions for the big campaign, which amounted in each case to $100,000 per annum. While these two giants of the lumber industry of the nation have the same name, they are no kin.

Cowell-Portland Cement Company, having complained to the Railroad Commission that rates collected by Bay Point and Clayton Railroad Company, The Atchison, Topeka and Santa Fe Railway Company, Central California Traction Company and The Western Pacific Railroad Company were unreasonable to the extent that they exceeded 19½ cents per 100 lbs. for the movement from Cowell to Las Plumas, the Railroad Commission found that the 19½ cent rate should apply on shipments during the period November 28, 1923 to March 12, 1924, and ordered defendant carriers to refund all charges in excess of that amount.

The Architects' League of Hollywood at its last meeting adopted a constitution and by-laws and is preparing to organize its work on a permanent bass. Four classes of membership are provided as follows: Regular members—certified architects or engineers recognized by the city building department; associate members—building designers and architectural and engineering draftsmen; affiliated members—decorators, artists, sculptors or others interested in architecture, allied arts and crafts; honorary members—persons prominent in the practice of architecture and its allied arts. The policy of the League will be determined by a board of directors consisting of five members. The initiation fee was fixed at $10 and dues at $6 a year.

TRADE NOTES

Magalia Lumber Company's "Optimo" mill and logging camp, northeast of Chico, was wiped out by fire, Aug. 8, with a loss estimated at $100,000.

Enwood Sand & Gravel Company at Roseville plans to double the capacity of its plant, by the erection of a duplicate plant about one mile east of the plant now in operation which involved an expenditure of approximately $100,000.

J. C. Peters, representing the United States Forest Service at Washington, arrived in Sacramento Aug. 9. with the announcement that he will commence a tour of the forest areas of California to investigate the manner in which the $300,000 Federal appropriation for forest conservation outside of the National forests is being expended.

The government again strikes to break up an alleged trust. A suit charging a conspiracy to violate the anti-trust laws, fix prices and eliminate competition was filed in the federal district court in Richmond, Va., against the Southern Hardware Jobbers' Association, 132 corporations, seven firms and 31 individuals. The individuals are scattered in 14 southern states.

Suit to foreclose a $950,000 mortgage has been filed against the Hutchinson Lumber Company of Oroville by the Capital City Bank of Charleston, W. Va. The action asks that the bank be placed in immediate management and that a receiver be appointed to handle the affairs of the lumber firm until such time as the sale of the business is authorized by the court. The complaint sets forth that the foreclosure action followed a default in the payment of $100,000 under the terms of the mortgage. According to a statement given out by A. H. Land, vice president of the company, the matter is simply a stock and bond account between various types of security holders in the company. The litigation will not affect the operation of the plant. No shutdown of the plant is anticipated.

ALONG THE LINE

Building in progress in Richmond taxes the Richmond Builders' Exchange to furnish skilled and unskilled laborers, L. C. Dexter, executive secretary, reports. There is a steady demand for building mechanics and common labor, Dexter said, in making a request for all men out of work to register with him.

All contractors in the State of Washington who bid upon public work will be invited to attend a convention of the Public Works Contractors Association of Washington at Vancouver, B. C., in October, according to an announcement made by Lee H. Johnson, Tacoma, president of the organization. Problems facing the public works contractors will be brought before the conclave in an effort to smooth the road of the men who are constructing public projects.

A meeting of the Santa Clara County Electrical Dealers' Association was held at the Hotel Vendome, San Jose, August 5. The program consisted of songs by Ida Kopp, Louise Cook and Ed. Kauman, who were accompanied on the piano by Margy Perrin of Ogden, Utah. Clyde Chamerlain was the speaker of the evening and addressed the gathering upon various lines of business principles and ethics. Chester Hershey presided over the meeting.

Construction of the new Los Angeles City Hall, planned for twenty-eight stories, or 250 feet higher than the building limit named in the city's charter, is not in violation of the charter provision and work may proceed immediately, according to a decision reached by the State Supreme Court. The decision was in the form of a writ of mandate granted to the C. J. Kubach Company forcing the Los Angeles Board of Works to sign a contract for the construction of the new hall. The Supreme Court ruled that the charter provision limiting the height of buildings in Los Angeles did not "specifically" refer to public structures, and that under a special provision voted by the people the City Hall could be built at the excess height.

Members of the executive committee of the All-Western Road Show will meet next Thursday evening for dinner at the Palace Hotel, San Francisco, to report on preparations for the exposition of highway equipment and conventions of road officials, experts and engineers. The All-Western Road Show and the conventions of road officials to be held in conjunction with it will be held in San Francisco, October 7 to 15, occupying 1,000,000 square feet of space on the Marina. Tracy W. Harron will preside at the committee meeting.

Financing Costs Are Not Excessive On Honest Projects

(By F. T. H. Bacon, Consulting Building Engineer, New York)

In the honestly conceived and planned commercial real estate venture the financial costs are seldom out of line. The borrower usually has three avenues open to him when he seeks a loan.

In the first place, he may go to what are usually known as the "old-line" financing agencies. In New York as a general rule these are the larger insurance companies. The cost of obtaining a loan from such sources averages 2 per cent, which goes to cover such expenditures as the mortgage recording tax, the attorneys' fees, the engineers' check on the advisability of the loan and perhaps a supervising architect's fee, if the loan is granted. This, of course, assumes that no broker's commission figures in; if it does, another 1 per cent. needs be added. The "old-line" companies will not loan more than about 60 per cent of the whole value of the completed land and building.

In the second place, the would-be borrower may go to what may be termed the intermediate type of bond house. Here he may get a larger amount of cash and more liberal terms. And, of course, he pays for it in a larger disbursement—3 to 4 per cent.

In the third place, he may go to the bond house, properly so called, one whose business is wholly identified with the placing of loans and marketing bonds. Here the loan will probably be still larger and the cost still higher—7 to 9 per cent, which, when you add the year's interest always deducted in advance, brings the cost of the first years' financing close to 15 per cent.

Now you ask if this is responsible for the high building costs. I do not think it is. The financing charge is not too much, not in those instances outlined. The fact is that the third type of lender has really made it possible to distribute very widely the owner of real estate securities and thus to collect the capital which made all our great buildings possible. His charges to the borrower are naturally higher, because his services are greater; he lends more cash and his distribution expense is considerable, because of his bond-selling organization.

There are instances of buildings where the financing costs are excessive, but they do not come within the realm of what I said at the beginning—the realm of honestly conceived and planned commercial ventures. Every one in the real estate field knows of buildings where the loan has been 100 per cent and even more of the total cost. Of course, these are not honest and only by good luck will they turn out right.

The safe guide the public has in buying real estate bonds is in the reputation of the house which issues them.

Lumber Manufacturers Object To Term "Fireproof" Buildings

(Special Correspondence from National Lumber Manufacturers' Association)

Although about eighty-five per cent of all the buildings in the United States are of frame construction, and a large part of the rest are about forty-five per cent lumber, the public whose savings are invested in buildings of this sort has docilely accepted a widespread notion that other forms of construction have the advantage of being "fireproof". According to the magazine "Fire Engineering", which publishes an article reviewing the recent disastrous fires in "fireproof" office buildings in New York City, the term "fireproof" is most unfortunate. It discusses the subject editorially as follows:

"Fireproof" Buildings Not Fireproof

An important truth is constantly being emphasized by the experience at fires occurring in so-called "fireproof" buildings, which are not what their name implies. In other words that, while they will not burn down, they will burn out.

This fact has been demonstrated in several more or less recent occurrences, in some instances in fires arising from outside exposure, as in the notable case of the Burlington Building in Chicago, a few years ago and in later ones; and again from the contents, inflammable in their nature, becoming ignited and the fire spreading through ventilating shafts and other openings to other floors, where more burnable material is stored.

No matter how fire resistant the structure itself may be, it is only as fireproof as its contents. If the contents are inflammable, there is just as likely to be a hot and severe fire in the "fireproof" building as in that of less resistant construction. And sometimes such a fire is even harder to control, owing to the fact that the building is higher and less accessible to the fire department in the upper floors, than a non-fireproof structure would be.

The term "fireproof", as applied to buildings, is very deceiving, and its use should be discouraged, as it naturally gives to those not well informed in the matter, a false sense of security which is dangerous in the extreme.

A much more sensible and certainly truer term is that of "fire resistant", which tells the story of the modern building, and emphasizes its advantages without exaggeration.

"Fire Engineering" calls attention to the fact that the New York underwriters' representative in commenting on one of the New York "fireproof" fires points out that the use of the word "fireproof" gives "a false sense of security". The Committee explains that where buildings are of fire resistive construction they can and do burn out. "A building may be able to resist fire with safety to itself, but when it contains combustible contents the damage is likely to be severe".

The underwriters conclude that automatic sprinklers ought to be installed in "fireproof" office buildings, as well as other buildings. In this connection, construction engineers have pointed out buildings of heavy timber (mill) construction having automatic sprinklers are equal in practical fire resistance to those of masonry construction. A large degree of fire resistance can be easily built into any edifice, but even a building that does not burn down is not necessarily fireproof as to contents or even to the integrity of its own structure.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

Building Contractors Of San Jose Aim To Keep Money At Home

That millions are being spent in the building industry outside San Jose, which should properly be spent in that city, was the assertion of Frank B. Marriott, secretary of the Building Contractors' Association, in an address before an association smoker held in the organization's headquarters at 63 West Santa Clara St. last Wednesday evening.

Secretary Marriott read a list indicating that of the millions spent in local construction hardly a cent has reverted to the building industry of San Jose. The secretary urged that the Merchants' Association, Farmers' Union and all service clubs, acting in conjunction with the city council and other public organizations, resist with all their power what he declared was a veritable invasion of the labor field. He advocated securing passage of restrictions placing San Jose in a position similar to other cities, where it is impossible for outsiders to "poach" on others' preserves and carry off the wealth of the community.

In conclusion he outlined a plan for securing such legislation. The meeting pledged unanimous support of the project.

According to Marriott, the following list is of construction projects handled by local architects, contractors and labor:

	Cost
P. G. and E.	$125,000
Catholic Women's Center	101,000
Commercial Building	321,000
Pala School	30,000
Gilroy Gymnasium	100,000
Willow Glen School	90,000
Los Gatos Grammar School	110,000
V. Benson Theatre	100,000
Hester Grammar School	22,000
Gilroy Junior and High Schools	160,000
Saratoga Grammar School	68,000
Total	$1,202,000

Following is the list of buildings recently erected on which Marriott declares local architects and contractors were not privileged to figure:

IS "LOSS"

	Cost	Architect's Fee	Labor
West Coast Theatre	$ 500,000	$21,000	$210,000
Porter Building—Alterations	25,000	1,500	15,000
Auzerais Building—Alterations	20,000	1,200	12,000
Woolworth Store	52,000	3,120	31,200
W. J. Bernhardt	60,000	3,600	36,000
W. L. Prussia	60,000	3,600	36,000
St. Claire Building	350,000	21,000	210,000
St. Claire Hotel	500,000	30,000	300,000
Conservative loss	$1,576,000	$85,020	$850,200

The following list is of construction jobs on which local architects were not consulted but which were built or are being built by local contractors or local help:

PARTIAL "LOSS"

	Cost	Architect's Fee
Trinkler-Dohrmann	$ 87,500	$ 5,250
St. Patrick's Church	82,000	4,920
K. of C. Building	173,000	10,380
Presbyterian Church	55,000	3,300
J. P. Kocher Sons	30,000	1,800
Sperry Flour Co.	125,000	7,500
Hart's Store	100,000	6,000
Mercantile Trust	82,000	4,900
Home of Benevolence	125,000	7,500
Roosevelt Junior High	204,000	12,240
Woodrow Wilson Junior High	335,000	20,100
Bank of Italy	750,000	45,000
Pacific Tel. & Tel.	144,000	8,640
Guaranty Building and Loan	60,000	3,600
	$2,352,000	$141,150

Fresno School Program Hinges On Agreement Of Contractors And Unions

Start in the construction of new school buildings and alterations planned under the $1,800,000 bond issue will be recommended at the next meeting of the Fresno City Board of Education, August 12th, provided an agreement has been signed between the Fresno County Building Trades Council and the Fresno Builders' Exchange, which will be sufficiently guaranteed to insure that the terms will be carried out.

This was announced by City Superintendent W. J. Cooper, who said that he did not believe a suspension of the building program should be used by one side of the labor controversy to hurt the other side.

The signing of such an agreement by the Builders' Exchange would be considered binding only if the Exchange is representative of those contractors who usually bid on school contracts, Cooper said.

"My policy is such that I would have all building operations deferred if there were danger of industrial strife on the lines of the labor war in San Francisco, because the demonstrations which take place are detrimental to the teachings of American citizenship," he said.

Cooper said that a letter from the Building Trades Council which assures the board that the committee from the organization is ready to renew the old agreement with the Builders' Exchange, would be acknowledged at the next meeting of the board.

Cooper said that the demand for higher wages made by the brick masons, who have servered connections with the Fresno Building Trades Council, would not effect his determination to go ahead with construction in the event the building trades council and the Builders' Exchange patch up their differences.

"CONCRETE MASONRY" IS TITLE OF NEW BOOKLET

The Portland Cement Association has issued a booklet entitled "Concrete Masonry Construction" that contains valuable information concerning the use of concrete buildings units. The adaptability of this class of material for nearly all types of construction is clearly shown and explained with the use of photographs and line drawings.

The first chapter, devoted to the characteristics of concrete masonry shows, as its title implies, the manner in which concrete masonry units are made. The various weights, sizes, and the uses of each type are described. A chapter on construction gives the best practice together with tables of strength for use of builders. Possibilities of attaining beauty combined with structural soundness are shown by photographs of actual jobs. Much information for builders is contained in this chapter such as making basement walls watertight; setting of doors and window frames; protection during construction; attachment of sills and plates and numerous other hints that would aid builders using this unit.

The booklet also contains 20 pages of drawings giving details of construction where the use of concrete masonry units are possible. Other valuable items contained in the booklet are the American Concrete Institute's standard specifications for concrete building block and tile; specifications for the application of portland cement stucco on concrete block walls; a building ordinance for concrete block and tile; also a table of weights and sizes of masonry units and methods of calculating of wall and column footings.

Asserting that "congested conditions in downtown buildings will aggravate traffic congestion," Chester Hunt, engineer for the Oakland City Planning Commission, announces that a campaign has been started for an ordinance regulating the maximum heights of downtown buildings.

Sacramento Box Factory at Sacramento suffers $350,000 fire loss, Aug. 9. More than 2,000,000 ft. of lumber was destroyed in the blaze.

Employers Who Reduce Wages Injure Business And Worker's Output

Herewith is an article by Wm. R. Basset, chairman of Board of Miller, Franklin, Basset and Co., prominent industrial engineers and accountants of New York, which is reproduced through the courtesy of "Advertising and Selling". This article, in which Mr. Basset's timely discussion of the problem of relationship between capital and labor has attracted wide interest in industrial circles, because of the frank manner in which the writer has dealt with this important subject.—Editor.

When an unskilled employer finds it "necessary" to reduce wages, it is customary to accompany the announcement of his incompetency with an insult to the intelligence of his workers in the form of a sermon on the text that "the interests of Labor and Capital are identical."

Fundamentally he is right. But his workers know that in the immediate case there is about the same community of interests as exists between the bull fighter and the bull.

Such sermons stress the theme that the workers can prosper only as the business prospers. The business, it is pointed out, can prosper only if it is allowed to reduce wages. Therefore the lower the wages, the greater the prosperity of the workers!

That is the usual point of view en the relationship between Capital and Labor. But occasionally you will find a business man who sees that if there is actually anything to this community of interests theory, it works both ways —that only as the workers prosper can business prosper.

High Wages Aid Prosperity

Unfortunately few on either side really believe in the soundness of economic truth that their interests are identical. No matter what is preached they both believe that their interests are antagonistic. The employer wants as much work as he can get for as low wages as possible. The aim of the workers is naturally just the reverse. In recent years the workers have had somewhat the better of the contest. They have made gains, and in many instances have held them. That is the chief reason for the sustained prosperity of the United States. Our large expenditures for wages provide purchasing power which stimulates the production of our factories.

Many hard-headed business men who once fought wage advances have been able to reduce costs in the face of advancing wages because they were intelligent as well as hard-headed. Instead of failing, their businesses are now more profitable than ever before. A dawning of commonsense on the Labor question together with a growing grasp on certain simple economic truths is gradually illuminating all but the most benightedly conservative of our industries. Some day even those who sermonize on Capital and Labor's identity of interest may believe their own sermons.

I have found that the man with the ability to make high wages is always the man who produces at the lowest cost. It does not follow that merely to pay a man more than he is worth will automatically make him worth what he gets. The incompetent and the lazy should be fired if they resist efforts to teach and stimulate them. The man who will not exert himself to hold a well-paid pob is a mental defeetive who has no place in industry.

About the surest way to get inefficient service from the workmen is to cut wages in the attempt to lower costs. On the other hand, to demand and secure production commensurate with high wages is equally certain to result in lowered costs.

Sweeping wage cuts never brought permanent good to anyone. First, they invariably bring lower labor efficiency. Through resentment the workers at once restrict production. Many times have I seen Labor costs rise in answer to a cut in wages. Secondly, lower wags have an immediate effect on the prosperity of all industry.

Wage Cuts Hurt Business

In industrial towns, such as the shoe-making or textile communities, this is strikingly shown. Within a week after a wage cut the merchants feel the falling off in purchasing power. Salesmen who sell to these merchants send home reports of poor trade instead of orders. Faetories a thousand miles away making breakfast food or hats, or soap, notice the falling off in trade and, if the wage cuts are widespread, either cut wages themselves or go on part time. Their workers are then unable to buy as many shoes or calico dresses as before, and the mills which first cut wages are worse off than before. The end may be a general business depression affecting all industries. All depressions are precipitated by a falling off in buying power caused either by wage reductions or by the failure of wages to keep pace with increased prices.

This is all very elementary. The trouble is that too few business men are able or inclined to think the matter through. It takes men of vision and high intelligence to realize that such a complicated relationship between wages and sales, inextricably entangled and interwoven across three thousand miles on continent, can have any real effect on their own business. But any wage cut or increase does have a greater or less effect upon every other business, and in a surprisingly short time.

Prosperous Industries
